Please pay to the pay pal under deisfm.net donations. All of the books have low res for size and hi res versions for clarity.

If you do not have the money pay what you can, and if you cannot pay anything please pay the cosmos back with good deeds to others. Pass on the good karma by being good to others and helping them the way I am helping you. Pass it on.
Introduction - perhaps the whole health care system is wrong

The recent calamity over Health Care as brought this topic to the attention of the world. But to understand this clearly we need to carefully and attentively analyze the topic in detail. People have all forgotten the two words Health and Care. They only argue about how they will get their drugs from the doctor. The doctor’s primary care is a prescription and the average patient gets three SInthetic drugs. Who will pay the doctor and who will pay for the drugs seems to be the only question.

There are some simple false beliefs in health care that need to be exposed. Here is a short list of major problems with our current Health Care.

1. Health needs to be at the heart of Health Care debate
2. The three leading killers of People are tobacco, synthetic drugs and medical doctors.
3. We must have sympathy and respect for the millions of people addicted to cigarettes. They should be allowed to continue but how do we allow people to expose children to tobacco and to inadvertently let children smoke? To protect the children we need to enforce the laws we already have. If you are careless and leave you loaded gun on the kitchen table and your child picks it up thinking it is a toy and kills someone, you can be tried and convicted for reckless endangerment and or willful neglect.

Cigarettes are just as dangerous and they will always take away life. Just because it is not immediate does not belay the danger. If we enforced the law and put those who in anyway allow a child to smoke into a smoke free prison, we would have more health as a society and less outgoing expenditures. People who smoke should pay extra for health insurance.
4. We need to face the fact that Synthetic drugs are basically incompatible with the human body. The side effects are creating a high cost of medicine and are killing people. Simple changes in our diet and lifestyle will make for much more health than allowing people to eat bad foods and then use harsh drugs to treat the diseases that result.
5. The drug testing techniques used today do not guarantee safety and the pressure to pay for synthetic research drive up costs while producing more sickness.
6. The FDA is more about paper and profit than people. Lobbyists of the drug and tobacco companies are more in control of the future than the
FDA. The FDA has failed in its current approach to sway risks to the people.

7. The medical education has very little to do with health and ways to keep it. **Medicine has become a crisis disease care not a health care.** Doctors are taught synthetic drugs and surgery and there is an active plan to dismiss and destroy natural medicine.

If we can face our false beliefs and face the pressures of profit over people we can build a healthier system of Health Care. This book will delve into health care and expose its corrupt side and how we have lost touch with health and we have let the Ultra Rich run over us.

8. The Synthetic drugs have failed to be safe, they are very risky and make dependence, have side effects, cost vast monies for development and when compared to placebo have little effect. Research has shown that most diseases can respond to diet, lifestyle, and simple natural therapies. TV shows like the “Diet Doctor” or “You are What You Eat” let us see the effects these changes have over a short two month duration. The Synthetic offers a quick fix at a great cost, but now we can no longer pay this cost and we now know the results are not what we thought they would be. The proof that the testing of the drugs is inadequate for safety is disturbing. Drugs are tested for their effects and side effects are observed not tested.

So the illusion that drugs are tested as safe is a false belief. The subtle side effects are not tested in a study they come out over time of usage by the public. The proof that the synthetic process is faulty is also to be considered. As I have very scientifically proven beyond a shadow of doubt that the scientist do not know how to make something compatible. It is the largest problem in medicine today. The process of pretending to be GOD and making medicines is a sin, a sin that makes lots of money.

**SINthetic medicine is a SIN**

So to call attention to this ludicrous SIN I will spell synthetic, SINthetic as I will do so in this document.

Drug companies have marketed a false believe. They have twisted the facts to increase profit. And now they try to destroy the alternative competition and make their expensive drugs mandatory use. This is now a threat to the basic freedom of choice we have been told we have in our society. But freedom of choice is a right that we must fight to maintain. Now more than ever the drugs companies fear books like this one that not only expose their corruption and illogical process, but also offer an inexpensive alternative. But this alternative threatens the profits of the chemical companies.

9. Natural medicine must remain a viable choice for families. There must be the freedom to not have SINthetic unsafe drugs pushed onto us. We must defend our freedoms and defeat the SINthetic drug cartels strangle hold over us.

10. We must stop persecuting people who have viable opinions that differ from the large corporations. We must stop the senseless persecution against me. This book is not designed to stop or destroy the SINthetic drug cartel. This book is about defending our right to choose. There are many more people writing to defend our rights and stop the drive for universality of SINthetic drugs in medicine. We are all attacked and harassed by the drug companies and their small mind army of regulators, all for simple expression of freedom of speech.
YOUR DRUG MAY BE YOUR PROBLEM

HOW AND WHY TO STOP TAKING PSYCHIATRIC MEDICATIONS

PETER R. BREGGIN, M.D.
DAVID COHEN, PH.D.

Possible side effects of commonly used oral steroids

- Moon face
- Facial hair
- High blood pressure
- Bleeding from gut
- Diabetics
- Low in potassium
- Obesity
- Stretch marks
- Osteoporosis
- Avascular necrosis of the femur head

Possible side effects of commonly used immunosuppressing agents

- Cyclosporin
- Nephrotoxicity
- Hypertension
- Hepatotoxicity
- Gum hyperplasia
- Facial hair
- Azathioprine
- Hepatotoxicity
- Leucopenia
- Secondary infection
- Methotrexate
- Mouth ulcers
- Hepatotoxicity
- Ulcerative stomatitis
- Bone marrow suppression
- Cyclophosphamide
- Haemorrhagic cystitis
- Myelosuppression, more susceptible to infections
- Secondary malignancies
- Infertility

Barriers Associated with Nonadherence to Blood Pressure Medications

- Inadequate insurance coverage for medications and medical treatment
- Lack of understanding
- Sexual side-effects
- Cultural issues related to dependence on medication
- Poor communication between patient and physician
- Drug intolerance
- Less than optimal interface between primary and specialty care for patient
- Literacy
- Hearing impairment
- Cognitive impairment
- Lack of resources for care
- Patient's belief system
- Inadequate support system
- Lack of motivation to adhere to treatment plan
- Perception of decreased quality of life while taking antihypertensives
But let’s return to basics and take some time to analyze and define Health Care

What is Health and what is Health Care

Health is defined as
(noun) Health the state of being hale, sound, or whole, in body, mind, or soul; especially, the state of being free from physical disease or pain.

Health, wellness
a healthy state of wellbeing free from disease
"physicians should be held responsible for the health of their patients"

Care is defined as
(noun) care, attention, aid, tending the work of providing treatment for or attending to someone or something
"no medical care was required"; “the old car needs constant attention"

(noun) care, safety and judiciousness in avoiding harm or danger
"he exercised caution in opening the door"; “he handled the vase with care”

(noun) care a cause for feeling concern
"his major care was the illness of his wife and her safety"

(verb) care, maintenance, upkeep activity involved in maintaining something in good working order, feel concern or interest

And Yet Health Care is defined as
(noun) health care social insurance for the ill and injured, the preservation of mental and physical health by preventing or treating illness through services offered by the health profession

Today health care is thought of insurance and how to pay for disease symptoms control. Safety, care, health and wellness have been forgotten. Our overall definition of health and wellness is vague and unclear. In fact my spell check still tells me that wellness is not a word. Our biological and medical definition is also very ambiguous. Care implies safety and or concerns for safety but the evidence medicine people have sacrificed safety for evidence and profit. We have lost touch with the words Health Care.

A country can make its health care system based on one of three system types.

1. Prevention emphasis. Example old China where you paid the oriental doctors when you are healthy but not when you are sick, or when you disobeyed his directions, it was his job to keep you healthy.

2. Early to moderate detection of health risks. Example modern 1980 Germany
the human body. As the drug does not offer a cure, it is incompatible with nature means it is incompatible with the body.

The drug offers no cure. Its synthetic nature means it is incompatible with the human body. As the drug does not offer a cure, it is incompatible with nature means it is incompatible with the body.

3. Crisis care. Example modern USA where you wait till there is a life threatening or extreme symptom to get help.

Of course America has chosen type three. This has turned it into a disease care not health care system.

And it turns health care into cash cow and expenses and costs are going more and more out of hand because of this choice.

The choice of type three does most of it damage when of the crisis modality we wait for crisis life threatening symptoms. We ignore subtle trends, and concentrate on clinical real risks rather than subclinical signs. PKU detection in babies detects only profound cases of phenylketonuria and subtle cases are left untreated.

The ignorance of early disease detection means that the most said and philosophical and bring the whole picture to light. For more detail on any specific disease please go to one of my other books.

To start let’s look at the biggest problems of health care.

This a recent article that shows what numerous other articles have shown before.

Four unhealthy behaviors the real causes of disease

Four Unhealthy Behaviors Linked to Premature Death. People who smoke, drink, rarely exercise, and skim on fruits and veggies die earlier than usual, study finds

Robert Preidt

MONDAY, April 26 2010 (HealthDay News) -- A combination of four unhealthy behaviors -- smoking, lack of exercise, poor diet and substantial alcohol consumption -- greatly increases the risk of cancer and premature death, a new study has found.

The study, published in the April 26 issue of Archives of Internal Medicine, included 4,886 people, aged 18 or older, who were interviewed in 1984-1985.

"A health behavior score was calculated, allocating one point for each poor behavior: smoking; fruits and vegetables consumed less than three times daily; less than two hours of physical activity per week; and weekly consumption of more than 14 units [one unit equals 8 grams, or about 0.3 ounces] of alcohol (in women) and more than 21 units in men," wrote Elisabeth Kvaavik, of the University of Oslo, and colleagues.

Over an average follow-up period of 20 years, there were 1,080 reported deaths among study participants: 431 due to cardiovascular disease, 318 due to cancer and 331 due to other causes. Compared to those with no bad health habits, those with all four unhealthy behaviors were about three times more likely to die of cardiovascular disease or cancer, four times more likely to die from all other causes, and had an overall death risk equivalent to being 12 years older.

"Modest but achievable adjustments to lifestyle behaviors are likely to have a considerable impact at both the individual and population level," the researchers concluded. "Developing more efficacious methods by which to promote healthy diets and lifestyles across the population should be an important priority of public health policy."

This study shows what we all know to be true, there are certain behaviors that make us die early of degenerative disease. There have been many many studies that show these same truths. It is a lack of education about these behaviors and also a lack of caring. These behaviors are easy to change. Here are some simple things that won’t change your life. These are Simple changes and you can have all the flavor, freedom and health for a better life.

1. Smoking first don’t start, resist peer pressure and don’t start. You can quit the nicotine addiction is the most powerful addiction but it last only a few days. And after that you only have a mental addiction and with help you can beat it, if you care to. I have written a book on how to beat addictions if you need help. It is simple.
2. Diet. It is as simple as switching from dextrose sugars to levulose sugars, avoid all white sugar cane and eat fruit sugars. Do not eat food with trans-fatty acids, and switch from boiling foods in oil, to boil in water and add oil for flavor when it is cooled, but still warm. You will not miss a thing. The flavor will be there and you will be healthy. It just takes a little education and a little care.

3. Eat more fruits and vegetables less meat. This is good for you and the environment. The simple trick is using good spices and cooking to make the vegetables more appealing.

4. Over Cooking. Smoke in cooking also is a carcinogen. Smoke in any way is cancer causing. Foods over cooked and exposed to direct flame are more carcinogenic. Stir fry, low temp, sushi, Carpaccio, rare not well done, are just some ways to improve health. Eat more fresh and raw foods. And cook less, the more you cook a food the less nutrient’s it has.

5. Exercise. Exercise is a nutrient. We are designed to chop wood and carry water. Our bodies require exercise like we require air, water and food. Just a little walk, a little stretch, a little calisthenics, or even isometrics can make a big difference.

6. Alcohol. A little bit of alcohol is good for you. It is only over dosing that is
not miss any of the fun. It is often only peer pressure that makes you drink on and on, or just stupidity. The third and more drinks will not make you feel better; they will maybe make you feel worse. When I switched to non alcohol drinks in the night club after the first bad. The relaxing, euphoric joyful effect of alcohol comes only from the first and second drink. Two drinks are all it takes to feel good. After that alcohol only makes your thinking disturbed. After two drinks switch to alcohol free, virgin drinks or just water and you will not miss any of the fun. It is often only peer pressure that makes you drink on and on, or just stupidity. The third and more drinks will not make you feel better; they will maybe make you feel worse. When I switched to non alcohol drinks in the night club after the first
two. I found no change in my level of fun and could dance more and sex was better. Alcohol is dangerous in excess.

7. Drugs. Doctors kill more people than any other form of health care risk. Street drugs do cause many deaths a year but it is a small pittance of the deaths caused by the medical community.

8. Ignorance, obstinacy, hard headed stupidity. To ignore these things and say well my Uncle Sam lived to be 80 and he smoked and drank and never ate a vegetable. Well first the question is how old Uncle Sam truly die? And next the undeniable evidence is that your supposed uncle would have lived 12 more years if he was not as ignorant.
for your children, your spouse, your friends, your family or for yourself then just let yourself die. But if there is some small thing that you care for then show some compassion and make these small changes.

More detail Smoking

1. Smoking first don’t start, resist peer pressure and don’t start.

Why does anyone start to smoke? Well intelligent people don’t. Your first cigarette always tastes bad. Everyone knows that it is an expensive disgusting bad habit. So why? Always because the person is emotionally insecure and lacks intelligence, ALWAYS. They give in to peer pressure to try to be cool. It is always the mark of severe emotional insecurity and a lack of intelligence. Everyone knows you can be fooled, you cannot think for yourself, and you are stupid. If there was no such thing as
cigarettes today and someone now would try to develop tobacco smoking as an industry, the FDA would stop it immediately. Early research would show its addictive and devastating disease component. Today one death in three is somehow linked to smoking. The Bible in Revelations says that "one third of the population will die with smoke coming out of their mouths". And second hand smoke kills.

It would be impossible to start such an industry, but today this disease causing killer of people flourishes. It does nothing for health, kills millions, costs money, and makes fools of us all. The twisting set of lies and self deceptive bullshit a smoker will come up with to continue his habit is endless. Moist smokers will say anything to keep their habit.

They can rationalize and distort perception extremely well addiction is just another unaddressed disease component. Smokers would pay a thousand dollars a pack if they had to. Most smokers would rather see their child burned to death, house destroyed, than give up their habit. Smoking is the most addictive substance and its cost to health care is extreme.

Smoker become ludicrous clowns as they now give up all logic and defend their right to kill themselves. The FDA is powerless to stop the greedy murder of vast millions of people. The cigarette companies control the legislature. This insidious addictive substance has shown the world that greed and money are in control all else is a ruse. The expose’ of the hypocritical side of our law system defiles us all.

How can we expect our children to believe in a society that is so twofaced and so despicably deceitful and phony?

When children grow up and see such duplicitous lies at the heart of their government they will lose respect and they will not put their faith into such a government. They will put their faith into addiction, the gun, the power of greed.

This is what this disease has done to America. Greed, Power, and Addiction have cut into the hearts and minds of the country, causing far more damage than just lung cancer. Children get a sense of the truth and when they see greed in control they lose respect and lose their principles.

How do we allow people to expose their children to tobacco and to inadvertently let children smoke? To protect the children we need to enforce the laws we already have. If you are careless and leave you loaded gun on the kitchen table and your child picks it up thinking it is a toy and kills someone, you can be tried and convicted for reckless endangerment. Children think the cig is a toy.
Reckless endangerment and willful neglect

Reckless Endangerment

Function: noun
- the offense of recklessly engaging in conduct that creates a substantial risk of serious physical injury or death to another person

- NOTE: Reckless endangerment is a gross misdemeanor but sometimes rises to a felony, as when a deadly weapon is involved. It involves possible jail time. Tobacco is a slow working deadly weapon. A person who gets addicted to it is forced to spend money on his habit, ruin their clothes, worsen their relationships, dull their senses, weaken oxygen transfer in the body, and destroy their health. To allow a child to be addicted to this drug is a crime.

- A person is guilty of reckless endangerment when he or she recklessly engages in conduct that creates a substantial risk of death or serious physical injury to another person. Allowing a child to access your cigarettes is a crime.

Willful neglect is Conscious or intentional failure to perform a duty due to negligence

It is a parent’s duty to protect their child from being addicted to any substance.
Parents who do not take care to prevent a child’s access to tobacco, store owners selling cigarettes, other minor and anyone who participates in this crime should be prosecuted.

When our authorities start to enforce the law of reckless endangerment and willful neglect and try people for allowing their child to smoke. Then and only then can we have an honest less hypocritical society. And then an adult can choose to smoke or not.

The FDA and the legislatures of the world have been under the control of the tobacco companies for years. The lobbyists know just how addictive the drug in cigarettes truly is. People say they have the right to defile their own bodies.

But these addicts will say anything do anything pay anything to support their habit. They love to get another stupid idiot addicted to divert attention from their own gross stupidity. Stupidity loves company. But when a child gets a cigarette this is a major crime. Getting a child addicted to a drug the kills is a major crime.

If the punishment was one year in jail then perhaps there would be some protection for the children. If a person out of stupidity was to inadvertently allow his child to get a cigarette and smoke it, if Uncle George puts a cigarette into your child’s mouth, he should be incarcerated for two years.

Everybody must be responsible for not allowing a child to be addicted. But this is not enough of a deterrent. There should be a special prison for these offenders. A prison with no tobacco, let the punishment fit the crime. Only the threat of a non-smoking prison would be enough of a deterrent.

People say that the death penalty is not a deterrent. Well a smokeless prison would be. Maybe then people would be able to become 19 years old before they can smoke and not fall under the influence of peer pressure or infantile fascination with taboo.

Many people reading this are angry and are now trying to explain, how certain people live to be eighty and smoke, or that their bodies and their children are theirs to abuse, or any number of inane twists of rationalization to allow smoking to continue.

And now for the smokers reading this, first of all you did not start smoking because OF AN EXPRESSION OF FREEDOM. You did not start because you were just curious. You started because you were so incredibly insecure and full of self doubt you could not resist the peer pressure. You thought you would be COOL. You started a life of disease, extra cost, and self defilement and twisting mental rationalization all to influence someone else’s opinion of your insecure timid self.

- Smoking gives you bad breath

Parents who do not take care to prevent a child’s access to tobacco, store owners selling cigarettes, other minor and anyone who participates in this crime should be prosecuted.

When our authorities start to enforce the law of reckless endangerment and willful neglect and try people for allowing their child to smoke. Then and only then can we have an honest less hypocritical society. And then an adult can choose to smoke or not.

You started a life of disease, extra cost, and self defilement and twisting mental rationalization all to influence someone else’s opinion of your insecure timid self.

- Smoking gives you bad breath
• Causes wrinkles earlier in life
• Makes your hair and clothes smell
• Can affect your sports performance
• You won’t be able to run as fast or as far.
• Stains your teeth makes your skin dry
• It will crease your lips from pursing them around the cigarette.
• It will make your skin tougher and not as soft.
• It will mix up the fluids in your brain.
• Makes you less attractive
• Costs lots of money.
• Destroys your clothes, AND

Puts you at risk of
• Smoking can cause Coronary Heart Disease
• Emphysema
• Lung Cancer
• Throat Cancer
• Mouth Cancer
• Bladder Cancer Infertility in men and women
• Stomach Ulcers

You risked these and more and you are now addicted and a slave to your uncontrollable desire to look like an idiot to others as you get your fix.

But when you in any fashion contribute to a child’s future life degradation, well your karma will get you back.

The health benefits of stopping smoking start almost immediately

After:
8 hours: Nicotine and carbon monoxide levels in the blood are halved.
24 hours: The lungs start to clear out the build up of tar.
48 hours: There is no longer any nicotine in the body.
56 hours: Taste and smell are greatly improved.
72 hours: Breathing becomes easier; energy levels increase.
2-12 weeks: Circulation improves, walking and running become a lot easier.

Trans-fatty acids

Trans-fatty acids are found in fried foods, commercial baked goods, processed foods and margarine

Bad Fatty Acids must be avoided

Foods Boiled in Oil are Slow Poisens

Extra high levels of dextrose in the blood will diminish white blood cells and thus weaken immunity, irritate nerves, weaken cell membranes, lessen healing repair, and over-all decrease health

Evidence Based Medicine Versus Natural Medicine
### Bad diet big sugar and bad oil

2. **Diet. Eat Good sugars and Good Fats not Bad Sugars and Bad Fats.**

It is as simple as switching from dextrose sugars to levulose sugars, avoid all white sugar cane and eat fruit sugars. Do not eat food with trans-fatty acids, and switch from boiling foods in oil, to boil in water and add oil for flavor when it is cooled, but still warm. You will not miss a thing. The flavor will be there and you will be healthy. It just takes a little education and a little care.

Good diet is the answer. People will say they have the right to choose, and this is the fundamental base of our society. I would fight for the freedom to
If there is evidence that your diet choice causes your illness the medical insurance should impose a penalty for any illness linked to your choice.

After education health insurance is the next question if you wish to burden our society with a personal choice to eat bad foods, this is bad. If there is evidence that your diet choice causes your illness the medical insurance should impose a penalty for any illness linked to your choice.

If you want to smoke, drink, eat bad foods to excess, fine, but you pay the bill. People should not be allowed to impose financial burdens on others because they are self-destructive, obstinate, stupid, ignorant, or just plain mean.
5. **Exercise.**

Exercise is a nutrient. We are designed to chop wood and carry water. Our bodies require exercise like we require air, water and food. Just a little walk, a little stretch, a little calisthenics, or even isometrics can make a big difference.

6. **Alcohol.**

A little bit of alcohol is good for you. It is only over dosing that is bad. The relaxing, euphoric joyful effect of alcohol comes only from the first and second drink. Two drinks are all it takes to feel good. After that alcohol only makes your thinking disturbed. After two drinks switch to alcohol free, virgin drinks or just water and you will not

3. **Eat more fruits and vegetables less meat.**

This is good for you and the environment. The simple trick is using good spices and cooking to make the vegetables more appealing.

4. **Over Cooking.**

Smoke in cooking also is a carcinogen. Smoke in any way is cancer causing. Foods over cooked and exposed to direct flame are more carcinogenic. Stir fry, low temp, sushi, Carpaccio, rare not well done, are just some ways to improve health.

Eat more fresh and raw foods. And cook less, the more you cook a food the less nutrient’s it has.
You are what you eat...

Which one are you?
The SCIO trivector device passes a changing low level field thru the item and generates a sophisticated picture of the electrical field of the item. It makes a 2x2x2 3D field that means over 10,000 separate frequencies to make one pattern. The shark senses these fields and they are amplified by the salt water. This makes them as detectable as the electro-sense. Researchers study leads to the discovery of the electro-sense. Researchers have found that sharks also sense a field. Living things have a changing reactive field, non-living things have a static field. The electro-sense in humans is the surface of the brain and most concentrated in the sense of smell.

So by measuring the Volametric electrical field of items and then multiplying the field 10 million times we get to really measure the patient’s reaction to items, really. So by applying a trivector Volametric pattern we can measure the response of the patient’s reactive potential and see the patient’s reaction.

So 5 million dollars were spent buying and processing the items in the matrix and testing these items with a patented registrated in the matrix and testing these items with a patented technology of modern science. This is why the SCIO device works so well, at each treatment from calibration, test etc. These QQC signatures are at the heart. Real science, real technology, real legal compliance, real items, real results, real honesty and integrity.

In 5th grade we were taught we are made up of atoms made of electrons and protons and neutrons. The electrons in the outer level are so charged they never touch. We are made of electrical fields.

The QQC is a very advanced patented trademarked technology with a CE mark. It measures in a very sophisticated process the Volametric electrical field of any item. If you lock up volametry in Google you see thousands of references for a world recognized very scientific chemical process also referred to as Polargraphy. You can see our patented process at http://www.volametriqccq.ro/
in philosophy like allopathically treating symptoms with inaccurate diagnosis while ignoring wellness measures and behavior leads to two factors, SINthetic drugs and surgery. When by their own statistics 75% of all surgery is unneeded, and hospital food makes you sick, the side effects of the drugs make more dependency than cure. We can see why doctors kill people.

8. Ignorance, obstinacy, hard headed stupidity.

To ignore these things and say well my Uncle Sam lived to be 80 and he smoked and drank and never ate a vegetable. Well first the question is how did Uncle Sam truly die? And next the undeniable...
Death by Medicine

By Gary Null, Ph.D., PhD; Carolyn Dean MD, ND; Martin Feldman, MD; Debora Rasio, MD; and Dorothy Smith, PhD

ABSTRACT
A definitive review and close reading of medical peer-review journals, and government health statistics shows that American medicine frequently causes more harm than good. The number of people having in-hospital, adverse drug reactions (ADRs) to prescribed medicine is 2.2 million. Dr. Richard Besser, of the CDC, in 1995, said the number of unnecessary antibiotics prescribed annually for viral infections was 20 million. Dr. Besser, in 2003, now refers to tens of millions of unnecessary antibiotics.

The number of unnecessary medical and surgical procedures performed annually is 7.5 million. The number of people exposed to unnecessary hospitalization annually is 8.9 million. The total number of iatrogenic deaths shown in the following table is 783,936. It is evident that the American medical system is the leading cause of death and injury in the United States. The 2001 heart disease annual death rate is 609,697; the annual cancer death rate, 553,251.

