First let’s discuss what is Natural. People laughed years ago when Cher said that she thought that Mount Rushmore was a natural formation. To most of us it is obvious that people carved out the faces. Cher thought the natural forces of wind, rain, and sun did the carving. And some people laughed at her for her not seeing the “Hand of Man”. It can be funny when someone cannot tell the difference.

When it comes to herbs and Naturopathy we need to clarify what we mean by natural. Herbs need to be picked, cleaned, sometimes, dried, cooked, or made into a solute. Mankind is preparing nature for better nutrition, convenience and flavor. Farming of nature’s bounty is needed to increase the bounty. This all takes the “Hand of Man”. A bowl of rice does not occur in nature. And nature has few pill or capsule trees. So when do we say the “Hand of Man” is interfering not harming the product????

Well by law when a patent has been given a product, it is a sign that there is the “Hand of Man”. A patent can only be given when there is proof that the “Hand of Man” in fact the “Hand of a Man” who gets the product or process patented. This is now called a synthetic process. Or as I spell it SINthetic.

Now the item is made in a totally different way that has not occurred in nature anywhere before as proven to the law to get a patent. The patent is mostly done to make profit by controlling the market for 19 years before it becomes public domain. When Mary Elizabeth first made SINthetic Insulin it was only
3% effective. OMG 3%!!! Means it was not really active at all. But they found they could make money using it. A vast industry of patented medicines using SINthetic products to make money was founded.

It is a pharmacological law that a SINthetic anything is an insult to the body. To understand this further and see a complete scientific proof please go to this website. Here we have a basis for our belief.
Some of us do not want to insult the body and get side effects. Some of us want natural medicines and natural therapies not SINthetic. This is a basis for naturopathy. And we need to have this in as safe, professional and effective process as possible so we need our suppliers to do evidence testing. We still require any sales person to validate their claims as required by law, but we want more natural medicine. We have to freedom to choose and we do not want SINthetic medications shoved down our throats.

"You Can't Patent anything Natural only SINthetic"

COUNTERTHINK

FUTURE GEOLOGICAL DIG, 3000 A.D.

AND THIS LAYER FROM A THOUSAND YEARS AGO IS THE AGE OF SYNTHETIC CHEMICALS, WHICH CAUSED ALL HUMANS TO DEVELOP AUTISM LIKE DISEASE, CANCER AND OTHER DISEASES
To get a **Patent** you must prove your compound has not existed before, so any patented chemical is by definition **UN-NATURAL**.
PROOF that SYNTHETIC DRUGS are incompatible with the Human Body

1. The Synthetic drug companies do not know how to properly place the electrons around the atoms in making a drug. Nature uses QED via Photosynthesis to put some of the electrons into high energy quantum states. This is how we get energy and life.

2. The Synthetic Drug companies use antiquated outdated reductionism philosophy to assemble and test their drugs. The Fractal Complexity of Nature with its incredible complexity must be revered rather than ignored. The height of IGNORANCE is to ignore nature. An IGNORANCE that makes money.

3. There is no study known that ever shows a synthetic drug completely equivalent to its natural counterpart. The reductionism studies only measure the required variables. They DO NOT measure side effects. Side effects are observed and often only observed years or decades later. The laws and the FDA protect them.

4. Side Effects dominate and proliferate the Synthetic Drug scene. Look at the Physician Drug Reference and see that all drugs have a list often a long list of side effects. This is not natural. Almost Every year over a hundred drugs are removed from the market because they are hurting people. It’s just a matter of time before the harmful side effects are seen.

5. Our society has now learned conclusively that synthetic foods are incompatible with health. We have now rejected all synthetics and we know that the finest quality comes from the natural. It is the next step of simple human consciousness and thought to see clearly that synthetic drugs are incompatible with the human body.
People want more Natural Medicine. They now are beginning to see the risks of SYNthetic medicine and they see how the SYNthetic Chemical Cartel has taken control of doctors who only know how to write prescriptions for SYNthetic medicine. Some people want more safety and the wellbeing of Naturopathy.

We have the right to choose safer, less side effects, and more natural medicine. We have the right to see evidence for claims made for products. We have the Rights + Freedom to choose safer Natural Medicines and Naturopathy.

People want more Natural Medicine. They now are beginning to see the risks of SYNthetic medicine and they see how the SYNthetic Chemical Cartel has taken control of doctors who only know how to write prescriptions for SYNthetic medicine. Some people want more safety and the wellbeing of Naturopathy.
Most people want to try natural therapies first. They want a Naturopath.

A good Naturopath will spend time to be HOLISTIC and look at the LIFESTYLE, RISKS, AGGRAVATIONS, SYMPTOMS, and body WELLNESS. A good Naturopath works with the medical community and knows how to teach the patient to use natural medicine and lifestyle. And a good Naturopath knows when to send the patient to the medical doctor for more harsh therapies.
SYNTHETIC vs. HERBAL STRESS MEDICINE

$ COST TO MAKE

- Roughly $4.2 BILLION per drug
- Naturally grown by mother nature

WHAT'S IT MADE FROM

- Synthetic chemicals
- Naturally grown by mother nature

HOW LONG HAS IT BEEN TESTED?

- 12 years of animal and human testing
- Used for centuries by native peoples
The Synthetic (SINthetic) companies want to deprive you of any choice in food and medicine. We must fight for our right to choose and to speak.
Desiré is the Professor Emeritus of IMUNE. IMUNE is an accredited and legally registered medical university in Europe.

Since 1995 IMUNE has been offering medical education in a variety of subjects to defend and perpetuate Natural Medicine. There are many small minded people being driven by the SINthetic chemical companies to destroy Natural Medicine as a viable choice in Medicine. IMUNE has offices in Switzerland, Mexico, Dubai, Budapest, England, and the British Virgin Islands. The small petty minded picayune minions of the chemical companies constantly attack with their anal retentive biased short sided views.

We must fight for freedom of choice and especially freedom of choice on medicine.
