Title: FEMALE DISORDERS, PMS PMT
PREMENSTRUAL STRESS OR TENSION

Part of the Following:
Large Scale Study of the Safety and Efficacy
of the SCIO Device

Developed By:
The Centro Ricerche of Prof. William Nelson University of Venice + Padova, Italy

This study was performed in the field by practicing Biofeedback technicians. Data was collected and the study supervised by the Ethics International Institutional Review Board of Romania. The Data analysis and study presentation is done By the The Centro Ricerche, University of Venice + Padova, Italy

Abstract:

This study demonstrates the safety and effective qualities of the SCIO device used in a large scale study. A large scale study of over 97,000 patients with over 275,000 patient visits reported their diseases. Many of them reported this disease. And the results of their therapy is reported in this study.
Introduction:

Over View:

This large-scale research was designed to produce an extensive study of people with a wide variety of diseases to see who gets or feels better while using the SCIO for stress reduction and patient monitoring. The SCIO is an evoked potential Universal ElectroPhysiological Medical apparatus that gauges how an individual reacts to miscellaneous homeopathic substances. The device is registered in Europe, America, Canada, S. Africa, Australia, S. America, Mexico and elsewhere. The traditional software is fully registered. Some additional functions determined by the manufacturer to be worthy of evaluation. Thus a study was necessary to determine safety and efficacy. (As a result of these studies, these additional functions are now registered within the EC)

An European ethics committee was officially registered and governmental permission attained to do the insignificant risk study. Qualified registered and or licensed Biofeedback therapists were enlisted to perform the study. Therapists were enrolled from all over the world including N. America, Europe, Africa, Australia, Asia, and S. America. They were trained in the aspects of the study and how to attain informed consent and transmit the results to the ethics committee or IRB (Institutional Review Board).

2,569 therapists enlisted in the study. There were 98,760 patients. 69% had more than one visit. 43% had over two visits. There were over 275,000 patient visits recorded. The therapists were trained and supervised by medical staff. They were to perform the SCIO therapy and analysis. They were to report any medical suspected or confirmed diagnosis. Therapists personnel are not to diagnose outside of the realm of their scope of practice. Then the therapist is to inquire on any reported changes during the meeting and on follow-ups any measured variations. It must be pointed out that Therapists were free to do any additional therapies they wish such as homeopathy, nutrition, exercise, etc. Therapists were told to not recommend synthetic drugs. Thus the evaluation was not reduced to just the device but to the total effect of seeing a SCIO therapist.

Part 1. The emphasis was on substantiating safety followed by efficacy of the SCIO.
Part 2. Proving the efficacy of the SCIO on diseases (emphasis on degenerative disease)
Part 3. Proving the efficacy of the SCIO on the avant garde therapies of Complementary Med
Part 4. QQC standardization
Methods and Materials:

SCIO Device:
The SCIO is an evoked potential Universal Electro-Physiological Medical device that measures how a person reacts to items. It is designed to measure reactions for allergy, homeopathy, nutrition, sarcoodes, nosodes, vitamins, minerals, enzymes and many more items. Biofeedback is used for pre-diagnostic work and or therapy.

The QXCI software will allow the unconscious of the patient to guide to repair electrical and vibrational aberrations in your body. For complete functional details and pictures, see appendix.

Subspace Software:
The QXCI software is designed for electro-physiological connection to the patient to allow reactivity testing and rectification of subtle abnormalities of the body electric. If a patient is not available a subspace or distance healing link has been designed for subspace therapeutics. Many reports of the success of the subspace have been reported and thus the effectiveness and the safety of the subspace link is part of this test. Many companies have tried to copy the subspace of Prof. Nelson and their counterfeit attempts have ended in failure.

SOC Index:
The SCIO interview opens with a behavioral medicine interview. This is called the SOC Index. Named after the work of Samuel Hahneman the father of homeopathy, he said that the body heals itself with it’s innate knowledge. But the patient can suppress or obstruct the healing process with some behavior. Hahneman said that the worst way to interfere with the healing natural process was allopathy or synthetic drugs. Theses upset the natural healing process by unnatural intervention and regulation disturbance. Other ways to Suppress or Obstruct the Cure are smoking, mercury amalgams, stress, lack of water, exercise and many others. This behavioral survey then gives an index of SOC.

The scores relate to the risk of Suppression and Obstruction to the natural Cure. The higher the scores the more the Suppression and or Obstruction. The scores of 100 or lower are ideal. A copy of the SOC index questions appear in the appendix.

Study Technicians:
The study technicians were educated and supervised by medical officers. The study technicians were to execute the SCIO therapy and analysis. All were trained to the standards of the International Medical University of Natural Education. Therapists from all over the world including N. America, Europe, Africa, Australia, Asia, S. America and elsewhere were enlisted to perform the study according to the Helsinki study ethics regulations.

They were to chronicle any medical suspected or confirmed diagnosis. Therapists personnel are not to diagnose outside of the realm of their scope of practice. Then the study technician is to inquire on any disclosed observations during the test and on follow-ups report any measured changes.

To test the device as subspace against the placebo effect, two of the 2,500+ therapists were given placebo SCIO devices that were totally outwardly the same but were not functional. These two blind therapists were then assigned 35 patients each (only 63 showed). This was to assess the double blind factor of
the placebo effect as compared to the device. Thus the studied groups were A. placebo group, B. subspace group, and C. attached harness group. Cross placebo group manipulation was used to further evaluate the effect.