OFFICE OF TECHNOLOGY ASSESSMENT (OTA)

General Facts
In 1990, US life expectancy was 71.8 years for men and 78.8 years for women, among the lowest rates in the developed countries.
The 1990 US infant mortality rate in the US was 9.2 per 1,000 live births, in the bottom half of the distribution among all developed countries.
Health status is correlated with socioeconomic status.
THE NUMBER OF DEATHS HERE IN THE U.S. ASSOCIATED
With Cancer is over 750,000 Americans
and over 2,000,000 other people each
YEAR! WHAT WOULD YOU HAVE US DO???

“More and more of our imports come from overseas.”

-George W. Bush
of all there is always multiple causes of disease. There is never just a simple cause. Everybody has nutritional disorders, everybody has toxicity, and everyone has stress.

We pile on risks and causes till we collapse and then we foolishly blame the last straw. This is reductionism. In the medicine of Dr. Selye accumulated stressors are what make the system fail. And we need to reduce overall stress and take the cure and go get good food, good air etc and let our bodies repair.

And most importantly the accuracy of diagnosis is at the best AMA statistic about 30%. In a major study people dying in hospitals all over the US were taken to the forensic autopsy and the forensic disease was compared to the
when he treats people in the clinic takes about 5 microseconds to make a full diagnosis and an assumption of his patient. Does anyone want this type of HMO health care? NO. Then when he gets a patient in danger he makes at least four to five mistakes of diagnosis and he hurts the patient with at least one of his guesses.

A poor Latino man in one episode gets a hole drilled into his and loses an arm needlessly when they finally figure out a bird disease was it. House assumes that it is when his patient lives long enough to leave the hospital. Every diagnosed one.

The accuracy was global at about 30%. Some teaching hospitals like Mayo clinic are about 5% accurate. But with so many studies going on and doctors stretching to get subjects into their studies, we can expect diagnosis to be inaccurate. No hospital was over 50%, 45% was the best.

We see doctors like Gregory House every week on TV. He is a presumptive asshole to say it short. This is a perfect example of the way many doctors are. First they ASSUME toooo much and they make and ASS out of U and ME. House
rather see humility come back into medicine.

We need to stop focusing on diagnosis and let stress reduction and reduction of the causes of disease be meaningful therapies. One of my mentors a medical doctor from Cleveland once told me in medical school a little secret. He said ask your patients to make a conscious effort to drink more water.

The hypothalamus of people shuts down its thirst detector at age 16 or so. People do not drink enough water and since all life processes involve water if you drink more most of the patient problems will go away and they will episode we see the primary patient hurt by misdiagnosis and drug or surgical treatment.

Do we want this kind of health care from presumptive, arrogant, assholes? Answer NO.

But freedom of choice is a valid point. If you want this Ok, but for my children it is not OK. With House as an example of Medicine, we need not look for other examples of presumptive arrogance. This assumptive egotism conceit and bloated self-importance has destroyed medicine. They think they know everything and they don’t even know what an electron is. I for one would

I want to Share your Pain. You selfish Bastard, I care about you, You Need to CARE
think you’re a wonderful doctor. This points out very simply that diagnosis is not the most essential component of Health Care, diagnosis is the most essential component of Disease Care with harmful therapies like drugs and surgery.

Diagnosis is needed if you have a plan to maybe hurt the patient with side effect medication or risky surgery. But to make a person more Healthy or to care for his health we do not need diagnosis. It should not be necessary to get a diagnosis to get health care. It is nice if you are humble enough to admit you may be wrong.

10. Lack of CARE.

If you don’t care for your children, your spouse, your friends, your family or for yourself then just let yourself die. But if there is some small thing that you care for then show some compassion and make these small changes.

Some simple changes that not only make you live longer but might help you avoid an ugly painful death of lying in a puddle of your own piss and shit from cancer. These simple changes are the beginning of a true Health Care.

One of the largest causes of disease and one of the largest factors in disease is mal-nutrition, starvation or mal-
absorption. Our society has allowed Big Sugar, Big Pharma, and Big Fast Food to go crazy and make record profits while giving so little nutrition as to border on starvation and mal-nutrition. People are not getting the nutrients they need to be healthy. In fact they are being fed foods filled with non-nutritious junk that makes money for the fast food industry. And money for health care.

The investors behind health care want only return on their investment. They want profits and for health care to make profit there needs to be sick people. The more sick people the more money they make.

There is an incentive to make people sick. Profit up front, profit in the back.

The inherent risk of a profit based society. And when the profiteers can influence the legislation with lobbyists, grants, jobs for the legislators’ dim-witted nephew, fellowships, and sometimes even just plain money, we see a system grow out of control.

Profit over people. Heath care turns to disease care. Our children see the double talk about health care and they laugh but nothing changes so they get cynical and slowly reject all authority.
Equal Economic Education

Education has been stymied and not allowed to truly help. There is very little effort to teach people to eat better. And since the education system is based on hypocrisy nobody takes it seriously. And when someone like me speaks out to help make people healthier, the media reaches out and attacks them mercilessly. (See my Persecution movie and books)

Yesterday a Hungarian woman came to visit me from Paris where she is living now. She remarked that she does not like the people outside of my house. I live in the 8th district of Budapest which has a lot of Roma (colloquially gypsies). As an American I have no care or any disdain about Roma. In fact Americans think they are kind of cool. As I grew up my father feared and hated blacks. He was very prejudice, but I learned that they were just people and my friends said I was color blind. When I found out the area the woman lived in Paris I found that as a poor Hungarian she lived in an Algerian ghetto. She had no problem with them but the French hate the Algerian poor. She was raised to hate the Roma, I was raised to hate the blacks, and the French are raised to hate the North Africans. Many resist the pressure and not all parents allow the bias to build.

As I travel the world there is always such prejudice. And one day I found the reason. In every case the minority living in an area get less money spent on their schools and thus the children grow up less intelligent. A person is created by education and the unequal education means that worldwide people are not created equal, especially in America. The minority are kept stupid by depriving them equal economic education.

Franklin Delano Roosevelt said that equal economic education was one of the keys to the stabilization of the future. He announced there should be equal health care, equal education, equal protection from loss and a new society for all Americans. He proposed a second bill of rights.

He died shortly thereafter.
“The Economic Bill of Rights”
Excerpt from President Roosevelt’s January 11, 1944 message to the Congress of the United States on the State of the Union:

“It is our duty now to begin to lay the plans and determine the strategy for the winning of a lasting peace and the establishment of an American standard of living higher than ever before known.

We cannot be content, no matter how high that general standard of living may be, if some fraction of our people - whether it be one-third or one-fifth or one-tenth - is ill-fed, ill-clothed, ill-housed, and insecure.

This Republic had its beginning, and grew to its present strength, under the protection of certain inalienable political rights - among them the right of free speech, free press, free worship, trial by jury, freedom from unreasonable searches and seizures.

They were our rights to life and liberty. As our nation has grown in size and stature, however - as our industrial economy expanded - these political rights proved inadequate to assure us equality in the pursuit of happiness. We have come to a clear realization of the fact that true individual freedom cannot exist without economic security and independence.

“Necessitous men are not free men.” People who are hungry and out of a job are the stuff of which dictatorships are made. In our day these economic truths have become accepted as self-evident.

We have accepted, so to speak, a second Bill of Rights under which a new basis of security and prosperity can be established for all - regardless of station, race, or creed.

Among these are:

The right to a useful and remunerative job in the industries or shops or farms or mines of the nation;

The right to earn enough to provide adequate food and clothing and recreation;

The right of every farmer to raise and sell his products at a return which will give him and his family a decent living;

The right of every businessman, large and small, to trade in an atmosphere of freedom from unfair competition and domination by monopolies at home or abroad;

The right of every family to a decent home;

The right to adequate medical care and the opportunity to achieve and enjoy good health;

The right to adequate protection from the economic fears of old age, sickness, accident, and unemployment;

The right to a good equal education.

All of these rights spell security. And after this war is won we must be prepared to move forward, in the implementation of these rights, to new goals of human happiness and well-being.

For unless there is security here at home there cannot be lasting peace in the world.”

If we all had the security of knowing that our society would protect us with these basic rights, we would not be panicked...
at the thought of being put out on the street. This panic and insecurity drives people to terrible things. Everyone fears financial collapse and we dread having nothing in a country of plenty. This fear makes for blind workers, stupid masses, and obeying servants. In other countries they take care of those who lose everything. In Denmark if you wish to be a poet, a painter or an artist, or just to take a sabbatical, you get an apartment, a monthly wage, health care, education, bus pass, and more. You are a member of the society regardless of your financial contribution. So they have less fear of loss. A society is measured by how it treats the lower status of people in it. We need the security of equal rights and protection from total demise and protection from being homeless, sick, unemployed or old. But this means that the rich must share with the poor. The thing the rich fear most is the simple idea of equal economic education. If the ultra rich would pay taxes there would be plenty of money for equal economic education.

The function of education is to teach one to think intensively and to think critically... intelligence plus character - that is the goal of true education.

"Why bus children to a different school when we could change the old school with equal distribution of education tax money?"

"Let us think of equal education as the means of developing our society's greatest abilities, because in each of us there is a private hope and dream which, fulfilled, can be translated into benefit for everyone and greater strength for our nation. Liberty without learning is always in peril; learning without liberty is always in vain.

If a free society cannot help the many who are poor, it cannot even be the few who are rich.

The ignorance of one is a danger to the security of all. For in the final analysis, our most basic common link, is that we all inhabit this small planet, we all breathe the same air, we all share acommon ancestor, and we all die at the hands of time.

We must never forget that art is not a form of propaganda; it is a form of truth." - JFK
"For there is another kind of violence, slower but just as deadly destructive as the shot or the bomb in the night. This is the violence of unequal institutions; indifference and inaction and slow decay. This is the violence that afflicts the poor, that poisons relations between men because their skin has different colors. This is the slow destruction of a child by hunger, and schools without books and homes without heat in the winter."

"I believe that, as long as there is plenty, poverty is evil."
Another wise man said he wanted to change things and have equal economic education; he was John F. Kennedy, president of the USA.

Twenty one days later he was dead. His brother Bobby liked the idea and also saw the vision of equal economic education. He was assassinated shortly after.

Martin Luther King said why bus people when equal economic education would save more money. He did not live long. On his death bed a CIA agent last year said that the CIA killed Kennedy because of his education policies. This was reported on FOX news.

Another president on reelection said that equal economic education was the way to the future. Nixon was his name and assignation was so overdone, so they trumped up a small charge of Watergate cover-up and got rid of him. There are forces that don’t want this topic discussed. And they have attacked me violently and tried to stop my movie “Equal Economic Education” from being seen. The rich don’t want to share with the poor as we see with the recent health care turmoil.
The Geek-lizard mind
Jesus taught us that the Meek will inherit the Earth. But today the Geek have stolen the Earth. The lizard mind of the Geek has taken over every aspect of our lives. Paper pushing, picayune, petty minds that over analyze and over regulate our lives. This Geek mind is selfless, without compassion, loveless, over critical and over demanding.

The Geek mind is lizard like. It is cold blooded and slithers with evil self serving control. Geeks do not believe in God. They do not believe in prayer. They want to stop anyone from learning of the power of the mind. They will try to stop this book. They do not want a message about the powers of the mind, the seeds of sin in the mind, or the ability to transcend.

The Geek mind is small and tries to impose limitations and restrictions of freedom. The Geek mind is petty, over picayune and over conservative. The Geek mind cannot accept the powers of the mind, because the idea that the mind affects things is counter to his basic belief that the mind restricts things. He fears and abhors freedom of spirit. Expansive great spirits who see holistic outstretching visions are the enemy of the Geek. The mediocre confining mind of the Geek will give incredible resistance to any great spirit it encounters.

This in itself is a proof of the powers of the mind, as that the nature of the geek mind is to impose its nature of restriction onto the things it perceives. Often small minds will gravitate to a position of power. Thus many regulatory positions are taken by some to compensate for their petty feelings. They then can lash out at greater expansive minds and find a way to attack them. There is definitely a power of the mind to effect things. This is proven by quantum physics and even medicine needs to do double blinds because the mind of a researcher can affect an experiment. Ninety nine percent of the people believe in a world where prayer, spirit, God, psychic connection, and religion exist. The mind has power. We have the right to believe this and the scientific evidence is undoubtedly conclusive.

There is indeed a non-local universe and it has been proven that the mind can affect things (see the movie Proof and the Journal on Proof of the Powers of the Mind). The geek will try to play psychic and pretend that he can put down the book and move without watching it or reading it. And it seems that playing psychic is not in the character of the geek. The first step in this process is to understand that the mind can affect things. The effect is small and we cannot control things but the mind affects things. The small mind of the geek has difficulty accepting this truth because it is counter to their basic small mindedness. Motivation greatly determines perception. Accumulated perceptions construct beliefs. And a false belief is very difficult to disband. The smaller the mind, the more it can cling to a false belief.

People hold to their beliefs and especially false beliefs. Geeks hold violently to their false beliefs. One of their false beliefs is that they are not a geek when actually they are. Some of the most closed minds I have ever met will swear they are open minded. Their small minds see their small mind as big, when it is not.

We Have a Conflict about the EPFX/SCIO medical device.
1. The EPFX/SCIO Biofeedback is medical therapy.
   The geek often is not aware of just what happens in the real world of medicine, but to all involved in medicine EPFX/SCIO Biofeedback is sound and valid medical therapy.
   Biofeedback builds awareness. Awareness helps the mind to affect itself and the therapy comes from self regulatory powers of the mind.
2. Stress reduction improves Health.
   The evidence of the psycho-somatic disease was astounding. Now the evidence of the psycho-neuro-immuno-soma link is profound and completely proven. (See the PNIS journal of the IJMSHl). But here again the geek cannot accept that the mind can be a part. If the mind is part of health then so is the Geek mind. And this is intolerable to the geek.

The rest of us can see that stress reduction can help stimulate circulation of blood. Blood brings oxygen and nutrients and carries away toxins. This is a good thing and stress reduction of excess muscle tension helps.

The rest of us can see that too much stress can over stimulate the sympathetic nerves and sedate the para-sympathetic nerves that control immunity and digestion. There are thousands of scientifically proven ways that stress reduction can improve health and thus help any disease known to man. But this thought is too expensive to the geek. And the geek hates to be lectured to; he hates to be found out as a geek.

The rest of us can see that stress reduction and biofeedback is empowering to the patient. But the geek fears and loathes empowering anybody. His basic personality is to disempower people. He likes to restrain powers and limit all situations he sees.

The rest of us can see Stress reduction improves everyone’s Health.
3. Biofeedback as Bioresonance, Bioresonance as Biofeedback. EPFX/SCIO are both.

Here science of the body electric comes into play. We can safely measure the body electric and in a cybernetic loop use a biofeedback cascade to induce certain bioresonance. This can be helpful and still allows us to be in the confines of biofeedback. The limitations
of the original regulatory requirements, known to the FDA as a 510k, can be adhered to and still the expansive mind can stay in the 510k box but reach out to people and find a way to safely help everyone with the EPFX/SCIO.

After over twenty years of use, over 200,000,000 patient visits, there has been no record of any significant risks. There have been over two hundred studies published on the device and the large study involved 2,500+ therapists, 97,000+ patients, and over 275,000 patient visits. All certified and inspected by governmental agencies. The conclusion on the EPFX/SCIO was total safety, results in over two hundred diseases, and effective stress reduction. The geek is now twisting in his chair. His small petty instinct is to doubt this, as it doubts everything. That would be fine and doubt we can live and work with. But some geeks go extra and feel that there must have been a crime. They play psychic and assume that no one could be so expansive and intelligent to do this and this person must be illegitimate. This assumption then cuts off the communication and an adversarial attack ensues.

There is an extra level of geek suspicion in America today. The legal system is very adversarial and often over reactive. A close inspection of the Seattle Times article on me will see that there is no evidence of any impropriety. No one hurt, no one deceived, and no one put at risk. All of our therapists are trained to work with the medical system and if the need for medical care exists of course it is recommended.

Our EPFX/SCIO device is proven safe and so effective that people get such good results and want to share these results with their friends. Their overzealous enthusiasm can be too excessive. We are constantly trying to contain their enthusiasm and restrain the zeal.

I am just an electrical engineer, scientist, medical professional who has designed a totally safe energetic medical device, EPFX/SCIO based on good science. I registered it as a legal system of biofeedback for stress detection and reduction. Now after two decades of use with no record of any significant risk, hundreds of peer reviewed medical articles, a vast multitude of case studies and testimonials, I am attacked because the EPFX/SCIO works. Or am I attacked because it is drugless. Is my courage to defy norms of sexual identity and medical tradition the problem?

My iniquity seems to be too much make up and too high a heel. Many fear my intellect and charisma, as I am seen as a threat to the pharmaceutical companies. I am not. I can appreciate any direct inquiry, any open challenge, but let’s drop the adversarial unpleasantness and let’s work together to help make America safe and progressive.

Geeks do not believe the following:

1. Biofeedback is therapy.
2. Stress reduction improves health.
3. People have the Freedom of Speech and Freedom to Choose.
4. People have the Freedom of Speech and Freedom to Choose.

Geeks hate freedom. Any type of freedom is an expression of expansion of spirit. Geeks hate expansion. They want things to be anal retentively controlled. Whatever a geek sees he wants to reduce and confine. It is a reflection of his small petty mind. When big thinkers see things they want to expand the vision, to magnify to effect, to accomplish more, and reach beyond. Geeks will be very annoyed by large thinkers. They will attempt anything and try to twist and rationalize; the geek may even lie and misconstrue to attack the Great Spirit. Geeks think that People should do what is expected and no more. Freedom is not in the geek language.

When someone has tremendous results from the EPFX/SCIO they want to tell people. The geek wants them to be quiet and doubt. The geek wants them to go to the same doctor they do and take the same medicine and do the same things that are expected. The constitution gave us freedoms and the geeks aspire to take them away. It is a constant balance.

Geeks do not believe the following:

1. Biofeedback is therapy.
2. Stress reduction improves health.
3. Biofeedback is Bioresonance.
Bioresonance is Biofeedback
4. People have the Freedom of Speech and Freedom to Choose
5. The mind can affect things. Prayer works.
This is the heart of the conflict. These simple truths are very antagonistic to the small petty minds. There are no damages no complaints just a conflict of expansive minds versus petty geek minds. The problem with the EPFX/SCIO device is more with the geek minds than with non-compliance.

Towards a New Science for Medicine
The end of degenerative disease
One of my jobs as the Angel of God is to bring an end to degenerative disease as the predominant killer. To do so has taken a lifetime of dedication persecution and violent attacks from so many small petty minds
Powers of the Mind
The Bible says “that as a Man thinketh, so is He”. Jesus, when asked about what food to eat, said it is not what goes into the mouth that defiles someone but what comes out. In fact the Bible, Koran, and all of the religious books abound with references of how the mind affects the body. Prayer and its ability to help people is a basic believe. This was all general knowledge many millennia ago. Our science has now proven these beliefs even further.

But today the antiquated science of medicine and small minded doctors have a hard time accepting this fact.

Quantum Theory
Mendeleeev made a chart of the elements based on his observations. Then later it would be learned that this organization of the chemical elements was because of the quantum states of the outer electrons. Quantum theory alone gave us an understanding of chemistry. But quantum theory has the observer effect where the mind of the observer can affect the outcome. Medicine seems to have an unstable phobia and an over compensative distaste for the powers of the mind.
The small petty minded Geeks have such disdain for the message of Quantum Theory. They have struggled against it for decades. The Geeks like reductionism as that they like to reduce things with their small minds. But yet Quantum theory has grown and prospered in Science and despite the attempts of many has succeeded as the pinnacle of science so far.

Electronics
Science developed a basic understanding of electronics several centuries ago. Electronics made a major boom in technology. It allowed us to understand so much of the world. But modern medicine has resisted an electrical analysis of the body. Yes technology allows for tech measures of the body, but there is little analysis of the body electric. Energetic medicine of Dr. Nelson defines a process to explain the body electric. But the modern medicine fixation on the financial hold of the synthetic chemical industry has prevented a progression of medicine into the modern age.

Nearly a century ago, quantum research overturned the 17th century mechanistic paradigm of “world as a machine,” within which phenomena are to be understood by reducing them to their parts. Reductionism worked for making cars, buildings and was so valuable to our society. But reductionism fails in a complex situation.

Electricity was then explored and a new set of rules were made. One hundred years ago electricity stepped up to explain more and more. But still so much was not explained. In the last hundred years the theory of Quantum Physics was the next advancement. And over the last 60 years the advent of QED has been hailed the king of current science.

The next step of science to come is the subspace connection of consciousness. The physical world has been reduced to a computer. This is quantum states of consciousness

Dr. Nelson defines a process to explain the body electric. Energetic medicine of Dr. Nelson defines a process to explain the body electric. But the modern medicine fixation on the financial hold of the synthetic chemical industry has prevented a progression of medicine into the modern age.

Nearly a century ago, quantum research overturned the 17th century mechanistic paradigm of “world as a machine,” within which phenomena are to be understood by reducing them to their parts. Reductionism worked for making cars, buildings and was so valuable to our society. But reductionism fails in a complex situation.

Electricity was then explored and a new set of rules were made. One hundred years ago electricity stepped up to explain more and more. But still so much was not explained. The next step of science to come is the subspace connection of consciousness. The physical world has been reduced to a computer. This is quantum states of consciousness.

The Electro-magnetic-static connection to biology
All biology is electrical in nature. Medical implications of electrical or energetic measurements can be introduced by this chapter.

Electricity as an electrical entity travels in the direction of, for example, your right thumb. Then for conduction of the electron, there is a magnetic field produced at 90E, and a static field will be produced at another 90E. This electromagnetic and electrostatic combination and its effect on conductance and from conductance is the basis for understanding electrical phenomena.

All of biology is electrical in nature.
But yet modern medicine has been so dominated by the Synthetic Chemical Companies that there is little investigation of the body electric in daily health. But the Angel has spent over three decades validating and proving the basic concept of energetic medicine.

**Let's now explore the basis of QED**

The theory of interaction of light with matter is called Quantum Electrodynamics QED. Simply put, QED tells us that any minuscule quantum change in a part of matter will involve the release or absorption of a photon. When an electron absorbs a photon it jumps to a higher quantum energy state. When it releases the photon it goes to a lower state. Also there are virtual particles, especially virtual photons, coming in and out of existence in the universe. The subject is made to appear more difficult than it actually is by the very much overly complex mathematics that constitutes the proof of the theory. One of the simplest is that of Fermi. We start by just postulating for the emission or absorption of photons.

Light absorption is the key to the process of photosynthesis. The light of the sun is absorbed by the plant which converts low energy electrons around the nuclei of minerals and nutrients from the soil, to high energy electrons around the plant products. The animal then eats the plant and gets the carbohydrate energy of the “Hot Electrons” to make ADP and ATP the needed compounds of life. The low energy ionic bonds of the minerals are converted to high energy covalent bonds in plants and animals. The master equation of life is in the next diagram:

Only through QED can we start to understand life. But this proves that the synthetic chemicals are incompatible with the animal kingdom. Only nature knows the secrets of the proper energy states for the outer electrons. A secret the SINthetic chemical companies do not know.

**Fractal Theory defeats reductionism**

Chaos theory gave us an enlightenment that reductionism does not work in complex systems like the human body. Fractal dynamics teach us that the reductionistic model fails in biology. In an overly complex closed system Fractal dynamics are unpredictable. Reductionism is completely invalid.

The Rules of a Fractal System are 1. Nothing ever repeats exactly as before, 2. Small changes can prompt very large and dramatic effects, 3. Observer effects and the mind can have effect on a complex fractal system (prayer works). Reductionism is the process of taking a complex situation and reducing it to simple terms. We reduce the weight of a building to a simple vector to calculate the strength of a building.

But yet modern medicine has been so dominated by the Synthetic Chemical Companies that there is little investigation of the body electric in daily health. But the Angel has spent over three decades validating and proving the basic concept of energetic medicine.

**Factors that influence the body voltage and membrane potential are fatty acids in the cell membrane, minerals, especially salts, hydration water, oxygenation, stress, toxins and life style.**

The SCIO has been proven in tests to increase the electrical potential of the body. Increased cellular membrane potential makes osmosis increase, which increases detoxification, nutrient transfer and absorption, hydration, oxidation, and all cellular functions in general.
The human body has over $10^{18}$ cells. Each cell is more complex than we can presently imagine in our verbal minds. This complexity makes our bodies a fractal. Reductionism cannot work for medical analysis.

When the drug companies wanted to test a blood pressure medication, they reduce the patient from the complexity of life to a simple variable, blood pressure. They test the blood pressure before, the pre test. Give an intervention, the drug. And then test the blood pressure again, the post test. They do not test the side effects, they observe them. This is important because they can only observe gross side effects and still they get by. If they would have tested the blood sugar, they would have found out that all patients taking certain blood pressure medications get some degree of diabetes, every one of them. If they were to test all variables for side effects, it would cost too much to do testing. And there are not enough people to do the test for statistical satisfaction. There are not enough rats. There are not enough fruit flies. The statistics of total protection against side effects are killing not hundreds of people, not thousands, not tens of thousands, but millions of people every year.

