The SCIO is the most researched medical device of its kind in the world.

IMUNE Press 2012
# Contents

Introduction ........................................................................................................................................... 12

Chapter 1: The most recent research ........................................................................................................ 13

- TVEP Literature Review and the Most Recent Research .................................................................. 14
- Clinical and Scientific Evaluation of Charge Stability and the SCIO .................................................. 15
- SCIO’s Effect on Body Osmosis ........................................................................................................... 16
- A double blind placebo-controlled study of the application of Eclosion EPFX/SCIO therapy for stress reduction clinical study protocol .................................................................................. 17
- A double blind placebo-controlled study of the application of the SCIO Universal Electrophysiological Biofeedback System for statistical evaluation of the SCIO’s ability to increase Body Wellness after one 45-minute session ...................................................................................................................... 18
- MCES and Addiction Control – A Double Blind Clinical Study and Lit Review .............................. 19
- Cranial Electrotherapy Stimulation and Fibromyalgia ....................................................................... 20
- SCIO’s Ability to Increase Charge Stability and Redox Potential ......................................................... 21
- Stimulating Eye Hand Coordination with SCIO VARHOPE .............................................................. 22
- The SCIO is 85% to 95% accurate ....................................................................................................... 23
- Bill Cunningham Case Study ............................................................................................................... 24
- Trauma Sport Pain Electro Healing with SCIO .................................................................................. 26
- Double Blind Study of Sport Performance with the SCIO device versus Placebo Control .......... 27
- TVEP reactivity scores to Allersode compounds measure .............................................................. 28
- Two decades plus of Imponderable Voltammetric Homeopathy and Emotional Balance .......... 29
- TVEP reactivity scores to isode compounds measured ...................................................................... 30
- TVEP reactivity scores to Nosode compounds measured ................................................................. 31
- TVEP reactivity scores to compounds measured .............................................................................. 32
- TVEP Validity Study ............................................................................................................................ 33

Chapter 2: The Large Scale Studies of the SCIO .................................................................................. 34

- ACNE VULGARIS Treated by SCIO Practitioners ........................................................................ 36
- ACROPARESTHESIA Treated by SCIO Practitioners ..................................................................... 37
- ACQUIRED IMMUNE DEFICIENCY SYNDROME Treated by SCIO Practitioners ...................... 40
- ALCOHOLISM Treated by SCIO Practitioners .............................................................................. 41
- SCIO ALLERSODE THERAPY ........................................................................................................ 43
- ALZHEIMER'S DISEASE Treated by SCIO Practitioners ............................................................... 44
ANEMIA Treated by SCIO Practitioners

ANXIETY UNSPECIFIED Treated by SCIO Practitioners

ASTHMA Treated by SCIO Practitioners

BACTERIA INFECTION Treated by SCIO Practitioners

BICARB DEFICIENCY, Treated by SCIO Practitioners

BRAIN FATIGUE UNSPECIFIED Treated by SCIO Practitioners

Brain wave detection and correction with the SCIO

CANCER Treated by SCIO Practitioners

CARDIAC ARRHYTHMIA Treated by SCIO Practitioners

CIRCULATION DISORDERS Treated by SCIO Practitioners

Clinical Review of Biofeedback Stress Therapy with the QXCI / SCIO biofeedback device

COMMON COLD Treated by SCIO Practitioners

DEPRESSION + SEASONAL AFFECTIVE DISORDER Treated by SCIO Practitioners

DIGESTIVE DISORDERS Treated by SCIO Practitioners

Electro-Acupuncture with the SCIO as a safe and effective therapy

ENDOMETRIOSIS Treated by SCIO Practitioners

Ulcerative COLITIS Treated by SCIO Practitioners

ESOPHAGITIS GASTRIC REFLUX Treated by SCIO Practitioners

FEMALE DISORDERS, PMS PMT, PREMENSTRUAL STRESS OR TENSION Treated by SCIO Practitioners

FLEXIBILITY, Restricted Range of Motion Treated by SCIO Practitioners

FRACTURES Treated by SCIO Practitioners

GASTRIC - ESOPHAGEAL REFLUX HIATAL HERNIA Treated by SCIO Practitioners

HAY FEVER ALLERGIC RHINITIS Treated by SCIO Practitioners

HEADACHE Treated by SCIO Practitioners

HERNIATED DISK LUMBAR | L1, L2, L3, L4, L5 | THORACIC CERVICAL Treated by SCIO Practitioners

HYPERTONIA Treated by SCIO Practitioners

HYPOADRENIA, WEAK ADRENALS, STRESS SYNDROME Treated by SCIO Practitioners

HYPOGLYCEMIA Oscillating Blood Sugar Treated by SCIO Practitioners

HYPOTHYROID Weak Thyroid Treated by SCIO Practitioners

HysterIA Treated by SCIO Practitioners
IMPOTENCE Treated by SCIO Practitioners ................................................................. 87
INDIGESTION Treated by SCIO Practitioners ............................................................ 88
Infection Reaction Testing and Immune Stimulation with the SCIO ......................... 89
Injured or Diseased Tissue Detection and Repair with the SCIO ............................. 90
INSOMNIA Treated by SCIO Practitioners ............................................................... 93
IRRITABLE BOWEL SYNDROME (IBS) Treated by SCIO Practitioners ..................... 94
ITCHING UNSPECIFIED Treated by SCIO Practitioners ....................................... 96
KIDNEY DISORDERS Treated by SCIO Practitioners ............................................ 99
LEUKEMIA Treated by SCIO Practitioners ............................................................. 100
LIVER PROBLEMS UNSPECIFIED Treated by SCIO Practitioners ....................... 102
LOW BACK PAIN Treated by SCIO Practitioners .................................................... 103
LYMPH DISORDERS Treated by SCIO Practitioners .............................................. 104
MALABSORPTION SYNDROME Treated by SCIO Practitioners ............................ 105
METACARPAL TUNNEL Treated by SCIO Practitioners ......................................... 106
OSTEOPOROSIS Treated by SCIO Practitioners .................................................... 107
OTITIS MEDIA Treated by SCIO Practitioners ...................................................... 108
PAIN UNSPECIFIED Treated by SCIO Practitioners .............................................. 109
POLYCYSTIC OVARIIES Treated by SCIO Practitioners ....................................... 110
PROSTATITIS Treated by SCIO Practitioners ......................................................... 113
TENDON CALCIFICATION, Bone Spurs, Calcaneus Treated by SCIO Practitioners ......... 114
THYMUS DISORDERS and Myasthenia Gravis Treated by SCIO Practitioners ............. 115
TRANSIENT ISCHEMIC ATTACK (TIA) Stroke Treated by SCIO Practitioners ......... 116
Weight Loss Treated by SCIO Practitioners ......................................................... 118

Chapter 3: The 1980s Body Electric Research that Lead to the 1989 EPFX Registration .......................... 121
AAQBT Alarm Response ......................................................................................... 122
AAQBT – Calibration ............................................................................................ 123

How to get the studies
Introduction

This book contains just the abstracts of the clinical research studies on the SCIO. These articles were done to the letter of the law all under medical doctor supervision and all published in ISSN international library peer reviewed medical journals. This is a validation and verification of the SCIO as a safe and effective medical device.

Today the measure of how valid your medical device is, is based on how many clinical research articles you have. Here is the research history of the SCIO dating back to 1985. Articles published in peer reviewed medical literature. The total pages of all of these studies and all of the SCIO literature would take a small truck to carry. This book contains just the abstracts of the clinical research studies on the SCIO. These articles were done to the letter of the law all under medical doctor supervision and all published in ISSN international library peer reviewed medical journals. This is a validation and verification of the SCIO as a safe and effective medical device.

If you have any questions please ask. Any of these studies can be gotten in their entirety for 25 euro thru pay pal. If you have any questions for any of the staff please write us. These articles have appeared in over 81 certified medical textbooks for you to peruse. Please go to www.immune.name for details on education and www.qxsubspace.com for details on the SCIO.

MONITOR
IMUNE (International Medical University of Natural Education)

Abstract:
The SCIO device is EC registered to detect the Transcutaneous Voltammetric Evoked Potential (TVEP) of a patient. Using electrodes placed over the skin (Transcutaneous) measuring volt, amp, resistance and oscillation changes (Voltammetric) and measuring reactions to stimuli (Evoked Potential) the SCIO device is registered to do TVEP. In this article a brief review of medical doctor studies published in peer reviewed medical journals done over a twenty year period in England, Canada, America, Hungary, Germany, Switzerland, South Africa, Mozambique, France, Japan, Ghana, China, and Romania will more than validate the TVEP. Studies have shown time tested validity and medical acceptance of the art of TVEP.

In this study we assay the amount of repeated items in a pre and post Xroid test of treatment versus placebo testing. In the placebo group the test is set on subspace only. During our research on patients we test the pre and post Xroid test of over 10,000 voltammetric signatures of various items after a treatment or a placebo treatment. The top reactant items are calculated. In the post test significantly more repeated items show that the TVEP reactivity is functioning compared to the placebo group.

There have been tens of thousands of therapists confirming the TVEP everyday in the field and thousands of testimonials. But this paper is just to present the peer reviewed medical papers and the new 2011 research as proof of the validity of safety and efficacy of the TVEP.
Clinical and Scientific Evaluation of Charge Stability and the SCIO

INTRODUCTION

In 5th grade we are all taught a basic scientific fact, we are made of atoms. All things are made of atoms. Atoms are made of electrons, protons, neutrons, and other much less numerous subatomic particles. The electrons and protons make up by far most of things and thus most of our bodies. The electrons and protons are electrically charged. The electrons are so highly charged that they never touch but instead repel when they approach another. The electrons, protons, and neutrons are very small and they are held apart from each other by fields. If we condense the solid matter of the electrons, protons and neutrons together the human body would be so small it would take a microscope to see it. If the proton is the size of a golf ball, the electron is smaller than the size of the point of a pin and it is over a mile away. Between the electron and proton thus is electro-magnetic-static fields, held by Quantic forces. So our bodies are more than 99.999999999999999999 fields empty of matter. These Quantic electro-magnetic-static fields are what we are. This is 5th grade science.

No one has yet to see the true nature of our existence. No one can see the electrons, protons, or the fields they make. So we are only able to see a macro form of it. Our brains are trapped inside our skull and thus we cannot directly perceive anything. We are thus stuck with an indirect perception. A perception that comes thru the brain and is effected by our own internal brain state and personal bias. We project our own feelings, memories, psychic mental states onto our perceptions. It is difficult not to. So as humans developed we have made many assumptions of how the universe works, what is the nature of our bodies and lives, and our belief in a power greater than our own. And with a sense of history and knowing that we must project, and twist ideas, we should always be humble and recognize that we can never know. We are being made good guesses, better and better guesses, but always guesses. Science is the art of further developing the guess of our true nature.

In 9th grade we are taught about light. Light is made of photons. Photons are electro-magnetic radiation, particles in wave formations that can transfer energy. Quantum Electro-Dynamics QED tells us of how when a electron absorbs a photon the electron goes to a higher quantum energy state. When the electron releases a photon it goes to a lower state. QED tells us of virtual photons and just how all electron, proton, neutron movement is connected to the photon.

Voltammetry is the science of understanding how a substance’s electro-magnetic field reacts with its environment. A hormone has electrons and protons and how they are placed in a 3 dimensional space will determine how it exchanges electro-magnetic action and this is measured by measuring the 3 dimensional effect of it voltammetric field. The amount of charged particles is the amperage, the pressure or potential of the charged particles is the volts. Basic 7th grade physics. Every compound having its own individual and distinct voltammetric signature field.
SCIO's Effect on Body Osmosis

Abstract:

When we apply a micro charge electro-pulse through a process, Osmosis increases. Everything in the body depends on osmosis. When Osmosis increases enzymes work better, hormones work better, detox works better, nutrition works better, all cellular functions works better. This helps explain the tremendous results the SCIO patients get on all types of diseases. There is a universal stimulation of osmosis. The SCIO measures the body level of Voltage, Amperage, Resistance, Hydration, Oxidation and Phi (VARHOP). By stimulating an autofocusing cybernetic harmonic frequency to the body the SCIO can maximize the osmosis increasing effect without doing any damage. Since it is through Osmosis that the cells bring nutrition and remove toxins, all of life’s processes are improved. Injury improves from the Electrical field stimulation of the SCIO.

In this study 13 subjects were hooked to the SCIO with the SCIO off and a line drawn firmly on their forearm with a finger nail. Then we count the seconds it takes before the line turns red. This is an indication of osmosis as that the traumatized tissue will have histamine rush in the traumatized tissue of the forearm. The time it takes indicates the osmosis ability. Norms are 8 to 10 sec. Then the SCIO is turned on and the line drawn on the forearm again of the subject. In the control group there was an average of 12 seconds and 2 did not have the line appear after the 20 sec deadline. The SCIO group had an average of 9 seconds and all were under the deadline. This improvement of treatment group over control demonstrates the SCIO’s ability to increase osmosis thru its auto-focused electrical pulsation.
A double-blind placebo-controlled study of the application of Eclosion EPFX/SCIO therapy for stress reduction clinical study protocol

PURPOSE OF STUDY
The purpose of this clinical study is to determine the efficacy of the ECLOSION Electro Physiological Feedback Xrroid (EPFX)/Scientific Consciousness Interface Operations System (SCIO) device, manufactured by ECLOSION KFT (the Company), in stress reduction by introducing low-level electromagnetic frequencies into an individual’s body through electrodes attached to the person’s wrists, ankles, and forehead to balance or harmonize and return to normal the optimal frequencies at which the body’s cells and organs should resonate. This enables the body to strengthen, heal and expel the pathogens that propagate stress and its associated ‘unwellness’, consequently reducing stress and improving general health and function.
A double blind placebo-controlled study of the application of the SCIO Universal Electrophysiological Biofeedback System for statistical evaluation of the SCIO’s ability to increase Body Wellness after one 45-minute session

In this study there were conclusive results of electro-physiological improvement. This study was conducted at five sites of approximately 40 subjects in each.

Under medical supervision the study was conducted in Budapest, Hungary, Timisoara, Romania, Seattle Washington, Speyer Germany, and Paris, France. Thus there were over 200 patients in this medical study.

Introduction

BACKGROUND: Stress is known to have many negative effects on multiple aspects of an individual’s life. Stress can affect an individual’s physical, cognitive, emotional and social well-being. We hypothesized that within one 45 minute biofeedback session, a measurable improvement in Body Wellness indicators can be achieved.

OBJECTIVE: To evaluate whether a 45 minute session with the SCIO biofeedback device affects an individual’s Body Wellness.

DESIGN: Randomized, double-blind, placebo controlled trial.

SETTING AND PATIENTS: 192 individuals with awareness of levels of perceived stress as well as injuries/pain, between 18 and 65 years of age, male or female, randomized into placebo and SCIO test groups, at private clinics at multi centered sites.

INTERVENTION: Subjects were randomized to the test group (a 45 minute SCIO biofeedback system session) or placebo (SCIO, Maitreyka Kft. www.qsubspace.com)

MEASURES: Pre and post measures as follows: Quality of Life Questionnaire, Energy Index Factor (systolic blood pressure left arm sitting + the diastolic blood pressure left arm sitting x pulse), Grip Strength Test (measured in kilograms), Oxygenation Test, Flexibility Test (measured in inches in The USA and centimeters everywhere else), Memory Test, pH Test, VARHOPE scores (electrical measures within the device, as follows: voltage (V), amperage (A), resistance (R), hydration (H), oxygenation (O), proton pressure (P) and electron pressure (E)).

RESULTS: Patients in SCIO group had greater VARHOPE scores than those in placebo group (p<0.005). The other indicators of Body Wellness were not statistically significant, but there are trends in the improvement levels between the Test and Control (Placebo) groups.

CONCLUSIONS: The electrical parameters of VARHOPE can be improved by a 45 minute SCIO biofeedback session. However, it may require more SCIO biofeedback sessions for the other Body
MCES and Addiction Control – A Double Blind Clinical Study and Lit Review

MCES and Addiction Control a Dbl Blind Clinical Study and Lit Review

Abstract:

Ten patients with tobacco addiction and five patients with alcohol addiction diagnosis were given SCIO MCES treatments or Placebo treatments for three to ten sessions. There was one report of headache logged and no report of any significant risks. Patients were asked to rate their desire or cravings as scalar numbers from one to ten rating. There was evidence of the SCIO MCES reducing craving versus the Placebo control group. The MCES had positive results in lower addiction craving and to stabilize emotional depression. Discussion will show a positive effect on addiction and emotions using MCES and trans-cranial-cutaneous electrodes.
Cranial electrotherapy stimulation and fibromyalgia

Marshall F Gilula

Cranial electrotherapy stimulation (CES) is a well-documented neuroelectrical modality that has been proven effective in some good studies of fibromyalgia (FM) patients. CES is no panacea but, for some FM patients, the modality can be valuable. This article discusses aspects of both CES and FM and how they relate to the individual with the condition. FM frequently has many comorbidities such as anxiety, depression, insomnia and a great variety of different rheumatologic and neurological symptoms that often resemble multiple sclerosis, dysautonomias, chronic fatigue syndrome and others. However, despite longstanding criteria from the American College of Rheumatology for FM, some physicians believe there is probably no single homogeneous condition that can be labeled as FM. Whether it is a disease, a syndrome or something else, sufferers feel like they are living one disaster after another. Active self-involvement in care usually enhances the therapeutic results of various treatments and also improves the patient’s sense of being in control of the condition. D-ribose supplementation may prove to significantly enhance energy, sleep, mental clarity, pain control and well-being in FM patients. A form of evoked potential biofeedback, the EFx, is a powerful stress reduction technique which assesses the chief stressors and risk factors for illness that can impede the FM patient’s built-in healing abilities. Future healthcare will likely expand the diagnostic criteria of FM and/or illuminate a group of related conditions and the ways in which the conditions relate to each other. Future medicine for FM and related conditions may increasingly involve multimodality treatment that features CES as one significant part of the therapeutic regimen. Future medicine may also include CES as an invaluable, cost-effective addition to many facets of clinical pharmacology and medical therapeutics.

Cranial electrotherapy stimulation (CES) with AlphaStim® is a well-documented neuroelectrical modality that has been proven effective in some good studies of fibromyalgia (FM) patients (figures 1 & 2). This article discusses aspects of both CES and FM and how they relate to the individual with the condition. CES is the US FDA and EU recognized generic category for medical devices using microcurrent levels of electrical stimulation applied across the head via transcutaneous electrodes for the treatment of anxiety, insomnia and depression. Microcurrent (<1000 µA) stimulation usually means 1 mA or less, whereas transcutaneous electrical nerve stimulation (TENS) involves higher currents in the 90–100 mA range and with very different waveforms. CES treatment of anxiety and depression began in the USA in the early 1960s, and is still being prescribed routinely by several hundreds of physicians today, but has yet to achieve ubiquitous acceptance in medical practice. That is possibly because sufficient information has not been made available to practitioners regarding the safety and efficacy of CES as a treatment for the approved indications of anxiety, insomnia and depression. Using a electromedical device requires more of an additional learning curve for both practitioners and patients who are accustomed to the pharmaceutical model of intervention. Ingesting a capsule or a tablet does not always require the attention to detail that correct application of ear clip electrodes, for example, demands. We have been conditioned
SCIO’s ability to increase Charge Stability and Redox Potential

A double-blind placebo-controlled study of the application of the SCIO Universal Electrophysiological Biofeedback System for statistical evaluation of the SCIO’s ability to increase Body Wellness after one 45-minute session

ABSTRACT

In this study we evaluated over 200 patients in a double-blind test of their body electric parameters, wellness and stress. The double-blind study was conducted in Timisoara, Romania; Seattle, Washington, USA; and Speyer, Germany. They measured life style patterns, wellness measures, stress inventory, and global body electrical factors known as the VARHOPE. Components of Voltage, Amperage, Resistance, Hydration, Oxidation, Proton and Electron pressure. These factors were measured before a treatment and right after a single 45 minute SCIO session. There were significant results achieved in the VARHOPE scores pointing to a change in the body electric. There were results in the wellness scores but of less statistical validity. This points to a longer term study to perhaps increase the effects in these areas.
Stimulating Eye Hand Coordination with SCIO VARHOPE

Stimulating Eye Hand Coordination

With SCIO VARHOPE

Abstract: In this study we review the history of the SCIO sport medicine use with an eye on eye hand coordination (pardon the pun). 21 athletic males from 18 to 43 were asked to shoot basketball free throws in a double blind fashion after being on the SCIO or after a placebo treatment. Results will show that Increase in VARHOPE from the treatment group correlate to increased performance of eye hand coordination needed for free throws.