**Important Questions** : these are the key questions of the study

1. Define Diseases or Patient Concerns
2. Percentage of Improvement in Symptoms
3. Percentage of Improvement in Feeling Better
4. Percentage of Improvement Measured
5. Percentage of Improvement in Stress Reduction
6. Percentage of Improvement in SOC Behavior
7. What Measured+How (relevant measures to the patient’s health situation)
8. If Patient worsened please describe in detail involving SOC_

After the patient visit is was complete the data was e-mailed to the Ethics Committee or IRB for storage and then analysis. This maneuver minimized the risk of data loss or tampering. Case studies were reported separately in the disease analysis.

**MEDICAL DETAILS**

Signs and symptoms vary greatly and may include any combination of the following. Avoid coffee and smoking. Most women experience some symptoms referable to the menstrual cycle; in many women the symptoms are significant but of short duration and are not disabling. Other women have one or more of a broad range of symptoms that temporarily disturb normal functioning. Symptoms last from a few hours to 10 to 12 or more days and usually cease with onset of menses; however, in perimenopausal women, symptoms may persist through and after menses. Type and intensity of symptoms vary in the general population and may also vary in individuals. With onset of menses, in many women PMS is replaced by dysmenorrhea. Significant dysmenorrhea is more common in the teens and tends to diminish as the woman matures. Conversely, PMS may begin in the twenties and increase with age. The most common complaints are mood alteration and psychological effects: irritability, nervousness, lack of control, agitation, anger, insomnia, difficulty in concentrating, transient weight gain, oliguria, and breast fullness and pain. Neurologic and vascular symptoms include headache, vertigo, syncope, paresthesias of extremities, easy bruising, and cardiac palpitation. Epilepsy may be aggravated. GI symptoms include bloating, constipation, nausea, vomiting, and changes in appetite. Pelvic heaviness or backache may occur. Skin problems of acne, neurodermatitis, and aggravation of other skin disorders may also occur. Respiratory problems (allergies and infection) and eye complaints (visual disturbance and conjunctivitis) may be worse premenstrually.

- Behavioral changes (mild to severe personality changes, nervousness, irritability, agitation, sleep disturbances, fatigue, lethargy, depression)
- Neurologic changes (headache, vertigo, syncope, paresthesia of the arms and legs, exacerbation of epilepsy)
- Respiratory disturbances (increased susceptibility to colds, exacerbation of allergic rhinitis and asthma)
- Gastrointestinal disturbances (abdominal bloating (most common), diarrhea or constipation, appetite changes, exacerbation of spastic colitis)
- Edema
- Temporary weight gain
- Palpitations
- Backache
- Exacerbation of skin problems
- Breast enlargement and tenderness
- Oliguria
- Easy bruising

Results:

Before we review the direct disease improvement profiles, we need to review the overall results. The first most basic of question in the results is the basic feedback of the generic patient conditions.

1. Percentage of Improvement in Symptoms
2. Percentage of Improvement in Feeling Better
3. Percentage of Improvement Measured
4. Percentage of Improvement in Stress Reduction
5. Percentage of Improvement in SOC Behavior

The SOC index gives us great insight to this study. Each disease has a different cut off where the ability of the SCIO to help was compromised. As a general index scores of 200 + where much less successful.

This groups significant SOC cut off was 140.

The Large scale study had over 98,000 patients and 275,000 patient visits we have direct evidence of the safety and efficacy. A placebo group was used for the large scale test to help validate the results.

This disease group total number of patients was 10,347

**Subspace Treatment 7,941 patients, 2,406 SCIO Harness Patients**

**OVERALL ASSESSMENT**

**A. Subspace Treatment 22,504 patient visits**

There were ---- cases of patients who reported a negative Improvement. None of these cases reported any major difficulty.

There were
29 cases reporting no improvement of Symptoms, .001 % of Subgroup
23 cases reporting no improvement in feeling better, .001% of Subgroup
21 cases reporting no improvement in stress reduction .001% of Subgroup
25%--- Percentage of Improvement in Symptoms
21%--- Percentage of Improvement in Feeling Better
31%--- Percentage of Improvement Measured
34%--- Percentage of Improvement in Stress Reduction
13%--- Percentage of Improvement in SOC Behavior

B. SCIO Harness Treatment 7,890 patient visits

There were ---- cases of patients who reported a negative Improvement. None of these cases reported any major difficulty. There were

7 cases reporting no improvement of Symptoms, .001 % of Subgroup
10 cases reporting no improvement in feeling better, .001 % of Subgroup
11 cases reporting no improvement in stress reduction .001% of Subgroup

47%--- Percentage of Improvement in Symptoms
51%--- Percentage of Improvement in Feeling Better
62%--- Percentage of Improvement Measured
64%-- Percentage of Improvement in Stress Reduction
45%----Percentage of Improvement in SOC Behavior

CASE STUDY REPORT CONDSATION:

“I have been using the EPFX device on myself, husband, and 4 children for about 6 months and have seen its benefits. My children are calmer. We all experienced less allergies this year than previously. My youngest son, underwent heart surgery at 11 months and has hardly slept through the night since (he is 5 now). I was told this happened to some patients, but his doctors did not know why. After running the EPFX device on him, even in subspace, he sleeps much better through the night, with his night terrors almost completely gone. My own health, was not the greatest and I had little energy and also had sleep problems, only partially related to those of my son. I am much more energetic these days and I sleep better most nights. I have also experienced far less pain during menstruation than I had previously. I am less stressed and have learned to relax much more readily. We are all very thankful that the EPFX has come into our lives.