### Scientific Principles of Voltammetric

**Trivector Analysis**

1. The liquid crystal nature of the polar substance water is a well known scientific principle.
2. The memory of water to retain and return to its crystal polymorphic shape structure is also well known. *(This memory is destroyed by a. Heat above 55 degrees Celsius b. Strong order such as camphor, c. Ionizing radiation (X-rays). Magnetic fields can distort the shape but the water memory will return after the magnetic field is discontinued. This is the principle of magnetic resonance imaging. Water will remember its crystal structure and always seek to find its shape or polymorphic state)*
3. Electrochemistry (polarography, Polography, chronopotentiometry, volt-ammetry) is standard accepted principle of modern chemistry for chemical analysis.
4. The dynamics of the chemical information transfer of hormones through shape receptors in the cell is the basis of all pharmacology. All hormones work by stimulating these shape receptors. The plasticity of these receptors has allowed synthetic hormones to exist.

### Synthetic failure

Our society has rejected synthetic foods. Society has tried the synthetic experiment and it failed. The synthetic foods made cancers and diseases. We will not choose them from a menu; we will not buy them from the shelf. We know from the gourmet that the finest quality is always from the natural. This is undoubtable. It is just a simple step of intellect to see that it is also true about our medicines as well.

In the IJMSH of 2009 there is an entire issue of the failure of the FDA to protect people from these side effects of synthetic drugs. We spell it SINthetlic. It is a sin to kill so many in the name of profit and ignorance, ignoring the benefits of natural medicine is ignorance at its ultimate ignorant best. All justified by reductionism. A science not used today by anybody but medicine. The reductionistic methods of drug testing are killing millions and wounding many many more. But big money is hard to beat, especially when there is 30 billion spent by the drug companies on political lobbying alone in America. Fractal non-linear science has stepped forward to help us understand medicine.

Synthetic Chemistry is polluting, corrupting and poisoning our bodies and the world. They now have SINthetic patents on living things such as bacteria and animals. A toxic chemical has a half life and will gradually be destroyed. A toxic organism however will proliferate and grow maybe to destroy our existence.

Science is always proud and feels that today we know enough to duplicate nature, to make synthetic foods etc. In the next few years new discoveries will tell us that what we did the last few years was wrong and silly. But then the scientists make the same mistake they have made for the last centuries. We do not know enough to duplicate nature and thus we should bring humility back into our science and especially our medicine.

When it was developed in the 1920s, quantum mechanics was viewed primarily as a way of making sense of the host of anomalous observations at the level of molecules, atoms, and subatomic particles that could not be explained in terms of older mechanical models. Now, in the 21st century, most physicists are confident that quantum mechanics is a fundamental and general description of the physical world. Indeed, quantum ideas are now being applied to understand the workings of consciousness, environment, electromagnetic field.
interactions, low-dose healing effects, non-local phenomena, and many other observable phenomena that are unexplainable with an outdated mechanistic world view.

During the last century, traditional medical and philosophical practices, such as Traditional Chinese Medicine, acupuncture, Qigong, Tai Chi, meditation, homeopathy, naturopathy, and mind-body techniques considered “esoteric” by the largely ignored while the world’s attention was focused solely on drugs, surgery, radiation, genetics, and other invasive and reductionist approaches. Approaches that make money for the synthetic chemical cartel. But these synthetic therapies are failing. One by one the synthetic pharmaceuticals are being discredited. With massive public pressure to support research of safer Complementary and Alternative Medicines (CAM), and with athletic communities seeking effective drugless performance advantages, significant funds are moving in those directions.

Quantum physics and non-linear mathematics are providing scientists with better models for understanding complex systems and subtle interactions, like mental, emotional, environmental, and electro-physiological interactions in the human body. With new ways of measuring and verifying energetic and quantum events and their effects on health, disease, and performance, scientists are re-igniting interest in traditional healing techniques, and the field of subtle-energy medicine is emerging. One of the most exciting and promising fields of CAM involves bioelectromagnetics (BEM) - the study of electromagnetic fields (EMFs) and their biological effects. Based largely on biofeedback principles, BEM diagnostic and healing devices are well entrenched in mainstream medicine already, but scientists are really only beginning to realize the practically limitless potentials that this field offers. Focus is given to the most advanced biofeedback energetic medicine technology, the EPFX (Electro-Physiological-Feedback-Xrroid) or also known as SCIO (Scientific Consciousness Information Operating System), which combines mind-body-spirit-social-environment interaction training with a methodology of applying micro-currents at various frequencies to the body, measuring feedback, and utilizing the resultant information for stress reduction, education, behavioral modification, and self-adjusting cybernetic correction (an historic innovation exclusive to the SCIO).

Proof of the incompatibility of synthetic compounds

1. Quantum Electro-Dynamics has proven that just putting the atoms such as calcium or copper in its place in a compound is not enough. Plants through photosynthesis and QED place the electrons in the correct places of energy etc. Synthetic chemistry does not do this at all. Geeks fear the word Quantum for it implies expansive thinking.

2. The realization of Fractal and Chaos mathematics has shown us that reductionism has failed as a technique for safety and efficacy of new drug. The side effects are not measured but just observed and thus are not fully controlled. 80% of drugs FDA credentialed involve payout to FDA staff. The amount of profit potential is incredible. It takes many years to find out just how much damage a drug does. Every year many drugs are removed from the market place because they hurt people. New drugs are put into place and the cycle renews.

3. Allopathy does not work as a form of medicine.

4. Doctor prescribed drugs are one of the most prolific killers. Over a million die each year from Doctor prescribed drugs. Millions more are weakened or sickened from synthetics. Sometimes the disease causing effects of synthetic medicines take years and decades to demonstrate.

5. The social experiment of synthetic chemistry is over. We have had synthetic chemistry foods and medicines for almost a century. The verdict should be clear. Synthetics are not compatible with a human and they are all dangerous. Only people who make money from their sale or are trained only to use them would argue. Our society now
 knows to not choose synthetic foods, to not use synthetic things. We know that the finest quality is from nature. The gourmet uses natural ingredients, not synthetic. Our society realizes this for our foods now. But the geeks do not want them to think that the same is true for our medicines.

6. At the very least, in the smallest manner, it should at least be a matter of opinion and a freedom of choice for informed consent for any use of a synthetic medicine. But small minded geeks hate freedom and struggle with expansive minds. Synthetics are reductionistic and thus small minded people love reduced things. Natural medicines and homeopathy do not make much money and thus have little funding.

**Psycho-somatic and soma-psycho disease**

Medicine was shocked to see that there was indeed a set of diseases that were psycho-somatic. The mind can affect the body. The largest type is the stomach ulcer or other gastric disturbance. Here stress upsets the sympathetic neural balance versus the parasympathetic.

There are also soma-psycho diseases such as when hormonal disturbances produce mental abnormalities. Medicine was shocked at the proof of this. But this threatened pharmaceutical sales.

As time goes by the list of possible involvements from psycho-somatic and soma-psycho disease grows and grows. Till now there is overwhelming evidence that there is mental involvement in over 80% of disease.

Stress detection and stress reduction then become an integral component in disease care and thus health care. There is an overwhelming evidence for a Psych-Neuro-Immuno-Soma link this is so well documented as to be an irrefutable fact. But still some over fastidious small minded geeks will reject this truism. In the PNIS issue of the journal we see more collective evidence.

**The end of degenerative disease**

One of my jobs as the Angel of God is to bring an end to degenerative disease as a predominant killer. To do so has taken a lifetime of dedication persecution and violent attacks from so many places. First we must confront the failure of the FDA to protect Americans from degenerative disease. Let’s review the largest killers.

What’s really killing people in the world today is number one: Big Tobacco. This is the number one killer. David Kessler was the head of the American FDA in the 1980s. And when I met Kessler at an FDA meeting he was going to do his job to protect the public. He met him at a meeting in Salt Lake City, Utah and he said he wanted to go after the most major risk to health, smoking. That his job was to protect the American people, included that he should go after big tobacco and to clamp down and to make sure that the people were protected. He was denied that. He was stopped from doing that. He quit the FDA, unable to do his job, as he said. Big tobacco is killing over a million people a year.

The next leading killer is factors that are related to Big Sugar, Big Sugar for its corporate name. As people who get bad sugars and bad oils, trans-fatty acids and cooked oils. Factors of bad nutrition in America are making people sick, producing blood sugar problems, producing obesity, cardiovascular problems, and many, many things that the FDA could also affect. Limiting trans-fatty acids, making good sugars (Left handed Fructose), rather than bad sugars (right handed Dextrose). The body needs right handed sugar (Blood Glucose) to enter the cell for energy. Right handed sugars such as sugar cane, beet sugar, grape sugar, corn sugar are right handed and they...
enter the cells too fast. This produces fat more easily, hyperglycemia (mild addiction) and then hypoglycemia (mild depression). This puts a burden on the pancreas, the eye and other organs. There is also a well documented negative effect on the immune system from dextrose. If you use chemicals to strip away vitamins and minerals to make the sugar white, and it gets even worse.

Fructose revolves to the left and needs to be converted to the right. A process that takes time and thus allows for a more smooth delivery of the glucose. Less fat, less stress on organs, less craving, less depression, less blood sugar fluctuations. More hormonal and enzyme production thus it is an anti-aging therapy. Use fresh fruits as a sweetener; it will change your life.

Crazy food additives that have not been fully tested add to the food and drug problems. The synthetic foods and drugs have failed. Our society has learned to avoid and mistrust synthetic foods. We will not order them on a menu or buy them of the shelf. We have learned to be chemophobic. We know that synthetic foods create cancer and disease. Our body needs good fatty acids. They make up the cell membrane of all of our cells. Stress sets them free. Cooking destroys most fatty acids. Meat and potatoes contain very little.
In fact the fatty acids from an animal are saturated. Fresh and raw vegetable and unheated vegetable juice are the best source. Bad food is a problem in degenerative disease. And this is also another industry the FDA is not attacking that the FDA is not doing their job to protect the human beings of America. Big Sugar and cholesterol are leading to diseases that are killing over a million people a year.

In the next category is allopathic doctor prescribed drugs. The medical doctor prescribed medicines are the third largest killer of people Big Pharma. Big pharmaceuticals are killing in the neighborhood of some 600 -700 thousand people a year.

If you read Gary Null’s books he makes a good case for well over a million. By all of these statistics, Big Tobacco, Big Sugar, Big Fast Food, and Big Pharma, collectively Big Money they are in the neighborhood of directly 3 million deaths a year in America alone and possibly 10 million complicating factors creating an incredible burden on the health care system.

Big Money and the Ultimate Profit Motive of Blind Greed is the culprit. Primary and secondary Deaths from Big Money total over 5 million a year in America alone. But that is a mortality statistic, if we evaluate morbidity and the erosion of health from Big Money we see that there is possibly one tenth to one fifth of the population being affected in negative ways. In other words degenerative disease is over 90% a factor of Big Money.

But the lobby groups of Big Money are so persuasive and powerful and those that attack them are violently attacked such as myself. Rather than go after a problem, if the problem makes money, the geeks will attack the messenger, anything but listen to the message. Can we then ever get rid of degenerative disease?

We need to embody a new theory of health care. The Hans Selye theory tells us that the cause of disease is a stressor.

HEALTH is EASE of Flow in the body
THEN ENTER STRESSOR (TOXIN ETC) - enters produces Dis-EASE
1. ALARM = Reaction to a stressor symptoms are the alarm
   if stressor continues then
2. ADAPTATION = symptoms go away as we adapt
   if stressor continues then
3. EXHAUSTION = the stressor burden the organs
   if stressor continues then
   a. FUNCTIONAL = first the stressor effect the organ function
   b. ORGANIC = then the organs start to swell or shrink
   if stressor continues then
4. DEATH = cellular, organ, organ system, organism death

In Step 2 the Adaptation state, we see that the stressor continues and the symptom goes away. The person adapts to the Dis-EASE of flow. The Symptoms go away. The person continues to get sick. And we come to the most important thing for all of medicine to know:

**Being Symptom Free is NOT an Indicator of Health.**

**You can be really sick and symptom free.**

Symptoms can no longer be a basis for medicine. Allopathy is the medicine of symptom reduction it is the basis of all modern medicine. ALLOPATHY DOES NOT WORK AS A FORM OF MEDICINE. In a survey we did in America the current medical doctors do even know that they are allopaths. They see symptoms not as a sign of disease they see symptoms as the enemy. They attack them. In order to live we must detoxify and then nourish. Everyone has a toilet. Our major detoxes include stool, urine, sweat, breath, skin, menses, hair, etc. in an ever increasingly toxic world we should expect more detox. Excess stool, urine and if there is any excess or irregularity of detox the medical doctor will attack the symptom.

A friend of mine a young girl age 18 was going to the doctor one day. She said she had too much sweat and the doctor was going to give her baptize shots to stop the sweat. I told her that the sweat is natural for a person under stress of growing and making life decisions and if you eat too much pig and bad food.

But the medical doctor was only concerned with blocking the symptom. And I asked her if you get diarrhea would the doctor sew up your ass. Allopathy does not work and is a great problem in medicine.

We can see the importance of stress detection and stress reduction. This form of medicine is a more true form of health care where nowadays medicine is much more positioned at the end of this scale. In other words a heroic medicine, a disease care system designed to stop you from dying.

I have spent a life time trying to build an educational system and a program to make health care more available the Nelson Method of Medicine is as follows.

1. Reduce the Causes of Disease
2. Repair the organs weakened by the Causes
3. Unblock the Blockages to energy, nutrition, Oxygen, waste FLOW
4. Treat the symptoms with natural means before resorting to Synthetic
5. Balance the metabolic typing or constitutional imbalances

The next step is to design a system to work with the body electric. A system to use the advances in science such as electronics, fractal chaos and Quantum Electro Dynamics. A new style of much more modern medicine. A device to find disease at the earliest level and reduce it.
I have been able to make such a machine in 1985, legalize it in 1989, and sell it around the world in compliance fashion. It is completely tested, safe, completely tested, and effective. It works and it helps people in many different ways.

The frustration of lack of education and the lack of opportunity it conveys, leads many of the poor children to resorting to drugs and crime. Addiction develops and spreads. Equal Economic Education will also help the society reduce degenerative disease and the costs it incurs. As well as when there is better education there will be more intelligent selection of foods and the ability to resist drugs.

I have dedicated my life to helping reduce degenerative disease. If we can see the problems of Big Tobacco, Big Sugar, Big Pharma and just how the medical community fights any change.

I have dedicated my life and intellect to make a new system of medicine and the tools to do it with a system that is safe and effective. But instead of me being applauded for the work that I have done, I am attacked. I am vilified. If you read the EPFX/SCIO testimonials you will see incredible results. As you read these testimonials, these stories, recognize that this is the tip of the iceberg. Is that we have been hearing these stories for 20 years. The wondrous stories of how people’s lives have been changed.

So to end degenerative disease we must
1. Make Big Tobacco pay for the damages they incur, if there is freedom of choice, then why cannot people choose natural of energetic medicine?
2. Make Big Sugar pay for the damages they incur, Use dextrose sugar for batteries not food.
3. Make Big Pharma pay for the damages they incur, first do no Harm in Medicine.
4. End Allopathic philosophy and develop a new stressor reducing based medicine
5. Avoid Bad sugars white processed. Eat Good Sugars from fresh fruit, Avoid bad oils cooked or saturated. Eat good oils from fresh and raw vegetable and uncooked low temperature made oils.
7. Safe forms of early intervention medicine such as energetic biofeedback
8. Recognize the powers of the mind to cure and remedy the diseases.
9. Recognize the need for an energetic medicine to safely evaluate the body electric and balance the aberrations of the body electric. We need to use a more modern medicine utilizing the body electric without emphasis on synthetic chemistry.
10. Recognize that the Sinthetic experiment has failed and we should be using the synthetics only in extreme cases when the natural remedies fail. Quantum Electro-Dynamics has further proven the problem of synthetic chemistry.
11. Allopathy does not work; we must adapt a safer and more extensive theory of medicine.

With these social changes degenerative disease could be so greatly reduced to allow for an inexpensive medicine. This text is just an introduction and if you want to know more go to the medical journals or the books or even the movies.

People will say that Tobacco is a choice. There is freedom of choice to smoke that is why the regulators allow the cigarette companies to exist, even though they kill so many. But the regulators do not allow freedom of choice to choose energetic medicine. Freedom of choice means nothing to the bureaucrats of the Ultra Rich, it is all about profit. This massive hypocrisy undermines the foundation of the FDA and all Health regulatory officials. They attack energetic medicine because it is drugless and it dramatically threatens the profits of the Sinthetic drug cartel of the Ultra Rich.

The prejudicial bias of the FDA and other Health Care Regulators and the sanctimonious hypocrisy are perfect examples of the Ultra Rich control and their petty small minded army. Now you see proof of the Ultra Rich manipulation of control to boost their profits while promoting degenerative disease. As to the freedom of choice for smoking, choice is a good thing for an adult. But no child under 18 should ever be able to smoke, and this is happening every minute of every day. This must be stopped.

Cost of Medicine

In light of our current financial crisis, we should address the issue of the cost of medicine. In the countries of the world today, America is not the leader in health care, but for only one criteria. America is not the leader in fact America is way behind in all criteria of health, longevity, child survival, morbidity, disease susceptibility, and all except one criteria. That criteria is COST. Americans pay threw the proverbial nose for health care which is not health care.

America has disease care not health care. In fact the regulatory agencies FDA are not concerned with disease causing industries like Big Tobacco, Big Sugar, Big Fast Foods or Big Pharma. The FDA is concerned with drugless therapies such as natural or energetic medicine, proved safe and effective. The hypocrisy is monumental and financially burdensome for the American people. In fact there is profit in promoting disease for a disease care system.
The Disease Care system in America today is very costly. Tremendous amounts of money are spent on incorrect diagnosis (the AMA statistics show the accuracy of the usual diagnosis in America is less than 30%), synthetic medications that cover up symptoms (vast side effects causing a continued spiral of disease from improperly tested Drugs), useless surgery (the AMA says that over 80% of heart surgery is not needed), and a host of mentally irregular thoughts on modern medicine. And after all of this nobody gets healthier, nobody improves their health, symptoms go away and the disease goes deeper.

When corporations run the Health Care system, profit for the stockholders is paramount. Thus the more disease there is the more profit there is. By definition corporations are psychopathic as that they care about profit over people. So there is no interest whatsoever in making people healthy, symptom control by prolonged medications is better.

A true Health Care system of healthy lifestyle education, early prevention of disease, and safe and natural methods of disease prevention and early treatment would not only make people healthier but would dramatically reduce cost. If people were taught the dangers of high glycemic dextrose foods, if these foods were better controlled, if the dangers of bad fatty acids and Trans fatty acids were controlled, if Tobacco was removed from sale. The cost of health care would dramatically improve.

The angel has designed a new type of medicine after the work of Dr. Hans Selye to help people not to develop disease, and to dramatically reduce
Money is a drug

“Money is drug, and as a drug, it must be a controlled substance. Money can cause addictive behavior which can be destructive to you and your family. The addictive behavior could trigger you to do almost anything.”

Money is a drug. Undeniably! Absolutely! It is an addictive substance. Just look at the works of Machiavelli! Just recognize this man’s solid clarity into the human heart. Recognize that money does affect people! You see, a man might forget his father’s face but intimately will know his father’s property...

Money creates most of the problems around the world. The Bible itself says that “money is the root of all evil”. This may be a bit harsh for you, but it is true. You see, it is a strongly addictive substance which makes people want more and more and more and more...

Let me give you an example: the United States government froze the bank accounts of the Japanese just prior to Pearl Harbor. This was the true reason the Japanese had decided to attack. Think about it: if all of your money was frozen in the bank, I think you might be angry too... Of course this doesn’t justify the attack of Pearl Harbor! But it explains it quite well...

Now, once we have looked at the idea of money being a drug and accepted that it’s an addictive force, we shall start to think over what we shall do with it. I think it is obvious. Just like any other addictive substance, money should also be turned into a controlled substance. There are plenty of substances that our society deemed to be controlled because of their strong addictive qualities. Why not control money as well?

If we really want to get to a 1000 years of peace and harmony, we do have to deal with the stark reality of controlling this ultimate drug.

Now, how can we control money? Well, we have to find ways to set limits to the pursuit of it. This way nobody will get addicted to it and nobody will cause anymore harm to others. In the past, every war initiated by mankind was related to disputes over property.

In other words: over money.

Don’t misunderstand me: I am not trying to reject money. Many people will say this in order to try to refute what my friends and I are doing. But don’t believe them! We are not rejecting money. We just want to make sure that all addictive substances are controlled. So they can’t hurt people! Right now money is hurting people and money is threatening this planet. We are at the point where self interest groups have too much power.

We are not talking about people who make – let’s say – a 100 million a year. We are talking about the guy who makes a 100 billion a year. The giants who are making decisions that put more money into their pocket, and meanwhile possibly result the demise of this planet.

We don’t want to ignore money; in fact we want to embrace it. It’s just as needed as anything else. In the sixties, the young kids – the hippies as they were called – tried to build a society without money. A society based on barter. Obviously it didn’t work, because money helps progress, and economic competition is an important part of life. But still, we shall not forget: money remain an addictive substance, therefore – above a certain level – it has to be controlled.

The story of Andreea Răducan, Romania's gymnast sensation (from Wikipedia.org)

Andreea Mădălina Răducan was born September 30, 1983, in Romania. She began competing in gymnastics at a young age and was training at the Romanian junior national facility by the age of 12. As one of the standout gymnasts of the Romanian team in the late 1990s, Răducan was known for both her difficult repertoire of skills and her dance and presentation. Over the course of her four-year senior career, she won Olympic or World Championships medals on every event except the uneven bars and earned three individual World Championships titles, on the floor exercise in 1999 and 2001 and the balance beam in 2001.

Răducan competed at the 2000 Sydney Olympics where she contributed heavily to the Romanian team’s gold medal and won an individual silver medal on the vault. She was also the original winner of the all-around title, but was disqualified and stripped of her gold medal shortly after the competition concluded, when it was revealed that she had failed doping controls, testing positive for ma huang, a natural herb with ephedra like compounds, at the time a banned substance. She and her coaches maintained that she had been given the substance in two herbal cold medicine pills by a Romanian team physician, and that they had not impacted her performance in any way.

The case generated a significant amount of media attention, and Răducan was supported by members of the gymnastics community and the Romanian public. Her case was brought to the Court of Arbitration for Sport in the fall of 2000. Răducan herself was exonerated of any personal wrongdoing by the CAS, the Romanian Olympic Committee and the...
International Gymnastics Federation, and was not subject to any disciplinary measures. However, her medal was not reinstated, and the team doctor who administered the Nurofen was banned for two Olympic cycles.

Răducan returned the year after the Olympics to win five additional World Championships medals, but retired from gymnastics in 2002. As an adult, she has worked as a sports announcer and media personality, and has pursued University level studies in journalism. They prohibit the drugs because they are an unfair advantage. Now the next Olympics is coming up and you could get the choice of two ma huang pills or six million dollars for training. This is the estimated cost the Americans spend on their athletes. Andreea had to wash dishes to pay for her own training and the Romanian’s spend less the 10,000 us dollars on training for each athlete. Which is an unfair advantage, millions of dollars or an herbal pill, which would you want? And now do you see the real unfair advantage is money and money is a drug.
Evidence based medicine versus Natural Medicine

Introduction

There are two basic theories of modern medicine. One has that SINthetic drugs and surgery are the only way and another camp who believe in natural medicine and safety first. These two need to have some explanation for you to be able to better assay the difference. The evidence based medicine has driven the price of medicine to ludicrous extremes. Cost due to malpractice alone is the fault of the harsh side effects of the synthetic medicines. Add additional costs of side effect management and cascading diseases and evidence medicine is driving us to the poor house. But simple natural medicine is put off because it does not work on 19 out of twenty people in the same way. Acupuncture, homeopathy, naturopathy etc all work in more subtle ways without demanding action at the cost of safety. Profit over people. But the regulatory people like the statistical emphasis of the evidence based techniques. Paper over people.

Evidence based medicine has put the future of the human race in danger. The frantic search to find a new SINthetic drug leads chemical companies to patent hundreds of new chemicals and Genetic Modified food or organisms every day. These things are developed without control. Often they find their way into our children and it takes years to find out the side effects. There is a possibility that one chemical or one genetic modification could stop human reproduction and stop the human race. OOOopps, I am sorry might be the final act of the SINthetic chemical company cartel. Pretty big OOOopps.

Greed is called the root of all evil in the Bible. Arrogance is deemed the root of all evil in the Koran. To ignore a truth is ignorance. The truth is that only nature knows how to make a substance safely and truly compatible with the human body. By ignoring this truth the drug companies show their ignorance. Greed, Arrogance, and the Ignorance of the SINthetic drug companies has driven up the price of medicine, threatened our existence, made excess side effects, made people dependent on their drugs, made some people addicts to their drugs, and severely compromised our safety. To expose this Greed, Arrogance, and the Ignorance of the SINthetic drug companies is the purpose of this book.

So this article is needed to explain the philosophical differences in medicine.