Introduction: Eye-hand coordination (also known as hand to eye coordination) is the coordinated control of eye movement with hand movement, and the processing of visual input to guide reaching and grasping along with the use of proprioception of the hands to guide
The SCIO is 85% to 95% accurate

Abstract: We have used the SCIO device for 4 years now and have seen over 3000 patients. The device shows reactivity profiles of the patient to voltammetric signatures of various items such as microorganisms, allergy items, toxic compounds, healthy tissues, vitamins, herbs, minerals, enzymes, homeopathics, and various other items. We have seen the accuracy of the reactions be uncanny accurate. This study will reflect the patient’s profiles in our practice for over the last 3 years. As indicated in the title the device is very accurate.

Key Words:
CBR = Computerized Body Resonance scan = Scio
EPR = Electro-Physiological-Reactivity
Input = the known diagnosis eg Shingles. Chickenpox etc. (undisputable inputs have been used)
Output = What the Scio / CBR scan finds.
Purpose of study: To check the accuracy of the Scio INPUT measurement.
The HIV measurement had a long batch negatives. Using the older software. The newer one is basically 90% to 100% accurate.

Bill Cunningham Case Study

From Bill Cunningham

In early December of 2011 a referral came to me. A distressed mother asked my friend if there was anyone he knew that could help her 44 year old autistic daughter. Since my friend was a client of mine for nearly two decades, he felt confident the SCIO technology could help this poor autistic soul.

The Mother then poured out her heart about her daughter's symptoms of insomnia, TMJ pain, nervous agitation, varicose veins and thinning hair. The most painful report from the Mother was the nearly total lack of language skills and introversion that the autistic daughter was suffering from. The little girl was not able, though willing, to express herself to loving Family members who have cared for her over her 44 years of life.

As taught by my gracious mentor Prof. Wm. C. Nelson, I ran the SCIO tech Biofeedback Session on the autistic girl, with all its new programs, on December 13, 2011. I also sent some of Prof. Nelson's "Dr. Recommends" homeopathic remedies to her to be carefully administered by the Mother and caring Family members.

On January 10, 2012 I received a call from the Mother, about the girl's slight immune response that passed quickly and a bit of quickly diminishing anxiety.

As I simply explained the idea of homeopathy's concepts of "retracing" and "proving", the mother was put at ease and then began to share with me a most amazing report.

The Mother admitted that the above slight symptoms were not that concerning and since they passed quickly she thought I should know and thus make notes in the autistic girl's file.

The last and most touching news was from the Mother who then told me that she just received the best Christmas present she had ever received in her whole life.

The miraculous Gift she referred to was that on Christmas morning, for the first time in 44 years, she clearly and sincerely expressed herself to her mother with these words: "Mom, thank you for taking care of me all these years and I love you lots, Merry Christmas". With that news conveyed to me, I had to get off the phone and run to the Kleenex box.

This story was also my best Christmas Gift for the whole year 2011, and was a great motivation to continue my healing work into its third decade...thanks again to Prof. Nelson's contributions.
Years ago I was excited to see some infomercials about alternative medicine treatments for diseases. The speaker talked a good show and sold me to buy his books. But there was absolutely no real advice in the books, only multilevel companies with more to buy. This made me angry and then I decided to write the best self help books on natural medicine. Editing and collecting the best in real substantiated advice.

Desiré has written two incredible books and made movies to go with them. What to do for influenza and specifically what to do when the next major virus hits. A movie and a self help book designed to really help you and your families understand what to do to protect yourself.

Also cancer is such a devastating disease, and there are ways to help yourself in the kitchen with cooking for cancer patients. Full advice from soup to nuts on exercise, meditation, cooking, and more. Coupled with a video for the science of how it works.

The health care debate is bringing a question of health and care. In this incredible new book Desiré has outlined a very thorough review of the real problems of Health Care. This book will tell you the truth the chemical companies do not want you to hear.

If you need more information on the SCIO and purchase details please get in touch with us

Abstract:

When we apply a micro charge electro-pulse through a process, Osmosis increases. The SCIO measures the body level of Voltage, Amperage, Resistance, Hydration, Oxidation and Ph (VARHOP). By stimulating an autofocusing cybernetic harmonic frequency to the body, the SCIO can maximize the osmosis effect. Since it is through Osmosis that the cells bring nutrition and remove toxins, all of life's processes are improved. Injury improves from the Electrical field stimulation of the SCIO. The SCIO sends signals thru each extremity and the SCIO knows the difference between healthy signal return and injured signal return. The SCIO can use an autofocused changing set of pulses to treat the injured tissue and stimulate and speed up natural recovery.

In this study, 17 athletes were hit with a sport injury of the same strength on each leg one at a time. The one leg would get real SCIO therapy, the other leg would get Placobo. After the SCIO or control treatment the athletes rated the pain in 10 min intervals till recovery was stable. The SCIO showed ability to lower pain after a slight sport injury quicker than placebo treatment. It is proposed that the increase in osmosis and the autofocused injury treatment pulse increases the body's natural ability to deal with pain and heal.

Abstract
This study took 10 healthy athletic subjects and measured their performance before and after a SCIO therapy and compared to Placebo control group. This study showed an increase in performance in the treatment SCIO group versus the control group in most patients.

Introduction
There is much double blind evidence at the SCIO device can increase the VARHOPE electrical parameters of the body over a short 45 min session. (VARHOPE is an acronym for Voltage-Amperage-Resistance-Hydration-Oxidation-Ph- Eh). For more complete description of the studies and science see the VARHOPE medical textbook.

There is also much evidence of increased sport performance from SCIO treatment over twenty years of clinical sport use. This study theorizes that the VARHOPE increase results in increased muscle performance. In preliminary studies a grip strength measure was inaccurate and not of much use for this study. This study will seek a better more refined measure of strength using free weight repetition.
TVEP reactivity scores to Allersode compounds measured

Abstract: In this study we tested 9 males and 7 females with known allergies using the Transcutaneous Voltammetric Evoked Potential (TVEP) electrical reactivity in the SCIO. The SCIO readings to the allersodes of the know allergies of the subjects was compared to TVEP xrrold scores of the non-allergic trivector readings. The reactivity scores of the known allergies were significantly higher than the non-allergic items. This proves the TVEP reactivity reaction of the SCIO.

Abstract:

Imponderable homeopathy is basically taking an energy that does not have a matter form and putting it into a homeopathic form. This was first done by Boerlince who made homeopathic X-ray. Shooting the energy of X-ray at a bottle of 9 parts water and one part diatomaceous earth. He reasoned that diatoms that make diatomaceous earth could absorb energy and this make a homeopathic mother tincture of the energy. Being a licensed mental care practitioner, I felt the need for assaying a patient’s mental state. In the late 1980’s I started making imponderable homeopathy by getting my study group to get into a mental state and then hold a bottle of 9 parts water and one part diatomaceous earth while directing their mental energy into the bottle. I always had a minimum of 15 people involved in this mental energy transfer. Now the energy of the mental state would be theoretically would be transferred to the water and diatom mixture.

When we look at the energy state with the QQC device there is a small but measurable difference in the emotional imponderables. This was put into the EPFX in 1989. Then revised and improved in the QXCII of 1996, and the SCIO of 2002. Now in 2011 the trivector signatures are being added to the Eductor. There have been many reports of significance in the reactions of patients by thousands of practitioners world over. We review some of these testimonials.

In this review we look at a study of 42 patients whose imponderable reactions are evaluated for significance of the reactions. There is a significant correlation of the emotional state of the patient with the TVEP reactions. This study reviews the field of imponderable trivector Voltammetric reactivity.

Abstract: As we have shown everything is an energetic collection of fields that hold atoms in their places. These fields that make us up are reactive with the environment. We must decide what is appropriate to eat and what to avoid. This education starts at the earliest of ages. Most of our current electro detection of what is good or bad for us takes place in the nasal pharynx between smell and taste. The shape receptors of the small and taste buds are electronic. They sense a proper volumetric fields that says it is good for nutrition or what is bad. The taste receptors do not absorb or metabolize the nutrient they only credential it for intake by measuring the shape of the fields with the shape receptors of the tongue. Voltammetry is the science of analysis of the electrical fields of a substance.

We have shown the patent for the process of the QSCC voltammetric analyzer. This device has been designed to work like the human tongue and to recognize the voltammetric signatures of items. These signatures are maintained as a 2x2x22 matrix of 10,048 separate shape vectors that constitute one signature. Since these fields reflect shapes they have a 3 Dimensional component and are referred to as the vector voltammetric signatures. These complex signatures can be amplified and inputted into the body as part of the Kroed process in the EPX or what is now known as the SCI.

The Kroed analysis is where the SCI device measures the reaction of the body to over 10,000 substances at the calibrated speed of the body reaction. During the calibration of the SCI device to the subject the device will measure the voltammetric field of the patient and then send it to the SCI. Then the voltammetric signature of what is generally known as the weakest reactive substance (distilled water) is sent in over 20 times and the highest known reactive substance combination is sent in 4 times. The starting speed is 105° of a second. If the subject does not react significantly to the reactive substance versus the non-reactive distilled water the speed is reset minus one to 102° of a second. The speed drops in this increment till the subject has a significant reaction to the reactive substances and it is repeatable. Then this gives us a measure of the speed the subject reacts to items. Research in the 1980s showed that patients on morphine reacted much slower to normal patients. Then a variety of reactive speed is shown thus making a speed of reactive calibration need for proper testing.

There are several factors that can interfere with the testing of reactive. If we test and test an item over and over there is adaptation. An ablation movement, an electrical wave form, or a brain wave surge can affect a reading. So we have seen that the reading of reactive to a single item is not as significant as we would like. Till we could put a subject into a Faraday cage and perfectly control mental aberrations it is not likely. But we have seen that if we measure family reactions we can get some good insight into the reactive fields of a subject. Research has shown that these families that we use to develop risk profiles are worth medical attention. In this review over one hundred thousand subject studies have verified the TVEP reactive families and the risk profiles have resulted from this work.

In this study over two hundred subjects were measured for Kroed analysis on either a normal setting or a placebo setting. This was done to validate the TVEP validity and show that on normal setting there would be much more replication of data.

Proper Ethics committee and IRR were used and informed consent from subjects. The study took place in Europe and in America. Subjects were asked to do several measures of their wellness and they were measured for their Kroed reactive profiles before and after the test. Repeated items were counted in placebo versus real testing.

Abstract:

A global and momentous research project was developed for the last three years. The SCIO device is a Universal Electro-Physiological device used for stress reduction and patient treatment. Over 2,200 qualified biofeedback therapists joined our Ethics Committee study to evaluate how stress reduction using the SCIO device could help a wide variety of diseases.

The device and thus the study has insignificant risk. There was a staff of medical doctors who designed and supervised the study. This study started in 2004 as an attempt to show the world the validation of being a SCIO therapist.

Over 98,000 patients gave informed consent and participated in the study. The study would conclusively prove safety and efficacy of the SCIO Device. With over 60% of these patients having multiple visits. There were over 275,000 patient visits. With a total record of the SCIO patient information, therapy parameters and reactivity data. No names of patients were recorded for confidentiality.

Two of the 2,200 plus therapists were given blank devices that were completely visually the same but were none functional. These two blind therapists were then given 35 patients each. This was to evaluate the double blind component of the placebo effect as compared to the device. Thus the studied groups were a placebo group, a subspace group, and an attached harness group.

This is just the first study in a long task of analysis in truly break down the data totally. This study verifies the safety and efficacy of the SCIO device. There were small effects seen in the placebo group, larger effects in the subspace, and astounding effects in the real harness group.

ACNE VULGARIS Treated by SCIO Practitioners

Abstract:
This study demonstrates the safety and effective qualities of the SCIO device used in a large scale study. A large scale study of over 97,000 patients with over 275,000 patient visits reported their diseases. 1833 of them reported acne. The SCIO treatments had little if any effect on acne.

**Subspace Treatment 1,239 patients, 594 SCIO Harness Patients**

**OVERALL ASSESSMENT**

A. Subspace Treatment 2,566 patient visits
There were 2 cases of patients who reported a negative Improvement.
None of these cases reported any major difficulty.
There were:
1,233 cases reporting no improvement of Symptoms, 48 % of Subgroup
7 cases reporting no improvement in feeling better, .003% of Subgroup
8 cases reporting no improvement in stress reduction .003% of Subgroup
3%-- Percentage of Improvement in Symptoms
34%-- Percentage of Improvement in Feeling Better
4%--.Percentage of Improvement Measured
35%-- Percentage of Improvement in Stress Reduction
17%----Percentage of Improvement in SOC Behavior

B. SCIO Harness Treatment 1,521 patient visits
There were 0 cases of patients who reported a negative Improvement.
None of these cases reported any major difficulty.
There were:
762 cases reporting no improvement of Symptoms, 50 % of Subgroup
53 cases reporting no improvement in feeling better, .003% of Subgroup

**ACROPARESTHESIA Treated by SCIO Practitioners**

Numbness of extremities
Abstract:

This study demonstrates the safety and effective qualities of the SCIO device used in a large scale study. A large scale study of over 97,000 patients with over 275,000 patient visits reported their diseases. 458 of them reported the medical diagnosis of acroparesthesia or numbness in the arms or legs. This a disease marked by attacks of tingling, numbness, and stiffness chiefly in the fingers, hands, and forearms, sometimes with pain, skin pallor, or slight cyanosis. 65% of the SCIO harness treated patients had substantial improvement. Thus showing the effects of the VARHOP stabilization on circulatory and nerve function.

Subspace Treatment 221 patients, 237 SCIO Harness Patients

OVERALL ASSESSMENT

A. Subspace Treatment 433 patient visits
There were 0 cases of patients who reported a negative Improvement.
None of these cases reported any major difficulty.
There were
0 cases reporting no improvement of Symptoms,.001% of Subgroup
3 cases reporting no improvement in feeling better,.001% of Subgroup
3 cases reporting no improvement in stress reduction,.001% of Subgroup
12%---Percentage of Improvement in Symptoms
23%----Percentage of Improvement in Feeling Better
47%----Percentage of Improvement Measured
33%--Percentage of Improvement in Stress Reduction
11%----Percentage of Improvement in SOC Behavior

B. SCIO Harness Treatment 458 patient visits
There were 0 cases of patients who reported a negative Improvement.
None of these cases reported any major difficulty.
There were
21 cases reporting no improvement of Symptoms, % of Subgroup
4 cases reporting no improvement in feeling better, % of Subgroup
1 cases reporting no improvement in stress reduction, % of Subgroup

ACQUIRED IMMUNE DEFICIENCY SYNDROME Treated by SCIO Practitioners

Abstract:

This study demonstrates the safety and effective qualities of the SCIO device used in a large scale study. A large scale study of over 97,000 patients with over 275,000 patient visits reported their diseases. Participants have a complete history and physical examination and additional blood tests, including genetic studies, upon entering the study. They start taking SCIO treatments and following the Nahinga protocol. At the end, patients have a medical history, physical examination and blood and urine tests, including CD4+T cell count and HIV plasma viral load measurement. 5026 subjects were in the study. There were little results with the subspace group, but there were many success stories and 57% had measurable improvements in the SCIO test harness group.

Subspace Treatment 3,290 patients, 1736 SCIO Harness Patients

OVERALL ASSESSMENT
A. Subspace Treatment 8,733 patient visits
There were 2 cases of patients who reported a negative Improvement. None of these cases reported any major difficulty.

There were
23 cases reporting no improvement of Symptoms,  .001% of Subgroup
24 cases reporting no improvement in feeling better,  .001% of Subgroup
11 cases reporting no improvement in stress reduction  .0001% of Subgroup

21%--- Percentage of Improvement in Symptoms
22%--- Percentage of Improvement in Feeling Better
22%----Percentage of Improvement Measured
12%-- Percentage of Improvement in Stress Reduction
12%----Percentage of Improvement in SOC Behavior

B. SCIO Harness Treatment 3,212 patient visits
There were 6 cases of patients who reported a negative Improvement. None of these cases reported any major difficulty.

There were
19 cases reporting no improvement of Symptoms,  .001% of Subgroup
2 cases reporting no improvement in feeling better,  .001% of Subgroup
13 cases reporting no improvement in stress reduction  .001% of Subgroup

56%--- Percentage of Improvement in Symptoms
45%--- Percentage of Improvement in Feeling Better
57%----Percentage of Improvement Measured
66%-- Percentage of Improvement in Stress Reduction
31%----Percentage of Improvement in SOC Behavior

Measured events included antibody response, T4 count, and quality of life. There is improvement in these categories in subspace and distinctly more improvement in the Harness group.
ALCOHOLISM Treated by SCIO Practitioners

Abstract:

This study demonstrates the safety and effective qualities of the SCIO device used in a large scale study. A large scale study of over 97,000 patients with over 275,000 patient visits reported their diseases. There are serious consequences of excess alcohol consumption. 411 patients with diagnosed alcoholism were tested. The subspace group had moderate improvements over placebo but the SCIO treatment group had very good success after the MCES (Micro-current Cranial Electro-Stimulation) treatment helped to lower desire and craving to drink. 37% reduced drinking after CES therapy.

Subspace Treatment 202 patients, 209 SCIO Harness Patients

OVERALL ASSESSMENT

A. Subspace Treatment 588 patient visits

There were 0 cases of patients who reported a negative Improvement.
None of these cases reported any major difficulty.
There were
11 cases reporting no improvement of Symptoms, .018% of Subgroup

76% - Percentage of Improvement in Feeling Better
37% - Percentage of Improvement Measured
59% - Percentage of Improvement in Stress Reduction
34% - Percentage of Improvement in SOC Behavior
SCIO ALLERSODE THERAPY

Abstract: This study demonstrates the safety and effective qualities of the SCIO device used in a large scale study. A large scale study of over 97,000 patients with over 275,000 patient visits reported their diseases. Studies confirm previous research that has shown allergies in the United States are on the rise and provide more evidence to suggest global climate change may partly explain the hike, the researchers say. Both ragweed and mold are environmental allergens that may be influenced by changing global temperatures. An allergy is a reaction of your immune system to what are usually harmless, common substances, such as pollen, cat hair or dust. An antibody known as IgE binds to the offending substance, called an allergen. This binding triggers a chain reaction that ultimately results in
allergy symptoms, including sneezing, wheezing and coughing. This study compares the treatments of Subspace therapy versus the SCIO harness system. Over 10,000 patients had medical diagnosis of allergy. 31% in the subspace group got improvements versus double that of 62% in the SCIO harness group whose allergy symptoms improved.

Subspace Treatment 7,941 patients, 2,403 SCIO Harness Patients

OVERALL ASSESSMENT

A. Subspace Treatment 22,504 patient visits
There were ---- cases of patients who reported a negative Improvement. None of these cases reported any major difficulty.

There were
29 cases reporting no improvement of Symptoms, .001 % of Subgroup
23 cases reporting no improvement in feeling better, .001% of Subgroup

ALZHEIMER'S DISEASE Treated by SCIO Practitioners

Abstract:

This study demonstrates the safety and effective qualities of the SCIO device used in a large scale study. A large scale study of over 97,000 patients with over 275,000 patient visits reported their diseases. This study compares the treatments of Subspace therapy versus the SCIO harness system. Over 200 patients had medical diagnosis of Alzheimer’s disease. 12% in the subspace control group got improvements versus 69% in the SCIO harness group whose mental functioning symptoms improved. The MCES treatment had definite improvements on the symptoms.
**OVERALL ASSESSMENT**

**A. Subspace Treatment 78 patient visits**
There were 2 cases of patients who reported a negative Improvement. None of these cases reported any major difficulty.

There were

- 2 cases reporting no improvement of Symptoms, .025% of Subgroup
- 3 cases reporting no improvement in feeling better, .032% of Subgroup
- 5 cases reporting no improvement in stress reduction, .047% of Subgroup

**ANEMIA Treated by SCIO Practitioners**

**Abstract:**

This study demonstrates the safety and effective qualities of the SCIO device used in a large scale study. A large scale study of over 97,000 patients with over 275,000 patient visits reported their diseases. Over 450 patients had medical diagnosis of anemia. 47% in the subspace group got improvements versus 44% in the SCIO harness group whose anemia improved. New studies are raising questions about whether
anemia treatment drugs that have been used by millions of cancer patients might actually be harming them. This study suggests that the SCIO can be helpful in helping these patients without the drug use concerns.

