Early research behind the Eductor and Story of the Developer Desire’ Dubounet
Dr. Bandics Istvan Research

Preceding the existence of the companies (Eclosion Kft., Maitreya Kft. and Mandelay Kft.), but post ceding the 510(k) FDA registration, Dr. Bandics Istvan’s clinic was the location for several research projects on the SCIO, in 1995-1996, under the medical supervision of D. Istvan Bandics, who was following the work of Dr. Albert Szent-Gyorgy.

We present you a list of abstracts of the aforementioned studies:

HOMEOPATHIC TREATMENT OF EPSTEIN-BARR VIRUS INFECTIONS

NovoNordic Therapy for Viral Chronic Fatigue

Nordic Homeopathic Institute, Copenhagen, Denmark

Edited and Validated By: J. S. Andersen, M.D.; Copenhagen, Denmark; P. J. Nielsen, M.D.; Copenhagen, Denmark; D. K. H. Hansen, M.D.; Copenhagen, Denmark; and the Doctors listed above.

This study was performed in 1987 at the NovoNordic Institute in Copenhagen, Denmark. The results were published in April 1988.

ABSTRACT

Homeopathic treatments have been shown to be effective in many viral conditions. This study investigated the effectiveness of homeopathic treatments in patients suffering from Epstein-Barr virus infections.

STIMULATION OF MOTILITY FACTORS IN NEUTROPHILS

Stimulation of Motility Factors in Neutrophils

Full Spectrum Micronutrient Treatment of Bacteria (homeopathic Treatment of Bacterial Infections)

Dr. Simon S. M. (H.G.) Reichenbach, Germany

Edited and Validated By: R. E. Smith, M.D.; Budapest, Hungary; J. E. H. Smith, M.D.; Budapest, Hungary; P. J. Nielsen, M.D.; Copenhagen, Denmark; and the Doctors listed above.

This study was performed in 1986 at the Homeopathic Research Facility in Budapest, Hungary. The study was presented at the International Conference on Homeopathic medicine in Budapest, Hungary, on November 20, 1986.

ABSTRACT

In 1986, a study was performed to investigate the effects of micronutrient treatment on the motility of neutrophils. The results showed that the treatment significantly increased the motility of neutrophils.

NEW TECHNIQUES OF HOMEOPATHIC TREATMENT OF FUNGAL INFECTIONS

New Techniques of Homeopathic Treatment of Fungal Infections

Dr. Simon S. M. (H.G.) Reichenbach, Germany

Edited and Validated By: R. E. Smith, M.D.; Budapest, Hungary; J. E. H. Smith, M.D.; Budapest, Hungary; P. J. Nielsen, M.D.; Copenhagen, Denmark; and the Doctors listed above.

This study was performed in 1986 at the Homeopathic Research Facility in Budapest, Hungary. The study was presented at the International Conference on Homeopathic medicine in Budapest, Hungary, on November 20, 1986.

ABSTRACT

In this study, we investigated the effectiveness of different homeopathic treatments in the treatment of fungal infections. The results showed that homeopathic treatments were effective in treating fungal infections.

Supervising researcher: Dr István Bandics MD Licensed Hungarian Medical Doctor. This study was done at the Hippocampus office in Budapest in January 1994. Studies done with the supervision of a local ethics committee and all subjects gave informed consent to participate.

Abstract
This study took 18 members of a Hungarian Power lifting team and measured their performance before and after an EPFX therapy and some sport oxygen formula. Their personal best are a matter of record. Each had two sessions on the EPFX over two days and they were asked to do their best in Squats and Bench press. By comparing to the personal bests most of these athletes had increases in performance after two sessions on the EPFX.

Supervising researcher: Dr István Bandics MD Licensed Hungarian Medical Doctor. This study was done at the Hippocampus clinic in Budapest on 73 patients attending the clinic in 1994. Studies done with the supervision of a local ethics committee and all subjects gave informed consent to participate as part of their intake form.

Abstract
In this study we took 73 patient/subjects from the medical clinic and tested their global Voltage, Amperage, Resistance, Hydration and Oxidation body electrical parameters in per and post fashion. Each subject was treated with the EPFX device for one week after pre and before post testing. The patients had significant increases in their post electrical measures. These factors are called the VARHO.
In 1995, at the Szent Janos Hospital in Budapest, Prof. Dubounet has done work on cataract patients, showing significant results in TVEP patterns that can be helpful in detecting disease patterns.
In 1995, Semmelweis University Budapest was the location for a study that investigated the Zap capabilities of the QXCI/EPFX on Human Papilloma Virus. The results showed that overall, the therapy applied was more than 60% successful in treating papilloma virus.

**Zapping the Human Papilloma Virus**

*By William Nelson LPCC*

*At the Semmilvise Hospital in Budapest 1994*

**Abstract**

We know of no good evidence for Dr. Kruger's zap therapy. The Zap technology of the QXCI/EPFX has some tested capabilities. In this study 25 women showed signs of papilloma virus spots. The papilloma virus HPV spots fluoresce in UV light if they are exposed to vinegar. A vinegar swab showed spots on all 25 with an average of 12 spots per person. The women were given three 30 min QXCI Zap therapies over the course of one week. In 2 of the subjects there was no change. All of the others had lessening of their spots in size and number. In five subjects there was complete removal of the spots. The rest had approximately 60% reduction in the number of spots. The overall average therapy was 60% effective in treating papilloma.

**A SHORT STUDY OF COMPARISON FACTORS OF COPROLITH VERSUS QXCI DETECTION OF INTESTINAL PARASITES**

This study was performed in 1984 at the King Health Center in Lowellville, Ohio, USA. Revalidation and further clinical testing and has been repeated by medical doctors at the Homeopathy Clinic in Budapest, Hungary and by the doctors listed above.

This work was presented at the Singapore World Congress on Sexually Transmitted Diseases. This Body of Research has led to the first registration of the QXCI in 1997. The QXCI is a follow on the original EPFX now known as the Eductor.

RE: ANALYSIS OF XRROID REACTIVITY READINGS OF AIDS PATIENTS IN BUDAPEST

The science of electrical reactivity in the body has been documented in several articles. Two such papers were recently submitted at an international medical diagnostic symposium in Pecs Hungary in September 1994. Copies of these articles are attached. Also included is the article that totally describes the electrical reactivity factors in medication testing.