Ontario. Canada”

“I had a client that was going to be scheduled for surgery to remove a cyst from her ovaries that was the size of a lemon and she also had carpal tunnel, diagnosed from her doctors. I worked on the stressors of the female hormones and ovaries and also the stressors in her arms and shoulders. She didn't even mention the arms, but I saw her braces and worked on them.
She told me her arms felt better before she left my office that day and her stomach pain went away. She came one more time and 1 month later she saw her doctor and they did an ultra sound and the cyst was down to the size of a dime. That was in 2004 and she has not returned and neither has the cyst.

Minneapolis, U.S.A.

“A 7 year old with medically pre-diagnosed rheumatoid arthritis came into my office in severe pain. She was unable to move without major discomfort, playing with any mobility, bike riding and running were out of the question. Even sitting was agonizing and she sat the majority of her time reclined. Using the EPFX to attempt to rebalance her stress she showed continual progression in her improvement. By looking at imbalances in minerals, vitamins, amino acids, and fatty acids her mother was able to make some lifestyle changes in the child's eating habits to help her balance those frequencies. After 8 visits the child's knees, which were equivalent to very large grapefruits in size, had reduced to normal dimensions and other inflamed areas and joints had also gone to a more normal size. She was now able to go out biking and playing with her siblings and school friends. The mother reported that the doctor did not know what was happening, but that he was ecstatic and as she quoted "whatever you are doing please keep doing it for her, it seems to be working."

Shortly after this time her aunt decided to purchase a device and the child's biofeedback care was turned over to her. I saw the children and their mother a month ago and she is looking healthy and is no longer in pain according to the mother. Another success story using biofeedback.

I am not an expert in the field of AIDS or HIV but I received a 56 year old male homosexual client in need of help. He was determined to use natural methods, supplements and stress reduction of massage and biofeedback to maintain his health and keep his HIV at bay. He decided to use the biofeedback therapy every other week and has done so for over a year. During this time it has been interesting watching his imbalances; when there are more he informs me he is under more stress at work, when the numbers are more balanced he informs me it's been a very relaxing period in his life. He has continued to amaze his physician and his counts continue to improve. Under one very stressful period his counts decreased and he added homeopathics which were to help with balancing his thymus and came in for his normally scheduled visit. He rebalanced to the doctors amazement and has remained stable and happy over the past two years. He now makes an appointment when he feels highly stressed and is only on a maintenance visit as he calls it.

A 39 year old woman who is having a stressed second marriage, and has been in three
long term relationships is unhappy because she cannot get pregnant. Her current husband does not wish for more children as his two are teens and this is causing more stress according to my client. She does not understand why she cannot get pregnant and neither can her medical doctors so she has decided to try biofeedback. I worked on her for several visits and she reported that she was feeling much less anxiety in her life. Using this technique of biofeedback and realizing that her hidden emotions were causing her more stress she agreed to talk more to her husband about their issues. She reported back to me on her 7th visit that she was expecting a baby. Our appointments were terminated at that time until after pregnancy and I am happy to report that she delivered a healthy, happy and wonderful baby boy just after to her 40th birthday. She then scheduled her "a tune up" after that when she felt overly stressed.

A 46 year old woman with diagnosed Fibromyalga was helped into my office. She was taking 7 prescribed medications and felt that they were no longer helping her and that she was getting worse and worse. Her decision was to try more alternative help and try and de-stress her life. We began her appointments. Over the next year of monthly visits she and her doctor reduced her medications down to only one, and her Fibromyalga rarely flared any longer...unless she became overly stressed. She latter purchased her own EPFX for her families private use, although I do still see her as a client about every six months, when she says it's "her turn to get pampered".

A 35 year old woman with five children came to my office. She was always tired, had constant headaches, heart palpitations and anxiety attacks, and was under a doctors care. The doctor could find nothing wrong with her. Her family had grown up Amish and had convinced her to seek outside help for her problems other than her medical doctors. She came to my office once a week for a month and then monthly for the next six months. While she was doing biofeedback for stress reduction she realized that she had the energy for her children, was able to function as she should and had very few anxiety attacks. She has since purchased a biofeedback device to try and help herself and her family remain healthy.

A 69 year old woman with major stress started seeing me for stress. She was working two jobs and had divorced and felt a failure, yet she could not keep from being in contact with her ex-husband. She stated she felt unloved and that everyone abused and used her and she was tired of being depressed. We began Biofeedback sessions, she chose to come in on a weekly basis even though the sessions appeared to be helping longer than that. It did not take me long to discover that the biofeedback was only part of her help. What she needed the most was simply a shoulder to lean on and someone to talk to. It is sad when someone has to pay for a friend that they feel has nothing to gain from them talking to them. She stated that her "friends" always had an ulterior motive for seeing her and talking to her. She started de-stressing enough that she began dreaming at night of past issues and traumas of her childhood and realized that this is one of the
reasons she was feeling so depressed and admitted that she had been feeling suicidal. But, that with the help we had gotten from Biofeedback she no longer had the wish to die. I suggested that in order to speed up her past traumas she seek professional help and gave her the name of a psychologist who could help with past life trauma as well as trauma regression. She started to see this professional and continued to come to the office for a monthly appointment. This continued for two years. She remained health and felt fine and has gradually decreased her appointments. When I began traveling more and at the office less I referred her to a different biofeedback technician.