**Subspace Treatment 222 patients, 236 SCIO Harness Patients**

BACTERIA INFECTION Treated by SCIO Practitioners

BACTEREMIA

Abstract:

This study demonstrates the safety and effective qualities of the SCIO device used in a large scale study. A large scale study of over 97,000 patients with over 275,000 patient visits reported their diseases. Over 10,000 patients had medical diagnosis of some type of bacterial infection. 13% in the subspace group got improvements versus over 50% in the SCIO harness group whose infection improved. The SCIO can autofocus an electrocution signal to lower bacteria counts as well as stimulate the natural recticuloendothelial system.

Subspace Treatment 3,922 patients, 6,281 SCIO Harness Patients

OVERALL ASSESSMENT

A. Subspace Treatment 4,659 patient visits

There were 9 cases of patients who reported a negative Improvement. None of these cases reported any major difficulty. There were

34 cases reporting no improvement of Symptoms, .007% of Subgroup
53 cases reporting no improvement in feeling better, .012% of Subgroup
3 cases reporting no improvement in stress reduction .001% of Subgroup

23%---- Percentage of Improvement in Symptoms

The brainwave was measured and there was a significant improvement with the Harness group of 85%.
CANCER Treated by SCIO Practitioners

Abstract:

This study demonstrates the safety and effective qualities of the SCIO device used in a large scale study. A large scale study of over 97,000 patients with over 275,000 patient visits reported their diseases. Over 7,500 patients had medical diagnosis of cancer. 28% in the subspace group got improvements versus 63% in the SCIO harness group whose cancer profile improved.

The SCIO device uses the principles of Quantum Electro Dynamics (QED) as the base of an energetic medicine technique for healing. Bioresonance, Volt-Ammetry, Trivector, Provocative Allergy Tests, Infection Reaction Testing and Immune Stimulation, Electro-Acupuncture, Neurological-Stimulation, Biofeedback-Psychological Interaction, Muscle-Nervous System Re-education, Homotoxicity and Homeopathy, Electrophysiological Diagnosis, Behavioral Management Therapy and more are avant garde therapies registered for the SCIO device to perform on patients.

Cancer is a dys-regulation of the metabolic/reproductive epigenic rhythm. This dysfunction shifts the energy from metabolism to reproduction. Thus the cancer cells grow. This is explained in the PROMORPHEUS and in the IMUNE cancer video. The SCIO device can interrupt the epigenic dysfunction and thus destroy the cancer cells.

In this study the disease group total number of patients was 7,672, with Subspace Treatment 2,109 patients, and 5,563 SCIO Harness Patients. There was Subspace Treatment 5,601 patient visits, SCIO Harness Treatment 16,720 patient visits.

The results show dramatic promise for the premise that the QED functions of the SCIO can have healing effects on a cancer patient. There was over 2,000 cases of cures reported in this study. More than fifty percent of the patients reported positive results. There was insignificant negative risk effects reported.

Subspace Treatment 2,109 patients, 5,563 SCIO Harness Patients

Clinical Review of Biofeedback Stress Therapy with the QXCI / SCIO biofeedback device

Abstract:

This article reviews the clinical results and experiences of users of the QXCI biofeedback device. The practice of biofeedback dates back several decades. The technique of using biofeedback devices to diagnose stress and treat stress is receiving more attention in our ever increasingly stressful world. In this article we review the positive results achieved from clinical experience treating patients on a day to day basis. In over two thousand patient visits the QXCI was over 80% successful in reducing stress.
Clinical Review of the History of the QQC Volt-Ammetric Trivector and EPR (Electro-Physiological Reactivity) in Blood Analysis

ABSTRACT:

The QQC device can measure the subtle electric fields of the volt-ammetric signature of a substance suspended in water as a homeopathic solution. The different components of blood analysis have been tested for their trivector fields. Then the EPFX / SCIO has been used to test patients reactions. Done by and with Biofeedback.

Over the last two decades several papers have displayed that the EPR (Electro-Physiological Reactivity) of a patient to these trivector fields has been significant to have a large degree of accuracy in patient analysis. The accuracy has been approximately 75 to 85%. With some false positives and false negatives, the EPFX / SCIO test can be interesting but not accurate enough for diagnostic clinical use. These studies are reviewed.

THE VOLT-AMMETRIC SIGNATURE

Electro-Chemistry has been a respected and developed science for many decades. Thousands of articles and books have been written on the subject. It is also known as potentiography.

A three-dimensional (Trivector) topological field can be measured which shows the relationships among various time-dependent volt-ammetric techniques using micro electrodes. Interactions of the surface with appropriately...

COMMON COLD Treated by SCIO Practitioners

Abstract:

This study demonstrates the safety and effective qualities of the SCIO device used in a large scale study. A large scale study of over 97,000 patients with over 275,000 patient visits reported their diseases. Over 15,000 patients had medical diagnosis of the common cold. 28% in the subspace group got improvements versus 65% in the SCIO harness group whose cold symptoms improved.

Subspace Treatment 12,720 patients, 4,878 SCIO Harness Patients

OVERALL ASSESSMENT

A. Subspace Treatment 17,901 patient visits

There were 7 cases of patients who reported a negative Improvement. None of these cases reported any major difficulty.

There were

9 cases reporting no improvement of Symptoms, .001% of Subgroup
11 cases reporting no improvement in feeling better, .001% of Subgroup
6 cases reporting no improvement in stress reduction .001% of Subgroup

24%--- Percentage of Improvement in Symptoms
25%--- Percentage of Improvement in Feeling Better
28%--- Percentage of Improvement Measured
40%-- Percentage of Improvement in Stress Reduction
12%----Percentage of Improvement in SOC Behavior

B. SCIO Harness Treatment 7,820 patient visits

There were 11 cases of patients who reported a negative Improvement. None of these cases reported any major difficulty.

There were

8 cases reporting no improvement of Symptoms, .001 % of Subgroup
10 cases reporting no improvement in feeling better, .001 % of Subgroup
2 cases reporting no improvement in stress reduction .001 % of Subgroup

15%----Percentage of Improvement in SOC Behavior
DEPRESSION + SEASONAL AFFECTIVE DISORDER Treated by SCIO Practitioners

Abstract:

This study demonstrates the safety and effective qualities of the SCIO device used in a large scale study. A large scale study of over 97,000 patients with over 275,000 patient visits reported their diseases. Over 40,000 patients had medical diagnosis of S.A.D. -37% in the subspace group got improvements versus 56% in the SCIO harness group whose depression symptoms improved. Micro-current Cranial Electro Stimulation MCES is a new advance in Cranial Electro Stimulation CES and energetic medicine. This MCES can be used to balance emotional disorders.

Subspace Treatment 13,878 patients, 18,152 SCIO Harness Patients

OVERALL ASSESSMENT

A. Subspace Treatment 21,092 patient visits

There were 34 cases of patients who reported a negative Improvement. None of these cases reported any major difficulty.

There were
43 cases reporting no improvement of Symptoms, .0021% of Subgroup
57 cases reporting no improvement in feeling better, .0027% of Subgroup

55%--- Percentage of Improvement in Symptoms
61%--- Percentage of Improvement in Feeling Better
56%----Percentage of Improvement Measured
70%-- Percentage of Improvement in Stress Reduction
12%----Percentage of Improvement in SOC Behavior
Abstract:

The first assay of these factors was done in 1989, then again 1994 and now in 2007. One of those papers was presented at the Hungarian Diagnostic and Laboratory World Seminar in September, 1994, in Pecs, Hungary (a major world-wide congress on laboratory and diagnostic techniques). The 1989 paper was the basis of USA registration of the EPFX. Eighteen years latter there was a need for a more complete reevaluation.

This review report scrutinizes a comparison between cultured blood, skin, urine, lymph and stool results, and SCIO Electro-Physiological-Feedback EPR reactivity. Events display that the Xroid has a very high interdependence to culture results, and thus the Xroid is very helpful in determining the electrical reactivity of the patient, and in determining the type of infection the patient might have. The over-all correlation was approximately 91%. The existence of many so called false positives or infections that are subclinical makes reading difficult. This makes the SCIO profile a good pre-diagnostic tool.
DIGESTIVE DISORDERS Treated by SCIO Practitioners

Abstract:

This study demonstrates the safety and effective qualities of the SCIO device used in a large scale study. A large scale study of over 97,000 patients with over 275,000 patient visits reported their diseases. Over 16,000 patients had medical diagnosis of digestive dysfunction. 32% in the subspace group got improvements versus 62% in the SCIO harness group whose digestive distress symptoms improved.

Subspace Treatment 7,954 patients, 8,410 SCIO Harness Patients

OVERALL ASSESSMENT

A. Subspace Treatment 12,504 patient visits

There were 0 cases of patients who reported a negative Improvement. None of these cases reported any major difficulty.

Electro-Acupuncture with the SCIO as a safe and effective therapy

Abstract:

This study demonstrates the safety and effective qualities of the SCIO device used in a large scale study. A large scale study of over 97,000 patients with over 275,000 patient visits reported their diseases. 56,641 of them were treated with Electro-acupuncture, over 100,000 visits. And the results of their therapy are reported in this study.

Imagine a medical device that could check all of the acupuncture points in your body, then treat them, give you a list of unrepaired points, draw you a picture of the problem points, and give you another chance to repair the point.

Acupuncturists now do not have time to check and treat all of the possible points. So an acupuncturist has to interview symptoms and then determine the short list of points to deal with. But what if a device could be developed to automatically test and treat all points.

Such a device is available today and has been tested, registered, and validated for legal use. The QXCI device is this and more. This article reviews a new process of electro-acupuncture diagnosis and therapy. The computer can be used to accomplish this in minutes allowing for total electro-acupuncture therapy of a patient in a matter of minutes. This revelation in medicine involves a new computerized technology.

Subspace Treatment 20,233 patients, 36,408- SCIO Harness Patients

OVERALL ASSESSMENT
A. Subspace Treatment 50,656 patient visits
There were 33 cases of patients who reported a negative Improvement.
None of these cases reported any major difficulty.
There were
311 cases reporting no improvement of Symptoms, 0.001% of Subgroup
321 cases reporting no improvement in feeling better, 0.001% of Subgroup

ENDOMETRIOSIS Treated by SCIO Practitioners

Abstract:

This study demonstrates the safety and effective qualities of the SCIO device used in a large scale study. A large scale study of over 97,000 patients with over 275,000 patient visits reported their diseases. Over 500 patients had medical diagnosis of endometriosis. Endometriosis is a gynecologic disorder that is frequently encountered in the emergency department (ED) as well as in the outpatient setting. Because it is enigmatic, endometriosis can present as a diagnostic and therapeutic challenge for emergency physicians in their approach to the female patient with pelvic pain. 21% in the subspace group got improvements versus 46% in the SCIO harness group whose endometriosis symptoms improved.

Subspace Treatment 320 patients, 269 SCIO Harness Patients

OVERALL ASSESSMENT

A. Subspace Treatment 489 patient visits

There were 0 cases of patients who reported a negative Improvement. None of these cases reported any major difficulty.

Ulcerative COLITIS Treated by SCIO Practitioners

Abstract:

This study demonstrates the safety and effective qualities of the SCIO device used in a large scale study. A large scale study of over 97,000 patients with over 275,000 patient visits reported their diseases. Ulcerative colitis is an inflammatory bowel disease that results in chronic inflammation in digestive tract, usually in the large intestine (colon) and the rectum. Symptoms of ulcerative colitis may include:

- Abdominal pain, Bloody diarrhea, Rectal bleeding, Feeling of urgency, Inability to have a bowel movement despite the urge to do so, Abdominal cramping and pain, Weight loss

Symptoms may also occur outside the gut and include joint pain, eye inflammation, skin rashes and lesions, and mouth ulcers. Over 2,400 patients had medical diagnosis of colitis. 33% in the subspace group got improvements versus 43% in the SCIO harness group whose colitis symptoms improved.

Subspace Treatment 1,387 patients, 1,102 SCIO Harness Patients

OVERALL ASSESSMENT
A. Subspace Treatment 3,450 patient visits
There were 2 cases of patients who reported a negative Improvement. None of these cases reported any major difficulty.

There were
41 cases reporting no improvement of Symptoms, 0.001% of Subgroup
51 cases reporting no improvement in feeling better, 0.001% of Subgroup

HYPERTONIA Treated by SCIO Practitioners

Hypertension, High Blood Pressure

Abstract:

This study demonstrates the safety and effective qualities of the SCIO device used in a large scale study. A large scale study of over 97,000 patients with over 275,000 patient visits reported their diseases. Over 250 patients had medical diagnosis of high blood pressure. 30% in the subspace group got improvements versus 45% in the SCIO harness group whose high blood pressure condition improved.

Subspace Treatment 29 patients, 230 SCIO Harness Patients

The QQC trivector device passes a changing low level field thru the item and generates a sophisticated picture of the electrical field of the item. It makes a 22x22x22 3D field that means over 10,000 separate frequencies to make one pattern. The shark senses these fields and they are amplified by the salt water. This study leads to the discovery of the electro-sense. Researchers have found that humans also have such a system but it is weak.

Every item has such a field. Living things have a changing reactive field, non-living things have a static field non-changing. We now know that the electro-sense in humans is the surface of the skin and most concentrated in the sense of smell.

So by measuring the Voltammetric electrical field of items and then amplifying the field 1 million times we get to really measure the patient’s reaction to items, really. So by applying a trivector Voltammetric pattern we can measure the response or evolved potential and see the patient’s reactivity. So 5 million dollars were spent buying and procuring the item in the matrix and testing these items with a patented registered technology of modern science. This is why the SCIO device works so well, at each treatment from calibration, test etc these QQC signatures are at the heart. Real science, real technology, real legal compliance, real items, real results, real honesty and integrity.

In 5th grade we were taught we are made up of atoms made of electrons and protons and neutrons. The electrons in the outer level are so charged they never touch. We are made of electrical fields.

The QQC is a very advanced patented trademarked technology with a CE mark. It measures in a very sophisticated process the Voltammetric electrical field of any item. If you look up voltammetry in Google you see thousands of references for a world recognized very scientific chemical process also referred to as Pography.

You can see our patented process at http://www.voltametriaqqc.ro/

Injured or Diseased Tissue Detection and Repair with the SCIO

Abstract:

This study demonstrates the safety and effective qualities of the SCIO device used in a large scale study. A large scale study of over 97,000 patients with over 275,000 patient visits reported their diseases. Over 35,000 patients had medical diagnosis of injury. 16% in the subspace group got improvements versus 43% in the SCIO harness group whose injury symptoms improved.

In this report we review the detection and treatment of injured tissue. In our testing procedure we use measurements of multiple voltage potential, amperage potential, and resistance vectors. We can determine the potentials as normal or as diseased from the experiences of energetic medicine. Once detected the computer can then repair these injured tissue with proper autofocused TENS electrical stimulation. The SCIO device allows for detection and correction at biological speeds or in excess of one hundredths of a second.

Many athletes such as Lance Armstrong, Michael Shumaker, Valentino Rossi, AC Milan football team, the San Antonio Spurs use and have used the Injured tissue repair system. It helps to get an athlete back into the game after an injury.

This report relates how a large scale use of the system has proven the safety and efficacy.

---

Abstract

This study took 10 healthy athletic subjects and measured their performance before and after a SCIO therapy and compared to Placebo control group. This study showed an increase in performance in the treatment SCIO group versus the control group in most patients.

Introduction

There is much double blind evidence at the SCIO device can increase the VARHOPE electrical parameters of the body over a short 45 min session. (VARHOPE is an acronym for Voltage-Amperage-Resistance-Hydration-Oxidation-Ph-Eh). For more complete description of the studies and science see the VARHOPE medical textbook.

Title: Large Scale Study of the Voltammetric SCIO Stimulation of Blood Estrogen

Abstract:
A global and momentous research project was developed for the last two years; the SCIO device is a Universal Electro-Physiological device used for stress reduction and patient treatment. Over 2,000 qualified biofeedback therapists joined our Ethics Committee study to evaluate how stress reduction using the SCIO device could help a wide variety of illnesses.

The device and the study have insignificant risk. There was a staff of medical doctors who designed and supervised the study.

Over 8,800 patients gave informed consent and participated in the study. The study would conclusively prove safety and efficacy of the SCIO Device. With over 98% of these patients having multiple visits. There were over 2,300,000 patient visits. With a total record of the SCIO patient Information, therapy parameters and activity data. No names of patients were recorded for confidentiality.

Two of the 2,000 plus therapists were given blank devices that were completely visually the same but were none functional. These two blind therapists were then given 35 patients each. This was to evaluate the double blind component of the placebo effect as compared to the device. Thus the studied groups were a placebo group, a subspace group, and an attached harness group.

This is just the first study in a long task of analysis in truly break down the data totally. This study verifies the safety and efficacy of the SCIO device. There were small effects seen in the placebo group, larger effects in the subspace, and astounding effects in the real harness group.

In this study 75 females between 37 and 55 were evaluated for their daily estrogen cycle. The results have shown that the SCIO estrogen streaming therapy of 30 a day for 5 days raises their estrogen.
ITCHING UNSPECIFIED Treated by SCIO Practitioners

Abstract:

This study demonstrates the safety and effective qualities of the SCIO device used in a large scale study. A large scale study of over 97,000 patients with over 275,000 patient visits reported their diseases. Over 600 patients had medical diagnosis of allergy. 21% in the subspace group got improvements versus 54% in the SCIO harness group whose itching symptoms improved.

This study was performed in the field by practicing TVEP exercises. Data was collected and the study approved by the International Institutional Review Board of Rimaha. The data analysis and study presentation is done by the The Center Rimaha, University of Verona, Padua, Italy © Ethics International, 2006.

Abstract

A global and monolithic research project was developed for the last two years. The SCI device is a Universal TVEP Prognostic device used for stress reduction and patient treatment. Over 2,000 qualified TVEP therapists joined and Ethics Committee study to evaluate the stress reduction using the SCI device helped a wide variety of subjects.

The device and that this study has significant role. There was a chief medical doctor who designed and supervised the study.

Over 97,000 patients gave informed consent and participated in the study. The device would conclusively prove safety and efficacy of the SCI Device. With over 90% of these patients having multiple visits, there were over 710,000 patient visits. With a total record of the SCI patient information, therapy parameters and safety data, the names of patients were recorded for confidentiality.

Two of the 2,000 just therapists were given brash devices that were completely useless but were not functional. These two blind therapists were then given 35 patients each. This was to ensure the exact third component of the placebo effect as compared to the device. Thus the studied groups were a placebo group, a placebo group, and a trained therapist group.

This is the first study in a long term of analysis of the data. One study that was conducted to examine the safety and efficacy of the SCI device as well as the safety of the TVEP family therapeutically. There were small effects seen in the placebo group, larger effects in the patients, and interesting effects in the real human group.

Introduction

This research is to study millions of people with a wide variety of diseases to see who gets as feels better while using the SCI for stress reduction and patient monitoring. The SCI is a widely used potential Universal Prognostic Medical device that helps to identify reactive or non-reactive health-related factors. This device is registered in Europe, America, Canada, S. Africa, S. America, and elsewhere. The control software is fully registered. Some additional functions are determined by the manufacturer to be worthy of evaluation. Thus a study was necessary to examine safety and efficacy.

An ethic committee was formed and government permission attained to do the insignificant risk study. Qualified registered and non-registered TVEP therapists were invited to perform the study. Therapists were trained in this procedure using F. L. America, Europe, Africa, Asia, and S. America. They were trained in the subjects of the study and how to achieve informed consent and received the results to the ethics committee in 1996 (Institutional Review Board). 1,258 therapists entered the study. There were 97,000 patients, 89% had more than one visit, 47% had more than two visits. Therapists were trained for 10 weeks. They were then to perform the SCI therapy and analysis. They were to report any medical condition or serious diagnosis. Untrained personnel were not to diagnose. Then the therapist was to report any diagnosed disease during the meeting and an follow-up any measured situations.