Death by Doctor

Cigarettes and doctor prescribed medications are killing millions and lead the causes of disease in some listings. But money seems to divert the agencies from their real job of defending people from harm to attacking small concerns like homeopathy and biofeedback that
Addiction, immaturity and dependence are all capitalized on by drug companies.

The Downward Spiral of Modern Medicine
(Why Synthetic drugs, Allopathy, and Evidence Based Medicine do NOT work safely)

People want to save money and not be cheated in Health Care. Statistics of Mechanics show that you must get 19 out of 20 to be significant, this is not fit for a sensitive Fractal system like the human body but it was used anyway.

To get such results you must be harsh and risky and Synthetic were designed for such action Statistical Research is costly, Synthetic design is costly, this needs investors, investors want only guaranteed return, corporations are more concerned with profit than people. It is too expensive to test all side effects, so side effects are observed not tested, most of the Synthetic drugs are shown to be harmful and later taken off of the market.

There is a downward spiral of safety and an upward trend iniatrogenic disease. The philosophy of making money, the synthetics, the philosophy of just treating symptoms, and the unchecked profits then lead to a cascading downward spiral of safety in medicine, a upward spiral of damages and malpractice, more disease, more side effects, more dependencies on drugs, more drugs, more profits for the drug companies. This constitutes the proof that there is a group of incredibly rich people who control most of our lives and they manipulate the rules to do what they please, even to the point of murder.

Studies on the SCIO were started and published in peer reviewed journals some over 20 years ago. There have been a host of studies done to firmly establish the safety and efficacy of the stress reduction capacities of our technology. There are current studies being done worldwide. Biofeedback is a standard type of device that we use in standard ways. Stress reduction is the single claim. We can claim literature or studies to qualify our device. Our new studies have been published in a peer reviewed medical journal; an electronic copy will accompany this letter.

Maturity is the ability to see the consequences of our acts. The more mature a person is the more into the future he can see. We need to try to balance symptom reduction with mature vision of long term health. It is a shameful fact that most people are immature. A small reward today such as the cigarette is more important than a large punishment later, like a slow painful death from lung cancer. This makes addiction possible.

And dependency is what the drug companies love, for people to get dependent on their drugs. And a small reward like symptom reduction is greater than the large punishment of side effects and a life of dependency later. Addiction, immaturity and dependence are all capitalized on by drug companies.

children died in one month in the pediatric hospital. The thought was that there was some unknown infection so extra cleaning chemical were used and the next month 22 died. There was fear and more cleaning was done and the next month 29 died. Till they found that it was something in the synthetic cleaning solutions that was the culprit. But the press made little of this story they were still going on about the diabetic boy. In fact literally thousands approaching millions of children die under the care of SYNthetic patent medicine evidence based medicine every year. It is extremely negligible the deaths in natural medicine. Research has shown that the more educated and intelligent you are the more likely you go to a natural doctor for help. This is because an intelligent assay will show that profit of the chemical companies is not more important than the safety of people. The financial power of the drug companies and the petrochemical cartel is extreme but people are not going to be fooled forever. And choice is not going to be taken away from them. The media slants against Desiré and spreads lies, rumors and slander. Stating medical facts that offend the chemical and tobacco companies and the regulatory agencies that defend their income, is assumed to be illegal by some small minded people. Having a different viewpoint of medicine is assumed to be wrongful by these small minded puppets of the drug company cartel. They feel that having companies.

Anyone who protests the drug company control is persecuted and prosecuted by the small minded geeks of the regulatory agencies who are the duped lackeys of the drug companies.

Media is owned by Drug and Petrochemical Companies

The media is owned and controlled by the chemical cartel behind the SYNthetic drug companies. A story came up In Denver years ago of a 13 year old boy of parent who were of a religion that did not believe in giving drugs of any kind. The boy died and it was suspected that because he was diabetic and his parents denied him the insulin shot, that this was news to the media. The media twisted the story to accuse the parent of killing him and to make fun of the religion. An intelligent mind would ask the statistical question of comparing the total population of children who go to the SYNthetic medicine doctors with the total number of those in the religion who do not. This analysis is incredible. The survival rate of the religion is vastly higher than the evidence based medicine group. If we look to the large group statistics we see that natural techniques will win out. The media and small minds (who own drug company stock) will want to only look at the one case. A larger look would see that the rate of diabetes is even much lower in the natural group.

The same year in Denver 12 newborn
the intelligence to see the profit the drug and tobacco companies have and how they seek to defend their profit is wrong. The persecution against me is extreme, but I won't give up my rights of freedom of speech.

As to the right of free speech, the key issue the people need to discuss is the issue of proven excellence. Medicine was built on ideas like FIRST DON'T HURT. This is a fundamental issue that all doctors pledge to in their Hippocratic Oath. And Medicine is now divided into two camps, one of natural medicines that hold first don't hurt as paramount, and evidence based medicine that holds profit as the highest priority.

Evidence based medicine clings to an antiquated type of statistical analysis of reductionism. A single variable is most often tested as the subject is reduced from his fractal complexity to a single set of measures. Side effects are NOT measured, they are observed. This dramatic difference means that since an experiment might measure blood pressure, blood sugar is not measured in the experiment.

If blood sugar was measured maybe in the past blood pressure medications that caused diabetes might have been diverted from the market. History is full of examples of side effects discovered long after a drug hits the market. It is assumed that all synthetic medicines have side effects and all synthetic drugs list them. To get evidence action we need to use massive amounts of a drug to get 95 people out of one hundred to have the same response. This is the fault of the statistical logic.

Natural biology does work like this, it is more subtle and fractal. Action is not demanded at such a statistical extreme, nature is more easy flowing. Nothing healthy in nature demands such action. Thyroid hormone in the body works with just a few molecules of hormone. To get statistical results, massive amounts of synthetic hormone are needed to get action statistically. This large amount interferes with regulatory processes, homeostasis etc.

The thyroid has hundreds of functions and many many more hormones than thyroxine T3, T4. The Synthetic form does not help secondary thyroid functions such as thyracalcitonin needed for bone calcium. So bone loss is a side effect of synthetic thyroid, as is depression, dementia, and Alzheimer's. Dependency is the result of much of synthetic medicine. This helps to make profit for the chemical companies, number one directive.

In my Book “Receptor” I go through the whole of the Synthetic pharmaceutical industry main types of drugs and show how unnatural and what exactly each does. This expose' is an eye-opener to any still thinking that the drug companies love you. They love your money.

Natural medicine as an industry does not require or demand such action, safety first is the dictum. The public think that side effects are managed in synthetic medicines, but iatrogenic...
of mostly the synthetic drugs have a different prime directive. Evidence and statistics are not cheap. They cost money. Money from investors. Investors require and demand only profit.

Since natural compounds cannot be protected by patents and synthetics can be protected money is invested into the synthetics. Research is designed to do bring a patent to the market and make profit as soon as possible. Investors / stockholders require profit and it becomes the prime directive.

Safety is pushed aside and dealt with later as side effects appear and the profit gleaned from the public and the drug removed from the market. All calculated in the end of the year profit statement. Every year an average of 50 medicines are removed from the market for hurting people and compromising safety.

Now this has built to an absurdity.

A new type of Medicine Philosophy

Dr. Hans Selye defined a new type of medical philosophy based on accumulated stressors. I worked with Dr. Selye and I am enclosing a paper he wrote mentioning me before his death. Stress reduction and lifestyle education is the heart of our philosophy of health care at our university.

You can review our one hundred plus journals. A list of my books also is attached.

disease from synthetic medicines is rising, law suits are escalating at an appalling rate. Death from these synthetic drugs is now in the top five causes of death. Natural medicine has an insignificant rate of death and law suits in comparison. Vastly insignificant and much less in a truly intelligent comparison. The Natural medicine fields concentrate on safety first. People over paper and profit.

I am sure that some regulatory person will want to question the profits of our company but if he is to compare he profits of the drug companies he will want to think before he puts his foot in his mouth.

The evidence based medicine field

Prof Nelson - Desiré
Towards a new Safe and Effective truly Modern Medicine

HEALTH IS EASE OF FLOW

Stressors block Flow, Stress is more than Just personal stress. Stress Reduction is the key to Medicine.

When the stressor or stressors weaken the defenses of the body, the weakest link of the body (from nature or nurture) is most prone to distress and thus disease.

Nelson Method of Disease

1. Reduce the Causes of Disease: Change Behavior, get patients to Care, get the nail out of the tire
2. Repair the organs weakened by the Causes, Restore Health, Fix the tire
3. Unblock the Blockages to energy, nutrition, Oxygen, waste, Parasites, infectious agents, nervous Flow
4. Treat the symptoms with natural means before resorting to Synthetic. The foods, exercise, herbs, homeopathics any and all natural means before resorting to Synthetics
5. Balance the metabolic typing or Constitutional Imbalances. Treat the patient as an Individual Whole

Selby Pathway of Disease

health then enter stressor (toxin etc)-criters

1. ALARM Stage
   - symptoms are the alarm, the enemy, symptoms at first are related to the stressor, later the dysfunction
   - if stressor continues then
2. ADAPTATION Stage
   - symptoms go away as we adopt, the distress a stressor generates deeper. You can have no symptoms and be very very sick
   - Being symptom free is not an indicator of Health
   - if stressor continues then
3. EXHAUSTION Stage
   - the stressors burden the weakest organs
   - if stressor continues then
   a. FUNCTIONAL
      - first the stressors effect the weakest organ function
   b. ORGANIC
      - then the weak organs start to swell or shrink
   - if stressor continues then
   c. DEATH
      - cellular, organ, organ system, organism death

Since the body’s weakest link is prone to disease from the stressor, any disease will improve with reduction of the stressor. If there is good nutrition and no excess or deficiency of nutrients, the body’s repair system improves. With stress reduction the Pan-Sympathetic system becomes free to boost digestion and immune system. As well as much pain, stress and more often ineffective. Add to this the side effects of synthetic drugs and see the poor history of medicine. Nelson and Selby have plotted out a safe, inexpensive and effective new more modern medicine.
SINthetic Drugs

Our society has now seen the failure of the synthetic chemicals. People will NOT choose synthetic wine or cheese on a menu. Chemo phobia has become universal. People have all learned that synthetics cause side effects and health risks. The next step of intellectual logic is that the medicines have also the same risk.

Natural medicines are safer but they do not demand such action to satisfy a .05 alpha statistical level. Newer non-linear fractal statistics need to be used as evidence. A more individual perspective of medical efficacy will be developed.

These synthetic chemicals are all needed and sometimes each and every one of them can save a life. But for some doctors they only use them with no respect for safety or choice. It is my professional opinion to respect the synthetic drug industry while challenging its universality. We do teach people to do the same. This makes me a target for the drug companies and some of the regulatory agents who have the opinion that the synthetic drug industry is unchallengeable. This is not the current law.

The key issue comes down to choice. Can someone choose the safety of natural medicine versus the risk of assisting the chemical company profits with evidence based medicine? Is there freedom of choice? Even incurable diseases such a cancer have distinct pressure from the chemical companies to push people into doing therapies with no hope and profit for the chemical companies. Why are the regulatory agencies so focused on natural medicine at this time where there is such a loss of public faith and profit in the drug companies?

Someone seems to be trying to remove the freedom of choice and funnel people back to the profit stream of the drug companies. In a time where the tobacco companies laugh and continue to grow and produce ever increasing profits, the hypocrisy of natural medicine persecution makes the public more aware of the difficulty.

My movies and work all speak to this issue. A nice court case against some overzealous agent or for me might be the needed impetus to get more media coverage to this issue. A review of the causes of death listing tobacco and synthetic drugs is all on needs to do to question.

So is my impropriety having the freedom of speech to think such issues? Or is it the ability to vocalize these issues?

A True SINthetic Chemical Warning

Cook for 3 minutes, stir, eat, and wait 5 years to see if the synthetic chemical ingredients gives you cancer.
At any rate please share your real concerns and let’s get to the real bottom professionally and competently, aside from rumor innuendo and out lies.

**Evidence based medicine**

1. Evidence is costly and investors want only return of investment, so only patented SINthetics get large investment. So safety is not primary, safety is not primary important. Profit Over People.
2. Evidence needs statistical proof that 19 of 20 people get results; this means that the patent medicines need to be strong and harsh to demand action, once again safety is forgotten.
3. Evidence centers on results. Results are measured, side effects are observed not measured. This compromises safety.
4. Years later one patent drug in twenty is removed from the shelves because they are hurting people.
5. Millions of people die from SINthetic drugs and it is one of the top killers of people.
6. FDA and regulators look the other way as patent drugs and cigarettes kill more people than any other factor. Far more than guns, car accidents, and virus combined.
7. The media only covers sensational stories like the swine flu to help sell more drugs.
8. Safety is Forgotten over Profit.

**Natural medicine**

1. Hippocrates said “First Don’t Hurt” Natural Medicines try to live to their oath and concentrate on SAFETY FIRST
2. Law suits for Evidence based medicine per year are in the trillions of dollars while Nature based medicine law suits are negligible
3. Natural medicine does not try to force action on 19 of 20 people. Soft safe techniques are cumulative and effective without side effects
4. People do not die from the treatment, Safety First
5. Money is not the main priority, People over Profit
6. The media does not cover the true story
7. The more intelligent a person the more likely he is to go to a natural doctor

**Evidence Based Medicine**

8. Safety is Forgotten over Profit.
Many years ago in Denver a man approached me who was a salesman for a survey company. They sent out survey questionnaires to all kinds of professions to find out more about marketing. He gave me 4 questions for free and they were mailed out to over 100,000 medical doctors. The first question was “would you use a Natural pharmaceutical over a synthetic one if you could?” 82% said yes. One of the questions was which of the following would you use in your practice? Acupuncture, biofeedback, nutrition, homeopathy, or allopathy. 55% said they would use biofeedback, it was technical and scientific. 45% said they would use allopathy.

Allopathy

The principle of allopathy is to only reduce and or address symptoms. The question “What’s Wrong with You” is the key. The answer details the focused complaint and not a true access of health or welfare. When we combine this with pills made and tested for the symptom we get a medical system where the average visit is less than one minute of real concern. Consider the side effects and you get an ever expansive cascade of errors that cost our society vast amounts in terms of money and human suffering. Allopathy has failed as a medicine philosophy and it just takes time for all to realize it.

Need sedation?
Just smell my breath

Alcoholism +
Drug Abuse in Medical Doctors
They do not know or understand the art of medicine they use. They do not know what it is or how unsound the philosophy is behind it. They are too busy learning what the drug companies want them to learn.

35% said they would use nutrition. 12% said they would use acupuncture. 5% said they would use homeopathy, and 5% said they would use allopathy, even though these were allopathic doctors who use allopathy every minute.

Drug Side Effects

Reuptake Inhibitors
are used to treat depression, attention deficit, OCD, and a host of other disease. As noted in the antidepressants section of our web site the odds of drug side effects developing in depression treatment are greater than getting relief of symptoms greater than placebo. Neurotransmitter levels in the brain that are not high enough cause disease. In reviewing drug side effects the reuptake inhibitor side effect of depleting neurotransmitters is unique. These are the only drugs in medicine where drug side effects make the cause of the problem worse. Drugs that work with neurotransmitters do not work if there is not enough

Neurotransmitter levels in the brain that are not high enough cause disease. In reviewing drug side effects the reuptake inhibitor side effect of depleting neurotransmitters is unique. These are the only drugs in medicine where drug side effects make the cause of the problem worse. Drugs that work with neurotransmitters do not work if there is not enough
neurotransmitters in the system to work. When the reuptake inhibitor drug quits working it is because the drug has just depleted the neurotransmitter levels below levels needed to keep the drug working.

Drugs are commonly viewed as having two categories of drug side effects, reversible and irreversible. Drug side effects involving depletion of neurotransmitters is reversible if proper levels of nutrients are given. With severe neurotransmitter depletion the patient may become suicidal. Most doctors do not understand how these drug side effects are caused by the drugs.

One of the basic foundations of medicine is, “First do not harm”. In other words, “don’t make the disease worse or create new problems”. If during treatment the doctor makes the cause of the problem worse, the doctor has just violated this basic foundation of medicine.

The reuptake inhibitor drugs deplete neurotransmitter levels if given with properly balance nutrients. Herein lies the problem, the standard approach in medicine in treating depression with reuptake inhibitor drugs is not proper. The current treatment approach with these drugs facilitates neurotransmitter depletion making the cause of the problem worse, neurotransmitter levels that are not high enough to keep disease symptoms under control.

How Drugs Deplete Neurotransmitters
The following is a discussion of what NeuroResearch Clinics has been teaching since 1998 on drug side effects. In 2007 the following pictures were posted on the “National Institute of Drug Abuse” web site discussing how reuptake inhibitors drugs deplete neurotransmitters. The National Institute of Drug Abuses explanation of how reuptake inhibitor drugs deplete neurotransmitters it is the exact same explanation NeuroResearch Clinics formulated in 1998. Following pictures are courtesy of the National Institute of Drug Abuse.

For people suffering with neurotransmitter disease synaptic neurotransmitter levels are below the levels needed to prevent symptoms of disease. The picture below illustrates not enough neurotransmitters (the red triangles) in the synapse to keep disease symptoms under control.

Serotonin, dopamine, and norepinephrine reuptake inhibitor drugs, as well as amphetamines,
in the brain in order to prevent the depletion of neurotransmitter levels by drugs is to provide properly balanced 5-HTP, tyrosine, levodopa, tryptophan, and cysteine, which crosses the blood brain barrier then are synthesized into new neurotransmitter molecules in the brain. With proper nutrient administration neurotransmitter levels in the brain are elevated to levels above what is needed to keep symptoms under control.

Drug Side Effects Can include Mass Murder Impulses and loss of reality checking.

With the cost of bringing a drug to market at over 1.5 million dollars when will we see the ludicrous folly.
Cancer is still listed as an incurable disease. The accuracy of cancer diagnosis is not perfect. Many people taking chemotherapy die, vast numbers of people taking radiation die. These are medical facts. Medical facts I have the freedom to express. Patients need to seek second opinions and do whatever therapies they can to try to deal with an incurable disease. Thousands of testimonials and a history of studies on the EPFX technology point to the proposition that the technology can help patients. We do teach at IMUNE that stress reduction helps all diseases. Cancer is a disease of the immune system where the reticulo-endothelial system immune system fails to attack the cancer effectively. The reticulo-endothelial system immune system is enervated by the para-sympathetic nervous system and thus is improved by stress reduction. Good nutrition, exercise, herbs etc can all have some small to moderate help, but help nonetheless.

With such a cascade of destruction possible any help is needed. Competent medical personnel today all realize these simple facts. We teach how to help increase health at our International Medical University. We mention this discussion with cancer to get your attention.

The more intelligent or educated a cancer patient is the more likely he is to go to a natural doctor. The sense of logic in natural medicine and the sense of Sinthetic chemo-phobia make this fact very understandable. The harshness of the chemotherapy leads to more deaths from chemotherapy than cures, all in a vain attempt to get
would eat. And if they ate these plants some of the cancer would go away. Sometimes complete cures. Vinca (periwinkle) was such a plant. There is instinctual ability of any animal even a human to eat what they need. But in humans the verbal logic resists this urge. The sense of vision is tied to the verbal logic system. The sense of smell is not, it is wired around the reticular system. People who are blindfolded and smell lots of foods will most often like the smell of what they need, very often not what they normally eat.

SINthetic chemical companies took the vinca and made the first chemotherapy vincastrin. Many forms were spun off of this formula. Chemotherapy was born. But no one ever researched the natural form of the vinca, you know the one the animals used to get results. Investors in research would not want to invest in a study that proved that eating a plant was helpful, no return of investment. Only a SINthetic patent would guarantee return. So no one ever researched the natural form of the vinca, that is till I did it in 1992. After the fall of the iron curtain Kiev and all of Eastern Europe was in financial trouble. I went to Kiev and hired five of the top doctors working in Oncology to study the natural vinca.

We started with cell culture, went on to rat, rabbit, and finally people. Each study showed that the natural was more effective and safer. The final people study of 120 women in the natural and 120 in the SINthetic group had statistical satisfaction. The discovery of chemotherapy comes from farmers who noticed that there were some plants that healthy animals did not eat, but a animal with cancer.
All of the 120 women in the SINthetic group die in two years. 80% of the natural medicine group survives over a decade, not dying from cancer. I delivered this paper and the whole series of papers from Kiev to the world congress of Oncology and cancer treatment in Paris France, 1995. The theme was “we get you better but you come back”. In my address I stated here is the answer, SINthetic chemistry is risky and they return. Natural medicine is more effective and safer. But there was little response to this mind changing idea. The chemical companies buy us pencils and computers what we do without them, I was told. Money speaks louder than words I was told. There was an attempt on my life.

I made my first movie about this event “Water, Wine, Homeopathy”. This is the true story of this chain of events. My second movie “Sworn on the Altar” was the true story of how I was able to register the acupuncture needle in America. The FDA made up charges and tried to stop me and the persecuted me.

My third movie was “Healer” the story of a medical doctor who finds out that being a healer is different from being a Healer. He learns how to use the healing power of his hands and mind to help people.

Then I became Desiré and the attempts to kill me were stopped. They believed that no one would take me serious. They would shoot the messenger, not listen to the message. But now people are gathering the intelligence to judge a message without judging the messenger. They are starting to judge the teaching not the teacher. There is a change coming.

My book the “Angel of God” tells the story of my life and the persecution against me. This article should now make it clear that a choice of medicine and medical treatment is necessary. People should have the ability to choose natural medicine and not be forced into side effect rampant SINthetic drugs.

In order to buy the book please visit www.desifm.net

Sometimes a private person buys one of the SCIO devices and has a miraculous cure in their perception. They foolishly believe that they have freedom of speech and can tell others of their success. They do have freedom of speech but not to deceive or embellish events to others. We try to act on any such action even though they are not agents of the company. But as we all know Smith and Wesson are not held responsible for the actions of the devices they sell.

Are the cigarette companies responsible for the fact that one third of all deaths are associated with smoking? And...
Battle of the Millenia:
David Desi vs. Goliaths
by Heather Swanson

There’s a battle outside your door, shaking your house. The battle cry has reached your ears; it’s raging in them. Only this is between the big guy and the little guy, and you don’t think he has a chance. Or are you already getting prepared to live under the big guy for the rest of your life?

We all remember the story of David and Goliath. Well, today, it’s not just one Goliath; it’s a host of THE GOLIATHS that freely roam the earth victimizing the human race all in the name of greed and money.

So, about now, you’re thinking: This is a big fairy tale, right? Let’s meet our modern day corporate Goliaths.

1) Big Sugar. Don’t tell me you don’t eat it. Dig your teeth into this: white deoxiructose sugar weakens the immune system and causes obesity. Over consumption of sugar is linked to lethal health problems and terminal illnesses such as diabetes and heart disease. It happens to be one of America’s top money makers.

2) Big Tobacco. One in every five deaths in the United States is smoking related. Need we say more? It’s legal, socially acceptable, and though a consumable drug (right?) the FDA happens not to be responsible for it.

3) The FDA. A kind of IgnoFrankenstein’s assistant, for these Goliaths. A polysemic agency, which has risen to its Goliath stature by consuming billions of dollars fed to it by pharmaceutical, Big Sugar and other sources. The FDA protects Big Sugar, Big Pharmaceuticals, and Big Tobacco more than it protects the American people.

4) The Music Industry. Think of the deaths of Woodstock and the birth of MTV. Opposing ideas, independent ideas, free creativity and a host of concepts related to freedom of expression, music has become a bloody battle for sales and power for this race of Mega-Prostitutes. It’s all about hype and nothing about talent.

5) The Pharmaceutical Industry. A multi-billion dollar business, the backbone of our allopathic medical practice; a leading cause of death in the USA and a killer of over one million Americans yearly.

6) Hollywood. One consumable that needs no introduction. In America, 98% of homes have at least one television set. In 2004, top studio grossed revenues of $7.4 billion from world box-office sales, $20.9 billion from world video sales, and $17.7 billion from world television licensing. Hollywood is a media monopoly with no room for pretense or truth.

Now meet David J. mean, Desi, Pont, musician, and healer Desire Dubouret. He’s currently fighting a six-way battle armed only with her special superpower, clarity of mind, and the SICU — a backpack machine Desire patented that caught the FDA’s attention because it doesn’t match their “regular” clients. It’s chemically free and doesn’t need the FDA to market it because people buy it because it works.

In 2002, 785 died from falling over furniture to date, no one has died due to use of the SICU. So, why don’t they go investigate furniture manufacturers?

With her independent media company Change the World Productions, Desire has been fighting the propaganda that has monopolized mainstream for generations. If you take a trillion dollars and stack them up, they would reach to the moon and back. Well, these trillion dollar industrial Goliaths are pitting themselves against one, solitary individual who has stood up and showed that there is a different way — a better, more noble path to the future development of this planet. After all, it isn’t an accident that her company is called Change the World Productions. It’s Desire Dubouret’s fate.

Take a stand today behind truth and justice! Join Desi in the fight against these malformed modern day Goliaths that now terrify our lives.
THE MAN WHO LEFT AMERICA TO FIND FREEDOM... WHO IS NO LONGER A MAN.