A 56 year old male who had served in the Golf War made an appointment at my office. He had been exposed to Agent Orange and had returned injured and with Paranoid schizophrenic he was currently under the care of the VA Hospital. At that time he could not go out during the day without help and medication for fear of someone hurting him. The voices in his head were telling him to kill himself and that other were after him. After six weekly his trust to me and willingness to talk had increased, he had informed me the voices had reduced but he was still having much of the same symptoms as before. At this time he informed me that he had a metal plate in his skull from his war injury, so we changed the placement of his electrodes within the next three visits he reported that he was much better. He had gone to the VA and they were extremely impressed with the biofeedback therapy he had been undergoing. If things were better yet again at his next appointment they were going to re-evaluate his medication and they suggested he continue the biofeedback. We continued with two more biofeedback sessions using the EPFX and he made his next appointment at the VA hospital, where they not only re-evaluated but removed his medication. Many of these prescription's were psychotropic medications; his body did not respond well to this and within two days of this removal he tried to commit suicide. He was then institutionalized.

A 65 year old male who had a cancer scare with previous skin melanoma had decided to try biofeedback and alternative health therapy. He and his wife 63, had both been feeling very tired as of lately and more stressed than in the past, because of this they decided to try biofeedback. After one visit they realized they were sleeping better and feeling more energy. They decided to continue this process on a monthly visit. They continued this process for a year while going to their physician who had been watching several pre-cancerous lesions. Most of these lesions had disappeared and both the doctor and the client were thrilled. They now remain on a yearly visit with biofeedback to monitor their stress levels.

A 76 year old woman who had taken care of her sister came into the office. Her brother had died a year before and her sister had cared for him while he was sick with a stomach issue. Shortly after this her sister became ill for several months with the same mysterious symptoms that the brother had had and she had taken care of her until her death. My client was now nervous because she had had diarrhea for over 6 months
which were part of the same symptoms. We began biofeedback and had 10 days until she was scheduled for a colonoscopy. She had earlier had a cancerous polyp removed from the colon and was concerned of what would be found now. Because of our limited time we met every other day to do stress balancing using the EPFX. She went to her scheduled appointment and was pleased to report to her doctor that the diarrhea was now gone and that she was feeling better. She was able to eat more now that she had been over the past six months without feeling bad and able to keep the food down and had begun to put back on some of her earlier weight loss. The colonoscopy test was complete and showed only one bacterial polyp. She was thrilled with the results.

Michigan, U.S.A."

„Client: 62 year old female. After running a test on the EPFX I noticed that she was showing many signs of stress having to do with female issues, specifically menstrual issues. At 62 I knew that was unusual and asked her if she was having any female problems. She had been a bit skeptical when she first came and had not revealed any existing issues. At that time she said " how could you possibly know that? I have had my period for the last 12 days". Knowing that was not normal, I suggested that she visit her doctor. The next time that I saw her she was very emotional and thanked me. The condition was pre cancerous and they were able to catch it before it became life-threatening.

City unknown"

„My first client when I opened business on September 11, 2007 was a 20 year old female who had been making weekly trips to the emergency room for a morphine shot to control her abdominal pain. She had been to pain management clinics, M.D.'s, Gynecologists and no one could find the source of her pain. They gave her pain medication to help control it and wrote her a prescription for medical marijuana. Her trips to the emergency room usually occurred during the night and she would wake her parents to drive her to the E.R. Needless to say her parents were at their wits end with fatigue and worry over their daughter. This routine had continued for two years before the client came for her first biofeedback session.

My young client required two sessions to manage the stress of pain the first week, this continued for the second week but after the third session she came back saying that she had just experienced the best week of the last two years of her life. She was able to go out and enjoy her young friends, exercise mildly and sleep all night. She actually cried as she put her arms around me and thanked me for helping her. She told me she had felt so helpless because no one else had been able to do anything for her except knock her out so she slept and couldn't function. Her mother also thanked me emotionally for giving her back her life!
City unknown

„While using the biofeedback machine on my Dad. I found that the stress was relieved in his neck. His neck is degenerated as the bones are rubbing on bones which causes great pain. After running the biofeedback program the pain is relieved and he can bend his neck without the great pain he was experiencing. With each session the stress is relieved.

I have found that stress is relieved in myself as I run the program. I am aware of this and am very grateful. If you need testimonial in person, on the phone, etc. I will, My Dad will, my Mother, So will my husband and daughter. When I had the biofeedback program ran on me before I purchased it. I found that my legs, knees moved better, that I could walk up and down stairs without pain as the stress was relieved. So did the others with me. I have experienced "feeling" the frequencies affecting me in many ways, some of them too unbelievable to mention here. Whether for energy, etc. or just smiling more . . which is a GREAT THING.