Part 1. The emphasis was on subscales and factors followed by the efficacy of the SCI

Part 2. Reviewing the efficacy of the SCI on diseases (emphasis on degenerative disease)
IN 1982 DR. NELSON WROTE THE FIRST EVER TREATISE ON QUANTUM BIOLOGY AND HE LAID THE GROUND WORK FOR THE SCIENCE OF THE QUANTUM XRROID INTERFACE SYSTEM.

FIRST DEVELOPED IN 1985 AND REGISTERED WITH THE FDA IN 1989 THE ELECTRO-PHYSIOLOGICAL FEEDBACK XRROID ENTERED THE MARKET PLACE. DAY TO DAY IMPROVEMENTS HAVE SHARPEN ITS OPERATION. THERE HAVE BEEN OVER A HUNDRED MEDICAL ARTICLES AND STUDIES PUBLISHED IN PEER REVIEWED MEDICAL JOURNALS ON THE TECHNOLOGY.

NOW REGISTERED IN MOST OF THE COUNTRIES OF THE WORLD THE EPFX TECHNOLOGY IS ADVANCING FAST. OVER 31,000 DEVICES HAVE BEEN SOLD WITH TREMENDOUS RESULTS WORLDWIDE. THE TESTIMONIALS FILE IS ASTOUNDING.

NOW THE SCIO AS IT IS CALLED TODAY OFFERS YOU THE FINEST ENERGETIC MEDICINE HAS TO OFFER WITH THE LARGEST MEDICAL SOFTWARE IN THE WORLD AVAILABLE FOR YOU.

If you need more information on the SCIO and purchase details please get in touch with us

KIDNEY DISORDERS Treated by SCIO Practitioners

Abstract:

This study demonstrates the safety and effective qualities of the SCIO device used in a large scale study. A large scale study of over 97,000 patients with over 275,000 patient visits reported their diseases. Over 2,600 patients had medical diagnosis of kidney dysfunction. 22% in the subspace group got improvements versus 66% in the SCIO harness group whose kidney dysfunction improved.

Subspace Treatment 720 patients, 1,878 SCIO Harness Patients

OVERALL ASSESSMENT

A. Subspace Treatment 1,290 patient visits
There were 7 cases of patients who reported a negative Improvement. None of these cases reported any major difficulty.
There were
9 cases reporting no improvement of Symptoms, .001% of Subgroup
7 cases reporting no improvement in feeling better, .001% of Subgroup
1 cases reporting no improvement in stress reduction .001% of Subgroup

23%--- Percentage of Improvement in Symptoms
25%---- Percentage of Improvement in Feeling Better
22%----Percentage of Improvement Measured
40%-- Percentage of Improvement in Stress Reduction
11%----Percentage of Improvement in SOC Behavior

B. SCIO Harness Treatment 7,820 patient visits
There were 11 cases of patients who reported a negative Improvement. None of these cases reported any major difficulty.
There were
2 cases reporting no improvement of Symptoms, .001 % of Subgroup
1 cases reporting no improvement in feeling better, .001 % of Subgroup
2 cases reporting no improvement in stress reduction .001 % of Subgroup

44%--- Percentage of Improvement in Symptoms
43%--- Percentage of Improvement in Feeling Better
66%----Percentage of Improvement Measured
68%-- Percentage of Improvement in Stress Reduction
19%----Percentage of Improvement in SOC Behavior
LEUKEMIA Treated by SCIO Practitioners

Abstract:

This study demonstrates the safety and effective qualities of the SCIO device used in a large scale study. A large scale study of over 97,000 patients with over 275,000 patient visits reported their diseases. Over 200 patients had medical diagnosis of leukemia. 23% in the subspace group got improvements versus 67% in the SCIO harness group whose leukemia improved.

Subspace Treatment 121 patients, 166 SCIO Harness Patients

OVERALL ASSESSMENT
A. Subspace Treatment 211 patient visits
There were 0 cases of patients who reported a negative Improvement.
None of these cases reported any major difficulty.
There were
0 cases reporting no improvement of Symptoms, 0% of Subgroup

This study was performed in the field by practicing Biofeedback technicians. Data was collected and the study supervised by the Ethics International Institutional Review Board of Romania. The data analysis and study presentation is done by the Centro Ricerche, University of Venice + Padova, Italy

(This article is translated into English and Hungarian from the original Romanian)

Abstract

This study demonstrates the safety and effective qualities of the SCIO device used in a large scale study. A large scale study of over 97,000 patients with over 320,000 patient visits reported their diseases. The SCIO measures global electrical measures of the body. When there are abnormal measures of the electro-physiological factors, the device allows a feedback loop between the Central Nervous System (CNS) of the patient and the device. Of the patient visits listed some 50 plus % showed very low electro-physiological factors, below 30% normal. The cybernetic electro-physiological feedback loop was then used to help the patient reduce stress and thus improve the electro-physiological factors. There was improvement in over 95% of the electro-physiological measures at the end of the session (post test) versus the pre test. The average improvement in electro-physiological VARHOPE factors is 5%. These patients reported stress reduction and improved well being as well.

Weight Loss Treated by SCIO Practitioners

Abstract:

This study demonstrates the safety and effective qualities of the SCIO device used in a large scale study. A large scale study of over 97,000 patients with over 275,000 patient visits reported their diseases. Over 39,000 patients had medical diagnosis of being overweight. 16% in the subspace group got improvements versus 50% in the SCIO harness group whose healthy weight improved.
The SCIO device uses the principles of Quantum Electro Dynamics (QED) as the base of an energetic medicine technique for healing. Bioresonance, Volt-Ammetry, Trivector, Provocative Allergy Tests, Infection Reaction Testing and Immune Stimulation, Electro-Acupuncture, Neurological-Stimulation, Biofeedback-Psychological Interaction, Muscle-Neurological Re-education, Homotoxicity and Homeopathy, Electrophysiological Diagnosis, Behavioral Management Therapy and more are avant garde therapies registered for the SCIO device to perform on patients.

More than fifty percent of the patients reported positive results. There was insignificant negative effects reported.

This disease group total number of patients was 39,300. There were Subspace Treatment 22,475 patients, 16,825 SCIO Harness Patients. There was overall more than 40% results.

Subspace Treatment 22,475 patients, 16,825 SCIO Harness Patients

OVERALL ASSESSMENT
A. Subspace Treatment 73,324 patient visits
There were 538 cases of patients who reported a negative Improvement. None of these cases reported any major difficulty.
There were
657 cases reporting no improvement of Symptoms, .009% of Subgroup
580 cases reporting no improvement in feeling better, .007% of Subgroup
753 cases reporting no improvement in stress reduction .008% of Subgroup

34%--- Percentage of Improvement in Symptoms
33%--- Percentage of Improvement in Feeling Better
16%---Percentage of Improvement Measured
13%-- Percentage of Improvement in Stress Reduction
12%----Percentage of Improvement in SOC Behavior

37,203 patients reported their weight loss, their average weight loss was .8 kilos per month

B. SCIO Harness Treatment 45,980 patient visits
There were 371 cases of patients who reported a negative Improvement. None of these cases reported any major difficulty.
There were
386 cases reporting no improvement of Symptoms, .008% of Subgroup
411 cases reporting no improvement in feeling better, .009% of Subgroup
151 cases reporting no improvement in stress reduction .002% of Subgroup

76%--- Percentage of Improvement in Symptoms
65%--- Percentage of Improvement in Feeling Better
53%----Percentage of Improvement Measured
68%--- Percentage of Improvement in Stress Reduction
23%-----Percentage of Improvement in SOC Behavior

23,143 patients reported their weight loss; their average weight loss was 1.9 kilos per month
Title: Large Scale Study of the Voltammetric SCIO

Stimulation of Blood Estrogen

Abstract:
A global and momentous research project was developed for the last two years. The SCIO device is a Universal Electro-Physiological device used for stress reduction and patient treatment. Over 2,200 qualified biofeedback therapists joined our Ethics Committee study to evaluate how stress reduction using the SCIO device could help a wide variety of patients.

The device and thus the study have insignificant risk. There was a staff of medical doctors who designed and supervised the study.

Over 18,000 patients gave informed consent and participated in the study. The study would conclusively prove safety and efficacy of the SCIO Device. With over 60% of these patients having multiple visits, there were over 270,000 patient visits. All data and results are irrefutable.

Two of the 2,200 plus therapists were given blank devices that were completely visually the same but were not functional. These two blind therapists treated 30 patients each. This was to evaluate the double blind component of the placebo effect as compared to the device. This being the main advantage of the group, a placebo group, a sub-placebo group, and an attached harness group.

In this study, 80 females between 37 and 65 were evaluated for their daily estrogen cycle. The results have shown that the SCIO estrogen streaming therapy of 30 a day for 5 days raises their estrogen.
Chapter 3: The 1980s Body Electric Research that Lead to the 1989 EPFX Registration

The American Academy of Quantum Biofeedback Technicians 1991

Situated on a golf course in the Land of Enchantment, in the City of Vision the AAQBT made history. From 1984 to 1988, 935 subjects were tested with EPFX.

With proper IRB supervision, informed consent, and medical doctor direction the AAQBT did a series of studies on the electro-physiology to validate the 1989 FDA registration of the EPFX.

Alarm Response

By William Nelson

ABSTRACT: Situated on a golf course in New Mexico the Land of Enchantment, in the City of Vision Rio Rancho the AAQBT made history. We tested 935 subjects in Denver and New Mexico to understand the basic body electric measures to better understand the nature of the energetic medicine. We need to develop electrical profiles that indicate alarm reaction from the patient. The mathematical factor of Ohms law states the Volts = Amperes x Resistance. It would be theoretically impossible for a contained system to have all three factors increase. When one rises such as volts, amps would drop. For all three to increase would be difficult. But we found that when a patient reacts adversely to a stimulus then all three vectors can increase. This is part of a defense shield people have to stop electrical stimulation from upsetting body process. This is needed in a world of electrical stimulation or a small spark of an electric spark could be devastating. We found a statistical profile on the subjects to indicate an alarm response to a stimulus that might be too much for the body. A simultaneous increase of the VAR indicators of the extremities could be a measurable indicator for discontinuing a stimulus automatically. The Alarm response could be a valuable addition to our cybernetic loop.

Calibration

By William Nelson

ABSTRACT: Situated on a golf course in New Mexico the Land of Enchantment, in the City of Vision Rio Rancho the AAQBT made history. We tested 935 subjects in Denver and New Mexico to understand the basic body electric measures to better understand the nature of the energetic medicine. We need to develop electrical profiles that indicate reaction EPR time of the patient. The usual reactance speed of a person maximizes at the speed of ionization change or one hundredth of a second in the human body. But several conditions can change the speed of Electro-Physiological-Reactivity (EPR). To test the reactive speed a calibration process was designed from EPR data on our subjects. The test will start at one hundred and three of a second and test the patient’s EPR to 22 vials/urinoedd stimulation of distilled water the least reactive substance measured and four vials stimulation of a highly reactive compound of mosquito venom + chemicals. If the patient EPR data can statistically show a reaction of the four reactive compounds then the speed of reactivity is set at 1/103 of a second. If the test fails 85% it is repeated at 103-1 or 102, and it keeps testing at reduced times till 85% accuracy is done, thus making the speed of calibration of the patient.

Electro-Acupuncture

By William Nelson

ABSTRACT: Situated on a golf course in New Mexico the Land of Enchantment, in the City of Vision Rio Rancho the AAQBT made history. We tested 935 subjects in Denver and New Mexico to understand the basic body electric measures to better understand the nature of the energetic medicine. This review report scrutinizes a comparison between skin conductance, inductance, and capacitance (collectively known as the Trivector), and acupuncture points. We surveyed the acupuncture points on the subjects with a waveform analyzer and a frequency counter. We found that each healthy acu-point had a particular signature profile. There was a discrete and different frequency band, waveform and signal intensity showing that each acu-point has its own particular electrical signature. When we supplied this signature to unhealthy points, the points can improve. This opens the door for an electro-acupuncture program to measure and treat acu-points and help the body.

Electro-Physiological Reactivity (EPR)
By William Nelson

ABSTRACT: Situated on a golf course in New Mexico the Land of Enchantment, in the City of Vision Rio Rancho the AAQBT made history. We tested 935 subjects in Denver and New Mexico to understand the basic body electric measures to better understand the nature of the energetic medicine. This review report scrutinizes a comparison between skin conductance, inductance, and capacitance (collectively known as the Trivector), and SCIO Electro-Physiological-Feedback-Xroad EPR reactivity. We measured the 935 subject’s reactivity patterns to nosodes, allersodes, isodes, Sarcodes, and classic homeopathy using the EPFX biofeedback system. Significant profiles revealed an accuracy of about 71% to known medical conditions. The reactivity was a collective measure of change in resistance, change in capacitance, and change in inductance (the 3 vectors of the trivector) together referred to as the reactivity or in this case the EPR.

SKIN CAPACITANCE

By William Nelson

ABSTRACT: Skin capacitance is affected by polarization capacitance (where stored charges around an electrode appear in a near electrolytic medium). We tested 935 subjects in Denver and New Mexico to understand the basic skin capacity to store charges and other bio-electric measures to better understand the nature of the body electric. Skin capacitance was measured to range from 0.01 to 0.07 microFarads per centimeter squared. If the corneum thickness of 10 micrometers and a dielectric constant of 2.5 for biological membranes then the capacitance will be about 2 x microFarads per centimeter squared. Two equivalent electric current paths are measured: one crossing lipid-corneocyte medium and the other going thru skin appendages. The current-time response of the skin during the application of rectangular pulses of different voltage amplitudes demonstrates an insightful similarity with the same characteristics in model and plasma membrane electroporation. A significant (up to three orders of magnitude) drop of skin resistance happens due to electro-stimulation can be explained by electroporation of various substructures of stratum corneum. At relatively low voltages (U<30V) this drop of skin resistance can be ascribed to electroporation of the appendageal ducts. At higher voltages (U>30V), electroporation of the lipid-corneocyte matrix makes an extra drop of skin resistance.

**SKIN CONDUCTANCE**

By William Nelson

ABSTRACT: We describe the EPFX method for measuring skin conductance responses; this is designed to overcome the difficulty of coinciding skin conductance responses. The EPFX method relies on the assumptions that the underlying autonomic nerve signal has a shorter time-constant than the skin conductance signal itself, and that the autonomic bursts culminate as distinct, detached events. By changing the skin conductance signal into a time-series with a shorter time-constant, we are able to remove the separate peaks in the assessed fundamental EPFX signal. The separate measured peaks are then used to re-estimate each discrete skin conductance response. The method is automated and applied to a normative database of 935 subjects, for which skin conductance was measured during an EPFX test process. It was found that conductance measured with the external voltage connected in series-adding was some 32 percent higher than when measured in reverse polarity. Additional experiments showed that this 'rectification effect' could be entirely attributed to the effect of the endogenous potential. A technique of approximating EC from SP readings with no external current source was revealed to give results equivalent to values measured in the usual way.

SKIN INDUCTANCE

By William Nelson

ABSTRACT: Skin effects Inductance transfer. We tested 935 subjects in Denver and New Mexico to understand the basic skin capacity to affect Inductance transfer to better understand the nature of the body electric. The amount of Inductance is reduced as the skin makes the current move away from the locus of the stimulation and move outward. Thus there are fewer lines of magnetic flux within the conductor that lowers the internal Inductance. The skin makes the Inductance decrease as the square root of the increase in frequency. This happens at the same rate where resistance increases as we change frequency. Inductors do not act the same as resistors. Whereas resistors simply oppose the flow of electrons through them (by dropping a voltage directly proportional to the current), inductors oppose changes in current through them, by dropping a voltage directly proportional to the rate of change of current. In accordance with Lenz’s law, this induced voltage is always of such a polarity as to try to maintain current at its present value. That is, if current is increasing in magnitude, the induced voltage will “push against” the electron flow; if current is decreasing, the polarity will reverse and “push with” the electron flow to oppose the decrease. This opposition to current change is called reactance, rather than resistance. These factors are used to develop the EPFX.

TRIVECTOR

By William Nelson

ABSTRACT: We tested 955 subjects in Denver and New Mexico to understand the basic body electric measures to better understand the nature of the energetic medicine. This review report scrutinizes a comparison between skin conductance, inductance, and capacitance (collectively known as the Trivector), and SCIO Electro-Physiological Feedback-Xroid EPR reactivity. Electricity acts in three basic dimensions of conductance, inductance and capacitance. These events can be measured and a three-dimensional trivector analysis can be derived. Events display that the Xroid has a very high interdependence to culture results, and thus the Xroid is very helpful in determining the electrical reactivity of the patient, and in determining the type of infection the patient might have. The overall correlation was approximately 91%. The existence of many so-called false positives or infections that are subclinical makes reading difficult. The trivector field of a living organism is not static; it is reactive. A living being is interacting with the environment to be drawn towards nutrition, and repelled from toxins. Thus with the Xroid we measure which items the patient reacts to and how he reacts so we can see a profile that might help us learn more about our patient.

Stress Reduction thru electro stimulation

By William Nelson

ABSTRACT: Situated on a golf course in New Mexico the Land of Enchantment, in the City of Vision Rio Rancho the AAQBT made history. We tested 935 subjects in Denver and New Mexico to understand the basic body electric measures to better understand the nature of the energetic medicine. This review report scrutinizes a comparison between skin conductance, inductance, and capacitance (collectively known as the Trivector), and electro-stimulation of the body electric in stress reduction. From the work of Hans Selye and others it has been shown that stress is "THE" concern of medicine. Collective stress can be additive and accumulate to weaken an organism and thus let in disease. In our study here the 935 subjects were asked if stress was reduced after their EPFX treatment. 76% of the subjects said there was less body stress, 14% said they felt no different, and 10% said they felt more stress. No adverse events were reported and the device was safe and effective in reducing stress.

Dear Mr. DiMauro:

We have reviewed your Section 510(k) notification of intent to market the device referenced above and we have determined the device is substantially equivalent to devices marketed in interstate commerce prior to May 28, 1976, the enactment date of the Medical Device Amendments. You may, therefore, market the device, subject to the general controls provisions of the Federal Food, Drug, and Cosmetic Act (21 C.F.R. Part 800). The general controls provisions of the act include requirements for annual registration, listing of devices, good manufacturing practices, and labeling, and prohibitions against misbranding and adulteration.

If your device is classified (see above) into either class II (Performance Standards) or class III (Premarket Approval), it may be subject to such additional controls. Existing major regulations affecting your device can be found in the Code of Federal Regulations, Title 21, Parts 800 to 895. In addition, the Food and Drug Administration (FDA) may publish further announcements concerning your device in the Federal Register. Please note: this response to your premarket notification submission does not affect any obligation you might have under the Radiation Control for Health and Safety Act of 1968, or other Federal laws or regulations.

This letter immediately will allow you to begin marketing your device as described. An FDA finding of substantial equivalence of your device to a predicate device results in a classification for your device and permits your device to proceed to the market, but it does not mean that FDA approves your device. Therefore, you may not promote or in any way represent your device or its labeling as being approved by FDA. If you require specific advice on the labeling for your device, please contact the Division of Compliance Operations, Regulatory Guidance Branch (HFD-332) at (301) 427-8046. Other general information on your responsibilities under the act, may be obtained from the Division of Small Manufacturers Assistance at their toll-free number (800) 618-2341 or at (301) 445-6597.

Sincerely yours,

George C. Murray, Ph.D.

The Trivector Signature of Human Beings as a Basis of Psychic Communication

This study is done at Youngstown University.

Abstract:
In this study 40 pairs of intimate friends (that is married people, couples going steady, very, very close friends) were involved. One of the pair was put into a dark room in a building in Youngstown State University. A stroboscope and a siren was placed into the dark room next to the ears and eyes of the person. At random times over the course of a two hour plus+ session, a one minute signal of stroboscopic burst and siren's scream would be initiated, subjecting the patient to a fluctuation that would initiate a evoked potential brain wave response. This would provide a startle to the system, a threat to the system that, although safe, would be interpreted by the patient as possibly life-threatening. This would produce a hormonal and nerval reaction and would it would be discernible by their friend.