AN ANGEL IS OFTEN JUST A MESSENGER.
This Angel is a Messenger of personal and mental freedom. But there are those that are afraid of freedom, especially mental freedom.
The Ultra Rich retained their small minded army to stop the message.

The powers that be (the Ultra Rich Illuminati) used their narrow-minded army of petty pleasure bureaucrats to attack the messenger. They tried to divert attention from the message by discrediting and disgracing the messenger. Their smear campaign told lies and innuendos to try to dishonor the messenger, all to distract scrutiny of the message. The message is not to be debated, so the messenger must be attacked.

The Ultra Rich tried to kill Nelson several times, but the angel messenger managed to escape. Persecuted, prosecuted, and presumably pressured the angel messenger in dominantly was not to be dissuaded from helping the world with the messages of deliverance and survival. But some people were able to escape the mind control of the media and the power of the Ultra Rich to manipulate minds. Some people listened to the messages, some understood.

The Ultra Rich was angered so the petty army illegally got another judge. The state department did not support the case and Nelson was issued a passport in 1998 and again in 2008. This provoked the Ultra Rich to pass a new law to stop the messenger. Under the new law the state department was not able to help. After challenging the validity of the new charges the small minded American embassy army of the Ultra Rich illegally revoked Nelson's passport. They press to put Nelson on the slow boat and lose him in a jail without the justice, without rights.

The Ultra Rich used the small minded army of the manipulated controlled media to further discredit the messenger angel. Multiple news papers carried lies and rumors, television joined in on sensationalist slander. Lies, misrepresentations, and falsehoods were aggrandized to further try to dishonor the messenger. Many of the masses would then be blinded from seeing the message. But the messages saved the planet needs a messenger that will not back down, unified the messenger angel continues.

Nelson was jailed on falsified documents, attacked by inspectors, slandered in the press, and the small minded petty army of bureaucrats assaulted him at every side. Laughed at, persecuted, discredited by infantile stupidity, misquoted, maliciously slamed by the press, Nelson fought on.

But you can not dishonor the honorable, you can not disgrace the distilled personage of grace. The petty mind's lies can not mask the truth. There is power in the mind, there is a God consciousness, the synthetic medicines and alchemy do not work for health care, we must replace greed with honor, anger with love, and delusions of false beliefs with open minded education. Equal Economic Education. The messenger angel can not be vanquished.

PERSECUTION

As prophesied the Angel will be aggrieved and persecuted before reaching the people. The Seattle Times, CBS, NBC and many others attacked the angel with lies, rumors, innuendos, and just poor journalism. The article goes on to say that my high heals are too high. And some of the mindless public believe anything. Two people with advanced cancer bought the device to help cure them. They did not have the device long enough to counter the effects of their chemo-radio therapy. The media twisted these two cases. All attempts to offer an honest retort were not allowed. Any kind of truth is prohibited by today's media.

After twenty years of selling over 27,000 medical devices, legally registered in over 13 countries, over two hundred published peer reviewed medical double blind studies, over 60 books, 50 movies, there is not one recorded case of anyone being significantly hurt. And yet FDA protected simplistic drugs are killing millions every year, FDA protected cigarettes are killing multi-millions, and FDA encouraged Big Sugar is killing maybe more. There are now over 250 articles of the failure of the FDA on the internet and around the world today.

Why? They protect Big Money in America. Not people.

A legal, safe, effective non-drug therapy of a modern concept of science and medicine the body electric might interfere with drug companies profits. The muck taking media and the drug companies brought in their junk yard dog, the FDA. My American passport has been revoked. The powers of Big money have pressured everyone they can to attack me. But my legal rights to a hearing might save the planet. This book might wake you the reader up to read the reports, look at the truth, and judge for yourself. Angel or Devil? You can only decide by hearing the message.
When the Media is one sided and controlled by the rich, is it not time to build a new media?

PERSECUTION

The Slander of Dr. Nelson is a tale told by an idiot, believed by a fool.

Intelligent people have seen through the slur. Intelligent people have called and asked for answers to questions. Intelligent people will see that any article written from spite and not truth is just an attempt to slur and twist the truth to protect the Drug company profits. Intelligent people will think and listen to both sides. IMUNE web site has the research, the articles, the books, and the incredible expansive, well researched, verified truth of energetic medicine. The drug companies are afraid of this Angel. Scientists fear losing their careers and they fear Big Money. Medical Doctors are afraid to take a stand against Big Money. Everyone has Cartel phobia. But the Angel must fight this and find a way to defeat Avarice. The Angel must defeat the small petty minds of the Big Money slaves. The angel must end degenerative disease, the angel must make the scientists see the powers of the mind through QED, the Angel must defeat the greedy selfish powers of Big Money, or all is lost.
America is not the leader in health care, but for only one criteria. America is not the leader in fact. America is way behind in all criteria of health, longevity, child survival, morbidity, disease susceptibility, and all except on criteria. That criteria is COSI. Americans pay throw the proverbial nose for health care. In fact the regulatory agencies FDA are not concerned with disease causing industries like Big Tobacco, Big Sugar, Big Fast Foods or Big Pharma. The FDA is concerned with drugless therapies such as natural or energetic medicine, proved safe and effective. The hypocrisy is momental and financially burdensome for the American people. In fact there is profit in promoting disease for a disease care system.

When corporations run the Health Care System, profit for the stockholders is paramount. Thus the more disease there is the more profit there is. By definition corporations are psychopathic as they care about profit over people. So there is no interest whatsoever in making people healthy, symptom control by prolonged medications is better.

A true Health Care System of healthy lifestyle education, early prevention of disease, and safe and natural methods of disease prevention and early treatment would not only make people healthier but would dramatically reduce cost. If people were taught the dangers of high glyceric dextrose foods, if these foods were better controlled, if the dangers of bad fatty acids and trans fatty acids were controlled, if Tobacco was removed from sale. The cost of health care would dramatically improve. The angel has designed a new type of medicine after the work of Dr. Hans Selye to help people not to develop disease, and to dramatically reduce disease. But the Angel’s efforts are a thorn to the Sinthetic chemical companies and the Disease Care System in America.

When profit is removed from the medicine, then we can go from a profit based disease care system to an improved Health Care System. And the savings of money and lives will be fantastic.
It is completely evident that the power of money controls the regulatory industry. Instead of attacking the real killers of millions the drug and the tobacco companies, they attack biofeedback and homeopathy. This ludicrous absurd farce makes the regulatory agencies like the FDA the MHRA etc look like simple babbling buffoons. They appear like mindless puppets of the money behind the murder of millions, SINthetic Drugs and Tobacco. Murder of millions, all in the name of money.

SINthetic Drugs and Tobacco use the power of their money to divert the attention of the regulatory agencies towards their competition the natural medical industry. They go free to sell more addictive, dependency causing unsafe slow poison. The public see the absurd mockery and travesty of justice, and they lose trust in the government and its regulatory industries. They see wars started on lies, their children dying in the name of a lie. They see politicians paid to vote and influenced by lobby groups of the rich SINthetic Drugs and Tobacco. They read the paper everyday of another drug hurting people. People want a sense of justice, not to see power and money using the system to make profit.

Evidence based medicine cost money, this lead to investors, this lead to corporations, this lead to the emphasis on profit. Safety took a back seat. Years go by and we later see the deaths and damage from the SINthetic industry.
Ultra Rich Control

Banks
Federal Reserve

Governments
Lobby Groups

Scientists
Grants, Jobs, Funding

Media
Absolute Distribution Control

Movies . News . Music
Protesters are under strict control to not really threaten the Ultra Rich...
The Celebrity Culture assures public control

Big Sugar . Big Tobacco . Big Pharmaceuticals
The 3 largest killers or humans are not really under any real control
They arrogantly put profit over people

Regulatory Agencies . FDA
Complete control of the foods, drugs, medicine, vaccines, and Philosophy

Now that they can listen to your every conversation, look at any of your bank transactions, market any thought, idea, or concept to the stupid public, the Ultra Rich Control is just about perfect. The message of the Angel is to

WAKE UP
There is on thing more powerful than all the Armies of the World, and that is an idea whose time has come.
The Messages of the Angel.
But by now the financial power of the drug and tobacco companies is so great they can buy influence. They can through the influence effect control on the regulatory industry of the FDA, the MRHA and others.

Back in the 80's I attended a lecture from David Kessler at the time the new head of the FDA. He said his job was to protect the people. He then said he was the new sheriff and he would go after the number one killer, tobacco. As he tried he was slapped down, and told to go after natural medicine instead. He was devastated and resigned in shame. He was unable to overcome the power of the SINthetic Drugs and Tobacco companies. Their power is worldwide and their influence is murderously pervasive.

Evidence based medicine is just a pass word to let the power of the SINthetic Drugs and Tobacco companies continue their wrongful ways. The powers of SINthetic Drugs and Tobacco are used to find small minds of the regulatory industry and use them against their enemies. Anyone found attacking the SINthetic Drugs and Tobacco will have the small minded, petty, picayune, regulatory agent barking at their door. These diminutive minds of the regulators will make threats, persecute and prosecute all who stand in the way of the power of the SINthetic Drugs and Tobacco companies. These small minded petty agents are the buffoons to the public, the bozo clowns who are the junk yard dogs of the SINthetic Drugs and Tobacco cartel. They twist and contort to attack all who oppose their masters, SINthetic Drugs and Tobacco.

And the health of the public dwindles as the cost of medicine goes through the roof and the profits of the SINthetic Drugs and Tobacco increase dramatically. Anyone with the intellect to see thru this farce, this sham, this injustice will be attacked if he opens his mouth to find the freedom of speech to vocalize his dismay.

Because to the SINthetic Drugs and Tobacco and their small minded army of petty regulators, there is no freedom of speech. There are only the whims of SINthetic Drugs and Tobacco and the Ultra Rich. Only the vision of the people to see the power of SINthetic Drugs and Tobacco can save us. But how can the people see such things when the junk yard dogs squelch attempts to educate them.

To learn more see the Angel of God books, and the movie and books the Persecution of Dr. Nelson.

www.desifm.net
The Special Law for the Pharmaceutical Companies

In the real world of commerce, if a company sells you something that hurts somebody you can sue them for damages. The Toyota cars killed people, and they had to pay damages. But the drug companies have a special exemption to this liability. To sue them for damages you must prove they knew it would hurt before they sold it and sold it anyway.

Just being hurt is not enough to get damages. You must prove that they knowingly sold a drug that could hurt. This allows them to hurt people and make massive profits and not be held responsible for damages. But still they are sued for damages in the multi billions of dollars each year when lawyers feel they have a case and can possibly prove the company knowingly sold a harmful substance.

If we change this law and hold them responsible for all damages then the world changes. There are an average of 50 medications a year being taken off the market. But very little is paid in damages compared to the amount of damage done. If we change this law and hold them responsible for all damages then the world changes.
The Extremes of the conflict of Evidence based medicine versus Homeopathy

Steve Martin once said, "How do you make a million dollars and not pay taxes? First you make a million dollars, then you don't pay taxes. If the two people come after you, you say EXCUSE ME!!!"

|------|------|------|------|------|

To get a Drug to Market
1. Find a natural compound and reduce the key ingredient
2. Hire a chemist to make a semi-chemical fake similarity
3. Start clinical trials in college kids to show effect
4. Get the war room sales people to sell the stock
5. Write a key doctor to sign off the papers
6. FDA goes to start the testing
7. FDA data goes to show no side effects + enhance results
8. FDA recommends to go back to testing
9. FDA men are promised grants, jobs, or some kind of kick back
10. FDA is marketed as the best thing in history and we avoid the side effects and hope we make enough money before it is recalled
11. The drug is advertised as the best thing in history and we avoid the side effects and hope we make enough money before it is recalled

Spinal Injury and Pain
Using MTENS and TVEP, the SCIO can treat the spinal area for injury and pain. Sending in an auto-focused sophisticated pulse different for each patient based on their personal electrical needs.
1st July is celebrated as Doctors’ Day all over the world. The day usually passes without a whimper. Many doctors have forgotten their Hippocratic oath or humanism. Therefore, I would like to administer the following oath to the doctors to serve as a reminder as to how important is their profession.

**The Oath of Medicine**

**REVISED OATH FOR DOCTORS**
(c) Written and Administered by Dr. Leo Rebello since 2003

This more comprehensive Oath was drawn by Dr. Leo Rebello in 2003, since Hippocrates Oath is now partly outdated being centuries old. This revised Oath has been widely circulated, accepted and appreciated.

1st July is celebrated as Doctors’ Day all over the world. The day usually passes without a whimper. Many doctors have forgotten their Hippocratic oath or humanism. Therefore, I would like to administer the following oath to the doctors to serve as a reminder as to how important is their profession.

I, __________, do hereby swear on this solemn day that:

- I shall NOT prescribe unnecessary medicines and tests to my patients;
- I shall NOT give false counseling;
- I shall NOT overcharge and accept cuts and gifts;
- I shall NOT rape tiny tots with mercury laced inoculations or vaccinations, for they pollute the blood stream leading to serious diseases like AIDS, Cancers, Autism, etc;
- I shall NOT prescribe lethal drugs, like anti-retrovirals, chemotherapy, or give ECT to my patients;
- I shall NOT indulge in human organ thefts to the detriment of my patients;
- I shall NOT be afraid of any authority
and fabricate medical records or give false evidence;

- I shall NOT exploit students studying under me;
- I shall NOT manipulate findings or results to win grants.

I, __________, further solemnly affirm that:

- If I cannot treat a disease, I shall not say that AIDS, cancers, diabetes has no cure. But will tell the patient to try other systems of medicine.
- I shall treat health practitioners of other systems with respect and not tell deliberate lies to prove my importance.
- I shall study Holistic healing modalities to increase my knowledge and wisdom.
- I shall not even by mistake say that “HIV=AIDS=Death” or cancers cannot be treated.
- I shall not frighten my patients with unnecessary comments, opinions or advice.
- I still remember what Hippocrates said, namely, “Let diet be your medicine” and shall accordingly prescribe fresh fruits, vegetables and good diet to my patients, rather than tonics, syrups, synthetic multivitamins, especially to children.
- I shall NOT perform surgery, unless it is absolutely must and will not indulge in rackets like amniocentesis, caesarian section, silicon implant or liposuction.
- I shall work to ban the useless and cruel animal experiments in the name of medicine.
- I shall participate in periodic workshops, seminars, conferences at my expense or on scholarship (no pharma funding) to educate myself and speak from my conscience if I am called upon to speak or preside.
- Finally, I shall not consume alcohol, smoke tobacco, or take other narcotic and psychotropic substances. As far as possible, I shall also not take animal proteins.

I realize and aver that a great responsibility of people’s well-being is upon my shoulders and I shall carry on my onerous task with utmost dedication.

This I swear in the name of God on this solemn Doctors’ Day and I shall repeat this oath daily lest I forget that I am in a divine profession to heal the world.

Oath written and administered by Dr. Leo Rebello Director, Natural Health Centre, Bombay.

Now for a new Oath for health care professionals, I have written this for IMUNE, the Nelsonic Oath.

P H Y S I C I A N

H E A L

thyself

The world is awakening to WELLNESS. This was not even a word until recently. Now it is a world wide movement, people want to become WELL. Desiré has developed and credentialled a new Doctorate in Wellness to awaken people and teach the art of making themselves and others WELL. For more details go to the International University at www.imune.net
The Modern Physician Oath

First Don’t Hurt: in the process of treating a patient it is tempting to try to use quick risky methods to abate a symptom while compromising long term safety. I realize that my job is to restore, prolong, and encourage health, not just ameliorate symptoms. Maturity is the ability to see the consequences of our acts. The more mature the more into the future we can see.

I promise to try to balance symptom reduction with mature vision of long term health.

I promise to encourage enthusiasm and maturity. I will seek to increase wellness, before decreasing a disease. I will seek to counsel for long term health before rushing into diagnosis. I will try to restore ease with education, lifestyle, awareness, enthusiasm in myself and my patients. I will seek to understand the complexity and individuality of each patient, and explore their ease or disease with body, mind, spirit, social and environmental, the total holistic interactions. It is better to teach a person how to live healthy than make them dependent on a drug.

I promise to care for and respect my teachers, my pupils, myself, the universal consciousness, the powers of the mind, the society, the environment of the planet earth, the family, the mind body and spirit of myself, my peers, and my patients. I care for the long term health and welfare of all.

I promise to realize that an ounce of prevention is worth a pound of cure. Moderation is better than excess, and that a good doctor must be a teacher. I will encourage responsibility, maturity, education, growth, for all concerns. I will try to help my patients to change the things they can change and understand the slow path to recovery, to accept the things they cannot change with steadfast honor and finding what joy they can on the path of life. And I pledge to try to have and share the wisdom to know, care and understand the difference. All paths have some pain all paths have some joy. Everybody suffers. We suffer most when we desire to have things different. We can reduce suffering by accepting what we can and changing what we can. And we must pray for the wisdom to know the difference.

I promise to respect all rules and local laws in practicing the art of healing. If the rules are unjust I promise to help to passively fight to change them. I will work within my training and background to help others within my scope of practice. I promise to respect all other practitioners who have or will treat my patient and work to network with them as best we can. I will always be respectful of another medical doctor’s advice and bond between them and the patient. I will refer my patient to other medical personal whenever needed or possible. I respect all others without condition, without needing them to respect me. I swear on the altar of God to oppose any tyranny over the minds of men. In fifth grade we are taught that the universe is made of electrons, protons and other particle that make up atoms, molecules, and all real things. This science tells us that all things of matter do not touch, but instead interact thru their fields. Everything is energetic fields which we cannot directly perceive. Any and all theories of existence are but illusions and incomplete descriptions of what is. So we must respect all such theories as having some validity if not just validity to the perceiver.

I pledge to respect people’s privacy, confidentiality, and to not have bias or prejudice for their religion, creed, sexual identity, age, or color. I will try to reduce suffering of people and patients. When the former conflicts with the latter I will try to weigh the final outcome wisely and carefully before acting.

I pledge to try to seek soft, simple, safe, natural methods of healing and first, and to only go to harsh, side effect laden, risky, unnatural, SYNthetic, surgical, abortive, allopathic, palliative methods when natural methods totally fail. If I use such risky methods, I must, educate the patient on the entire risks, help limit their use to stop the risk of dependency, I must monitor their use to reduce side effects, teach the patient how to reduce the harsh drugs to restore health after their use, and educate my patient how to reduce the causes of disease and find natural treatments.

I pledge to not cause addiction and to try to set any patient free from any addiction they might have and allow them freedom to find happiness without dependency. I realize that food is the best medicine, moderation is the best dose, and there is power in the small and energetic. I will dedicate my life and time to learn what I can of nutrition, diet, juicing, cooking, exercise, social networks, personal and family counseling, biofeedback, massage, bodywork, spiritual therapy, energetic medicine, homeopathy, aroma therapy, acupuncture, healing hands, prayer and all true healing arts. I will seek first to heal, second to care with compassion, third to understand, and then to profit enough to take care of myself and my family.

I promise to keep humble and to charge fees appropriate to the patient to gain.
I pledge to respect such loss and help those who remain to cope and restore some happiness, and deal with pain and suffering constructively not destructively. And when I face my own hurts and ultimate losses.

I will try to look back on a life of growth, grace, wellness, balance, intellect, joy, sharing, caring, inspiration awareness and enthusiasm. And to know that I did what I could to help others towards health to spiral upwards with wellness not dependency, side effects, and a spiral down of cover-ups, sedation, unnatural symptom reduction.

I will remember that I lived and loved life and respected others and respected nature. I hope that others will be healthier just because they remember my life of healing. To these pledges and promises I vow to hold true.

signed

So in conclusion
We see that greed, impatience, reductionism, immaturity, addiction, ignorance, dependence and let’s say greed again have lead to the fantastic profits and vastness of the SINthetic chemical world.

This is a choice and people are free to make choices. Or are they for now the chemical companies have employed small minded geeks of regulatory agencies all over the world to attack alternative medicine with paper work and to systematically remove natural medicine for the world. If we don’t stop them they will succeed.

To start with know the dangers of a SINthetic world. Pass this book onto others.

Major Problems of Modern Medicine
1. Profit over people greed has gone unchecked.
2. Mistake of SINthetic chemicals, we now know that the SINthetic drugs cause more disease than they cure, and they are incompatible with the body, Nature knows better.
3. Allopathy is a wrong answer, we need to be more holistic and look at the overall risks to help people.
4. Big Tobacco, Big Sugar, Big Pharma are all unchecked and their money controls the process, they hire the little minds of the regulatory geeks to attack any that threaten them. And the FDA look the other way as Big Tobacco, Big Sugar, Big Pharma kill and injure vast millions.
5. The wrong use of reductionistic statistics has led to a loss of safety.
6. There is no Health Care, just Disease Care as nobody is made healthier in the system, just symptoms are abated and side effects spiral down the system.
7. There is a lack of truly modern science in “Modern Medicine” as they cling to antiquated chemical views and reductionistic science and resist ideas of quantum, electrical philosophies of the body, or of the powers of the mind.
8. Massive monies are spent on an inaccurate system of diagnosis (30% accurate by AMA statistics). 80% of the multi trillion dollar medical budget is spent on wasted diagnosis to guide the next pharmaceutical and nobody builds responsibility, or education, or simple health care into the system. Has nobody watched “You are What You Eat or the Diet Doctor”.
9. The costs are spiraling out of control, this massive debt and cost is crippling.
Solutions
1. Big Tobacco, Big Sugar, Big Pharma must be removed from their controlling position and limit the lobby groups control of legislation.
2. Quit attacking new minds that have solutions but threaten Big Tobacco, Big Sugar, Big Pharma for they are the real bad guys.
3. Emphasize Health in Health Care, emphasize responsibility, education.
4. Stop the overuse of dextrose, and switch to fructose.
5. Stop bad oil use and switch to good oils.
6. Stop the 19 out of 20 significance hold and allow fractal non-linear systems of statistics to be used.
7. Insurance should be triple or more for those that smoke, eat, drink, stress and risk excessively. Insurance companies have the statistics and the cost of these addictions and behaviors should not be borne by the population of healthy people but should be on the shoulders of the addicts.
8. Allow more modern systems of safe electrical biofeedback to educate and de-stress people.
9. Look at the philosophy of medicine and compare the Dr. Nelson and Hans Selye system to the present one.
10. Make a new group of care givers to detect early signs of disease and educate and consult stress reduction, compassion, understanding, diet, exercise, and basic health. These should be Registered Wellness Consultants (RWC).
11. If we truly CARE for people not for profit the cost will come down and the health will go up. Society will benefit by immeasurable ways. These are simple techniques that all could be done easily. There is one thing more powerful than all the armies of the world. It is an idea whose time has come. Who of you could help get these ideas out to the masses.

Problems with Alternative Medicine
There is an emphasis on Safety in Alternative Medicine, but there is most often an anything-can-go air as long as you don’t hurt anyone. But people can be hurt by not getting proper care, or delaying a proper diagnosis. Even though the accuracy of diagnosis in Modern Medicine is about 35% it is still needed in times of progressive and possible disabilitating diseases. Alternative Medicine can build-up false hopes while capitalizing on the dramatic failures of the drug and cut them approach. If the only tool you have is a hammer, you will treat everything as if it is a nail. So the surgeon always want to cut, the drug doctor has a pill for everything.

But if the only tool you have is a placebo, a pill made on an illegal fake sham homeopathic duplicator device, then you will treat everything as if it were an illusion or a dream. Many homeopaths never use a real homeopathic they are sold devices that have no validity and falsely make a sugar pill’s energy enhanced. These Alternative Medical people are mostly math-phobic and cannot really understand when they are being sold something that is not really tested. They do not know how to evaluate a study from opinion, test group or dbl blind. A man in America traveled selling a little device that when you rolled a hundred dollar bill into it out came two. He sold thousands before someone would stop him for the con artist he was.

Alternative medicine has many many charlatans, fakers, liars, backstabbers, and frauds. These people are the ones who hate me the most. For I have spent my life doing statistics, math, testing,
validation, research, compliance etc. and these frauds have faked charges against me.

Multi-level companies hype things at high prices to get down level sales and often dupe people into buying what they do not need. And the biggest rip off is muscle testing. Rather than use a constant weight as a test, the muscle tester pushes on the client arm or other area, and detects muscular strength. Then he puts the item for sale onto the client’s stomach or other area and retests. The weak muscle is now strong, the strong muscle is now weak, and the magic act is complete. The client says you used a different pressure, the magician or therapist says your wrong I used the same pressure. When measured the pressure varies wildly the therapist is quite openly and flagrantly lying thru his teeth when he says the pressure is the same. This smiling buffoon lies to his client to sell something or to affect the client in some way. Alternative Medicine is weakened and betrayed at every use of the muscle test.

Proof Muscle testing is a Sham
All scientific tests of muscle testing show it to be a sham. It has failed every dbl blind test miserably. The muscle tester will spout against this remark and promise to send you a dbl blind test tomorrow. And this time, that tomorrow never comes. Muscle testing is suggestibility, hypnosis, chicanery and fraudulent.

The point probe acupuncture devices for medication testing are the same. The point probe user varies the speed of delivery on the point of his probe. In fast for a higher reading, slower for a low reading. The results are the same in both muscle tests and point probes; the therapist controls the outcome 100%. Sometimes unconsciously but always the therapist is in control. He lies to the client saying I am going to test you now, then he laughs as he sell you a vitamin off the shelf.

