2006
Desire' Visits AC Milan to do her study on the team

AC Milan cut their injury rate by 91% in our study

Stimulation of Sports Performance and relief of Sports Pains with a Natural Herbal Yeast Formula with Special consideration of the SCIO

Towards a Natural Oxygenation and Sports Stimulation Formula
Cheif Editor: William Nelson, Prof Medicine MUNE

SCIO Sport Study review

The 7th Congress of the Hungarian Sport Science Review, Budapest, Hungary

Presentation at the Semmelweis Egyetem, Testnevelési és Sporttudományi Kar (TF) Budapest

Date: 28th of May 2009

VII. Országos Sporttudományi Kongresszus

By: Prof. Desiré Dubouzet

Some of the best cyclists in the world have used the SCIO to win championships.

Basic 5th grade science tells us. We are made of atoms and atoms are made almost exclusively of electrons, protons and neutrons. None of us can in any way perceive this simple truth presented to us in 5th grade. We live in the false belief that there is solid flesh in our bodies, when we know that it is not true. The outer area of any atom or molecule is made of the electrons. The electrons have a very strong electric charge. So strong that two electrons can almost never touch, the energetic charge will repel them. No atom ever touches another atom. No molecule ever touches another molecule. Everything is held together with energetic, quantum, electro-static-magnetic, or other subatomic forces. All of life is mostly electrons and protons that never touch but only interact through electro-magnetic fields. These are the basic forces of electricity. All of the interactions of life are energetic and electrical at some level, 5th grade fact.

Chemistry has been taught with the analogy of rods and balls. Every chemistry student has been shown molecules with balls for atoms and rods for the bonds. This implies there is a solid nature. There is not. The atoms are energy fields, the bonds are also fields not much different than two magnets that repel on the table. There is no rod or ball, but this analogy is used by the pharmaceutical companies to sell their wares. It is a false belief.

The field of voltammetry tells us this simple fact. We appear solid because these forces are strong. But we cannot touch anything but just interact with energy fields. This is basic 5th grade science but our society has decided that since this interferes with the sale of pharmaceuticals, we will ignore this simple truth in medicine. People such as me, who try to reposition medicine to this truth are attacked and persecuted.
The AC Milan team thanked Prof Nelson for helping them win the Italian and European Championship.
pictures on China, AC Milan, San Antonio spurs, Dennis Johnson

The first sport study with the Quantum Xrroid technology was on members of the Cleveland Browns football team in 1988. The results were amazing and all of the participants went all Pro over the next five years. Having worked with the power lifting team of Hungary in 1991 they went from moderate to gold medal performance.

AC Milan bought some systems and their injury level dropped 91%. This was because the system can stimulate and accelerate healing of injured tissue. They asked for us to develop the device to sharpen the athletic skills of the clients. With this in mind we developed a way to sharpen coordination endurance and strength. AC Milan won the European championship the next two years. We worked with Dennis Johnson ex twice NBA MVP in the San Antonio Spurs system. The results were amazing.

The Chinese Olympic team had us do a study. Out of their 487 athletes in the 2008 Olympic Games, they assigned 150 of the sick, old, weak, and tired to us. The study was to see if we could repair injured tissue and get an athlete back onto the field. The results were astounding. Out of the hundred medals won by the Chinese our 30% of the injured performers won 33% of the medals. Our athletes were not supposed to win. And because of this Desire' was awarded an honorary Gold medal.

Sports medicine has entered the energetic arena. There are those who want to win and they differ from those who want to conform.

Some of the best cyclists in the world have used the SCIO to win championships.