Dalton, Georgia”

„My sister was 11 weeks pregnant about 9 months ago and she had uterine pains. She went to her Allopath who did an ultrasound and told her everything was fine, just go home and rest. Everything was not fine. Her husband is a paramedic and saw my sister continue to decline into excruciating pain and vomiting. He called and the ambulance was there in minutes; however it was an hour drive to the closest hospital. As it turns out she had an ectopic pregnancy and the fallopian tube had burst leaving her life in danger. I received a call around midnight that my sister was on the way to the hospital, hemorrhaging severely and that she probably will not make it to the hospital alive. So I put her name, birthdate, sex into the EPFX asap and ran a test. Although I am an EPFX beginner I had to do something and I live too far away to have helped by driving there, she may have been dead by then. Since my background, and my comfort zone, is with Homeopathics, I went directly to Arnica. I Sent her via subspace a 10M of Arnica to try to stop the hemorrhage. I got a call about 2 minutes later that my sister was beginning to stabilize and that she might make it to the hospital. I continued to send her flower essences and homeopathics for shock and hemorrhage. She made it to the hospital where she underwent surgery and I continued to gently send her the appropriate FE’s and Homeopathics using my own estimations and the EPFX’S of her needs. As it turns out, she recovered in what the Allopaths considered to be a remarkably rapid pace and was released from the hospital the next day. She is well and in good health to this day.

City unknown“
"The first thing I did with our biofeedback computer was run a customer who was told he had cancer. He had a basketball sized tumor on his stomach and had been to Mexico in the Donsbach clinic. I used Rife frequency to zap the cancer. I think I ran him three times -- each time using a different strategy. The last time I ran him, it came up in the risk profile that cancer was no longer a risk. I told him. He was shocked and speechless. Then he got happy. He said he was going to the Mayo Clinic to get checked. A couple of days after his appointment I found out they confirmed that he was cancer-free.

I run myself the most. I am 61 years old. I haven't been to a doctor in years and years, except for elective things like laser eye surgery. I look like I'm 40. I ride a bike, ski, play golf, play the piano, write company literature etc. I give the magnets some credit but since I've been using the computer I've felt better than ever before. I have probably had one cold in the last year with no flu. I do the anti-aging programs.

Female patient, 54 years old. Her issues were menopause. Her hot flashes were unbarable. In the middle of the session she started getting a hot flash and it never materialized. Her symptoms are decreasing and decreasing regularly.

City unknown"

“I have worked with a 2 year old female who was throwing tantrums everyday for many weeks. She had fallen several weeks earlier and bumped her head. I told her mother about biofeedback and Dr recommends homeopathic remedies. She decided to do a session. I took an hour to run my protocol, advised her to use some homeopathics for the child and she has not thrown a single tantrum since this session.

A friend of mine told me that her friend was diagnosed with endometriosis and that she would have to have surgery for this within a few weeks. She had had many pains and female issues. I had to act quickly so I sent her a bottle of Fem B - Dr Recommends. She took it for 3 days and all of her symptoms disappeared. She told me that she cancelled the surgery during a presentation I gave, in the town she lived in.

I am a 29 year old male and have had acne for over ten years. I have used diet, cleansing and other natural remedies. My symptoms decreased around 80%. I own the biofeedback device and I am the one sending this email. I did a session using the situation method, specifically on this issue. The results showed a possible bacteria
problem. I proceeded with my protocol and then used Dr recommends Bacteria Fuge for over a week. My acne is nearly 100% diminished. There is hope for those who seek the truth.

I have scanned my girlfriend who is 25 years old several times. She has had some cramps, back pain and headaches prior to these sessions. She uses Dr Recommends remedies - Fem B, Thyroid Thymus and Parathyroid. Basically I use the device to detect the appropriate remedies for her during the month. She has no headaches, her back pain has decreased by 75% and she has no more cramps.

I scan my mother who is 55. She has been diagnosed with hypothyroid and was taking synthetic drugs for this. I told her to try the Dr, Recommends Thyroid Thymus Parathyroid. She told her physician about it as well. She no longer uses the drugs and she has told me she notices a clearer mind when using the biofeedback and homeopathics.

I worked with a 10 year old girl who had different allergies that were pollen related. I did a biofeedback scan and sure enough it showed on the device both in the allergy screen and in the main matrix. I did the session and gave her the Dr. Recommends Pollen remedy. Her allergies have decreased considerably since this session.

Dilworth, Minnesota"

“A Boulder, Colorado Biofeedback Practitioner saw a 45 year old woman lawyer with late stage breast cancer. She admitted that the stress of a high profile Denver law practice was a major factor in her onset of cancer. Skeptical of biofeedback's benefits, she agreed to a 90 day stress detection/management program. In those 3 months, and after 6 biofeedback sessions with the EPFX, she reported to the Practitioner a complete remission of the breast cancer, proven to her and her family with well documented cancer marker tests from her Denver Oncologist.

A Boulder, Colorado Biofeedback Practitioner saw a 3 year old child with external skin warts that covered most of her small frail body, even her face. She was not able to attend daycare because of the fear the daycare center had about the possibly contagious nature of the child's condition. After 2 biofeedback sessions over a 6 week period all external body warts subsided and the child began to thrive and was shortly after that allowed back into the daycare program with no further relapse of the condition and its symptoms.

A Boulder, Colorado Biofeedback Practitioner saw a young 28 year old married woman that was diagnosed with infertility and who was desperately wanting to have children with her newly wedded handsome and healthy husband. Soon into the young marriage
she was beginning to blame herself and was accepting a very poor image of herself due to her inability to conceive. After a 3 month period of regular, weekly biofeedback sessions, the Practitioner received a note in the mail announcing the good news that she had conceived and the attending Doctor reassured her of a happy and healthy birth that coming spring.