Homeopathy has several myths that prevent it from success.
1. Homeopathy is all like treating like, everything is a reversal of action. According to the Arndt Schultz law of Pharmacology whatever action a poison has in a large dose, it will have reverse effects in a very small dose. So homeopathy of poisons such as venoms, belladonna, causticum, etc will have reversal effects. But this only applies to poisons. Substances like Euphrasia (Eye-Bright) are not reversal. The indications for the herb are the same for the homeopathic. 75% of the Homeopathic Pharmacopeia has herbal remedies with the same indications of use for the herb or tincture as the dilute homeopathic. Most Homeopathy is not reversal of action.
2. Homeopathy has no substance. The Pharmacopeia list thousands of items with where mother tincture or less that 6x remedies with lots of substances are involved. Homeopathy and Herbology are more or less the same in many ways. The separations are the misgivings of an over anal retentive mind.
3. Homeopathy is illegal and fraudulent. The FDA in America was started by a Homeopath to save homoeopathy and still does. Homeopathy is legal and protected in Europe, Canada, America and elsewhere.
4. You can make all your Homeopathics with a duplicator. Most of these systems are fraudulent and the only true active ingredient is placebo and the mind of the therapist. They are all unreliable and are for emergency use only.
5. There is no need for studies they are time consuming and expensive. Studies and research are essential for quality and protection of peoples’ health and income.

So with these and other myths Homeopathy is prohibited from real growth by a lack of appreciation for technology and science. It is attacked by the main stream medical profession and is a targeted for destruction. Till science and statistics can be brought into homeopathy we cannot expect much improvement.

But the egos of the math-phobic leaders of homeopathy are still a barrier to real success. Homeopathy needs to embrace its partners not reject them.

The Story of...
William Nelson or Desiré D. Dubouneut as most know her, is a legend in her own time. With over 60 books on medicine, over 200 medical articles published in peer reviewed medical ISSN journals, over 35 movies, three 24/7 TV channels, 2 radio stations, and a host of other publications, Desiré is one of the most important and influential persons of the new age.

The courage to stand up and prove that all synthetic drugs are incompatible with the human body. The intrepid pluck resolution to let the big head choose her sex not the little head’s presence. Desiré is one of the most courageous people alive today.
She personally made homeopathy legal in Hungary. She is known as the father of modern Homeopathy in Pakistan. She is known as the mother of current Superlearning. She personally registered the acupuncture needles as medical equipment in the USA. Made patents in homeopathy in the USA and Ireland. She has been nominated for the Nobel prize in medicine over ten times. Dr. Bill Nelson was proclaimed the greatest intellectual of the 20th century. But now Desiré is eclipsing and displaying greater genius.

Desiré has developed a new and exciting style of movie making that has Hollywood shaking in fear. Her Intellectual Angel Movies are a fantastic unprecedented and inventive style of movie aimed at the sophisticated intelligent audience. Desiré has the courage and fortitude to make over

It is a constant battle against the small and petty minds to fight for freedom and awareness. A modern day warrior fighting for rationality in an ever increasingly stupid and judgmental world, Desiré fights on against all who live in false belief. False beliefs are the hardest to release.

With over 5 patents, 10 trademarks, thousands of copyrights, and a host of other leading edge changes to help natural medicine, Desiré is now a Professor Emeritus of Medicine at the International Medical University. IMUNE is Registered in the British Virgin Is. And the Isle of Mann, accredited internationally, recognized by the U.N. and the E.C. there are IMUNE offices in Switzerland, Mexico City, Beijing and Romania.

Desiré was licensed to treat and diagnoses patients in Ohio, and is now licensed internationally as a medical doctor.

She has directed produced, written and stared in over thirty movies. Desiré established the proof of homeopathy in the USA.
There are major problems with the Alternative Health care industry. Math-phobia makes the natural therapists not keen to do statistics, and no one wants to fund it. The lack of good math skills and statistics means that many therapies are launched without real investigation. There is a lack of good education and good teachers. IMUNE has tried to standardize some good education in producing its Wellness Doctorate course. Somewhere in between the extremes of evidence (profit) medicine, and Natural (airy fairy) medicine in an answer waiting for us all. First we need to get profit out of medicine. People first, profit later, much later.

So as you read this book and see the dangers of evidenced based medicine you might get angry, you might get annoyed, you might get exasperated. You might give this book to a friend or relative. They might pat you on the head and say something like, We don’t need to change. Well it’s the best system we got, the system will work itself out, doctors are doing their best, there is not enough

35 movies that challenge the system and the powers of big money. She has defined and elucidated the evil of the Illuminati in her movies. As Einstein once said “great spirits get incredible resistance from mediocre minds”. Judging from the petty trivial critiques and biased twisted criticisms it can be said that Desiré must be one great spirit. Her courage, intrepid spirit and clarity of mind are legendary.

Desiré was awarded the first prize in a contest of Cardiologists in Florida in 1989. Medical Doctor of the year in 2003, and voted best Healer of the year in 2005. Often called the most eminent Doctor and Naturopath alive today. She has become the world’s most famous expert on Natural and Energetic medicine. The story goes on and on this is just a brief set of the ever growing legend and saga of Desiré D. Dubouneet.

As Desiré says the past is not, real the resume is just an illusion. The power of the mind must stand on it’s own. The petty mind can come at you from any angle and the only defense is steadfast dedication to the truth. When you read or watch her scientific journals, clinical studies, advanced scientific papers, medical discussions, philosophical essays, social themes, and intellectual movies you can see a world class genius. Petty minds will say that it is too good to be true, well Desiré is so true to be good.

land to grow medications, or another sentence of mindless evasive drool that allows them to disregard the damages done by evidence driven medicine.

At first you might wonder how they could not be touched. Then just ask them a simple question. How much drug company stock do they or their family own? You will find that anyone without a conflict of interest will join your anger.

Those with something to lose will find the rising death toll of drugs just a hallmark of their profits. Their mind can justify or rationalize the burning of babies if it means more profits. Some of us care about people. Some care about money. Some just don’t care.

As for me they attack me violently. They try anything they can to stop this publication of these ideas. But as a warrior and angel I must fight on.
He tested her and she went weak when thinking of her husband who she loved. This he said was evidence that she did not really love him.

There are indeed millions of chiropractors, naturopaths, cupuncturists, and other alternative artists practicing the con art of muscle testing for emotions and medications. There are millions of lay people doing the same. There is a need for someone to be able to test evidence beyond placebo, and tell people the truth. If the muscle testers would just say “I am going to touch you and MY intuition will tell if you need something”, but instead they want to lie and say “I am going to test your body and your body...
who tell the world of their fraud, they deny the fraud to the public and laugh later because they really do change the pressure while testing. Muscle testing to sell nutritional supplements is the biggest con game in the world today. There are many problems of the SYNthetic evidence based way and the flim flam muscle testers, classic homeopaths, and math-phobic alternative doctors. This puts stress on alternative doctors trying to do statistics, and registration and trying to find a way to help natural medicine get to the people in real science and real research. I have been hated by both extremes and persecuted and prosecuted by the extremes. Perhaps someday people will respect my work and realize that when a man sees a wrong and does not correct it he is not a man.

There is a need for evidence research. There is a need for science to test things and not let them develop out of control and let people be deceived by charlatans. Some years ago the Papini device killed people in Seattle. An unregistered experimental medical device the Papini shot a lightning bolt into the patient. This was intolerable, and because they saw a picture of me standing next to the Papini device at a seminar in Bahamas, I was classified a risk and a charlatan.

Too bad the picture of me wasn’t video with sound. You could have heard me saying “What the FUCK is this shit doing here?!” pardon my French. I offered to help do studies for the company to get the device safe and effective, but they said no, they were only interested in sales.

We need protection from these liars and cheats who project their lies onto others, like me. We need evidence. People should not be duped by a muscle tester to buy vitamins they do not need. Foods are our best medicines. We need science. We need humility. We need compassion. And we need mathematics. So somewhere in the middle path of these two extremes, you will find me and perhaps truth. When we find a plant that has medical effects, we could grow it, and make it better...
with natural not genetic modifications. We don't need to synthesize everything for the patent profits. We can grow our medicines as well as our foods. And use harsh synthetics in emergencies when natural fail. There is a time for all things under heaven.

This book is dedicated to the middle path of using statistics and science but not as our God, but as our guide. First don't hurt, but second try to help as best you can and not lie to the patients. Recently a group of researchers in India have developed a new rice that is cooked at low temperature. This reduces fire and heat, thus reduces global warming. And this discovery was not a genetic modification but natural hybridization. Man and nature working together, not as enemies. Man has in the past seen bacteria, fungus, pests as his enemies.

They are our friends that sometimes become opportunistic. We do not have the technology to make chemicals compatible with nature. We do not understand the electron quantic energy enough. People in Alternative Medicine always whine about the drug companies, the evidence based medicine damages. The modern doctors whine about the airy fairy Alternative Medical people. Neither want to see the flaws in their own camp they want to focus on the other. But to progress we must disband muscle testing for medications, fully test side effects of drugs not just actions, allow legal protection of natural remedy formulations, encourage electrical medicine, natural medicine, educate people about bad sugars and bad oils, stop the sale of cigarettes that in any form might be used by a minor. Make a 2 year jail penalty for anyone who allows a minor to smoke and become addictive, we must stop conflicts of interest and money from controlling our medicine.

Kinesiology can test a muscle, but not your reaction to a substance or whether you are lying or not.
Death by Medicine

By Gary Null, Ph.D.; Carolyn Dean, M.D., N.D.; Martin Feldman, M.D.; Debra Rasio, M.D.; and Dorothy Smith, Ph.D.

ABSTRACT
A definitive review and close reading of medical peer-review journals, and government health statistics shows that American medicine frequently causes more harm than good. The number of people having in-hospital, adverse drug reactions (ADR) to prescribed medicine is 2.2 million.1,2,3 Dr. Richard Besser, of the CDC, in 1995, said the number of unnecessary antibiotics prescribed annually for viral infections was 20 million. Dr. Besser, in 2003, now refers to tens of millions of unnecessary antibiotics.2,3

The number of unnecessary medical and surgical procedures performed annually is 7.5 million.4 The number of people exposed to unnecessary hospitalization annually is 8 million.5 The total number of iatrogenic deaths shown in the following table is 783,936. It is evident that the American medical system is the leading cause of death and injury in the United States. The 2001 heart disease annual death rate is 699,697; the annual cancer death rate, 533,251.6

OFFICE OF TECHNOLOGY ASSESSMENT (OTA)

General Facts
In 1996, US life expectancy was 71.8 years for men and 78.8 years for women, among the lowest rates in the developed countries.
The 1990 US infant mortality rate in the US was 9.2 per 1,000 live births, in the bottom half of the distribution among all developed countries.
Health status is correlated with socioeconomic status.
Ruth began to regret visiting the homeopathic practitioner.

**MCES**

for autism

*micro.current.cranial.electro.stimulation*

It is true that when a low level voltage and micro-current pulse is applied to the patient's body, electric currents can be detected in areas associated with health and harmony. The SCIO will let the patient experience physical and psychological improvements.

There is published research on these therapies. The new world of energetic medicine can help you.
Biofeedback in America and the Persecution of Desiré

In America a new rule allows for easier sale of biofeedback units that came into force last June 6th. Under this new law it makes the sale of Indigo and SCIO possible in America as biofeedback units. SCIO has the additional benefit of the 1989 510k, and a history that draws controversy.

The 1989 510k allows for the device to measure on the skin volts, amps, resistance, frequency and temperature. To measure resistance we must send in a Voltammetric signal. This is all for EMG muscle reeducation and stress reduction purposes. I talked to an FDA official who said our device is registered for muscle education. I said we use it with sport people to educate their muscles. (In China the word for sport is TU which means education of the muscles) the FDA official said “What does sport have to do with muscles?” this is like asking what does swimming have to do with water, what does golf have to do with golf clubs. It is a good thing she is not in charge of the next Olympics.

She did not know what fuzzy logic numbers were. And her math knowledge was so little she thought Descartes is the thing you put before de-horse. She was obviously Not the brightest crayon in the box and most FDA agents are not known for their superlative intellectual skills. Most FDA employees think the Muppets sing their own music, a make-up test is about use of eyeliner, lipstick and mascara and most think that Meow Mix is a CD for cats.

You see there is a profound lack of intellect with the FDA in America and it seems that FDA stands for Fucking Dumb Assholes at times. The FDA agents are mostly all mindless anal retentive ass kissers who are over fastidious to obey orders. Who else would take such a job filled with anal retentive bureaucracy and such incredible hypocrisy? There was a national crisis when five hundred FDA agents were gathered in an auditorium and told to obey the FDA head and he stumbled on the stage hit his toe and shouted “SHIT”. The cleanup
succeed in this completely there will be absolute standards for any medical illness and your child with a runny nose will have to take an antibiotic.

An example of off label use is Robitussin. Robitussin is designed and registered as a cough medicine as it reduces mucus. Some women with excess cervical mucus cannot get pregnant and by taking Robitussin they reduce mucus and have a chance at pregnancy. Robitussin does not claim this but a Dr. can make a prescription for Robitussin to someone trying to get pregnant. The company and their paid representatives cannot say this but an off label claim can be made by therapists.

In Mexico they don’t care, you can of the toxic spill is still a heated form of discussion.

In 1989 the FDA asked what does your device do? I answered the device measures on the skin volts, amps, resistance, frequency and temperature. To measure resistance we must send in a Voltammeteric signal. This is all in a cybernetic loop of measure VA output, send in VA input, repeat. They said great and registered it in 1989. How it was used was not the jurisdiction of the FDA. The FDA is to supervise manufacturer quality and claims. The practice of medicine is not a federal issue but a state issue, and biofeedback is unregulated in all states. But as time goes by the FDA exceed their authority and against federal law they try to control the practice of medicine. If they
even put such claims on the bottle and call it Ya Wanna HaveaBabyTussin if you want. Of course I should talk, when as a blonde my idea of safe sex is locking the car doors. Well each of us has our own little problems. I believe in the collective unconscious because I am Jung at heart.

The FDA now tries to juristic over the practice of medicine and supervises all claims. This means control over the freedom of speech (first Amendment remember). When the average FDA employee has a bachelor of business degree and their intelligence level is in question. Two FDA employees find a mirror on the sidewalk. The first FDA employee picks it up, looks into it, and says, “Hey, I know this person! I’ve seen her somewhere before.” The second FDA employee takes the mirror, looks into it, and says, “Duh! Of course you have – it’s a picture of me your coworker!” Believe me these people are dumb, they would try to drown a fish. Manipulation of excess rules so they are the kind of people to wake up a patient to give them a sleeping pill or use a ruler to see how long a patient slept and trip over a wireless phone doing it. They follow inane rules like staring at an orange juice carton every morning for an hour because it says “concentrate”.

An agency that lets Big Tobacco and Big Pharma make addicts, servants and kill multi millions indiscriminately, is worried about biofeedback claims of subtle energy. Stupidity and Ignorance and Anal Retention at such a high level they can’t keep chairs in the FDA because they get swept up agents asses. They have the highest level of turn over because of the demeaning illogical hypocritical upper level staff and when the escalator broke it took the emergency staff five hours to get the FDA agents off. And there is a sign out front that says “FDA - LEFT” so most of the agents went home.

Please watch the off label use claims in America. The FDA is stupidly over cautious. This is like torture and questioning the horse after the barn door is stolen. And they are over fastidious about biofeedback kindergarten milk money, while the Big Tobacco and Big Pharma perpetrate the new Hitler like Holocaust ruthlessly murdering masses for profit under the dimwitted FDA nose.

In Europe our CE mark is much grander. We can claim to measure EEG, EMG, ECG, GSR and then make a response with a MCES (Micro-current Encephalic Stimulus), MENS (Micro-current Transcutaneous Electro Nerval Stimulation for Pain), TVEP (Transcutaneous Voltammetric Evoked Potential for reactivity to VA signals of sarcodes, isodes, allersodes, nosodes, and classical compounds), VARHOPE correction of redox potential for Hydration, Oxygenation, Wattage and Ph, and EWH (Electro Wound / Trauma Healing). Europe has given us the chance to add claims of treating depression, addiction, insomnia, anxiety, attention disorders, learning difficulty, sport injuries, sport performance and many more. Imagine now you can publically say that this SCIO can be used to help treat ADD (Attention Deficit Disorders). The sky is the limit.

Very excellent congratulations to all involved. And since the CE mark is the basis of Africa, Mexico, Korea, China and other registrations the success is manifest. The SCIO now has 20 wave functions and the big difference is in the software face of functions. Bigger things are happening and the future is very bright, but there is a problem.

In America we meet with resistance of ignorance. The FDA writes they are unaware of any biofeedback unit for detection and reduction of stress. They are unaware of any biofeedback unit used in muscle tension disorder.

FDA Failures

The FDA is challenging the limits of stupidity. This shows a blanket ignorance of just plain ignoring their own guidelines, reading the web pages of the many FDA registered devices, or just plain ignorance of common sense. The FDA agent told us that “everyone knows that stress reduction benefits all diseases, but you will have a hard time convincing the FDA of that”. With people in the US senate saying there is no such thing as energy in the body,
There is a blanket of ignorance. What are the FDA agent's best five years? The Fourth grade.

The FDA actually insisted on a hairdryer warning: Do not use while sleeping. (darn, and that's the only time I have to work on my hair).

The FDA insisted Infant Cough Medicine's label say: "Do not drive a car or operate machinery after taking this medication." (We could do a lot to reduce the rate of construction accidents if we could just get those 5-year-olds with head-colds off those forklifts.)

On Nytol Sleep Aid the FDA mandated: "Warning: May cause drowsiness." (and...I'm taking this because???)

On a medical biofeedback device the FDA insisted the label: "Not to be used for the other use." (dumb, dumber, more dumber, most dumbiestiest.)

On Sunsbury's peanuts: "Warning: contains nuts." (talk about a news flash!)

On a child's superman costume: "Wearing of this garment does not enable you to fly."

On a chainsaw: "Do not attempt to stop chain with your hands or genitals." (was there a lot of this happening somewhere?)

On an American Airlines packet of nuts: "Instructions: Open packet, eat nuts." (Step 3: maybe, uh...fly walk instead?)

On a Tiramisu dessert (printed on bottom): "Do not turn upside down." (well...duh, a bit late, huh!)

On Bread Pudding: "Product will be hot after heating." (...and you thought????...)

Statistically, medical doctors are approximately 9,000 times more dangerous than gun owners.

Remember, "Guns don't kill people, medical doctors do."

FACT: Not everyone has a gun, but almost everyone has at least one doctor.

Please alert your friends to this alarming threat immediately. We must ban doctors before this gets completely out of hand!

Note: Out of concern for the public at large, the statistics on lawyers have been withheld for fear the shock would
Why did the post office recall the new FDA stamps? People couldn't lick them because of health risks. We are fighting this ignorance. But be advised that we are legal in America and must play by the rules. And there are Americans that still think they are the world when only one person in 25 lives in America. Where each American owes the Federal Reserve and China well over 100,000 dollars based on America national debt. What do you call a lawyer who has gone bad? Senator. And a Senator that has gone cause people to panic and seek medical attention.
The FDA writes that it is inappropriate to use words like subtle energy measures. Our muscles operate as magnets, this is an energy. The energy is beneath our awareness, this means it is subtle. We measure the subtle energy and we defend our right to do so. Even though the FDA intellect is so low we hear jokes like = What do a FDA agent and a sperm have in common? Both have about a one in 3 million chance of becoming a thinking human being. OR Why did the post office recall the new FDA stamps? People couldn't lick them because of health risks. We are fighting this ignorance. But be advised that we are legal in America and must play by the rules. And there are Americans that still think they are the world when only one person in 25 lives in America. Where each American owes the Federal Reserve and China well over 100,000 dollars based on America national debt. What do you call a lawyer who has gone bad? Senator. And a Senator that has gone
I HAVE TO HAND IT TO YOU, MISTER GREENSPAN—YOU ARE A COMEDY MASTERSMIND!

Remember when you were helping to inflate the housing bubble with historically low interest rates—AND urging people to take out adjustable rate loans? What a classic! Pure comedy gold!

Like when you urged Congress to stabilize Social Security by raising the payroll tax—which disproportionately impacts low and mid-level earners!

And when you claimed that we were actually opposed to the tax cuts all along—what can I even say?

...And to top it off now by staining that you were actually alienated from any real form of community that you can no longer distinguish between belonging and conforming...!

...Are you so alienated from any real form of community that you can no longer distinguish between belonging and conforming...!

...Have your critical faculties been so blunted by a relentless diet of sensationalist trivia that you're now rendered gullible enough to believe that yet another purchase will finally make you happy...!

And that another drug will make you well... GOOD...

WE'LL BE RIGHT BACK AFTER THESE MESSAGES...

the Media use advanced Brain Washing and Devious Marketing Techniques to Control Us

Big Tobacco Knows Monkee see Monkee do, They pay for cigs to be in movies, so you will think it makes you cool
years ago there was a picture of me next to the Papini device. An untested investigational device sold in America that killed 12 people. The fervor in America is that I was involved with the device because of the picture. Nobody knew that when the picture was taken I was shouting “What the FUCK is this garbage doing here?” Karen was so dumb she once sold her only car for gas money, really. There are many charlatan devices sold around the world. We fired John Kelsey because he refused to help stop the Russian frauds of the Oberion and Introspect. John was so dense there was lightning and he thought someone was taking his picture. John got an AM radio. And it took him a month to realize he could play it at night. Read my bad is called rich, filthy rich, or at least just filthy.

The Federal Reserve is no more federal than federal express. They made a world record profit last year of over 500 billion dollars, and no one knows who owns the Federal Reserve. And they are not examined, audited nor do they need to report anything to the US people or government. America is in trouble with many things and we hope that they can solve their problems with new leadership. The focus is as always on me. They fear my power and intellect. My new books on natural medicine will help many more people. And after Karen (my ex-wife) and Ryan had a seminar in the Bahamas a drugless art like energetic medicine. I hope the FDA people read this and I know how to keep them in suspense. I’ll tell you tomorrow.
Failure of Alternative Medicine
Letter to John about the problem of fraud in alternative medicine

So finally John we have the crux of the problem, the Introspect, the Oberon, whatever Russian device the charlatan frauds are selling this week. You see we measured the Russian devices, and there is no electrical connection to the body, and yet they claim there is, this is FRAUD. There is no evidence that they can send in a signal of some anatomy part and measure your reaction to it. No electron, photon, sound or science. You want to stupidly smile look the other way and let doctors lose their licenses and their lives because the Russian pay such a large percentage of sales commissions. They can because their devices are not CE registered hence illegal, not fully tested (this costs money) and they are completely fraudulent, deceitful and bogus. There are no registrations and no electrical or scientific interface with the body human. You say you use one of these devices regularly and this is the **THE reason we are firing you.**

We will tell the MHRA you use this device, we will tell them of your lecture on cancer to a European audience. The tightening of your anal sphincter right now is because perhaps you are afraid, NOW. You know the truth but cannot admit it. You are not afraid to be in a seminar where the device is shown, discussed, marketed and sold. But when we want to tell the authorities about a device that is so fraudulently marketed and you personally use it as you have admitted in your e-mail, now you might understand. Or maybe greed over the large commission they pay might still sway your mind. This is the problem. Perhaps the MHRA can educate you on the law of what and how devices can be used on a member of the English community. Believe me they will not understand the fraudulent con man science the Russian devices use to trick people into buying and or using one.

Sale and use of these fraudulent, incompetent, foolish, and ignorant ways has resulted in two actions. One your incompetency has resulted in your dismissal, and two your stupidity has resulted in our turning over the case of your introspect to the MHRA who will investigate your illegal use and illegal claims. They I am confident they might finally break down the stupid, brainless, dim-witted resistance you have and perhaps they can teach you the value of a CE mark.
The field of alternative medicine is faced with tough times, we must put our money where our mouth is, prove and spend the money to prove what we say. We must see the attack on alternative medicine and not be drawn into defense of fraud and con men, but defend good science. The Russian devices do not have good science, I have found no science at all. They are fraudulent charlatans who will tell any story that a thoughtless sap like you might believe. A foolish, uneducated, stupid, witless, just plain dumb fool like you will see money before law. If there is no real CE mark as a medical device stay away or you are fired from IMUNE. A donkey will dig in his heels and resist logic. A stubborn witless fool will refuse to accept the truth. A cheap fool and stupid idiot cannot see the truth if money is in the way. An asshole as such was never worthy of a commission in IMUNE. I am sorry to ever have hired such an incompetent fool in the first place. Dig you heels into the Russian shit and enjoy the smell of illegal folly. Your choice of who to defend is implausible and questions your intellect and mental capacity. I hope the Russian mindless drool is in some way compensation for the loss of a cheap fool and stupid idiot who cannot see the truth if money is in the way.
you have now occurred. The Russian devices are shit and those such as you who support them are less.