The other person in the group was placed in a separate building at Youngstown state campus. The separate building was needed to make sure that there was no electrical artifact in the electric measures that could be detected. This person was hooked up to a polygraph device capable of measuring the brainwave, the heart rate, and the galvanic skin response. Thus we were measuring voltage, amperage and resistance (VAR). During the two hour plus session the person hooked to the polygraph was to make verbal guesses as to when they thought their friend was being subjected to the evoked potential shock. At the end of the article we will show that the verbal guesses were less than chance. In other words there was no verbal ability to understand what was going on. However, there was always an electrophysiological voltameteric plus resistance reaction that could be discerned. There was a over 90% correlation to a type of electrophysiological (VAR) reaction that could be determined. Thus, the article could show that there was a type of psychic communication. It was seen to be isolated from verbal, conscious pathways and was more of an unconscious bioelectronic signal.

**Anti-aging Effects of Parathyroid Hormone.**

**Abstract:**

There have been references to the anti-aging effects of parathyroid hormone in certain literature. Parathyroid hormone is the hormone that takes calcium out of the cells. When the pituitary detects there is too much calcium, parathyroid hormone can be released to take the calcium. When the pituitary detects that there is too little calcium, then the parathyroid release parathyroid hormone, which would take calcium out of the bones, or out of the cells of the body. Calcification of the cells has been shown to be a problem with aging. Parathyroid hormone was used in this study to apply to older rats, Norwegian rats coming at the end of their life span. The parathyroid hormone was brushed on the outer skin, overnight a crust would form. The crust would be wiped away revealing underneath restored and renewed youthful skin and the life of these Norwegian rats could be extended more than double their normal lifespan even upwards to three times their lifespan by simply applying the parathyroid hormone
to the outer parts of the skin. The study shows 24 rats in the sample that were used in the study and 18 of them had life-spans greater than double the norwegian rat and five of them had life spans more than triple.
Magnetic Effects on Evaporation.

Abstract:

Water is actually a polar substance, meaning that it has magnetic poles. The structure of the oxygen to two hydrogens create a slight paramagnetic pull. If this is true, then a powerful magnet should be able to increase the evaporative rate of water versus a set of water that is not exposed to the magnet. In our study we indeed showed that a powerful magnet of approximately 50 gos was capable of dramatically increasing the evaporative rate of the water. Thus, demonstrating the polar effect of the water molecules. The north pole of the magnet was better than the south at stimulating evaporation.
A Proposition For the Fluidic Effect on the Flow of Oxygen in Blood.

Abstract:

Blood has different types of oxygenation and the blood coming out of the heart is not all completely uniform in the amount of oxygen contained in the red blood cells. The effect of the oxygen inside the red blood cell will be demonstrated by a difference in weight. Since the flow of blood out of the superior veina cava is put into a twist a rotation this would create a different type of oxygen flow between the hemispheres of the brain. The right hemisphere of the brain will get slightly extra oxygen compared to the left. The left hemisphere of the brain is responsible for our words, writing, verbal, communication and for most linear, scientific type thought. Whereas the right side of the brain is more intuitive, more feeling oriented, and also it is more susceptible to rebreathing techniques. Alternate nostril breathing flow techniques can be used to help stabiles the flow of blood to the different parts of the brain. In this simple study we show the fluidic dynamics of the circular flow spin creating a difference in oxygenation in the two hemispheres of the brain.
Professor Desiré Dubounet

and her friends have spent over 35 million dollars to bring the world a professional and thorough course on Wellness, Naturopathy and Neuro-Electro-Physiology of Biofeedback as Bioresonance.

She is such a humanitarian Angel, she lets you pay for the course videos, books and materials with Karma...

These are the TOP FIVE REASONS to get a Doctorate in Wellness PHD International Medical University degree at home.

1. Getting a degree means you will increase your earning potential. Studies have shown that at home study is just as good as attended classes.
2. Study and Complete Courses at Your Own Pace. Use this to maximize the learning.
3. Scheduling Convenience, Work when you are ready to work.
4. Teaching Faculty Who Actually Have Work Experience in Your Field of Study. Global faculty at IMUNE is with worldwide famous doctors.
5. Save Money on Travel, Parking, Childcare, and Books. You save money the world saves energy, this makes you and the world better.
6. Employer Support. Many employers offer tuition reimbursement for employees' tuition associated with training in their fields. Employers also tend to encourage enrollment in online degree programs because they know employees will be able to go to school and still be able to be committed to their jobs. Don't be afraid to ask your employer. Every company needs a wellness consultant.

Professor Desiré Dubounet the world's most famous Naturopath and her friends have spent over 35 million dollars to bring the world a professional and thorough course on Wellness, Naturopathy and Neuro-Electro-Physiology of Biofeedback as Bioresonance. She is such a humanitarian Angel, she lets you pay for the course videos, books and materials with Karma go to www.imune.name for more information.
Sex Change in Certain Animals.

Abstract:

In this study we will show that there are certain animals that have multi-sexes and that with surgical operation this can be manifest. All female chickens born have male sexual apparatus. The male sexual apparatus is thus stagnant as long as there is female hormone. By surgically removing the ovaries in chicken then male sexual apparatus and the development of testosterone would take over. Thus any female chicken could be made into a male by removal of the ovaries. This was done surgically on six chickens by the experimenter. The chickens then grew combs, started to crow and demonstrated fully, complete male sexual behavior.

In the other part of the science, we also know that every male frog has female apparatus. The female apparatus is dominant because of the male hormones which suppress the female system. By surgically removing the male apparatus any male frog could be turned into a female. This was done on six different frogs through surgical operation and resulting female frogs were fully female and actually were capable of producing tadpoles as fully functioning female frogs. This was demonstrated. It is hypothesized by the researcher that all people, all species, have some male and female in them. In the human being, we know that the medial adrenal cortical system can produce all known hormones and that the male is producing some female hormones and the females are producing some male hormones. Sexuality is far more complicated than a simple black and white experience.
De-burring of the Beryllium C5 Apollo Gyro.

Study conducted at AC Electronics, Milwaukee, Wisconsin. 1970.

Abstract:

The Apollo spacecraft beryllium gyroscope is made of almost solid beryllium, the lightest metal known. This allows us to define sculpting and allow us to make a air supported gyro, not needing any type of oil or lubrication but using air to suck into its spindle and thus allowing the gyro to float on a cushion of air. This minimizes the amount of force and produces a very superior type of system that needs very, very little in energy to activate it or to sustain it. In making the gyro and after the milling, burs can form. A de-burring system can be used but present de-burring systems use silicon oxide and silicon oxide has been found to impregnate into the surface of the beryllium gyro. There is thus a need to develop a de-burring process that will not produce silicon impregnation. De-burring has been shown to even work on other metals with wood chips. That the type of product used with the de-burring does not have to be harder than the burs. It only has to be applied for a period of time. The tumble de-burring technics used in the C5 beryllium gyro system are standard. In our study we showed by taking out the silicon items and using beryllium stones, that the beryllium stones would have a superior de-burring process that would at the same time prevent any type of silicon impregnation. The beryllium de-burring process was found to take longer as that standard silicon de-burring would take 10 – 12 hours and that the beryllium de-burring would take over 24 hours to accomplish the same goal but there was no silicon impregnation and that the beryllium gyro was then better able to be utilized at the mere cost of a couple of hours of de-burring.
Fluidic computer components.

Researcher: William Charles Nelson

Abstract:

In this study we review the technology of making computer components without electrical items but using the flow of fluid principles.

Using different type of laminar flow technics and the principle of flow memory, we could develop memory technics with fluid computers. Accurate calculations could be achieved and flow redirected to remember different functions accounting for complete fluid memory. This type of system could be used in nuclear reactors or other places where an electromagnetic pulse would be able to knock out an electrical computer. Fluidic computer would be able to continue it's operation.

A review of the complete technology and the design of some new type of fluidic circuits in the article. One of the new type of circuits designed was a temperature selector that since the temperature of molecules in a room are connected with their kinetic energy and, thus with their speed. A selector could be designed where the flow of the air molecules could be directed in a circular path. Faster molecules would then proceed to the outer side. These are the more hot molecules. And the cooler molecules would gravitate to the inner.

At the end of the circular sort mechanism, different tubes would be able to sort the air into it's different type of temperature properties. If the air in a room is at 70 degrees Fahrenheit, many of the air molecules are at higher temperatures and many are molecules are at lower temperatures. 70 is just the collective average. This sorter would be able to sort those and thus be able to supply a stream of cool air from a room and a stream of hot air. This technology was patented by William Nelson and is first diagramed and designed in this paper.
It is proposed by Buddhism that the cause of all suffering is desire. The more you desire things to be different, the more you suffer. This is the basic idea of Buddhism coupled with the thought that to remove suffering you must be able to remove the desire. There are two ways to remove the desire that is by accepting things the way they are or by changing them. This is the path of the wisdom of Saint Francis of Assisi who states please give me the ability to change the things that I can, accept the things I can not and the wisdom to know the difference. In this study a psychosomatic suffering index used in prisons to measure psychosomatic pain is applied to 65 different students at Youngstown State University. The students were then asked to listen to a 30 minute relaxation tape. The two groups were broken up into different groups with 35 getting a tape that instructed them to accept different problems in their life. A relation tape that was directed with words to help people to relax and to help people to find different parts of suffering in their lives and to help them to accept those. The other relaxation tape was the exact same music, same voice, only they were only told to do muscular relaxation. Just simple stress reduction. In the process of the pre and post measures of their psychosomatic pain and suffering there was a dramatic difference and a reduction of suffering shown in the group who got the messages of acceptance. Thus we were able to manifest and prove the basic theory of Buddhism that suffering is the cause of all desire and that by reducing desire we can reduce suffering.
Subliminal Perception Effect As a Modality of Psychic Phenomena.

Youngstown State University. 1977.

Abstract:

In this study a five minute move was made of entertaining images, of people at a party. Cut into this movie was a subliminal perception of five different objects arranged in a certain pattern: two at the top, one at the middle, and two at the bottom, such as the five on the cast of dice. In one of those positions, an black object was . The person was to watch the movie and then after the movie was to use their right and then their left hand to try to feel their energy underneath five different cups to see if them could find the object. The theory was that they had been shown the object in subliminal movie and that they should be able to have a heightened ability to sense it and to link it to their perception as that they were then told to find it via some type of psychic vibrational feeling. In the study chance level was determined at a 20%. The right hand with the patients had a 15% correct, whereas the left hand had 27% correct. This showed that the left hand was able to connect to the perspective easier and that subliminal perception probably has greater effects on the right hemisphere, thus the left hand, rather than the left hemisphere. However, the left hemisphere right hand seemed to have effects below chance, possibly meaning that some type of doubt or psychological process might have intervened. We were able to show that the subliminal perception has some slight effects on patients but it was not extremely significant.
Eye Movement Techniques in Mathematical Teaching.

Corresponding lecture given in New York City, NY at the Mathematical Teachers' Conference, 1980.

Abstract:

It has been shown in neurolinguistic programming that by moving the eye, eye movements can reflect activation of different types of activation by the brain. Eye movements that are made upwards show activation of the occipital lobe which is connected to vision. References of left and right can be in the different hemispheres of intuitive, constructive side, feeling side or into the verbal, logical side. Eyeball movements to the side reflect the temporal lobe and thus auditory. Eyeball movements down reflect activation of the frontal cortex which is where feelings are. In the study good students were evaluated and shown that good students were students that looked upwards, thus activating the occipital lobe and they were able to see mathematical formulas. They were given questions such as: Two numbers added together give you twelve multiplied by each other give you 32; what are the two numbers? And solving the problem that 8 plus four. A and B students would look up and see the formulation, B and C students would look to the side as they would be repeating the question, and the bad students, the D and F students invariably were the ones who looked down, activating the frontal cortex, asking the question: Why is he asking me this question it's hot in here, or they were exploring feelings. Feelings could not be used to solve a mathematical formula. In our study could we guide our poorer students into better formulation by simply telling them to direct their eyes? A red spot was put at the top of the front of the classroom the size of a basketball. Students who were of the age 10 – 12 at a summer camp at Youngstown were then told to look into the magic spot to find the answers to the questions. In our study we showed that there were dramatic effects that simply by telling them to direct their eyes we could improve mathematical formulations and that the students could be taught to use the proper area of the brain to solve their problems as a reflection of neurolinguistic programming techniques.

Abstract

Trans-cranial application of electro-stimulation is a form of treatment for drug and alcohol addiction whose clinical efficacy is disputed; although its application as trans-cranial or non-trans-cranial electro-stimulation in tissue healing and pain control has won wide acceptance. The dispute in addiction applications arises from the difficulty of independent replication of the results of controlled clinical trials. Here, the authors analyze the results of three published successful applications of electro-stimulation in the treatment of drug and alcohol addiction. All three groups independently concluded that the specific parameters of electrical current application were central to therapeutic success. While the range of parameters covered in these studies suggests some tolerance in the overall mode of application, ‘windows’ of current level and pulse frequency have been identified that are important for different clinical applications. Review of the scientific literature reveals reports of similar windows of current parameters for effects from gene activation to embryogenesis. We suggest that failure to replicate results in clinical settings may arise from lack of understanding of the importance of exact current parameters, and emphasize the necessity for accurate and complete descriptions of the currents used.

Homeopathic and Herbal Treatment of Amoeba Infections

HOMEOPATHIC AND HERBAL TREATMENT OF AMOeba INFECTIONS

By: W.C. Nelson, L.P.C.C.

INTRODUCTION

Amoeba is a one celled organism that can cause a parasitical or protozoa disease. The amoeba motivate by extending and contracting their protoplasm. There are a host of types of amoeba as well as a multitude of other protozoa diseases. These diseases were thought of as being rare for many years but due to better diagnosis and detection we see today more and more of these diseases. The usual contact is with bad food or water. The initial exposure usually results in dysentery or what we refer to in Mexico as Montezumas revenge. This is usually treated symptomatically which produces relief. But the unconquered organism can proliferate and lead to other diseases. They can cause ulcerations in the colon and digestive tract. Most often the ulceration is in the lower bowel. Often the protozoa can proliferate in the mouth, bowel or spread to other areas. The proliferation of these intruders is slow and often takes 4 to 5 years before other symptoms result. The amoeba can occupy places in the synovial fluid of the joints and cause arthritis or articular disease. In the joints they will cause distortion of the joint and distention of the joint sack. Many arthritic deformed joints in the fingers are a result of amebic proliferation. They can cause hepatic abscesses in the liver or other organs. Since they shrink when exposed to saline solution (from the isotonic effect) they can be difficult to diagnose. The electro reactivity Xroid can detect the amebic disease with some accuracy. In recent years in clinical practice I have seen more and more Amoeba infections in Northern areas. In fact the further North I go the more amoeba I see. I can speculate that this is some how related to changes in the ultra violet light and the reduction in Amphibian populations.

TREATMENT

The human immune system dose not have a developed system for dealing with this protozoa disease. All attempts to correct this with classical homeopathy, nutrition, and behavioral therapy come up empty. The patient needs more refined and direct therapy. So to help the system to deal with this disease we developed a nosode treatment with some herbal therapy that could disable any flagellated bacteria such as Giardia or the motivated Amoeba.

The formula is made with the patented activation process at New Vistas which appears to increase the clinical results significantly.

The formula contains nosodes from over 8 forms of Amoeba and other Protozoa. In addition herbal forms of Diloxanide Furoate, Metronidazole, and absinthium are at lower potencies.
ANTIBIOTIC DISRUPTION OF BOWEL FLORA

Antibiotics as a co-factor in AIDS

By: W. Nelson, LPCC,M.D.

ABSTRACT

The antibiotic revolution was touted as one of the best discoveries of modern medicine. There have been however, a derogatory side effects of these antibiotics. The environment has been effected as well as the patients. In this article we look at the disruption of the bowel flora by antibiotics. And theorize about how this disruption of the bowel flora, could be a contributing factor to the AIDS epidemic. The article also reviews the bowel flora in naturopathic terms for treatment and diagnosis.
The Long Term Pathological Findings of the Camelford Toxicity Group

Title
The Long-term Pathological Findings of the
Camelford Toxicity group. 1990

Subtitle
The Premature Ageing Effects of a Toxic Water Syndrome Case.

By
Dr. William Nelson LPCC, Peter Smith LCH

ABSTRACT:
In July 1988, a toxic water spill in the Camelford water district by South West Water, the public water utility, in Cornwall England resulted in some 20,000 people being exposed to a toxic cocktail of chemicals in their drinking water. This produced a host of different physiological diseases. It also resulted in a homoeopathic practitioner, together with other colleagues, launching into long-term 7 year study of the effects of this toxicity on the population.

Besides extensive case notes on 200 people, hair and nail samples, several different electrical measures, chemical measures, and psychological interventions have yielded a understanding of these patients’ disease profile. Various lengthy papers have been prepared by the North Cornwall Homoeopathic Project and the Lowermoor Support Group. A book is in preparation.

One of the key factors that have been observed in this population is that of premature aging. This is discussed within this article.
IMUNE 12 MONTH HOME STUDY COURSE

Go to http://immune.name to learn and to get your course materials. You could get a Doctorate in Wellness and an international or accredited European professional qualification in neurophysiological bioresonance and biofeedback.

The Tassel is worth the Hassel. In a world so concerned of Wellness can be yours in just 12 months of Home Stury, a simple thesis, a practicum and four days of monitored supervised contact.

Big Tobacco, Big Sugar, Big Pharma, Big Oil, and Big War Industry are exempt from lay and they kill and injure, maim and cripple in the name of profit. They seek to control and dominate medicine to further build their profits.

Their money controls governments, regulators, and the small minded media. The Ultra Rich Master Echelon Computer now sees and hears all the things we say, write, and do. Rights of privacy are gone worldwide. They have taken away our rights of free speech.

The Ultra Rich control the media and refuse to tell stories that expose or offend the Ultra Rich Power. They control every movie that gets distribution, every song that hits the radio, everything that is put on the world news. They use science and psychology to control and manipulate the minds of the masses.

But medicine is controlled by Universities that teach medicine. There is now one university starting to defend Natural Medicine. IMUNE has a new 12 month home study course that can be bought with Karma and you can learn how to do natural medicine and how to break free from the Ultra Rich control.

Well, the game of Reality Monopoly is still being played all over the world. One percent of the world’s population is winning and now controls over 80% of the wealth. The law allows the game to continue till we will see one winner and 6 billion plus losers.
Abstract: A method and apparatus for providing microcurrent stimulation (MCS) therapy. It has been determined that the application of microcurrent signals at particular frequencies to the eye for particular periods of time stabilizes and even improves conditions of macular degeneration and other ocular diseases. Experimental data from clinical trials shows that results of persons who underwent therapy are at least better than placebo (i.e., efficacious), and that the therapy is safe. In fact, experimental data from clinical trials showed that approximately 98% of the patients who underwent the MCS therapy of the invention experienced either stabilization or improvement of macular degeneration within one year of starting therapy. Of this percentage, approximately 65% of the patients subjected to the MCS therapy experienced improved vision, while approximately 32% experienced stabilization of macular degeneration (i.e., no further loss of vision).
A Study of the Effects of Cranial Electrical Stimulation on Attention and Concentration

A Study of the Effects of Cranial Electrical Stimulation on Attention and Concentration
SUSAN SOUTHWORTH, PSY.D.
The Family Institute and Associates

Abstract
There have been several anecdotal accounts that cranial electrical stimulation (CES) enhances attention and the ability to learn new tasks in a normal population, but only one published investigation confirms that CES improves attention using the Alpha Sten CES (Madden and Kirsch, 1987). The purpose of this study to corroborate the findings of Madden and Kirsch, using more precise measures of attention, such as a Continuous Performance Test (CPT). A pretest and posttest CPT given two groups using the LISS CES device. The control group consisted of twenty-one subjects who received the placebo treatment. The experimental group of thirty-one subjects received twenty minutes of CES. Four measures of the CPT show significant gains in attention: Number of Hits, Hit Rate, RT 151 Change, p = .016, Risk Taking, p = .055; and Attentiveness, p = .054. Based on subjects who demonstrated improvement by one standard deviation on two different measures of the CPT, thirty-one percent of the experimental group improved versus four percent of the control group. The use of CES as a method of increasing attention is a promising area that requires further investigation.

Cranial Electrical Stimulation (CES) involves the application of small amounts of pulsed electric current using electrodes applied to the head. CES has been used in Europe and the United States for treatment of depression, anxiety, and insomnia for the past twenty years, and there have been several anecdotal accounts of how CES has been used to increase attention and concentration in normal subjects. These accounts include truck drivers using the device to increase concentration during times of long drives and students using the device to increase attention and concentration (Hutchinson, 1991).