Colorado, U.S.A.”

“A 49 year old woman from Los Angeles, CA had experienced intense pre-menstrual depression, bloating, headaches and irritability, and post-menstrual painful and debilitating cramps for over 30 years. After 5 treatments over 3 months time with the EPFX she reported that her pre-menstrual depression was completely gone. Her mood swings had disappeared and the menstrual cramps were in most cases no longer an issue and when she did experience them the severity was lessened by 90%.

L.A., U.S.A.”

1) I worked on a 12 year old boy with diagnosed learning disabilities and after working the stress programs on the relevant areas for 3 visits over 6 weeks this boys reading had improved by A FULL GRADE LEVEL – as verified by testing! His teachers and sports coaches were amazed at his improved ability to follow instruction verbally and comprehend written instruction.

2) At least 5 menopausal women have come to me complaining of symptoms of menopause that they were not able to get any relief from. They all reported 100% improvement after one session and they returned periodically for tune-ups.

3) I do mini-sessions as a means of sharing the EPFX and introducing people to it. One woman with fibromyalgia reported to me that she was pain-free for 3 months after a 20 minute mini session where we did the primary and secondary stress areas only.

4) A woman with cerebral palsy, but very high functioning – only visible signs are a slight tremor in the hands and tilt of the head, saw me to see if I could assist with a pain issue. She reported to me that her tremors (which were constant her entire life, 24 hours a day) had stopped completely for 10 days. We are looking forward to exploring this further!

City Unknown
“Blood sugar levels as reported by a local medical laboratory decreased thirty points in a type 2 diabetic after two treatments. An elderly woman reported greater range of motion in her arthritic shoulder after one treatment. A menopausal woman reported cessation of hot flashes after one session. She had been having about ten per day.

“A lady I saw last year had been suffering from IBS as her doctor told her. She came to see me with a view for helping her with her diet. I picked up an imbalance with her gallbladder and gallstones, but as I don't diagnose I suggested she visit her doctor again. He dismissed her as mad as she didn't fit the profile. She saw a private doctor who discovered she had a five inch stone in the gallbladder.

She brought in her daughter who had not had a period for 2 years. After working on her for 3 sessions and recommending supplements her periods started.

She then came along with a skeptic husband who had a rash on his arms and legs. He has now come 3 times and is feeling a lot better.

I've been seeing a lady since last September, who was only having about 1/2 hour sleep a night. the doctor was trying to give her anti depressants. I picked up Giardia and asked had she been on holiday, and she suddenly remembered taking a trip to Barbados when her symptoms started. She wanted a quick fix, but had spent hundreds of pounds seeing homeopaths, tropical disease doctors, who all told her it was emotional. She nearly drove me mad calling me, but she trusted me and the Scio and I've been seeing her every week. Gradually her digestion is better, her sleep got better for a few days each time she saw me. Now she is sleeping for 7 hours a night.

“I have had my device and have had great success in the stress reduction area. I have a friend who had been going for pain management therapy. Her pain was all over her body to the extent that it was affecting her ability to walk normally. She came for one treatment and saw immediate positive results. Her pain was greatly relieved and she now walks normally without difficulty. All this after only one treatment.

My sister-in-law who was rushed to the emergency room because of heavy bleeding was told that she needed surgery to remove her uterus and ovaries. Because of her low blood count, it was postponed. I used the device on her only once and her feeling of
weakness was gone. Her bleeding stopped and she has not returned to the doctors to plan surgery. This took place two months ago.

Spring, Texas"

“• 2 years ago I was diagnosed with bipolar disorder and spent some time in a psychiatric hospital. They started me on a wide variety of medications (apx 10 different meds) I was hardly able to function in my job or any other aspect of life because of these medications. I started as a client and after three visits I had dramatic results, so dramatic that I purchased my own system. Within the first couple of months I was able to get off all of my medications and I have had positive life changing results from using the QXCI/EPFX.

• I have been running various protocols on myself over the past couple of years. My back used to be in excruciating pain when I laid on my right side and that has completely gone away. I also have also seen a significant change in my circulation, increased energy, relief from PMS, stress relief, and clarity of thought all do to the QXCI/EPFX. I cannot imagine what my quality of life would be without this.

• I have had the opportunity to spend some time with a 7 year old child that experiences dramatic swing do to bipolar disorder. Since I have had the opportunity to run protocols on him he has balanced out significantly.

• I ran a 30 something year old adult for depression and stress. She found significant relief.

• We have seen significant relief for clients who have been diagnosed by their physician with fibromyalgia.

“52 year old white woman. Depression, overweight, migraines, musculoskeletal pain, menopausal sxs – hotflashes, heart palpitations, multiple surgeries incl hysterectomy, breast reduction, and urethral.blockage. Multiple car accidents. 3rd marriage, previous husbands abusive.

Rx: Ceprolex, Phentolin.

Client left looking like a different person after long session (almost 3 hours.) She went home and changed her diet. Lost 25 pounds, did some extreme self care and altered her realationships. Depression lifted. She is starting a business and feels like a “new person.” All symptoms drastically reduced.

City Unknown

“I have a case of Chrone’s. Stools normal and all pain gone with some supplements and two sessions.