This conflict in Romania starts when I was asked to do a lecture in Romania some years ago. There were some very intelligent young medical doctors who saw my lecture. I lectured for one whole day and because these doctors knew what a volt was I went into great detail on the electrical aspects of our device and also said that the subspace use was very small in effect and was an off use not a company claim. I was asked about the Russian devices and one of the doctors in attendance did not like my answer about the lack of science. She used the Russian devices everyday and was shocked at my answer. The fact that she had and continues to sell these devices led her to form cognitive dissonance and hate me rather than see the truth.

But the next day the Russian doctor would lecture on how his device worked and I told the doctors to ask the following questions, What does the device use for inputs?, What is the science behind these inputs?, What is the device then measuring the change of? Is it measuring electrons, photons, sound, or what? How is it measuring? Your device says that an organ part is weak, how do you determine this? How did you verify this? We researched the device and we were able to prove it had no changing inputs, and nothing was measured. It just appeared to work. I read the so-called research and as an expert I can tell you it is mindless rambling and offers no proof of any of their claims.

After the next day the young doctors came to me with their mouths open they said OH MY GOD the Russian doctor did not answer a single scientific question. He only gave us goodbye look pseudo science. It was as I had said complete and utter chicanery, and an absolute fraud. These Romanian doctors now are the ones most opposed to seminars where companies like Calivita allow the Russian devices and other illegal products to be illegally marketed. And the one doctor who got money for the sale she has since been my worst enemy for she is unable to admit she was fooled. You John and Thomas and many others are blind the truth of these Russian devices. With alternative medicine fate in the balance, we need to be careful and stop being fooled by stories and promises.

You see in the real world you need to have some answers for the questions of how it works to know your adrenals are weak. But in the airy fairy world of the unintelligent asinine alternative medicine community, you just need a story, sleight of hand, a few mirrors, and a lecture where real scientists can’t attend. The Romanian doctors told me that when they really listened and asked questions they saw he did...
not know. He did not know what an electron was. Romania is one of the few places where they can sell such sham devices. Where people running lectures don’t seem to care or know about European rules or regulations, or even know just good common sense of what works or what doesn’t.

We must be straight and forthright. We must not be guilty of association with such blatantly illegal and non-scientific devices. If we are too quick to allow our good name to be associated with lying scoundrels like the Russian devices we might be seen to be the same scoundrels they are. The line must be drawn. The CE mark or some rational legal use of same is the line. We will not be associated with devices or products that use false or irregular claims to make money from an unprotected public. It is our job to protect the public, and insist on the law. It is our duty to ask for science and when a device marketer says that there is an electrical or photonic connection to the body and it is proven that there is none, as in the case of the fraudulent Russian devices, we need to have direct and decisive action. When their studies are just mindless unscientific drool someone has to have the where with all to see it. The Russian studies show no scientific rational.

Do not be involved in fraud. If the device company wants to say that there is some above science activity and be straight forward about it, we will reward honesty and help them to be honest. But in the case of the Russian devices this is not the case. There are lies, claims of studies not shown, claims of studies not done, claims of electrical connections not done and many other lies. Simple truth, this is fraud. The public needs to be protected from such fraud. Your association with such fraud is the case of your dismissal. Dig your ignorant heels into the shit the Russian companies are selling you. Wallow in the pig sty they create and let the
authorities deal with the fraud and deception they and now you dispense. Your inability to see the blatant fraud and lies of the Russian devices is the grounds for your dismissal.

We however will make the CE mark a legal value of importance and validity. We are ethically bound to seek full compliance at every required avenue. And as such your inability to do the same has resulted in your dismissal. Please do not associate with our people in any fashion for we fear that guilt by association might weaken our firm commitment to helping the people with truth.

People can be duped by con men like some of these supposed scientists. Doctors can be lied to, deceived, led to believe in clever lies. There are most certainly many con men selling things in alternative medicine. Because there is a vast history of this in medicine, Doctors and the public must be protected from these charlatans. We must stop people like Thomas from standing on a podium and spouting about scientific studies and results that do not exist. And when I say this let me emphasize that the lies and chicanery of Thomas is a obvious fact. We have many many videos of him talking about such studies and there is not just no evidence the studies exist, we have proof they do NOT exist. Our society must find ways to protect naive doctors and a gullible public from blatant lies.

People like you can be duped and led to believe that the Russian devices work in some way, because they appear to work. Our society has made laws starting in 1976 to make sales people and manufacturers provide evidence of what they claim. When the Russian write a book, most people don’t read it, they simply say well there is a book about the device it must work because there is a book. I read the books. Garbage, there is not a shred of legitimate evidence, not a single verifiable substantiation that the claims are valid in a double blind session. Not even a scientific rational. The fact that is appears to work is not enough for our society. Someone must protect the public from the chance that an unproven illegitimate device should be given any chance to hurt people. We have laws of evidence to get a CE mark.

When I first got the registration in America in 1989 we needed to present good double blind research, which was done with an IRB in 1986. We repeated the research with doctors in Colorado in 1989. We did research in 1990 in Kiev, 1991 in Budapest, 1992 in Canada, 1993 in America. We needed a large scale 1000+ person research in 1996 done in England, Colorado, and California, Validated in 1999. We have done many research projects. The large scale study where over 2,000 therapists sent in data was done with a double blind from 2005 to 2007. The Italian, German 6 month study cost in excess of 50,000 Euros. The recent study of France, Romania, Hungary, America, and Germany cost quite a lot. What we

he said this and laughed. I was appalled at blatant admission to fraud. He then laughed that the FDA and no other could stop him. He could teach this hoax scheme called muscle testing to anyone, no one could stop him. There is not only NO evidence that muscle testing for medications works, there is MASSIVE research that PROVES beyond a shadow of doubt the therapist is in complete control of the results. He is able to sell you any vitamin, homeopathic, story, or idea he wants by showing you how you go weak or strong when he pushes on your muscle. Sham charlatan fraud at a pinnacle. No one but me speaks out against such obvious deception of patients. Everyone in alternative medicine does not want to make enemies of the charlatans. It seems I am the only one to step forward with ethics, unswerving honor, and a full appreciation of the law and the fact that some evidence of a claim is needed.

The next big fraud is the point probe, for it also is completely under the control of the therapist. If the therapist presses in fast he gets a high signal. Slow press and there is a lower signal. By varying the speed of delivery of the probe the therapist can alter the reading to sell the duped patient whatever remedy he wants, most often at abhorrently high prices. When the therapist does not know what he is testing, he cannot get the same readings. It fails every double blind test.

It appears to the authorities that all of these devices are unscientific. And I have tried to make the real deal. I have tried to help all of the people in alternative testing, registering and validating this as a real science. And the charlatans want to coat tail with us. We cannot let them circumvent the path and continue their fraud.

With a strong history of research in many ways, a history of proper IRBs, Proper ethics committees, countries registrations, a ISSN peer reviewed medical journal, an International Medical University, and above all a history of personal focused honor, ethics, and dedication to doing things right and proving safety and efficacy, explaining scientific rationale in the over 90 books I have written, showing research in the over 100 journals I have participated in, and opening the eyes of all science to new horizons. I have tried to make the real deal. I have tried to help all of the people in alternative

can prove is safety and efficacy of the device. Beyond a shadow of a doubt and we satisfy the stringent laws and get a CE mark once again. A battle that the Russian do not have to do because witless dupes and clueless fools such as you dig in their heels and wallow in self pity afraid to face the simple obvious fact, your believe that the device works because it appears to work is not enough. When we did testing we proved the devices did not work. In a double blind they fail.

The biggest fraud and chicanery of the modern world is muscle testing. Louie admitted to us in Mexico his fraud. He admitted he changes the pressure to make the results he wants. He laughed at how he dupe, cons, and fools his patients. You were at the table when he said this and laughed. I was appalled at blatant admission to fraud. He then laughed that the FDA and no other could stop him. He could teach this hoax scheme called muscle testing to anyone, no one could stop him. There is not only NO evidence that muscle testing for medications works, there is MASSIVE research that PROVES beyond a shadow of doubt the therapist is in complete control of the results. He is able to sell you any vitamin, homeopathic, story, or idea he wants by showing you how you go weak or strong when he pushes on your muscle. Sham charlatan fraud at a pinnacle. The legal authorities have focused on me because first they see me as guilty by association. Karen and Ryan had many illegal devices presented as real devices in the Bahamas years ago. There is a picture of me next to the Papini device. This device has now killed over a dozen people. Americans were upset, and they focused on alternative medicine. They attacked me not knowing that if there was sound on the picture you would hear me say “What the FUCK is this device doing here? You should not use IMUNE to misrepresent any device as real and legal when it is not”. But to the FDA it was just another sold. They did not call me or work with me because I have the where withal to ask for the real CE mark, the real properly done research, real science. They could dupe you because you are a money hawking idiot. Dig in your stubborn heels and when you awake from your childish temper tantrum of obstinate self deception realize that your lack of integrity is the problem, not me. You promised to not go into Romania and now you are going your promises mean nothing, your integrity is worthless, and your word is rubbish. Dig your heels into your lying brain. You cannot be trusted and it is my duty to the world to tell this story to all who can read it. Someone has to try to protect unwitting doctors from being duped into spending their money on fraudulent products.

I am sure of two things first you are angry at me and want to write a letter to attack the messenger who has told you a message you do not want to hear. And second after the anger subsides you know that every message I have said is true. The sale of these devices continues because there are those who
make lectures and give the con men the chance to display their wares as if there were scientific or legal. Doctors are thus duped into spending their hard earned money on fraud. They use Stories most often unverifiable, unsubstantiated, and unscientific. You know I am right. The whole industry of natural medicine knows I am right. But they like the stories about Russian scientist and devices in space, and legends of back water science not accepted. They love the guy in the suit who looks and talks a good show as all con men do. But when there is fraud, well, someone must care. I care.

But here is the problem. I was at an IMUNE conference in Norway when a doctor called me to her table to talk. She was crying and told me that her medical license was removed for having an illegal device.

**Proof of the Fraudulent Russian Devices**

She had a patient who the Russian device (Oberon, Introspect etc) said there was a problem with the liver. Her medical doctor said there was no such problem then the patient asked how does the Russian device know this. How does it work? The doctor did not know and asked the distributor Thomas. He did not know and asked the manufacturer. They did not know and asked the developer and he would not say. The medical authorities found no scientific evidence that is worked. With our device I wrote complete details of every aspect with research, data, publication, and sound scientific rational. But the Russian devices had nothing.

I read the Russian literature and there was no description of how it worked. And most importantly there was extreme false claims. This is fraud. I brought several types of the Russian devices into our lab. They said there was a sound signal for each organ sent into the headphones. There was no science research or even a publication on this. And when we put the sound signal onto an oscilloscope it had no variation. It was an unchanging monotone. They said that the laser had a variation for each organ tested. There was no science research or even a publication to explain this. It is impossible for a laser to vary. And low and behold when we tested it there was indeed no variation. This was another fraudulent claim.

There were two sensors in the headphones sensing only if 1. The headphone was stretched out onto a head or head sized body. When we put the headphones onto a melon it worked fine. 2. The second sensor was if the laser was directed at the headphone. So these sensors determined only if the device was in place and it appeared to work. There was no sensor for variant sound or light or electricity. The hard drive was monitored and there was no variation of signal received. In short no scientific connection, just the appearance of it.

When we tested a person we got a set of readings, the same readings make lectures and give the con men the chance to display their wares as if there were scientific or legal. Doctors are thus duped into spending their hard earned money on fraud. They use Stories most often unverifiable, unsubstantiated, and unscientific. You know I am right. The whole industry of natural medicine knows I am right. But they like the stories about Russian scientist and devices in space, and legends of back water science not accepted. They love the guy in the suit who looks and talks a good show as all con men do. But when there is fraud, well, someone must care. I care.

When we tested a person we got a set of readings, the same readings
and protect the doctor from his own stupidity. Most of these doctors are easy targets for conman. Since it seems that I am the only one who cares, and I am the only one who seems to know the difference of an electron versus a photon, it is logical that I be kept in the loop of decision.

With our device we are able to explain it, prove it, validate it, register it, publish about it, test it and protect the doctor who uses it. We do this to the nth degree and we are attacked most violently by the mindless dupes who use the fraudulent devices. They will say anything to divert attention away from their own chicanery and con. They think we are the same we are not we can fully explain any and all functions and we have full documentation to back us up.

Well the problem is that I cannot allow the name of IMUNE to be associated with such an incredible fraud as these Russian devices are perpetrating. And no one including John seems to be able to expose them or to even care. But before a law suit destroys us all, someone must care. Someone must do some science. Someone must get a medical CE mark. I tried to help the Russians but they did not want to have their con exposed. These are strong words but they are all true. As a person ask them how it knows a small part of the liver from another, and think if you would take their answer to court to defend yourself.

The fact that these devices seem to work is not enough. A clever programmer has found a way to make it seem to work. This is the same if not worse for the CORE device. It is a bigger fraud that a clever programmer has made to look good. But the CORE program is complete fraud. There are many clever people making outlandish and fraudulent claims. I take great care to explain, test, write and publish in direct fashion every detail to protect you and all concerned. And I am hated by the con men. But the field of alternative medicine, the seminars, and the teachers all just smile at these con men and lets them perpetrate their fraud. Everybody just lets them continue, nobody but I will stand to protect the public. Even John lets them go on with their deceit. If you can’t explain how your device works and when a qualified scientist finds undeniable proof that it is fraud devices like the CORE and the Russian devices should not be allowed.
So once again let me apologize for my outburst and if we are to work together again please do not circumvent me. As for John he will have to learn a lesson from the MHRA which is the medical police in England. He will learn a lesson for using non registered and fraudulent devices on patients. I hope that you folks and all of the therapists attending any of your lectures never have to have such a lesson. The Norway doctor had to pay a stiff price to learn about fraud.

Sincerely
Desiré Dubounet

John was asked to not go to Romania unless the request went thru proper channels and there was a complete consensus on his attendance. John agreed to this several times. But John lied again. So John was fired. This is just business, no one can have employees who lie. After two such lies John was fired.

Then John writes an email he has and uses the fraudulent Russian device. This is another problem. John does not have the integrity to address legality. He uses foolish prejudice and bias in his ways. He over details people he dislikes and washes away details from those he likes.

I am so tired of discussing the science with people who do not even know what an electron is. We use electrons thru the harness. Only the electrical process of the voltammetry is able to measure and make a field. The EIS device uses electrons. There are NO NO NO electrons in the Russian devices being measured or sent to the body. It is so obvious the fact that the SCIO is fully scientific and credentialed and the Russian devices are flim flam shams. But even eye witnesses like John, Thomas, Ben, and Cathy can suspend their disbelief, twist their memory, and somehow rationalize the blatant crime these fraudulent devices are. This lack of integrity and honor of these people is appalling and fully frustrates me. It is such an incredible battle to try to erode false beliefs. People cling to false beliefs...
the alternative field would hate him. I said you have an ethical responsibility to the truth. He left on that remark, knowing I was right the point probes are fraudulent but ethics seems to be gone in alternative health.

You see the conmen are nice guys. The conman who sold the Papini devices that killed people was a super guy a real prince. And the point probe muscle testing con artist can smile like no one I know. It is because inside they are laughing at the alternative industry people.

And then to the greatest insult of all. When people ask how does this Russian, CORE, LIFE device work? They say well it is like the SCIO. This is the greatest insult of all. The SCIO works on a thirty year old technology of Voltammetric assay of both product and Voltammetric measure of the patient’s reactivity. The science is precise and extensive. A rich history of science, research, registrations, legal compliance and everything accounted for in fine detail. And because these charlatans lie and say there sham is like the SCIO I am attacked by the authorities, I am slandered in the press, and I am prosecuted, persecuted and wronged.

I have tried to offer science to energetic medicine, a real university, a medical university, a real peer reviewed medical journal, real registrations, real science. And in return I am wronged by the very field I sought to protect. I cannot tell even the face of profound evidence.

I am told that the users and salesmen for such illegal devices are presenting at this lecture. I would suggest you publicly print my letters to help get the awareness of the frauds out.

I was in Germany years ago in Baden Baden lecturing on the technology at medicine week. An important man from an alternative magazine interviewed me. We discussed how the point probe was a sham. He agreed that the therapist was in complete control of the results and the speed of delivery of the probe determined the reading. I said if you know this why you don’t publish this. He said well there are so many nice guys selling the point probe, and if he said anything the people I was attacking me and my family.

John did not hold to this line of ethics. He did not want to take an active stance to protect doctors and patients from frauds. If he did, we together might have stopped the sale of the Papini device in America, and saved the lives of those that died. So before the industry is hurt any further by fraudulent devices and con men let’s take action not sit and let them go. Here we have the problem: Science, Math, Statistics and so many people’s complete and utter inability to use them and the people’s ability to suspend their disbelief and believe what they want to believe.

Ben Lict writes to provide evidence for you how dangerous these frauds like the CORE device is to our dreams. I am not the enemy of alternative medicine and neither are you if your letter is correct and I believe it is. The enemies are those that go outside the law and make illegal programs with made up stories and no science to back it up. We all look bad if we in any way let the Russian charade continue. We all have a duty to protect the doctors who might believe a concocted story and suspend their disbelief. The gullible doctors must be protected from the real enemy these con men who prey on the doctors and public suspension of disbelief. These con men and the doctors using their devices are
Our Aim is to Keep this Place Clean and Your Aim will Help

Ben you saw this, we discussed this over twenty times over the course of more than four years. It is so frustrating to once again recount the experience. It is like talking to a stump and trying to get the stump to change its mind. We have more than a hundred times the information than the EIS, easily. We do not attach such information to each sale. But the information is there to peruse if you can have the simple integrity to go to the IMUNE International Journal of the Medical Science of Homeopathy and look at the articles published by this international recognized, registered and approved ISSN peer reviewed medical journal. Any slander against this journal is just mindless illegal libelous drool. In the EIS literature there is no description of how they test the liver. There is a sound science to the electron flow test, and the device showed some validity. It is registered with a CE mark. So it is OK. But its ability to measure the liver is not fully nor even partially disclosed. The science presented is partial not complete and the list of studies is very limited.

With the Russian devices they claim that there is some signal for each body part being transmitted via a laser or infrared device or the sound into the headphones. #1. There is no literature showing the ability of the laser, infrared or sound to send in a signal of a body part like any part of the liver. #2. The Russian devices have no variant signal coming from these. #3. The claims of the laser, infrared, sound are completely false. These claims are criminal fraudulent. The headphones and ray are just a sham to get stupid non-scientific alternative people and doctors to buy one. This chicanery is the focus and the impropriety and it cannot be tolerated.

We have more than a hundred times the information than the EIS, easily. We do not attach such information to each sale. But the information is there to peruse if you can have the simple integrity to go to the IMUNE International Journal of the Medical Science of Homeopathy and look at the articles published by this international recognized, registered and approved ISSN peer reviewed medical journal. Any slander against this journal is just mindless illegal libelous drool. In the EIS literature there is no description of how they test the liver. There is a sound science to the electron flow test, and the device showed some validity. It is registered with a CE mark. So it is OK. But its ability to measure the liver is not fully nor even partially disclosed. The science presented is partial not complete and the list of studies is very limited.

Our system is registered as a Voltammetric evoked potential system. There is full and open disclosure for each and every aspect of the process for over twenty years. There have been
over 150 articles published on the use of the QX SCIO etc. No chance for any deception whatsoever. I won't tolerate even the tiniest bit of deception or illegality. I cannot tolerate someone who is ignorant of the total large amount of research and articles on each and every facet of my technology and then puts the burden on me to provide research that he should have the wherewithal to find on his own.

But when I first started the alternative people were afraid of the word volt, amp, and statistics. They were science and math-phobic. Alternative medicine has been a testimony to the theories of suspension of disbelief. The other companies could put out anything and sell it for most of the therapists had no ability to understand words like volt, amp and statistics.

I am an electrical engineer having worked on the Apollo mission and an ex-professor of mathematics from YSU. As such I tried to bring these three words into alternative medicine. The other companies hated me and they trumped up lies about me. They tried to discredit me. The FDA tried to stop me and use lies against me. I was able to register the acupuncture needle in America as a medical device. But the FDA used the lies to continue their attack. I was unable to see my father for ten years before he died, and now I am unable to see my mother who even now is in a hospice on her death bed. Why because the alternative therapists and muscle testing people will believe anything. They have incredible suspension of disbelief. When the other companies cannot argue the science or mathematics of my vastly superior devices and technology, they resort to telling lies about me. They know they can dupe alternative therapist and muscle testers to believe any story they tell. The stories are so fantastic and the lies so incredible it just goes to point out the gullibility of alternative medicine.

My dedication to saving this field and establishing a new type of science is unavering. Even now I must take time to write these articles about science that these people wouldn't understand. I am trying to save alternative medicine from being destroyed. In a world of evidence we need to produce it. Put our money where our mouth is and produce the evidence. And we need to expose the frauds.

You see the conmen are nice guys. The conman who sold the Papini devices that killed people was a super guy a real prince. And the point probe muscle testing con artists can smile like no one I know. It is because inside they are laughing at the alternative industry people.

And it above all I would like for someone to write a letter to me that said they would do something against the frauds instead of asking me to do something. It would be nice for someone else to see the cancer these frauds are to our
have found some way to rationalize your own perceptions and once again in the future this will come up again. If you still are suspending your disbelief and not understanding it is hard to understand how we can protect alternative medicine when the people are so easily fooled by any story that comes down the pike. I believe that if I show you the video of you being a fool and the proof of the sham that your mind will just twist the perception again.

The claim that there is a signal of light sound electron or other measurable signal sent to the patient for each body part and a measured reaction to the signal to get a score for each part is not true. Thus this claim used to sell the device is false. The sale is a con and a industry. Rather than just smile and let them dupe people, let's do something. If there is anything to debate in these letters please have the common decency to express the exact concern without giving me mindless drool and stupid rationalization. I know it is difficult to admit that you have been fooled and deceived by the conmen. It is hard to admit that you were such a dolt as to twist both memory and perception to suspend your disbelief. It is hard to face a false belief. It is hard to admit the Russian devices are full out and out fraud, and the tricked you to believe them. But you have to find a way to either learn what an electron is or admit that the Russian devices are fraud. But I am sure that your mind has already twisted this letter, and you have found some way to rationalize your own perceptions and once again in the future this will come up again. If you still are suspending your disbelief and not understanding it is hard to understand how we can protect alternative medicine when the people are so easily fooled by any story that comes down the pike. I believe that if I show you the video of you being a fool and the proof of the sham that your mind will just twist the perception again.

The claim that there is a signal of light sound electron or other measurable signal sent to the patient for each body part and a measured reaction to the signal to get a score for each part is not true. Thus this claim used to sell the device is false. The sale is a con and a
The devaluing of the American dollar over the last five years has made every American’s worth 50% less than before.

The Americans have allowed hypocrisy to expound and the unequal education has made most students think education is a joke. Everyone devalues education and looks for the easy fraud. And then to the greatest insult of all. When people ask how does this Russian, LIFE or CORE device work? They say well it is like the SCIO. This is the greatest insult of all. The SCIO works on a thirty year old technology of Voltammetric assay of both product and Voltammetric measure of the patient’s reactivity. The science is precise and extensive. A rich history of science, research, registrations, legal compliance and everything accounted for in fine detail. And because these charlatans lie and say there sham is like the SCIO I am attacked by the authorities, I am slandered in the press, and I am prosecuted, persecuted and wronged.

I have tried to offer science to energetic medicine, a real university, a medical university, a real peer reviewed medical journal, real registrations, real science.

And in return I am wronged by the very field I sought to protect. I cannot tell you how dangerous these frauds like the CORE device are to our dreams.

The flourish of muscle testers is just one example. So many people believing in an art proven to be a sham, it is appalling. The muscle testers change the pressure and thus they control the outcome. They do not measure the patient they deceive the patient. When they use this deception to sell a vitamin or product the fraud deepens.

The public needs to be protected. You need to discipline your mind. This industry needs attention.

Desiré

America could Capsize from the Hole Hypocrisy has made in it

By Desiré Dubounet

The global recession that began in America’s housing market has shaken the world’s economic order and possibly knocked the United States down a notch or two or more, maybe much more. The spendthrift American consumer is out of money. American wages are flat. Despite some hopeful signs, the U.S. economy could muddle along for decades. Technology has shifted from America to other countries. And as oil shifted from Texas oil men to Arab henchmen, America has made many other countries rich. The lazy shortcut driven Americans have all went on strike for more and more pay only for most of them to be laid off as victims of takeovers and early sale of the assets of their company. Only America has way out. The best expression of lazy stupidity and how marketing has taken over is the election of George Bush for two terms. George was a stupid psychopath who hurt the country. If you hired a set of trained intellectual terrorists to plot how to hurt America, you could not have hurt America more. His devastating and destructive legacy has now made every American poorer, hated, and less respected. There are still Americans with their chest stuck out trying to get themselves to believe that America is still the leader of the world. But inside they know different, and their own self deception is weakening. It will take more than bravado to save America.
that are undermining our future prosperity:

**America is a land of haves and have-nots**

The Federal Reserve is not owned by Americans but is owned by the Ultra Rich bankers. These people are above the law. The Federal Reserve does not need to account to the American government. They do not need to account to anybody or anything. Each American now owes the Federal Reserve more than $40,000 usd. Our debt to the Federal Reserve is approaching twenty trillion dollars. This means that Americans have become a land of indentured servants working only to pay taxes to go to the Federal Reserve. And with the interest charged per minute, we can never be free. This massive con job Federal Reserve was pushed into existence by a trick of the government in 1913 and 1914. Woodrow Wilson said of this that he had doomed his country to death by allowing the bankers to take control. We are now seeing the possible death of America with such large hypocrisy as this. We think we are free and that we own our possessions but we are all debtors to a country who is sinking us deeper into debt. Illusions of ownership, material wealth, equality and freedom stop us from seeing the truth.