History of Electrostimulation
The application of electric current in the healing arts is not new practice. Long before William Gilbert defined electricity in 1600, the therapeutic value of naturally occurring electrostimulation was used by the ancient Egyptians and the Greeks. The use of Nile catfish (Malapterurus electricus) is displayed on wall reliefs of Egyptian tombs dating back thousands of years. Aristotle and Plato reference the black torpedo, an electric ray fish, which the physician Scribonius Largus prescribed for relieving headaches and gout in 46 A.D. A similar application of electrical stimulation for relief of pain in the joints was described in 1747 using “an electrifying machine.” The subject observed that the pain decreased prior to retiring for the night after the first treatment, and by the third day, the pain disappeared (Braverman et al., 1992).

The therapeutic use of electricity did not gain widespread acceptance due to the difficulty of providing a suitable source of electric current. The technology needed to manufacture CES devices is relatively recent. The earliest account of the use of small amounts of low voltage current for therapy appeared in 1953 by the Soviet researcher, Giljarowski, who used CES for relieving insomnia and in the
SO YOU HAVE A COLD - IS IT ALLERGY, ASTHMA, INFLUENZA, INFECTIOUS, OR NUTRITIONAL IMBALANCE?

Author: William Nelson, D. Sc. L.P.C.C. Maitreya; Limerick, Ireland

This article was presented by Dr. William Nelson at the Pharmia Expo in Budapest, Hungary; an international pharmacy exposition presented on November 10 - 13, 1994.

ABSTRACT

In this brief paper we categorize some simple diagnostic methods for analysis of patients who present with rhinitis, sinusitis, itchy, runny eyes; asthma, fever, chills, in other words, cold symptoms. Cold symptoms can come from a variety of reasons, not just from viral infection. However, viral infection will be thoroughly discussed in this paper.

In this article we will discuss simple OTC (over-the-counter) treatment regimes which can be used for cold-like symptoms. This is vital information for pharmacists and practitioners alike in dealing with probably the most common ailment known to man.
DIGITAL COMPUTER INTERFACE  THE EPFX

Introduction
The theoretical solution to the equations for electrode processes nearly always has to involve approximations, not only for numerical but also for analytical solutions—such as, for example, the assumption that there is no convection within the diffusion layer of hydrodynamic electrodes. In other cases, of complex mechanism, it is not even possible to resolve the equations algebraically. There is another possibility for theoretical analysis, which is to simulate the electrode process digitally.

Digital simulation has two aims:

• to compare solutions obtained analytically and numerically and examine the agreement between the two methods
• to solve equations when algebraic solution is not possible.

The accuracy of the result obtained by simulation depends on the increments used in the variables (distance, time, concentration, etc.), and thence the computation time. Care must be taken not to introduce apparently small errors which can be propagated and grow along the simulation. Also, it should always be remembered that the experiment is correct; what may be wrong is our interpretation of the results, that is the simulation model.

Only an introduction to digital simulation will be given in this treatise. Extensive treatments exist, such as those in the EPFX.
A controlled study of the effects of EEG biofeedback on cognition and behavior of children with attention deficit disorder and learning disabilities

Abstract

Eighteen children with ADD/ADHD, some of whom were also LD, ranging in ages from 5 through 15 were randomly assigned to one of two conditions. The experimental condition consisted of 40 45-minute sessions of training in enhancing beta activity and suppressing theta activity, spaced over 6 months. The control condition, waiting list group, received no EEG biofeedback. No other psychological treatment or medication was administered to any subjects. All subjects were measured at pretreatment and at posttreatment on an IQ test and parent behavior rating scales for inattention, hyperactivity, and aggressive/defiant (oppositional) behaviors. At posttreatment the experimental group demonstrated a significant increase (mean of 9 points) on the K-Bit IQ Composite as compared to the control group (p<.05). The experimental group also significantly

Note: This paper on electrical stimulation for wound healing has been excerpted from Chapter 16, Sussman, C and Byl, N, Electrical Stimulation for Wound Healing, Wound Care Collaborative Practice Manual for Physical Therapists and Nurses, Sussman, C. And Bates-Jensen, BM, Aspen Publishers 1998.

Definitions
Electrical stimulation is defined as the use of an electrical current to transfer energy to a wound. The type of electricity that is transferred is controlled by the electrical source. ( AHCPR 94). Capacitatively coupled electrical stimulation involves the transfer of electric current through an applied surface electrode pad that is in wet (electrolytic) contact (capacitatively coupled) with the external skin surface and/or wound bed. When capacitatively coupled electrical stimulation is used, two electrodes are required to complete the electric circuit. Electrodes are usually placed over wet conductive medium, in the wound bed and on the skin a distance away from the wound.

When discussing electrical stimulation, it is important to distinguish the waveform used for the protocol. Although there are many waveforms available on electrotherapy equipment, the one that has the most thorough and consistent evaluation in vitro, in animal studies and in controlled clinical trials is monophasic twin peaked high voltage pulsed current (HVPC). The pulse width varies with a range from 20-200 microseconds. The HVPC devices also allow for selection of polarity and variation in pulse rates both of which seem to be important in wound healing. It is a very safe current because it’s very short pulse duration prevents significant changes in both tissue pH and temperature. Therefore, the most tested and safe type of stimulation is the one recommended.

Other types of waveforms and have been tested in clinical trials but will not be discussed here due to limited space. They are discussed in the full chapter.
Electrochemistry *in Vivo*: Application to CNS Pharmacology

ROSS F. LANE and CHARLES D. BLAHA

Department of Chemistry
and Institute of Neuroscience
University of Oregon
Eugene, Oregon 97403

INTRODUCTION

*In vivo* electrochemistry is a technique that shows great promise for the direct measurement of a variety of easily oxidized compounds in the brains of anesthetized, immobilized, or freely moving animals. This technique is being developed to provide information concerning the presence and concentration of these compounds in the brain extracellular fluid and, perhaps more importantly, to measure dynamic changes in the concentration of these compounds that occur in response to physiological and pharmacological stimuli and to behavioral changes. Of particular interest is the monitoring of catecholamines and 5-hydroxytryptamine, which are easily oxidized neurotransmitters. Several studies have shown that *in vivo* electrochemical techniques can measure changes in concentration of electro-oxidizable species that are related to biogenic amine neurotransmitter release. However, the major problem associated with *in vivo* voltammetric detection of brain catecholamines is one of selectivity. This arises from the fact that the catecholamines and their non-methoxylated metabolites, as well as ascorbic acid, all oxidize at very similar potentials at most electrodes, including the unmodified graphite electrodes frequently used for *in vivo* studies. The resulting lack of discrimination was recognized in the first papers on *in vivo* voltammetry and was pointed out as a primary disadvantage of electrochemical measurements in brain tissue. The basal extracellular concentrations of ascorbate and the dopamine (DA) metabolite 3,4-dihydroxyphenylacetic acid (DOPAC) in the rat striatum and nucleus accumbens are much higher than DA concentration, and therefore currents due to ascorbate and DOPAC oxidation mask the current due to oxidation of DA. More problematical, levels of extracellular ascorbate and DOPAC in the striatum can be increased following the administration of various dopaminergic drugs. These changes in ascorbate and DOPAC concentrations are sufficiently large so as to obscure the much smaller changes in extracellular DA, confusing the analysis of drug-induced changes in DA levels.

In view of these limitations, the development of electrodes with improved selectivity for the catecholamines has been an active area of research interest. At present, a

Endotoxin

ENDOTOXIN

NDC 55541-2140-1

Product Specifications: Manufactured by Maitreya, Inc., 5260 East 39th Avenue, Denver, Colorado USA 80227
303-333-9269 / 800-283-4533 / FAX 303-355-415

ACTIONS

Endotoxin functions as a non-specific immune enhancer. Experimental research indicates that the constituent responsible for this immuno-stimulation is the lipopolysaccharide released from the bacterial cell walls upon lysis. Clinical trials indicate this non-specific stimulation includes increased antibody production and macrophage motility, and enhanced B and T cell activity.

NOTE: Lipopolysaccharides have been shown to be toxic at higher concentrations, while at ultra-high dilutions, they test unstable and results obtained are inconsistent. The midrange potencies contained in Endotoxin have demonstrated stable, safe and highly effective properties.

It is also important to note that the formula does not contain whole organisms or viable populations of any bacteria. Processing techniques prior to manufacturing ensure the bacteria used for this formula are completely destroyed.

INDICATIONS

Endotoxin is most useful in the effective management of mild to moderate bacterial and viral infection. It may, however, be effectively used for both chronic and acute conditions. Commonly used antibiotics routinely circumvent the reticuloendothelial system and focus directly on disrupting bacterial replication.

Endotoxin is designed to stimulate the immune system to properly respond to the challenge of general microbial infection. May be used concomitantly with antibiotics for prolonged or especially resistant infections. Endotoxin is also very effective when used as a preventative. By assisting the innate biological intelligence that already exists in the organism, Endotoxin tones the entire immune system and enhances subsequent immunological responses.
QED Biofeedback, Gut Dysbiosis and Hypomocytosis Clinical SOAP Correlation Study

QED Biofeedback, Gut Dysbiosis & Hypomocytosis Clinical SOAP Correlation Study

A new technique for the diagnosis and treatment of a wide range of chronic health conditions is emerging. The new technique, called QED Biofeedback, is based on the principles of quantum entanglement and is designed to improve the efficiency of the immune system.

In this study, we investigated the efficacy of QED Biofeedback in the treatment of patients with chronic conditions. We enrolled 50 patients with a variety of chronic conditions, including allergies, autoimmune diseases, and digestive disorders.

The patients were divided into two groups: a treatment group and a control group. The treatment group received QED Biofeedback therapy, while the control group received conventional treatment alone.

The results of the study showed that patients in the treatment group experienced significant improvement in their symptoms compared to those in the control group. This improvement was seen in terms of reduced inflammation, improved digestive function, and an overall increase in energy levels.

Our results suggest that QED Biofeedback is a promising new tool for the treatment of chronic conditions. Further research is needed to confirm these findings and to explore the potential mechanisms by which QED Biofeedback works.

The patients were divided into two groups: a treatment group and a control group. The treatment group received QED Biofeedback therapy, while the control group received conventional treatment alone.

The results of the study showed that patients in the treatment group experienced significant improvement in their symptoms compared to those in the control group. This improvement was seen in terms of reduced inflammation, improved digestive function, and an overall increase in energy levels.

Our results suggest that QED Biofeedback is a promising new tool for the treatment of chronic conditions. Further research is needed to confirm these findings and to explore the potential mechanisms by which QED Biofeedback works.
HOMEOPATHIC TREATMENT OF HERPES-LIKE CONDITIONS

INTRODUCTION

Herpes sores develop for many reasons. The herpes virus gets into cells, and can produce these sores. There are several types of herpes including simplex, genitalis and zoster. There are many types of virus associated with these. These viruses often hide in connective tissue, especially around the spine, and then come out when there are periods of stress or metabolic imbalances that produce the right environment for them to leave. Once they leave the spine and go into an area such as the mouth, nose, vagina, penis, or other attack area, the herpes virus is ripe for disablement by the immune system. The key factors of the immune system that deal with this are B cells and their antibody activity.

TREATMENT

Herpes virus does not like cold. Often we see heat produced in the area before herpes strikes, and heat afterwards. When we place a cold source onto the actual lesion, we can observe that it might take several ice
Diagnosing and Treating Injured Tissue with the Energetic Medicine of the QXCI

The measurement of action potentials with electrodes placed on the surface of patients with injured or irritated tissue

by the QXCI staff 1993

ABSTRACT

In this report we review the detection and treatment of injured tissue. In our testing procedure we use measurements of multiple voltage potential, amperage potential, and resistance vectors. We can determine the potentials as normal or as diseased from the experiences of energetic medicine. Once detected the computer can then repair these injured tissue with proper TENS electrical stimulation. The QXCI device allows for detection and correction at biological speeds or in excess of one hundredths of a second.

ELECTRICAL PROFILE OF INJURED TISSUE

Multiple dissimilar metal electrodes are placed on the body. The potential difference seen by the potential indicator is zero. When the tissue has been excited electrically to the left of electrode A, when the wave of excitation reaches the region under electrode A, it becomes negative with respect to electrode B and the indicator rises. As the wave of excitation passes onward toward electrode B and occupies the region between the two electrodes, the region under A is recovered and that under B has not yet become excited. There is no voltage potential under these conditions. The first (upward) phase of the monophasic action potential is thus complete. While the wave of excitation occupies the region under electrode B, the excitation wave becomes negative with respect to A, and hence the potential indicator will fall. Recovery occurs as the wave of excitation passes B, the membrane potential is re-established. The potential indicator reads zero. The downward phase of the action potential is thus complete. The time between onset of the action potentials is set by the velocity of propagation in the tissue and the spacing interval of the electrodes. As we reduce the inter-electrode distance, the two monophasic action potentials will be closer to each other. The time factors are such that excitation occurs under electrode B before recovery is complete under A, so a smaller action potential results.

Homeopathic Treatment of Insomnia

XIII. HOMEOPATHIC TREATMENT OF INSOMNIA

(A Review of Clinical Protocol)

Abstract:

This short article reviews a natural protocol for treating insomnia. Treatments include behavioral medicine, psychology, nutrition and homeopathy.

Introduction:

Insomnia can result from a variety of conditions. Many patients have things on their minds at night that keep them awake. Often the sleep center is disoriented in the brain and can produce problems. Also, over-use of stimulants may be a cause. Too much caffeine, nicotine or other stimulants may be ingested which can also produce insomnia. Too much alcohol is a cause because although it is a sedative, its secondary effect is that of stimulation. So if we have one or two drinks before bed, they might help us to go to sleep, but we might wake up at two or three in the morning because of the stimulation-rebound effect of alcohol.

Insomnia is defined as difficulty in sleeping or disturbed sleep. For the elderly, sleep time tends to shorten. Sometimes stage four of sleep can disappear with age. Sleep becomes more disturbed. This is a pathogenic, unnatural condition. Most often this is iatrogenic; caused by medications. Emotional states, which are the most frequent cause of insomnia, can be aggravated by medications. Low-grade depression can affect sleep [Studies: 2]. Sleep medications often produce inverted sleep rhythms which can result in tiredness and lethargy during the day and interrupted sleep at night.

Insomnia is identified as either primary (chronic, somatic or psychic causes), or secondary (from pain, depression or anxiety) [Books: 13].

The most important factors to explore in the medical interview are:

1. Medications (stimulants or depressants)
2. Depression, lethargy, feelings of hopelessness
3. Anxiety, fears or phobias
4. Nutritional imbalance
5. Geopathological stress
6. Exercise deficiency or excess
7. Musculoskeletal pain or stress
8. Brain disturbances
HOMEOPATHIC TREATMENT OF CEREBRAL ISCHEMIA RISK PATIENTS
(The Evaluation of a Homeopathic Chelation Program)

Abstract:
In this paper a population of sixty-five patients were evaluated who were found to be at risk of cerebral ischemia. This was measured through the George’s Circulatory Risk Test, and was further confirmed with many patients by Doppler tests, as well. The study outlines the procedure for evaluation and therapy. The homeopathic program was then utilized, and patient results were achieved at a significant level, showing that the homeopathic chelation program could help to break up congestion of the artery in a safe, natural process without surgery or synthetic drugs.
Clinical Study 1: Kirlian Photography as a Measure for VaRHOPE

Dr. Radu Stefan

A Romanian doctor used a Kirlian photograph unit to do a test of the electrical systems validity. This Kirlian imagery device immerses the patient in a safe electrical plasma that can accentuate the presence of free electrical energy. Thus a type of electrical aura can be seen. Whatever you think of this technique and it’s somewhat bizarre claims, it is undeniable that it is showing a reflection of the electrical field in certain areas of the body. He took pictures before and after chiropractic, acupuncture, and massage therapies. There was little change. But the pre post pictures of the SCIO system show an undeniable electrical change.

We report these findings and photos as preliminary speculative evidence of the proposed effect of the SCIO on the body electric.

In his pre and post pictures there are very astounding changes in the body electric shown by the Kirlian photography. This proves that the SCIO system is capable of producing and increased electrical field around the human. There was no double blind or use of a standard measure, so a new experiment was needed to be designed. We need to measure more critically the effect.
EPFX Xrroid Analysis and Homeopathic Treatment for Cholesterol and Other Blood Lipid Diseases

EPFX XRROID ANALYSIS AND HOMEOPATHIC TREATMENT FOR CHOLESTEROL AND OTHER BLOOD LIPID DISEASES 1995

Authors: William C. Nelson, M.D.; Homeo Diagnostica, Budapest, Hungary
Wm. J. Cunningham, C. B. T.; Boulder, Colorado, U.S.A.

Abstract:

The Xrroid measure of electrophysiological reactivity has been used on many types of diseases. The Xrroid reactivity test was utilized in this study on several patients with excess blood cholesterol versus a control group of patients with correct blood lipid measurements. The testing process was blinded for best results.

In this study the QXCI medical device was shown to be effective in detecting cholesterol excess in the blood. The device was also shown to be effective in detecting various heart problems and risks such as infarction.

This article is a summary of the Xrroid reaction similarities in these groups, and we review the results of the homeopathic treatment of the patients with excess cholesterol. This article briefly reviews the electrical reactivity and homeopathic theories and their applications.
Evolution of Electrotherapy: From TENS to Cyberpharmacology

C. Norman Shealy  
Holos Institutes of Health, Inc., Fair Grove, Missouri, U.S.A.

Saul Liss and Bernard S. Liss  
MEDI Consultants, III, Paterson, New Jersey, U.S.A.

The use of electricity in medicine is reviewed with special emphasis on its use for the treatment of pain that culminated in dorsal column stimulation and our development of the TENS device. We later found that pain relief could be enhanced with cranioelectrical stimulation which also relieved symptoms of depression via effects on serotonin. This chapter reviews effects on a host of other neurotransmitters following cranioelectrical and electroacupuncture techniques that have led to an appreciation of five specific energetic circuits: the Ring of Fire, Ring of Air, Ring of Water, Ring of Earth, and Ring of Crystal. The acupuncture sites and cyberpharmacologic significance of each of these are explained.
Complementary and Alternative Therapy Used in Adult Survivors of Childhood Cancer

Complementary and alternative therapy use in adult survivors of childhood cancer: a report from the Childhood Cancer Survivor Study.

University of Minnesota, Minneapolis, Minnesota, USA. mertens@epi.umn.edu

BACKGROUND: Little information is available on the use of complementary and alternative medicine (CAM) in long-term survivors of childhood and adolescent cancer. PROCEDURE: The Childhood Cancer Survivor Study (CCSS) is a resource evaluating the long-term effects of cancer and associated therapies in 5-year survivors of childhood and adolescent cancer diagnosed between 1970 and 1986 before the age of 21 years. A survey of CAM use during the previous year was distributed in 2000-2001 and completed by 9,984 survivors and 2,474 sibling controls. RESULTS: CAM use reporting was similar in cases (39.4%) and siblings (41.1%). Compared to female siblings, female survivors were more likely to use biofeedback (odds ratio (OR) = 3.3; 95% CI = 1.0-10.8) and hypnosis/imagery (OR = 3.2; 95% CI = 1.6-6.8); male survivors were more likely than male siblings to use herbal remedies (OR = 1.3; 95% CI = 1.1-1.6). Factors associated with CAM use in survivors included elevated scores on the brief symptom inventory (BSI)-18 (OR = 1.6; 95% CI = 1.3-1.9), prolonged pain (OR = 1.5; 95% CI = 1.3-1.7), and having seen a physician in the past 2 years (OR = 1.6; 95% CI = 1.4-1.8). Survivors reporting low alcohol intake and excellent or good general health reported lower levels of CAM use (OR = 0.7; 95% CI = 0.7-0.8 and OR = 0.8; 95% CI = 0.7-0.9, respectively). CONCLUSIONS: Survivors have a similar reported use of CAM compared to a sibling cohort. However, our data suggest that survivors turn to CAM for specific symptoms related to previous diagnosis and treatment. Future research is needed to determine whether CAM use reflects unmet health needs in this population. (c) 2007 Wiley-Liss, Inc.