A Gentleman with fertility problems. 3 visits and they are expecting.

A 25 year old female who never had a menstruation in her life. After one visit she started menstruating.

Elderly gentleman diagnosed with Prostate Cancer. Did cancer protocol and he came once a month for a year. His check up with the Doctor, he is cancer free.

Lady on anti depressants for 1 year. After 2 sessions has been off meds for now 2 years.

The list goes on and on. Every day I am amazed at the response of my clients. I am blessed to have the opportunity to work with such a device and share it with my community. Thank you for sharing this technology with the world.

“I am a female and when I was 16 I was at the Doctor for one of my first yearly check-up and Pap Smear. I received a call about a week later to come back, and they did another. It turned out I had extreme dysplasia or a pre-cancerous condition caused by human papilloma virus. I was very young, just barely sexually active and was going in for a biopsy. The biopsy found cancer starting to form on my cervix and the Doctor was scheduling me for surgery. I said I wanted to try something else first, and being a very open minded MD, she told me that she would love it if I could find another way. I worked with the EPFX (QX version) on a regular basis and used homeopathy along with lifestyle changes (Diet). After 2 months there was no sign of any abnormal cells. I am 32 years
old today and still have %100 healthy Paps. I have had many more, smaller health crisis change for the positive over the years by working with the EPFX. I cant even remember them all but I do know that the only time I have had to see an MD since I was 16 is for broken bones, cuts and car accidents.

„My personal experience with the treatments on the machine have been great. I was able to get rid of migraines, PMS, hormone imbalances, left over trauma and emotions and fibrocystic breast disease. I have been able to build my immune system, treat all my stressed organs, regulated and knocked out my sugar craving. It has made me more conscious of the lifestyle changes I need to make to be healthier. My digestion has improved greatly, along with my attitude and my energy level. The detoxing treatments have allowed my body to get rid of the candida (yeast) and other bacteria and toxins in the body. I am always amazed with the accuracy of the machine, not just because of my personal experience, but through the experiences of my clients.

- Broomfield, CO”

„Last March, I had my appendix taken out and went through the usual 6 week recovery process. At some point I was still experiencing complications that I felt was not the result of the surgery. I was menstruating twice a month and experiencing severe pain.My gynocologist told me that I would need a hystorectomy and had further concerns that I would be anemic. Fortunately, I was able to use the EPFX for the pain and get some clues as to where the stress was coming from. After careful examination, and looking at where the imbalances were, I asked my regular doctor to check my DHEA levels and my thyroid. I started taking 5mg of DHEA and a little progesterone cream and continued working with the EPFX device. Within a month I started to experience normal and painless periods. I am very thankful for this technology, It has made a huge difference in my life and I feel that it helped me avoid another surgery.

City Unknown”
Female client had been suffering from hemorrhage for seven years. Had to quit her job. Now after a few sessions with the EPFX, a few changes in her diet, and some supplements she is taking, she is back to work, very happy and doesn't miss an appointment.

City Unknown

I have had my device for about 2 years now and use it mainly on myself and family. I am 40 years of and age and have suffered with endometriosis for 20 years. After multiple surgeries and a partial hysterectomy the only thing left for me was a complete hysterectomy. Right around the time I bought my device I was trying to make a decision as to what to do about this for I did not want to lose another body part! Well, I'm sure you can guess the rest. I'm still hanging in there 2 years later and feel much better with the use of my device.

City Unknown

I have a client who was 35 at the time, she and her husband had been married for 15 years and had not been able to conceive and had done everything to get pregnant. She was told that due to her endometriosis and Circulation issues that they were never conceive. I have work with her for three sessions over a 2 week period. She cried the first session for 1.5 hours and never talked about a thing. I just work with the stress and did short therapy for fertility. Three months later she was pregnant and now has a son who is three years old.

City Unknown

I would like to give a testimonial for my own health improvements with the EPFX device. When I started working with the device, my general health is very good with the exception of one area, my hormones. For at least 20 years or more I have suffered with heavy cramping during my ovulation cycle and the first two days of my menstrual cycle. The last 5 years or so I have had heavy bleeding with thick dark clotting as well on the first 2 days and it would last a full 7 days. After working on myself for approximately 2x per month, for 2 months I started my menstrual cycle without pain! I had little to no forewarning (usually lots of pain). The cramping during my ovulation cycle stopped within 3 months, I have minimal cramping just before I begin my cycle, and the bleeding...
only lasts for 3-4 days instead of 7! It has only taken a few short months to correct my cycle, when my O.B.G.Y.N could not figure out why I had so much pain. The solution he could come up with was that I was having cysts that would erupt during that phase and that was causing the pain. He did not offer any solutions to my problem. FYI.....he was a fertility specialist.

I also feel as though working with my clients, my health and energy levels are better! It makes me very happy when I work with the device, I feel as though I have bonded with it and we are a team! I love how it gives me pop up messages, they are very profound at times, even shocking!