**America has no real health care but disease care**

The system of health insurance has failed and people are not getting healthier but they are getting poorer. The medical system is run by corporations bent on profit not people. Health care is more and more expensive. And attempts to give all a care will bankrupt the system when everybody gets their hands out. There is a basic lack of understanding of the biology and health taught in schools and the killers, processed foods, nitrate meats, processed sugars, synthetic compounds, tobacco, and drugs, drugs, drugs all killing and making us sick. There is no working definition of health. And no consciousness of stress effects by the main players, the FDA and the AMA. So the rich get richer and the poor get poorer. The people causing the health care problem are getting rich and don’t want their excessive profits taxed. They then invest their money into drugs and hospitals to get secondary benefits from causing disease, charge to palliate the symptoms. Don’t cure them palliate and make them dependent on a drug. Make them turn to a doctor in fear when their child sniffs. We have a “wake you up to give a sleeping pill” system; with “did you take your meds” as the key mantra. All about drug co. profit.

**Too Many Americans don’t want to work**

Sure, now that jobs are scarce, everybody’s willing to put in a few extra hours to stay ahead of the ax. But look around: We still expect easy money, hope to retire early and embrace the overly simplistic messages of bestsellers like “The One Minute Millionaire” and
I recently interviewed entrepreneur Gary Vaynerchuk, who transformed his father’s neighborhood liquor store into a $60 million business anchored by the Web site winelibrarytv.com. An overnight success? Hardly. Vaynerchuk has big plans, and he works at least 16 hours a day to achieve them. “If you want to work eight hours a day,” he says, “you’re going to get eight-hour-a-day results. There’s nothing wrong with that, but I don’t want to hear you bitch about money if you’re only willing to work eight hours a day.” Take pride in what you do, enjoy the work, and skills you don’t have.”

Unfortunately, the rest of the world isn’t sending as much money our way as it used to, which makes it harder to do less with more. White-collar jobs are now migrating overseas just like blue-collar ones. Kids in Asia spend the summer studying math and science while American mall rats are texting each other about Britney and Miley.

“We need a different mind-set,” says Guillen. “People need to invest more in their own future. Instead of buying stuff at the mall, spend the money on evening classes. Learn a language or...
bring a positive sense to the job.

Vaynerchuk is only 33, but he has something in common with John Bogle, the founder of the Vanguard mutual fund company, who’s 80 years old. I talked to Bogle recently about how Americans need to change their approach to work and money. He told me this: “We need more caution, more savings and we may have to work harder. Maybe we need more people who like to work and don’t count down every day till retirement.”

Too Many Americans don’t want to sacrifice

Why should we? The government is standing by with stimulus money, banker bailouts, homeowner aid, cash for clunkers, expanded health care and maybe more stimulus money. And most Americans will never have to pay an extra dime for any of this. Somehow, $9 trillion worth of government debt will just become somebody else’s problem. The American government can just print money, make it from paper. And the rest of the world will just smile and let us. Actually they won’t that is why the big devaluation of the dollar will happen when the Ultra Rich have properly removed more of their liquid investments from the US shores. With it impossible to attack the Ultra Rich what else can we do but let someone else do it. Everyone is afraid, and most problematic is the lawyers are afraid. Lawyers used to fight for law but now they all just play let’s make a deal. They are afraid to step out of the line, afraid to stand up to the Ultra Rich, afraid to do their job.

When he was campaigning, candidate Barack Obama dabbled with the “personal responsibility” theme, and in his acceptance speech in November he called for a “new spirit of sacrifice.” Obama’s plan is to get a tiny portion of the American public -- the wealthy and the corporations-- to pay higher taxes for the benefit of the majority. Hey, if we can convince 1% of the population to bear some responsibility for fighting two open-ended wars that is supposedly in the interest of every American. It would just be best to tell the middle class that if they want something, they need to earn it themselves. The Ultra Rich has manipulated the system for profit and should now be asked to help out. Obama Ultra Rich and corporation tax will get over 2 trillion of the debt back. Apparently a good start, but more will be needed.

Science has become a search for funding not a search for truth

It is foolish to think that technology will solve the problems that technology caused. Scientist’s opinions can be bought for a fee. Money is in control and Machiavelli was right.

The Ultra Rich control science and use it for profit. Protestors and those who believe in truth are made fun of in the media, and not allowed into the science club.

We used to look up to scientists but now we view them as most often self

reform and other complicated issues, then we’re signing ourselves over to special interests of the Ultra Rich who see nothing wrong with plundering our national -- and personal -- wealth.

People who lack the sense to question Big Lies always end up in deep trouble. Being well informed takes work, even with the Internet. In a democracy, that’s simply a civic burden. If we’re too foolish or lazy to educate ourselves on health care, global warming, financial
interested, arrogant or paid to say the things they say.  

Energy is a problem, the Environment is a problem  
The same oil that powers our cars and comes from deep in the earth can be grown on farms. There is Bio-mass, Bio-fuels, wind, solar etc not really being tapped. Our problem is too much carbon dioxide and too little oxygen in the air. If we switch to farming our energy, we have plants taking in carbon dioxide and giving off oxygen. All the while the plants are supplying us with bio-fuels and bio-mass, Problem solved. America is no longer dependent on foreign oil, the environment is saved, people move to more rural farming communities that improve health, more good healthy air, more fresh food, less congestion, less crime. Hydroponics brings water desalination and life to the dry deserts; we channel sea water and remove the threats of rising sea, and a host of cleaner lifestyle choices all from using plants rather than drilling for oil. Brazil has made major advances in the way of getting energy from plants. They even use sugar to make plastics and other chemicals that used to be only petro-chemical. The technology exists today to do this. But America is under control of the Ultra Rich who want us to keep the money flowing to the Arab world.
the best of any of these. America is way down the list for almost all good categories except cost of health care, where it is the leader by far. And we want everything at a discount -- or better yet, free -- which brings us back to the usual disconnect between what we want and what we’re willing to pay for. What’s in it for me is the guideline.

Rationing is a dirty word, so we can’t have a system that officially rations something as vital as health care or education. Instead, we have unacknowledged, de facto rationing that directs the most resources to those with the best connections, the most money or the savvy to game the system. What keeps the rest of us content is the illusion that we, too, eventually might be able to game the system -- as long as the government doesn’t interfere. There is a possibility to hit the lottery, make the NBA, sell drugs, retire to Hawaii, get an insurance settlement and somehow beat the game. As if material goods and money were all it needed. Solutions that serve some public good -- like Social Security and bank deposit insurance in the 1930s and Medicare in the 1960s -- usually require everybody to give something to get something. If it works, the overall benefits outweigh the costs.

Good programs leave individuals the option to pay more if they want more. Bad programs promise more than they can deliver. But often we don’t know that until it’s too late. True solution could come from facing the hypocrisy. To get out of the toilet America has slipped into we need to go from a “ME ME” society to a “WE WE” society. We can take a “We WE” to get out of the toilet.

America has lost some of its honor from hypocrisy

The average American tells three lies every ten minutes. The marriage vows of love forever are 85% broken. A business man can make a deal in one room and another in a different room on the same day. Americans feel it is OK to lie to themselves, and to others. All because they know the system lies to them every day so it must be OK. In Norway and Sweden and other Scandinavian countries the public transport is on the honor system, and 99% pay. If the American subway system was to use the honor system almost no one would pay. We have less and less a sense of right and wrong. In a recent poll 65% of American children thought it was OK to commit a crime as long as you don’t get caught. This is a tragedy. And for the people who are annoyed by this truth, I’ll wager you live in a good neighborhood with good expensive public schools. 25% of American children going to school are below the poverty line, more than any other country. In Europe it is 10%.

America has become the land of incredible hypocrisy

There are so many incredible and unbelievable hypocrite money swayed ideas, procedures and things in America. The leading killers of people are tobacco and doctor prescribed pharmaceuticals, with millions of deaths and associations with deaths. The FDA is to protect us but the killers are allowed to kill as the FDA chases alternative medicine. The hypocrisy is astounding. There is public water, public roads, public utilities and public areas, where there is equality. There is no Gucci water system or Armani roads. But in education there is vast vast vast differences. The public education is still based on local taxes, so there is
an incredible difference in the money for education in a state. In most grade schools and high schools there is little chance for a good education, and this produces four big problems
1. Lack of respect for education
2. Lack of caring for others
3. Areas of ghetto devastation
4. Rising Crime as certain people have no other resort.

The land of the free has more people in jail by far more than any other. And 99% of those in jail are from less funded lower class PUBLIC schools. The jobs will go to the people graduating from the schools with more money.

Not public education at all. In fact since the most prevalent difference between the people living in poor school areas versus rich areas is race, the unequal system produces apartheid. The unequal education system maintains and encourages racism, those graduating from poor schools with little money, appear to be stupid, when it is a product of hypocrisy.

The simple solution of a state or country to give equal economic education is not even aloud to be discussed. People who discuss this seem to vanish. Children grow up asking why and the Ultra Rich say Because I say so. There is a different set of laws for people who can afford good lawyers. O.J. Simpson’s case would have turned out different with public offenders.

Equality as a word is laughable, as an American concept ludicrous.

The hypocrisy of the media is extreme. The movie industry is of just a few chosen few insiders who don’t rock the boat. The music industry who used to have protest singers has no been under control of a few ultra rich who deny access from true protest. The news media tell us one per cent of the truth of what’s really happening. The marketing media tell the uneducated public what to buy, when to wear it and when to buy another. The celebrity culture is designed to make us feel inadequate, give us false hope and drive us into conformity. Ultra Rich hypocrisy is at the heart of American problems.

As today’s children grow up and pose questions on the hypocrisy, they are met with scolding, witticisms like you can’t fight city hall, keep your mouth shut and get with the program. They are taught to fear power, obey authority and remain stupid. Just get by and find what happiness you can in drugs, sex, or music. And as music slips more and more non-verbal, less and less protest is allowed. The protesters are humiliated, maliciously aligned, and dealt with severely, all just below the uncomfortable level to not get too much attention. Conform and stand in the proper line say the proper thing and you will be OK. School cares more for conformity and reduced tension than education.

“Step out line and they take you away” as BS once said. The minds become dull and the ultra Rich get richer. And after America is under indentured slavery and mindless oppression the Ultra Rich will try to move elsewhere and they will find out that they can’t fool or control everyone. Sexuality and sexual identity is a decision for the brain or big head to make. But in America all are taught to think with the little head. Your sexual identity is decided not in your big head brain but in your little head penis. Whether you have one or not makes you male or female. In fact most of American culture is encouraged to think with the little head. Turn on the music video channels and see how sex is used to help you make every decision. America thinks with the little head and you what trouble can then result. Latent homosexuals in the media will not allow stories of sexual freedom to be shown. So the attacks on me went from regulatory to media, to revoking my American passport. All because of my social protests and greatness of free spirit. Freedom expressed in writing articles like this and making movies the way I do.

The small petty minded army of the Ultra Rich attacks me. The recent financial crisis has seen the destruction of a host of banks. The remainder are funded and controlled by the Ultra Rich who fund and control the drug companies. So when I proved that synthetic
Synthetic drugs are not compatible with life. The simple truth could destroy a nation. The Ultra Rich controls every aspect of American life. The hypocrisy makes some that can see this, feel depressed and helpless. And some of them resort to drugs or alcohol to forget. Some who see this succumb to the pressure and drop out.

With ten words appearing in my movies I became more. Those ten words are “if I were you I’d sell my drug company stock”.

The chain reaction of these words could destroy the American economy. America has invested its future in a lie. Synthetic drugs are not compatible with life. The simple truth could destroy a nation. The Ultra Rich controls every aspect of American life. The hypocrisy makes some that can see this, feel depressed and helpless. And some of them resort to drugs or alcohol to forget. Some who see this succumb to the pressure and drop out.

This makes for a bad society of drones and some protesters dismissed in the media as cranks. But as the Angel I hope you will see that there is hope for America. It lies in breaking the back of the Ultra Rich. It lies with the Americans waking up. We must fight against the Ultra Rich and their army of small petty minds. The Angel Book was written to help. America must reduce its greed, avarice, hypocrisy, anger, and false beliefs. America can be saved and restored to the days of glory, through compassion, caring, sharing, truth, equality and freedom.

We should be panicked. The Ultra-Rich and the FDA want to completely control medicine and the profit. The FDA has gradually given itself more and more control over medicine. The idea is that soon there will be an automatic prescription of a SYNthetic drug given to you for any ailment.

A blood test or perhaps a DNA test or maybe a symptom and a drug and dose will be automatically made without real human intervention. And if you don’t go to the doctor they will punish you. And if the doctor resists he will lose his license. There would be absolute control of medicine by the drug companies. The drug company’s synthetic drugs have all failed and they need to make their use mandatory to make you use them. This anal retentive form of government control is possible in a system where intelligence is so low and complete control over the minds of the population has come about.
The Scientific Results are in, the SCIO Works

Published in an ISSN Peer Reviewed Medical Journals

Their money controls governments, regulators, and the small minded media. The Ultra Rich Master Echelon Computer now sees and hears all the things we say, write, and do. Rights of privacy are gone worldwide. They have taken away our rights of free speech. The Ultra Rich control the media and refuse to tell stories that expose or offend the Ultra Rich Power. They control every movie that gets distribution, every song that reaches the radio, everything that is put on the world news. They use science and psychology to control and manipulate the minds of the masses.

But medicine is controlled by Universities that teach medicine. There is now one university starting to defend Natural Medicine. IMUNE has a new 12 month home study course that can be bought with Karma and you can learn how to do natural medicine and how to break free from the Ultra Rich control.

Well, the game of Reality Monopoly is still being played all over the world. One percent of the world’s population is winning and now controls over 80% of the wealth. The law allows the game to continue till we will see one winner and 6 billion plus losers.

The Tassel is worth the Hassel. In a world so concerned of Wellness can be yours in just 12 months of Home Study, a simple thesis, a practicum and four days of monitored supervised contact.

Big Tobacco, Big Sugar, Big Pharma, Big Oil, and Big War Industry are exempt from lay and they kill and injure, maim and cripple in the name of profit. They seek to control and dominate medicine to further build their profits.

Go to http://imune.name to learn and to get your course materials. You could get a Doctorate in Wellness and an international or accredited European professional qualification in neurophysiological bioresonance and biofeedback.
Look into my eyes... you are feeling sleepy... sleepier... let yourselves go... now, listen carefully... you are in grave danger... danger, danger... the swine flu will kill you... will kill you... vitamins can't help you... can't help you... you alone can save yourselves... you alone... you alone, and Tamiflu too... save yourselves... with Tamiflu... Tamiflu, Tamiflu... 

Do Not Listen to Desire Dubounet your Dr knows best.

SMOKING BANS

FIRST IT WAS... NEXT IT WAS NO SMOKING IN PUBLIC BUILDINGS... NOW IN SOME PLACES, IT'S NO SMOKING IN PUBLIC!

WHAT? AND GIVE UP ALL THAT TAX REVENUE?

COMING SOON... NO SMOKING AROUND KIDS

MAYBE WE SHOULD JUST BAN CIGARETTES?

Till death do we part.

"Hypocrisy for all to see"

How Can the Health dept + FDA see the Problem thru the smoke?

The Target is your Children. The tobacco companies need them to continue their profits.
The story goes that just one more straw breaks the camel’s back. In reductionism we blame the last straw. In holism we look at the entire burden. A weakened body cannot resist disease. The incredible work of Dr Hans Selye points to stress as the cause of most disease. The simplest analogy is the story of the straw that broke the camel’s back. The story is the camel will carry things but when we get too greedy and add too much.

We pile things on and on till just one more straw...

When we finally collapse, we only remember the last straw and not the other larger burdens.

The Philosophical Differences in Medicine and the Need for Stress Reduction in Treatment

This short essay is to point the major differences between allopathic drug and cut medicine and natural holistic medicine. The huge profits of the drug companies and small minds of some people hold back the true advancement in medicine. A major difference is in reductionism versus holism. Stress accumulates and weakens the body. A weakened body cannot resist disease. The small mind is reductionist and petty. It looks for simple ideas like a diagnosis. The more intelligent mind has expansive thinking and more intellectually complete views. It takes time to be Holistic. An allopath medical doctor thinks that the flies cause the garbage. Every time he finds garbage he finds flies. Every time he finds disease he finds infection so he figures the infection caused the disease. The Holistic doctor looks for multiple causes of disease that weaken the system not one straw.

The Holmes-Rahe Life Stress inventory

The Social Readjustment Rating Scale

Instructions: Mark down the point value of each of these life events that has happened to you during the previous year. Total those accumulated points.

New, add up all the points you have found your score.

100 or more means a relatively low amount of the change and a low susceptibility to stress-related health breakdown.

70 to 200 means about a 50% chance of a major health breakdown in the next 2 years.

40 to 60 means the odds to about 80%, according to the Holmes-Rahe statistical prediction model.
Hungarian born Hans Selye was called the Einstein of medicine for his insights into stress and its effects on the body. Selye saw the reaction phase of initial symptoms as a warning, a notice, and a sign post of disease.

If the stressor continues however the body adapts to the stressor and reduces the symptom. The symptom goes away. The next phase is the adaptation stage. The warning symptoms go away but the disease or systemic weakness continues to have deleterious effects on the body. You can be really sick and have no symptoms. Allopathic traditional modern medicine is built on symptom reduction. The verbal interview is the key start of the process and it starts with what is wrong with you.

The most important thing to remember in medicine is being symptom free is not an Indicator of Health.

Being symptom free is NOT an Indicator of Health.

Allopathy- Reductionistic Medicine

When a stressor strikes it causes an alarm reaction. A stressor like a heavy metal might cause a sore throat, a toxic chemical in food might cause diarrhea, lead in the air might cause asthma, a fight at work might cause insomnia, a fight at home might cause constipation, too much work and not enough pay can cause headaches, muscle tightness, and a cascade of diseases.

Selye saw the reaction phase of initial symptoms as a warning, a notice, and a sign post of disease.

With the cost of bringing a drug to market at over 1.5 million dollars, when will we see the dead one fall.
A new medicine with stress reduction and awareness of the causes of disease is needed. If people wish to choose synthetic drugs they should be able and free to choose but when someone wants natural medicine it should also be a viable choice. Freedom of choice is also feared by small minds. People need to be aware of these facts and take more responsibility for health.

An FDA officer said to us “Everyone in the World knows that stress reduction helps disease, but you will have a hard time convincing the FDA of that.” This type of small minded ignorance of the truth of medicine makes new advancement difficult. The drug companies like their stranglehold on medicine and reducing stress thus disease without drugs is counter to their massive profits.

So we need to see that the problems of medicine come from some false beliefs. One the false belief that the person knows what is wrong and that symptoms are the most important problem. Reductionism is a problem for profit and these are a key problem for health.

**Prof Nelson - Desiré**

Towards a new Safe and Effective truly Modern Medicine

**Dr. János (Hans) Selye**

Health is Ease of Flow

Stressors block Flow. Stress is more than Just personal stress. Stress Reduction is the key to Medicine.

When the stressors or stressors weaken the defenses of the body, the weakest link of the body (from nature or nurture) is most prone to distress and thus disease.

LACK OF AWARENESS OR LACK OF EDUCATION

STRESS

HEREDITY

MENTAL FACTORS

(Greed, anger, delusion arrogance etc)

ALLERGY

BAD POSTURE

TOXICITY

TRAUMA INJURY

PATHOGENS (microorganisms, bacteria, fungus virus, prions, worms, etc.)

PERVERSE ENERGY (heat, cold, wind, dryness, radiation, magnetic, etc.)

DEFICIENCY OR EXCESS OF NUTRIENTS

**Nelson Method of Medicine**

1. Reduce the causes of Disease—Change Behavior, get patients to Care, get the nail out of the tire.
2. Repair the organs weakened by the Causes. Restore Health. Fix the tire.
3. Unblock the Blockages to Energy: nutrition, Oxygen, waste, Farads, acupuncture, neural FLOW
4. Treat the symptoms with natural means before resorting to Synthetic. Use foods, exercise, herbs, homoeopaties any and all natural means before resulting to Synthetics
5. Balance the metabolic typing or Constitutional Imbalances. Treat the patient as an Individual Whole

**Selye Pathway of Disease**

Health then enter stressor (toxin etc)-enters

1. ALARM Stage—symptoms are the alarm, not the enemy, symptoms at first are not to the Stressor, later the dysfunction

   if stressor continues then

2. ADAPTATION Stage—symptoms go away as we adapt, the stress + disease points deeper. You can have no symptoms and be very very sick.

   Being symptom free is not an indicator of Heal

   if stressor continues then

3. EXHAUSTION Stage— the stressors burden the weakest organs

   if stressor continues then

   a. FUNCTIONAL—first the stressors effect the weakest organ function

   if stressor continues then

   b. ORGANIC—then the weak organs start to swell or shrink

   if stressor continues then

   c. CELLENT—cellular, organ, organ system, organism death

Since the body’s weakest link is prone to disease from the stressors, any disease will improve with reduction of the stressors. If there is good nutrition and no excess or deficiency of nutrients, the body’s repair system improves. With stress reduction the Para-Sympathetic system becomes free to do digestion and immunity as well as cellular repair. Some stressors can have more specific target diseases, such as cigarette target the lungs primarily but with the lack of synergetic oxygen, any other weak link in the body from genetics or from life will be involved. Thus stress reduction is a universal therapy for all diseases. Reductionism of diseases via inaccurate and expensive current medical diagnostic means, are archaic, inaccurate, over complex, morbidly expensive, unsafe, risky are most often ineffective. Add to this the risk of side effects from Synthetic drugs and we see a poor history of medicine. Nelson and Selye have plotted out a safe, inexpensive and effective new more modern medicine.

**Professor Desiré Dubounet**

and her friends have spent over 35 million dollars to bring the world a professional and through course on Wellness, Naturopathy and Neuro-Electro-Physiology of Biofeedback as Bioresonance.

She is such a humanitarian Angel, she lets you pay for the course videos, books and materials with Karma...

For more information go to www.imune.name

These are the TOP FIVE REASONS to get a Doctorate in Wellness PhD International Medical University degree at home.

1. Getting a degree means you will increase your earning potential. Studies have shown that at home study is just as good as attended classes.
2. Study and Complete Courses at Your Own Pace. Use this to maximize the learning.
3. Scheduling Convenience. Work when you are ready to work.
4. Teaching Faculty Who Actually Have Work Experience in Your Field of Study. Global faculty at IMUNE is with worldwide famous doctors.
5. Save Money on Travel, Parking, Childcare, and Books. You save money the world saves energy, this makes you and the world better.
6. Employer Support. Many employers offer tuition reimbursement for employees’ tuition associated with training in their fields. Employers also tend to encourage enrollment in online degree programs because they know employees will be able to go to school and still be able to be committed to their jobs. Don’t be afraid to ask your employer. Every company needs a wellness consultant.

Professor Desiré Dubounet the world’s most famous Naturopath and her friends have spent over 35 million dollars to bring the world a professional and thorough course on Wellness, Naturopathy and Neuro-Electro-Physiology of Biofeedback as Bioresonance. She is such a humanitarian Angel, she lets you pay for the course videos, books and materials with Karma go to www.imune.name for more information.
It was genius to take Behavior Medicine, Life Style, Electro-Acupuncture, Homeopathy, Herbal Medicine, Homotoxicology, Blood Analysis, and all of Natural Medicine and combine it all in one Energetic Medicine device. Theorize it, Research it, Build it, Register it and do clinical evaluation of it for the last 30 years. This genius, perseverance and enthusiasm.

Leonardo da Vinci was a cross dresser with man and woman characteristics of beauty, grace, science and art. He is an example of eccentricities in genius. The male and female mind when combined and set free can see truth and see reality where more rigid minds are blind.
How goes the WAR on Drugs?

Drugs Won

So Far this is the Result Can we change it

A long time has gone by since this cartoon was first published. Yes the Drug Companies and the FDA are sitting on the research that confirms beyond a shadow of doubt that the synthetic drugs are not safe and they do more harm than good. But since medicine has become so dependent on these drugs, the drug companies have soooo much money, it would be difficult to reteach all doctors medicine, the FDA and Drugs sit on the research, and drug caused iatrogenic disease increases Dramatically
The origins of Synthetic Pharmaceuticals came from doctors like Fleming and other doctors who thought that drug companies should not be built on Profit but on serving People at the lowest price possible. But these English ideas turned to Profit based ideas as the drug companies took hold in America. These ruthless corporations are ruled by Profit and Profit alone. And Greed Rules over all.

I express my Outrage by being Outrageous

I am Outraged at Natural Medicine's Gullibility + Math-Phobia

I am Outraged at Evidence based medicine's Profit over People

If You are Not also Outraged then Think, maybe it is Time

I am Outraged + I am tired of being Hated by Both sides