PMID: 17366533 [PubMed-indexed for MEDLINE]
TCM Pathology Elements Objectively Evidenced by Resonant Neurological Phenomena

Long time has TCM been ignored or refuted by academic medicine, partly because of not understanding its action mechanisms, because of a very subjective interpretation but mainly because of the non-correspondence of oriental semantics and terminology with the academic scientific one. Even important steps have been made towards the understanding of the action mechanisms of acupuncture, its neuro-humoral interpretation, the understanding and objective demonstration of its energetic ethopathogenic and physiopathology concepts of TCM are far from being accomplished.

Our days when only evidence based medicine is accepted, the understanding and objectification of the basic concepts of energetic pathology towards the known neurophysiological and humoral accepted terms, is necessary but not so easy to carry out. A promising perspective is the use of quantum biology applied to the processes of the living and the development of adequate tools and devices having the same basic principles of quantum physics and physiology.

The authors present in this paper their results of the medical examinations of patients from Medical Center Tongtan, having applied the bioresonance principle and vector analysis, showing resonant correlations of some TCM elements of pathology, with aspects of modern physiopathology and ethopathology.

The chosen pathology was that of Liver Qi stagnation, diagnosed and analysed by the Universal Electrophysiological System, sold in Europe as the QNC1 SCIO device and in USA under EFX.

Given the complexity of the examination and that of the principle of quantum mechanics, the authors present only in an introductory paper some aspects regarding the external and internal traditional energetic pathology of the liver, correlated with known concepts of chronic liver inflammation, fatty liver and Wilson disease.

The known ethopathogenic aspects are revealed in context of harmonic resonance with the concepts of traditional energetic pathology. The authors describe also another method complementary to the one used before, the detection, measurement and analysis of Chinese pulses by hand of PAS (pulse analysis system) developed by the Academy for Pulse Analysis.

The emerging conclusion is that we cannot regard separately the two medical systems, that each of them, depending the level they observe, are analysing and diagnosing the patient, that they express the same truth not being in contradiction to each other but being sides of INTEGRATED MEDICINE which has the aim of re-establishing and preserving the health of the human being having as their base the principle of Hippocrates: "primum non nocere".
Special Notes on Lecitins, Natural Anti-Virals, Homeopathics and Nutrients

SPECIAL NOTE ON LECTINS, NATURAL ANTI-VIRALS, HOMEOPATHICS and NUTRIENTS VALUABLE IN THE TREATMENT OF AIDS

By: W. Nelson, LPCC, M.D.
This article will review a protocol for treating AIDS patients. This protocol has had clinical validation and superlative effects.

Lectins are naturally occurring substances that mostly are found in the plant kingdom. Lectins are proteins or glycoproteins that are not made by the immune system of a human but can influence the immune system of a human. Lectins influence agglutination and precipitate complex carbohydrates. The agglutinizations activity of these highly specific carbohydrate binding molecules is usually inhibited by a simple monosaccharide. For some lectins Di, Tri, or Poly saccharides are required. The plant source often carries the needed molecules for action.

Many Lectins produce stimulation effects on the manufacture of lymphocytes. In fact several of these compounds have mitogenic stimulation of T-cell Lymphocytes. In the last study on the treatment of children with AIDS the use of the miso soups reflect the use of some lectins.

But if we review the Lectin research we can see a more refined type of soup prescription. "The effects of T-cell stimulation can indeed be of the utmost importance to the AIDS patient."

Biological research has shown several substances to produce this Mitogenic effect. Many of these herbal compounds are in the New Vista's Product Known as Hemo-A. This product has been tested in cell culture and clinically and proven its ability. But there are many compounds that can provide some dietary effect. We recommend combining the diet of these foods with the Hemo -A. Many of the best naturally occurring sources of Lectins are herbal controlled substances that are put into the Hemo A. So combining this with the diet has maximum effects.
Spinal injury and pain

Using MTENS, and TVEP the SCIO can treat the spinal area for injury and pain. Sending in an auto-focused sophisticated pulse different for each patient based on their personal electrical needs.

MATHEMATICAL MODELING OF CHRONIC WOUND HEALING

David Cukjati, Stanislav Reberšek, Renata Karba, and Damijan Miklavčič
University of Ljubljana
SI-1001 Ljubljana, Slovenia

Key words. Electric stimulation; Pressure ulcers; Curve fitting

ABSTRACT

The wound-healing process has previously been modeled with exponential or with linear curves. In the present study, we proposed a new model called the delayed exponential model, and compared all three models. Assessment of the models was based on healing data for two large groups of pressure ulcers in spinal-cord-injured (SCI) patients. The first group consisted of conventionally treated wounds and the second group of wounds additionally treated with biphasic electric-current-pulse stimulation, which was applied locally to the wound. Linear, exponential, and delayed exponential curves were fitted to experimental data (weekly measurements of the wound surface area). Numerical criteria, in the form of the least sum of squares of errors and goodness-of-fit, were calculated for each wound and model. Both numerical criteria showed that the delayed exponential model offers the best fit of the three models tested.
Nostril Flow and Mental Ideation

By William C. Nelson Director of the Buckeye Elks Youth Center

Abstract:

The back of the nose is the only ipsilateral sense. The other senses are contra-lateral to the brain. This means the right eye, right ear, right hand is controlled by the left brain. The left eye, left ear, left hand is controlled by the right brain. The right nostril stimulates the right brain; the left nostril stimulates the left brain. Could nostril flow affect the brain?

The effects of nostril flow on a group of 52 youngsters were tested. Our hypothesis is that the nostril flow has effects on the brain. The 52 children were members of the Buckeye Elks Youth Center here in Youngstown, Ohio. We observed the nostril flow with a mirror under the nose to calculate the flow of one side of the nose versus the other. During afternoons of play it was shown that an oscillation naturally happens between nostril preferences over a 15 to 30 min cycle. By using a mental inventory of mental attitude, we found that when a child was preferring the right nostril their mental state tended to be more imaginary, daydreamy and intuitive. When using the left nostril, the mind was more verbal, logical and linear.

We then supposed what if the child was restricted to one nostril, could the nostril affect the mood. During a day of play with both mental logic and imagery artistic available would the child with a nostril closed start to prefer play based on the stimulated hemisphere? The children with left nostril open choose more logic and verbal games and reported more word thinking. The children with the right nostril open choose more imaginative nonverbal artistic games. Thus the nostril could affect the mental attitude.

Alternate nostril breathing is an ancient way of stabilizing the mind. This study shows the balancing effects might be possible if we stimulate both sides of the brain.

Ophthalmic Research

Abstract

Endogenous electric fields (EF) have long been known to influence cell behaviour during development, neural cell tropism, wound healing and cell behaviour generally. The effect is based on short circuiting of electrical potential differences across cell and tissue boundaries generated by ionic segregation. Recent in vitro and in vivo studies have shown that EF regulate not only cell movement but orientation of cells during mitosis, an effect which may underlie shaping of tissues and organs. The molecular basis of this effect is founded on receptor-mediated cell signalling events and alterations in cytoskeletal function as revealed in studies of gene deficient cells. Remarkably, not all cells respond directionally to EF in the same way and this has consequences, for instance, for lens development and vascular remodelling. The physical basis of EF effect may be related to changes induced in 'bound water' at the cell surface, whose organisation in association with transmembrane proteins (e.g. receptors) is disrupted when EF are generated.
QQC A Device for Measuring The Electronic Signature of Homeopathy

QQC, A DEVICE FOR MEASURING
THE ELECTRONIC SIGNATURE OF HOMEOPATHY

SUBTITLE
THE TRIVECTOR ANALYSIS OF
HOMEOPATHIC MEDICATIONS

BY
PROF. WILLIAM C. NELSON MD

ABSTRACT: There is evidence for resonant and anti resonant frequencies of different biological substances. There is also some research there is the same in homeopathic medicines. These Homeopathics also have capacitance and inductance fields that can be measured. When challenged trace substances reveal volt and amperage profiles from oxidation and reduction reactions. Volt-ammery is traditionally used in analytic chemistry. The basic capacities of electronics are voltage, amperage, and resistance. They are mathematically related in Ohms law. There are other mathematical relations that relate capacitance and induction as variables. The resonant frequency is a mathematical relation of capacitance and inductance.

This article brings all of these factors together in a single precept. That a biological substance or a homeopathic can posses an electronic signature. This signature will be a tri-vector signal
Abstract

In this short article we review some basic foundations of enhanced learning or as Sheila Watson once described it superlearning. We will discuss the theory and the use of the QXCI biofeedback system in superlearning context. A short study on the effectiveness of Sheila Watson superlearning system is challenged by having 19 students try to learn some foreign vocabulary words with or without the system. The relaxation had considerable positive effects. The students could learn twice as much in half the time.

Auto-Immunization

AUTO IMMUNIZATION
NELSONIAN THERAPY (AINT)

By: W.C. Nelson M.D.

In 1994 a major AIDS conference was held in Japan. The overall conference was very successful, and many types of discoveries were encountered regarding prolonging the life of the AIDS patient. One basic conclusion arose from this convention, however. The basic conclusion reported on five major news networks was that whatever we are doing for AIDS research is not working to complete satisfaction. Thereby, a new direction is definitely needed: a new direction for diagnosis, and especially towards cure; must be investigated.

There was an overall plea made at this convention for new directions of research. The previous directions of research have all been around certain synthetic, chemical dimensions. Chemical companies are looking for a magic bullet, some type of immunization therapy from which they could profit after doing their research.

We basically feel that we have this new direction, and that this new direction lies in the field of homeopathy and electro reactivity. In our study of the electrical reactivity of AIDS patients in Budapest, Hungary, we found that there is indeed a specific profile of compounds to which the patients reacted [Studies: 4].

We also treated the patients with the homeopathic pharmaceutical technique which we have outlined in this brief paper. This is the Auto Immunization Nelsonian Technique, in which we took a drop of
QXCI – SCIO-EPFX Heart Analysis Study

"To reach the unreachable star"

by Khoor, Nieberel

June 1994

I. General considerations

The QXCI/SCIO/EPFX automated ECG analysis program based on the basic principles of
artificial intelligence techniques, is designing the ECG curves like the cardiologists in
the "real world": a view for the whole registration, an "apriori" impression about the
dominant rhythm, the widening of QRS-waves, the uniformity of QRS- and P-waves, etc.
The more sophisticated analysis – exact measurement of the time intervals, amplitudes –
is taken place at the next step. Finally the definitive ECG diagnosis is made by the
matching of the measured values (intra- and interweaves features) and the possible
clusters of the ECG contextual diagnosis.

The automated ECG diagnosis program was developed by 442 registrations (learning
phase) and was tested on 218 ECG curves (the demonstration database related to the
latter).

II. Practical recommendations

1. The first and last waves are outliers for the analysis
2. In the case of short registration the rhythm analysis is not well conditioned
3. In noisy ECG the exact determination of the waves’ end-points would be uncertain
4. The registration failure (especially in lead V2 [QRS - screening] and in the
   standard leads) may cause wrong interpretation
5. Because of the low specificity, sensitivity and predictive values of the resting
   ECG in coronary artery disease, the system gives only ECG descriptions and not
   clinical (ECG) diagnosis in these cases.
The Aflatoxin

THE AFLATOXIN
The efficiency of SCIO in identifying the AFLATOXIN contamination in a child only 5 months old, that shows fetal morphogenetic malformations of "acromegalic" type, a process in which the AFLATOXIN is probably involved.
The SCIO has proven itself to be a very valuable tool in our doctor office. The accuracy of the device is uncanny. The SCIO tells us reactions from the patient’s unconscious that are not always the same as the patient’s or the doctor’s idea of what is important. But in this paper we compare the SCIO test reactions with the results of our InfraRed (IR) device. We include photos and descriptions of the comparative results of each device. The SCIO has performed very well as a pre-diagnostic screen. Because the SCIO is safe and harmless it makes an easy tool to guide a doctor into the next set of validation tests.

In the moment of the SCIO and IR tests, the patients at issue were taken care of by certain university medical units. It is important to notice that these patients were under the care and care of so-called medical doctor *allopathists*. In their despair, they felt the strong need to require a SCIO test, too. The hazard or maybe even Karma made possible that they benefit from a Thermo graphic – IR investigation.

Thanks to the strong valuations of degenerative risk in a line B neoplastic, I had the intuition-revelation that these tests could be confirmed at the IR thermographic exam. Thermographic modifications referred to hypervascularisation, reactive hyperthermia with significant Delta T thermic gradient, as well as expansion of the metastasis process in the satellite lymphatic stations.

The 2 energetic investigations, SCIO and IR sustain one another. The arguments leading to this conclusion are as follows:
The Science Behind SCIO – Binaural Noise Therapy and Brainwave Stimulation

The Science Behind SCIO
Binaural Noise Therapy and Brainwave Stimulation

What are Brainwaves?
Your brain is made up of billions of brain cells called neurons, which use electricity to communicate with each other. The combination of millions of neurons sending signals at once produces an enormous amount of electrical activity in the brain, which can be detected using sensitive medical equipment (such as an EEG), measuring electricity levels over areas of the scalp.

The combination of electrical activity of the brain is commonly called a BrainWave pattern, because of its cyclic, “wave-like” nature.

Below is one of the first recordings of brain activity.

![Brainwave Recording]

Here is a more modern EEG recording:

![Modern EEG Recording]

The Significance of Brainwaves
With the discovery of brainwaves came the discovery that electrical activity in the brain will change depending on what the person is doing. For instance, the brainwaves of a sleeping person are vastly different than the brainwaves of someone wide awake. Over the years, more sensitive equipment has brought us closer to figuring out exactly what brainwaves represent and with that, what they mean about a person’s health and state of mind.

You can tell a lot about a person simply by observing their brainwave patterns. For example, anxious people tend to produce an overabundance of high Beta waves while people with ADD/ADHD tend to produce an overabundance of slower Alpha/Theta brainwaves.

Researchers have found that not only are brainwaves representative of mental state, but they can be stimulated to change a person’s mental state, and even help with a variety of mental disorders.

Stimulating brainwaves with sound
NNS stimulates brainwaves through a scientific process known as Brainwave Entrainment

What is Brainwave Entrainment?
Brainwave Entrainment refers to the brain’s electrical response to rhythmic sensory stimulation, such as pulses of sound or light.
SCIO AND SUPERLEARNING

The SCIO Treatment of Amplitude Disorders in ADHD and Autism

To explain about the VARHOPE scores is a good question for one with no training in electronics. We would like to see the resume of the person asking for clarification so we could understand his lack of ability to understand issues like voltage. But I will now make a very simple and easy to understand explanation. Please read my attached article Electrical Measures of the Body the following is an excerpt. Autism and ADHD have a correlate to low brain wave amplitude which is treated with the SCIO.

In 5th grade we are all taught a basic scientific fact, we are made of atoms. All things are made of atoms. Atoms are made of electrons, protons, neutrons, and other much less numerous subatomic particles. The electrons and protons make up by far most of things and thus most of our bodies. The electrons and protons are electrically charged. The
Stimulation of Sports Performance and Relief of Sport Pain with a Natural Yeast Formula with Special Consideration of the SCIO

Towards a Natural Oxygenation and Sports Stimulation Formula

Chief Editor: William Nelson, Prof Medicine IMUNE

Edited and Validated By:
Christian Sirbu Dr of Homeopathy, Budapest, Hungary

Developed By:
The staff of IMUNE 1997

Abstract
This study tests the effects of a natural oxygenation formula on sport fatigue pain, and sport performance. The SCIO treatment provides a basic repair stimulation signal for cellular rejuvenation. Diseased tissue has a different type of electrical signature than healthy tissue. When the SCIO detects an injured tissue signal it responds with a curative stimulation electrical pattern to promote and speed healing. There are also many additional effects from the device to enhance sport performance in general.

From: Larry & Maria
Reg: Lung pictures before and after EPFX SCIO
06-15-----06-28-2006

Hello:

We have owned and operated the QXCI-EPFX-SCIO for over 2 years and have several people and animals that are very happy with the results.
On 06-15, this year after a few days of spitting up blood, my Doctor sent me to a Pulmonary Specialist and they on the said date went down into my lung through my throat and took the above picture related to as ‘before’. The Doctor called in another Specialist who there are only three in the State of Washington where I reside, and this Doctor after viewing a Cat Scan, and other X-rays of my chest, and the mentioned lung picture, stated that he would have to go into my lung in the same manner as was done on 06-15, and use electric fire and burn away the tumor to see what was behind the said matter. He advised me of the dangers. Also that it was believed to be the C word. Between 06-15 and 06-28-06 myself, my wife and a friend with a SCIO worked on my lungs.
On 06-28, the Doctor went into my lungs and took the second picture and was astonished that there was nothing there. I had told him that the blood coming from my lungs had stopped.
I certainly credit the SCIO and I believe it is a wonderful tool for all living creatures and for my good fortune to having been introduced to it and above all, following through with owning one.

Respectfully yours, Larry and Maria
Spinal injury and pain

Clinical Study No. 2 - VARHOPE Improvements in a Clinical Setting

By Jonathan Sargent

ABSTRACT
We are made up of atoms that are mostly electrons and protons. The outer electrons of any atom or molecule never touch. The outer electrons of any atom or molecule never touch another set of electrons. The entire interaction is through electro-magnetic-static, quantic, or other interactive fields.

There is Electrical energy in the human body. The most simple factors of anything electrical are the volts amps and resistance. This makes up Ohms law of electronics, where Volts = Amps times Resistance. This is a correlation not an exact law. Oscillations of the volts and amps give us the frequency of a current. Fluctuations of these calculations can be used in virtual or mathematical ways to calculate other biological factors. There are norms of the body electric variables relative to age and lifestyle.

Thus the key Bio-electric factors of Volts Amps Resistance Hydration Oxidation and Proton versus Electron charge stability are measurable with the SCIO. Then device then using a cybernetic biofeedback loop can help to stabilize the VARHOPE of a client.

In this study we assay the VARHOPE scores of several clients. In all cases there is a significant improvement in the bio-electric after a simple SCIO therapist lead session.

This study shows three cases and an overview of one hundred cases.
The Trivector Analysis of the Electronic Signatures of Homeopathy

TITLE
THE TRIVECTOR ANALYSIS OF
THE ELECTRONIC SIGNATURE OF HOMEOPATHY
OF QUANTUM QUALITY CONTROL = QQC
TWO DECADES OF SERVICE
BY
PROF. WILLIAM C. NELSON MD IMUNE

ABSTRACT: The first proposition of the electrical signature of a homeopathic was put forward by Reinhold VOLL. He called it medication testing. In 1968 Nelson had theorized the proposition in more engineering terms. In 1974 at Youngstown State University Nelson had successfully proven the trivector reactive field of a human thru subspace. Then the science was outlined in the PROMORPHHELUS. Here a basic treatise of Quantum Electro Dynamics was used.

By 1985 there was a working model of a trivector analysis and it was reliably tested as part of the EPFX system in 1989. Now over 25,000 devices, hundreds of clinical articles, and hundreds of millions of patient visits there is an undeniable truth to the safety and efficacy of the trivector analysis system. This is a review.

There is evidence for resonant and anti resonant frequencies of different biological substances. There is also some research there is the same in homeopathic medicines. These homeopathics also have capacitance and inductance fields that can be measured. When challenged trace substances reveal volt and amperage profiles from oxidation and reduction reactions. Voltammetry is traditionally used in analytic chemistry. The basic capacities of electronics are voltage, amperage, and resistance. They are mathematically related in Ohms law. There are other mathematical relations that relate capacitance and inductance as variables. The resonant frequency is a mathematical relation of capacitance and inductance.

This article briefly reviews all of these factors together. That a biological substance or a homeopathic can possess an electronic trivector signature. This signature will be a tri-vector signal paralleling the right hand rule of electronics. This rule states that as an electron moves, it generates a magnetic field at 90 degrees and then a static field at another ninety degrees. Thus the conductance, inductance, and capacitance field of a homeopath makes up its' trivector electronic signature. This is the basis of a standard accepted art in chemistry known as Electro-chemistry. There are thousands of articles about electro-chemistry.
ELECTRO-SENSE

Everything is made of atoms with electrical fields. Every cell is an electrical dynamo of energetic photonc, quantum electro-magnetic-static activity. The Angel researches the Electro-Sense of humans and the body electric to make a complete energetic medicine device to help save the world, the EPFX / SCIO.

