NATUROPATHIC DOCTORATE

NATUROPATHIC DOCTORATE PROGRAM
First let’s discuss what is Natural. People laughed years ago when Cher said that she thought that Mount Rushmore was a natural formation. To most of us it is obvious that people carved out the faces. Cher thought the natural forces of wind, rain, and sun did the carving. And some people laughed at her for her not seeing the "Hand of Man". It can be funny when someone cannot tell the difference.

When it comes to herbs and Naturopathy we need to clarify what we mean by natural. Herbs need to be picked, cleaned, sometimes, dried, cooked, or made into a solute. Mankind is preparing nature for better nutrition, convenience and flavor. Farming of nature’s bounty is needed to increase the bounty. This all takes the "Hand of Man". A bowl of rice does not occur in nature. And nature has few pill or capsule trees. So when do we say the "Hand of Man" is interfering not harming the product????

Well by law when a patent has been given a product, it is a sign that there is the "Hand of Man". A patent can only be given when there is proof that the "Hand of Man" in fact the "Hand of a Man" who gets the product or process patented. This is now called a synthetic process. Or as I spell it SInthetic.

Now the item is made in a totally different way that has not occurred in nature anywhere before as proven to the law to get a patent. The patent is mostly done to make profit by controlling the market for 19 years before it becomes public domain. When Mary Elizabeth first made SInthetic Insulin it was only 3% effective. OMG 3%, means it was not really active at all. But they found they could make money using it. A vast industry of patented medicines using SInthetic products to make money was founded.

It is a pharmacological law that a SInthetic anything is an insult to the body. To understand this further and see a complete scientific proof please go to this website. Here we have a basis for our belief.
Some of us do not want to insult the body and get side effects. Some of us want natural medicines and natural therapies not SINthetic. This is a basis for naturopathy. And we need to have this in as safe, professional and effective process as possible so we need our suppliers to do evidence testing. We still require any sales person to validate their claims as required by law, but we want more natural medicine. We have to freedom to choose and we do not want SINthetic medications shoved down our throats.

Deaths are just the tip of the iceberg

We have the right to choose safer, less side effects, and more natural medicine.
We have the right to see evidence for claims made for products. We have the Rights + Freedom to choose safer Natural Medicines and Naturopathy.
People want more Natural Medicine. They now are beginning to see the risks of SINthetic medicine and they see how the SINthetic Chemical Cartel has taken control of doctors who only know how to write prescriptions for SINthetic medicine. Some people want more safety and the wellbeing of Naturopathy.

Most people want to try natural therapies first. They want a Naturopath.

A good Naturopath will spend time to be HOLISTIC and look at the LIFESTYLE, RISKS, AGGRAVATIONS, SYMPTOMS, and body WELLNESS. A good Naturopath works with the medical community and knows how to teach the patient to use natural medicine and lifestyle. And a good Naturopath knows when to send the patient to the medical doctor for more harsh therapies.
Patent medicine has led to profits. These profits are used to do studies. But there are many good studies done on natural, homeopathic, and energetic medicine. It takes a disciplined and professional mind to find and discern the good from the bad studies. There are scientific, medical, clinical, spiritual, social, secular and legal issues to analyze and investigate to bring to the student. You need to have a professional faculty well experienced with all of these issues and more.

There are many charlatans and frauds selling untested, unverified, non-registered devices and products in the world of SINthetics and also in the world of Naturopathy. Muscle testing and point probes for medication testing are examples of fraud being sold on gullible therapists.

A curriculum is measured by the quality of its text books and the expertise of the faculty. New online (at home, distance learning) instruction needs to be designed with the utmost consideration of these areas of consideration. In-depth methodical attention to our courses.

A student needs to learn about the total field and to develop an expertise on the key topics. A graduate need not remember every detail, but you do need to be able to get answers to patient, legal, scientific, medical, clinical or technical issues. To get a doctorate you need to be able access resources, libraries, lawyers, doctors, experts who have the experience. You need to have qualified experienced, educated experts you have confidence in. You might get a legal question and your life might depend on a professional answer to a question.

IMUNE has over 300 certified medical university textbooks. IMUNE has the world’s largest and best library on Naturopathy and Energetic Medicine. A group of professional lawyers, doctors, scientists all have worked together to supply you an in-depth intellectual, evidence based education.

Without doubt IMUNE has the best education courses to teach you Naturopathy and Energetic medicine. We at IMUNE want to have a book and set of Naturopathy plans for all diseases and a review of the evidence behind the therapies. If you find a disease we have not reviewed then tell us so we can develop a naturopathy program for the disease.

IMUNE operates in international waters and we provide an accredited certificate you can be proud of to hang on the wall. We have tried to get other accreditation but the powers of the SINthetic drugs, and the Charlatans often control such accreditation. We beg your understanding and patience. But if you want the best education, networking, consulting and resources you will choose IMUNE over other substandard courses. Please review and inquire.

Eductor

The word 'Doctor' comes from the Latin word 'Eductor' which means 'to teach'.

Thomas Edison said that the doctor of the future will teach the patient how to live and how to eat, exercise and meditate.

The Eductor is a Biofeedback Teacher

A good Naturopath is only as good as his tools and his resources. If you want the best and you want validation, verification, evidence based, and professional resources you will get an Imune ND education.