„AGE: 33
GENDER: FEMALES
DIAGNOSIS: ALLERGY FOR A LOT OF SUBSTANCES, EMOTIONAL CRISIS, PMS, FATIGUE

AFTER A TEST WITH THE SCIO AND AN ALLERGY TEST I FOUND A MEXICAN PLANT THAT WAS CAUSING SOME OF HER ALLERGIES. I ASK HER TO FIND THIS PLANT FIRST IN INTERNET AND THEN IN HER HOUSE. THE PLANT WAS IN HER KITCHEN, THEN SHE MOVED THIS PLANT TO ANOTHER PLACE IN HER GARDEN AND THE PRINCIPAL ALLERGY STOPS IMMEDIATELY. ALSO, WITH FOUR SESSIONS WITH THE SCIO SHE EXPERIENCED A RELAX STATE, BETTER FEELINGS, EMOTIONS, AN ESPIRITUAL BALANCE AND JOY.

CITY UNKNOWN, U.K.”

„I purchased the EPFX/Scio device five months ago. I had many hormone issues, and after visiting the gynecologist I thought I was going to have to undergo many tests and possibly a hysterectomy. Five months later all of my symptoms have disappeared.

SUGGESTED THERAPIES

FEMALE DISORDERS, PMS PMT PREMENSTRUAL STRESS OR TENSION

1. Female problems are very complex and are often the result from an imbalance of hormones. Stress, improper nutritional toxins, drugs, and lifestyle produce female problems.
2. Hormonal disturbances can develop due to excess or deficient estrogen which is released from the ovaries; excess or deficient progesterone which is released from the corpus luteum, an organ which is developed every month in the female up until menopause; excess testosterone; and deficient adrenalin both of which are produced in the adrenal glands due to stress; excess growth hormones produced in the hypothalamic/pituitary area which can contribute to endometriosis (ref. Endometriosis Study).
3. Disorders of the liver can also produce problems because the liver has to help metabolize the excess of any one of these hormones. Disorders can result from stress and emotional problems, as well as nutritional deficiencies and excesses. Caffeine from cola, chocolate, coffee and tea as well as nicotine have more profound disturbing effects on the female system. Also fatty acid deficiencies contribute to these disorders because the different regulatory hormones need to be made out of fatty acid components. Proper mineral balancing is also important. Toxins can disrupt this. Toxins such as those found in beauty shop compounds and the environment can also place a burden on the female system. Many synthetic pharmaceuticals also cause female problems.
4. *FEMALE LIQUESCENCE contains an estrogen-based compound and can be used as a form of hormone replacement therapy in low grade conditions. For more hormone replacement therapy, a homeopathic of 3x estrogen with 6x progesterone can also be utilized. FEM-PRO is a complex homeopathic that helps any and all female problems.
5. In conditions involving testosterone and adrenalin production, stress reduction is very important as well as prescribing *KIDNEY/OVARIAN/ADRENAL which helps to stabilize
these hormones. *PROGESTEX is used when a build-up of bad tissues occurs in the vaginal and uterus area due to excess progesterone. This product helps to provoke a cleansing of the bad tissues and is a natural form of DNC.

6. The diagnostic criteria of a progesterone problem will usually result in a pre-menstrual stress and/or tension that is usually relieved upon the onset of the period. This is a diagnostic criteria that tells us that the problems is in a progesterone imbalance. The use of PROGESTEX for one month can help in relieving this condition.

7. The diagnostic criteria for an estrogen type disorder is that the condition would ensue the entire month or would mostly ensue at the release of the period and then occur for a week after the period. This is known as post-menstrual disturbance and is highly significant of an estrogen type disorder. A combination homeopathic of ESTROGEN 3x with PROGESTERONE 6x, taken 10 drops/3 times a day for one month along with *FEMALE LIQUESCENCE taken for three months, 1 teaspoon per day (ref. Natural Hormone Study).

8. If there is a problem with irritability, this is diagnostic of a testosterone and/or adrenal disturbance. *KIDNEY/OVARIAN/ADRENAL should be taken 10 drops/3 times a day.

9. In treating hormonal disturbances, remember a healthy liver function is always important as well as good nutrition, stress reduction, and reducing exposure to toxins. Master acupuncture points for stabilization shown below:
EMOTIONS AND ATTITUDES EFFECT AND CONTROL
HYPOTHALAMUS PITUITARY PINEAL REGULATES ALL FUNCTIONS

THYROID THYMUS
effects metabolism effects immunity
LIVER detox excess male hormone
ADRENALS makes male hormone and other excess hormones, more under stress
OVARIRES makes Estrogen releases eggs
CORPUS LUTEUM UTERUS made and destroyed every cultivates eggs month makes
Progesterone needs to detox monthly
VAGINA There is a critical balance of many factors in the female hormone regulation.
Most importantly Estrogen, Progesterone and Testosterone Our natural herbs and
glandulars are designed for micro-nutrient supplementation and natural stimulation of
balance.

SCIO TREATMENT SUGGESTED

Color - set patient's favorite if desired, or choose color by chackra that is deficient
Cosmic: set 1 for physical body, 2 for astral, 3 for etheric, 4 for mental, 5 for cosmic, 6+
for other
Magnetic Method - 1+10 is universal, 7 for detox, 8 for regrowth of new tissue, 3 for
injury, 2 for metabolic correction, 5 for inflation, 6 for infection, 9 for psych stress, 2
for energy stimulation, 4 for immune stimulation.
Frequency - 5k-10k, 333hz--555hz 1200--1300hz,
Trivector for 10 min once a month in early stages once a week in later stage.
Discussion:

The results show significant improvement in symptoms and feeling better. The Collective results show a dramatic benefit to the SCIO therapist visit.