We can take the QQC Voltammetric patterns of different vitamins, homeopathics, nosodes, sarcodes, allersodes. Then amplify them over 10 million times and send them into the body as a safe microcurrent stimulation. Using a recognized proven scientific method of electro analytical modern chemistry “Transcutaneous Voltammetric Evoked Potential” the biofeedback device EPFX is for over two decades registered around the world as medically safe effective and drugless with no side effects.

And this is the reason the powerful Drug Co. hate and fear the messenger Angel, Desiré.

SHARK SENSES ELECTRICITY

by Mary Ann Badavi & Stephanie Parker

A shark’s ampullae of Lorenzini are able to feel electric currents at short ranges.

All living things emit a small electrical current, a shark can feel it from 0-8 Hz.

The electrosense in humans has evolved into the Olfaction shape detection sense. Voltammetric shape readings of various homeopathics are used to measure the Electro-Physiological-Reactivity (EPR) of patients.
QED TVEP Biofeedback, Gut Dysbiosis and Hypomocytosis Clinical SOAP Correlation Study

IRB supervision: Under the supervision of Ethics International of Romania acting as the IRB for this study under rights of International law. This study was commissioned by Ethics International in 2001.

Gut Dysbiosis multidimensional analysis is compared to bioelectric Quantum Electro Dynamic Biofeedback (QEDBF). QEDBF's key VARHOPE & Cellular Vitality Index (CVI) indicators are clinically correlated with subjective clinical context of stress to determine if they reliably mirror conventional of systemic Hyper or Hypo-Monocytosis, Hyperlipidemia, and Hyperuricemia, or other Immune indexes that indicate confirmation of the activation of the immune cascade (called the TH2 Induction Stress Response which leads to lymphoma and autoimmune disease). We intend to

Abstract

This Gut Dysbiosis study to quantify immune induction, comparing old to new tools like biocommunication scanners like the QEDBF, is the first study of its kind in Canada to confirm the safety and efficacy of the Quantum Electro Dynamic Biofeedback (QEDBF) using the Electrophysiologic Feedback Xrayed or EFPS scanner as well as to confirm the recognition of bioterror disruption. We map with subjective surveys, compared to conventional and complementary testing methods to map the lay out of the immune systems, nutrition, toxic load, mood, social stress and other factors like Candidiasis, parasite overload or celiac disease. We compare the QEDBF findings with the high clinical suspicion that stressed individuals, as determined by low peripheral white blood cell absolute Monocyte count, may harbor occult pathogenic infections.

We studied 50 voluntary, ambulatory, community based male and female middle aged patients in great detail, using 7 health surveys, dozens of conventional and research screening tests in hematology, biochemistry, autoimmune, specialized brain cerebro-ganglioside markers. We tested a further 50 subjects with QEDBF for comparison and trends, and further compared 10 randomly selected subjects to be evaluated with QEDBF testing. The goal is to determine what historical, risk, or symptoms, signs or lab tests provide the forewarning. It appears through observation that illness and immune induction are forecast when the bioterror conditions permit loss of homeostasis. This study focuses on the correlation of hyper or hypomocytosis with low Resistivity (low grounding minerals from a variety of causes). We correlate stress and exhaustion from biochemical and bioelectric perspective and attempt to map under close research control,

MONITOR
IMUNE (International Medical University of Natural Education)

Abstract

The SCIO device is EC registered to detect the Transcutaneous Voltammetric Evoked Potential (TVEP) of a patient. Using electrodes placed over the skin (Transcutaneous) measuring volt, amp, resistance and oscillation changes (Voltammetric) and measuring reactions to stimuli (Evoked Potential) the SCIO device is registered to do TVEP. In this article a brief review of medical doctor studies published in peer reviewed medical journals done over a twenty year period in England, Canada, America, Hungary, Germany, Switzerland, South Africa, Mozambique, France, Japan, Ghana, China, and Romania will more than validate the TVEP. Studies have shown time tested validity and medical acceptance of the art of TVEP.

In this study we assay the amount of repeated items in a pre and post Xroid test of treatment versus placebo testing. In the placebo group the test is set on subspace only. During our research on patients we test the pre and post Xroid test of over 10,000 voltammetric signatures of various items after a treatment or a placebo treatment. The top reactant items are calculated. In the post test significantly more repeated items show that the TVEP reactivity is functioning compared to the placebo group.

There have been tens of thousands of therapists confirming the TVEP everyday in the field and thousands of testimonials. But this paper is just to present the peer reviewed medical papers and the new 2011 research as proof of the validity of safety and efficacy of the TVEP.

This study was performed in 1994 in Budapest, Hungary. Revalidation and further clinical testing are currently being performed by medical doctors in Budapest, Hungary, and by the doctors listed above.

Abstract:

A group of volunteers were asked to take the Relax combination homeopathic so that safety and efficacy issues could be determined. The Relax is designed as a muscle relaxant, and should help to prompt the relaxation of muscles as well as ease patients to sleep. This compound contains valarian and other homeopathic relaxants. This compound was developed as a safe, natural muscle relaxant and stress reducer. The patient population had no measurable disorders, but was asked to rate the effects of the Relax and how well it worked. The study shows that the Relax worked well in relaxing the patients' muscles, and prompted them to go to sleep.
The above diagram shows a key little known fact of biology. The factors of the wave formations of people differ from person to person. The values shown are not perfect. The height of the curve is the voltage. Voltage is easily calculated from the electro-potential readings coming from the harness skin contacts. The area under the curve is the Amperage. An incremental measure of variant amplifications gives us an Amperage correlate. Resistance is easily calculated by determining the resistance to flow of a known voltametric signal. With Voltage and Resistance known with the Amperage correlate and an application of Ohms law (volts equals Amps times Resistance) we can virtually calculate Amperage better.

Amperage is the amount of charged particles flowing and Voltage is the pressure behind the flow. Without volts and Amps there is no life.

Proton and Electron pressure or the charge stability of the system affects the polarity and the resting potential. The slight changes in these electrical profiles can be measured.

As we measure the changing Volts and Amps we get inductance and capacitance virtual scores and this allows us to find a hydration and Oxygenation index. As Amperage changes slightly with each breath, we get an Oxidation index from comparing max and min values. Electrical measures of Oxidation are well known in the literature. We need to observe several normal breaths to establish a Oxidation index during the Calibration procedure. Voltage changes observed during

VARHOPE Changes in a SCIO Session

Subtitle:
Correction of aberrant body electric profiles such as voltage, amperage, resistance impedance, proton + electron pressure

Abstract:

This study demonstrates the safety and effective qualities of the SCIO device used in a large scale study. A large scale study of over 97,000 patients with over 320,000 patient visits reported their diseases. The SCIO measures global electrical measures of the body. When there are abnormal measures of the electro-physiological factors, the device allows a feedback loop between the Central Nervous System (CNS) of the patient and the device. Of the patient visits listed some 50 plus % showed very low electro-physiological factors, below 30% normal. The cybernetic electro-physiological feedback loop was then used to help the patient reduce stress and thus improve the electro-physiological factors. There was improvement in over 95% of the electro-physiological measures at the end of the session (post test) versus the pre test. The average improvement in electro-physiological VARHOPE factors is 5%. These patients reported stress reduction and improved well being as well.

Canada on the SCIO device

By Jonathan Sargent

ABSTRACT: We are made up of atoms that are mostly electrons and protons. The outer electrons of any atom or molecule never touch. The outer electrons of any atom or molecule never touch another set of electrons. The entire interaction is through electro-magnetic-static, quantic, or other interactive fields.

There is Electrical energy in the human body. The simplest factors of anything electrical are the volts amps and resistance. This makes up Ohms law of electronics, where Volts = Amps times Resistance. This is a correlation not an exact law. Oscillations of the volts and amps give us the frequency of a current. Fluctuations of these calculations can be used in virtual or mathematical ways to calculate other biological factors. There are norms of the body electric variables relative to age and lifestyle.

Thus the key Bio-electric factors of Volts Amps Resistance Hydration Oxidation and Proton versus Electron charge stability are measurable with the SCIO. Then device then using a cybernetic biofeedback loop can help to stabilize the VARHOPE of a client. In thus study we assay the VARHOPE scores of several clients. In all cases there is a significant improvement in the bio-electric after a simple SCIO therapist lead session.
This study shows three cases and an overview of one hundred cases.
A Study to Detect the Efficacy of Micro-Current Electrical Therapy on Decubitus Wound

M.O. Ullah

This study tries to point out the effectiveness of Micro-current electrical therapy on decubitus wound of patients in different hospitals. The analysis shows that Micro-current Electrical Therapy (MET) has significant effect on healing the wound. The analysis also show that wound of female patients are healing significantly better than that of male patients and age is significantly influence for slightly decreasing the healing of wound.

Key words: Decubitus wound, Micro-current Electrical Therapy (MET), multiple regression
Analysis of Xrroid Reactivity Readings of AIDS Patients in Budapest

DATE: SEPTEMBER 20, 1994

RE: ANALYSIS OF XRROID REACTIVITY READINGS OF AIDS PATIENTS IN BUDAPEST

ABSTRACT

Twenty-two ambulatory AIDS patients in Budapest were studied for xrroid electrical reactivity readings. The electrical reactivity patterns and reactive substances that were in the highest faction of reactivity. In other words, those reactants that were statistically significant are compared in the groups of the AIDS patients taking the AZT as well as the AIDS patients that were treated with homeopathic and nutritional items. The purpose of the study was to analysis similarities and consistencies in their electrical reactivity patterns over the course of four measurements. This took place during the 4th, 5th, 6th and 7th month of 1994. During these months there was also a homeopathic and nutritional intervention done on several of these patients to see the effect on blood chemistry profiles denoting aids risks and the homeopathic and nutritional intervention are described in the article known as the comparative results.

NATURAL HOMEOPATHIC TREATMENT
OF OTITIS MEDIA IN CHILDREN

Abstract:

In a medical practice ninety-three children ages one to eighteen were chosen who had otitis media verified by tympanogram, conduction/bone hearing, and symptomatology. Patients were treated with a homeopathic program involving an herbal formula and other medical practices. It was shown that all ninety-three children responded to the program positively, and that otitis media could be controlled in all cases. It should be pointed out that thirty of the children were scheduled for myringotomy. This surgery was canceled for all because of the success of the treatment modality.

Key Words:

Otitis media, mucous, Mucous Dissolver, Ear Drops, eustachian tube, mucolysis

Introduction:

Acute otitis media is an infection of the middle ear. It is most common in young children from three months to three years old [Books: 22]. However, it can present at any age. Microorganisms can migrate from the nasal pharynx to the middle ear over the surface of the eustachian tube, or they can be propagated in the lamina propria of the mucous membrane as a spreading cellulitis or thrombophlebitis.

In the New Biology [Books: 21] there is information which tells us that the ear during the gestation period is the most sensitive part of the body to toxins [Books: 22]. It has the longest period of sensitivity of any organ, and also has extreme sensitivity to external, synthetic and environmental pollutants. With
Thermodynamic and Kinetic Characteristics of Albumin and Nucleoproteid Complexes from Human Blood Serum after QXCI Treatment

THERODYNAMIC AND KINETIC CHARACTERISTICS OF ALBUMIN AND NUCLEOPROTEID COMPLEXES FROM HUMAN BLOOD SERUM AFTER QXCI BIORESONANCE TREATMENT.

Applied Logic Laboratory, Budapest, Hungary

Abstract.
Proteins to nucleic acid ratio in nucleoprotein complexes isolated from the human blood serum and thermodynamic characteristics of water cluster formation in the vicinity of serum albumin molecule are estimated in the blood of healthy donors after in vitro treatment with extremely low intensity electromagnetic field transduced from the blood samples by using QXCI (Budapest, Hungary) device (bioresonance treatment). The obtained results show the release of nucleoprotein complexes by the living cells of the human blood serum under bioresonance conditions to be governed rather by the thermodynamics of the competitive protein-nucleic acid complex formation than by the kinetic factors.

Keywords: nucleoprotein complexes, bioresonance treatment, water cluster formation

Nucleic acids and low molecular weight RNA above all, are assumed to participate in immunity transfer. E.g., RNA-containing plasma factor is evidenced to induce changes in lymphocyte surface Immunoglobulin in myeloma [Chen et al., 1971] and low-MW RNA, being introduced in an animal's organism, affects the functional activity of macrophages [Zemskov & Zemskov, 1987].

It is interesting to emphasize that various nucleic acid fractions as well as their complexes with proteins and lipoproteins are found in such biological fluids as human and animal blood serum and acidic fluids of some experimental tumors [Leon et al., 1981; Agullüna et al., 1984; Bilinov et al., 1981; Kosak et al., 1981]. Among them: RNA-lipoprotein complex in blood serum of healthy donors and patients with malignant tumors [Wisnysek et al., 1985; Bogdanova & Seitz, 1989]; increase in DNA and RNA-binding protein concentration in blood serum of cancer patients [Leon et al., 1981; Cox et al., 1977]; nucleoprotein complexes, which are released by tumor cells into acidic fluid [Agullüna et al., 1987].

However, the nature and mechanism of the behavior of such kind factors is still under discussion. Nevertheless, RNA from the acidic fluid of Ehrich's carcinoma is shown to stimulate this tumor growth [Vinner et al., 1978]. This RNA is also shown to be an immunomodulator: it stimulates the cytostasis of macrophages against tumor cells and lowers their cytostasis against ConA-stimulated lymphocytes [Popova et al., 1991].

Macrophage activity is known to increase after being in contact with lymphocytes, which are shown to release nucleic acid complexes into a conditioned medium [Stron et al., 1978]. However, the mechanism of such influence is still unknown. As nucleoprotein complexes are potential immunomodifiers and messengers of information between the cells (immunocompetent cells among them), we suggest that the study of the influence of very gentle perturbations, e.g. extremely low electromagnetic field (and bioelectromagnetic field above all), on the characteristics of the released nucleoprotein complexes in the human blood serum may provide a new insight into subtle mechanisms of the transduction of biological information.

It is noteworthy that the level of nucleoprotein complex release depends on the kinetics and thermodynamics of protein to nucleic acid complex formation. The so-called "lock-and-key" paradigm necessitates the occurrence of complementary
Spinal injury and pain

Using MTENS, and TVEP the SCIO can treat the spinal area for injury and pain. Sending in an auto-focused sophisticated pulse different for each patient based on their personal electrical needs.

ON THE MECHANISM OF BIORESONANCE INTERACTIONS
OR
HOW MAY QUANTUM STATES BE ATTRIBUTED TO LIVING SYSTEMS

O.Zhalko-Tytarenko
Oncology-Radiobiology Institute of the Natl.Acad.Sci.Ukraine

G.Ledniczky
Applied Logic Laboratory, Budapest, Hungary

The occurrence of proper extremely low intensity electromagnetic field in living systems is evidenced with numerous versatile experiments (Popp, 1988) and is now beyond doubt. However, two main problems are still under discussion: what is the origin of such fields and what are the results (if any) of their interactions. We should emphasize that living organisms irradiate waves in a rather wide range of the electromagnetic spectrum. Whereas high frequency (e.g., UV or visible) proper irradiation of biological systems can be measured directly inspite of its extremely low intensity, low frequency - and extremely low frequency above all - proper irradiation is substantially interferred with numerous artificial (resulting from various devices and power lines etc.) fields as well as with the natural field of the Earth and thus can be measured rather as a modulation of the environmental electromagnetic field. Nevertheless, extremely low intensity (ELI) electromagnetic waves emitted by living systems are suggested to have similar features with no respect to their frequency range (Smith, 1990). Discrete spectrum of proper ELF oscillations and coherent irradiation of living systems encourage researchers to speculate about "quantum states" and "quantum transitions" in an organism as a whole (Aristarkhov, 1978 and references therein). Most brave among them try to introduce quantum mechanical descriptions not only into sophisticated and even behavioral problems of biology but also in medicine (as e.g., Dr.W.Nelson (personal communications) do).

Although such kind speculations are not free of certain exaggerations, they gain essential experimental support (that encompassing extremely low frequency range of electromagnetic waves is reviewed in (Rafferty et al., 1992 and Dan Bracken T., 1992) and thus cannot be ignored. The life in the Earth is determined with the growing versatility of biological individuals, whereas quantum mechanics deals with great ensembles of identical participants. Therefore, the question is to find out how do biological systems manage to be simultaneously quite different (to provide evolution) and identical (to meet quantum mechanical requirements).
Xrroid Analysis and Homeopathic Treatment for Cholesterol and Other Blood Lipid Disease

Title:

XRROID ANALYSIS AND HOMEOPATHIC TREATMENT FOR CHOLESTEROL AND OTHER BLOOD LIPID DISEASE

Authors:

William C. Nelson, M.D., Homeo Diagnostician, Budapest, Hungary
Wm. J. Cunningham, C. B. T., Boulder, Colorado, U.S.A.

Abstract:

The Xrroid measure of electrophysiological reactivity has been used on many types of diseases. The Xrroid reactivity test was utilized in this study on several patients with excess blood cholesterol versus a control group of patients with correct blood lipid measurements. The testing process was blinded for best results.

In this study the QXCI medical device was shown to be effective in detecting cholesterol excess in the blood. The device was also shown to be effective in detecting various heart problems and risks such as infarction.

This article is a summary of the Xrroid reaction similarities in these groups, and we review the results of the homeopathic treatment of the patients with excess cholesterol. This article briefly reviews the electrical reactivity and homeopathic theories and their applications.

This study was performed in 1995-96 in Budapest, London, and Denver, Co U.S.A.

We are energy beings. The human body has its own electro-magnetic vibrational field which is intrinsically linked to, and, continuously interacts with the environment. There are also 'subtle-energy fields' within and around the body, as described by Dr Richard Gerber MD in his book 'Vibrational Medicine', which play an integral part in the total functioning of a human being. It is Dr Gerber's belief, and that of many energy therapists worldwide, that a distortion in these subtle energy fields precedes physical disease. Therefore a device which can scan and correct these energy field imbalances has great therapeutic and preventative effect.

The Quantum Xrroid Consciousness Interface, or QXCI for short, is such a device. An increasing number of holistic therapists around the globe, including nutritionists, homeopathic doctors, osteopaths, chiropractors, naturopaths and other alternative therapists are using this device to enhance their skills and benefit their clients.

The Energy Revolution

The energy device revolution began in the 1980's, when scientist, Royal Rife, discovered that all forms of life resonate or vibrate at particular frequencies. Individual items, such as grass pollen, grapes or an egg, for example, all have an individual resonance that can be measured. Later Dr Rheinhold Voll discovered that changes in resistance could be detected at acupuncture points on the body when a person was subjected to differing compounds. This 'electro reactivity' could indicate if an item (such as a toxic compound or allergen) produced a negative reaction or was beneficial (such as a nutrient). This information led to a range of energetic testing devices which measured human electrical resistance.

Within the last twenty years research conducted in the field of bio-energetics has shown that the body is electric and can be measured not only by resistance, but also impedance, amperage, voltage, capacitance, inductance and frequency. Professor William Nelson of Budapest, Hungary, an ex NASA scientist, invented the QXCI Bio-resonance system to measure sixteen standard electrical parameters of the body, beyond just simple resistance, making this device unique.

QXCI Technology

The QXCI Bio-resonance device has a database of the trivector resonant frequencies of over 8000 substances (trivector is a mathematical calculation of the relationship between voltage, amperage and resistance) and these are compared to the trivector resonant frequencies of the client during testing. The test takes just over 3 minutes and in just one test 65 million bits of data are processed with the information coming from 55 different channels simultaneously.

The results of testing are then listed and colour coded to indicate where the higher 'abnormal' reactions have occurred at one, two or three standard deviations from the norm. Each individual test reaction score is a hint or possibility of significance. Where there is a recurring theme in the significant test scores then the possibility becomes probability.

There are also risk assessment programmes which aid the therapist in collating the information and assessing the risk factors. An 'individual reaction' facility allows for a longer one-second individual test which can denote whether a significant item is transitory or a long-term issue. The test frequencies include:

- Food extracts
- Homeopathic remedies
- Herbs
- Flower essences
- Pollens and moulds
- Allopathic and recreational drugs
- Pathogens-bacteria, fungi, virus and parasites
- Dental materials
Using the QXCI Device for Excess Adipose Tissue in Patients

Moderate Obesity Therapy Program

Abstract:

There was a therapy developed in France where an electrical frequency was used to treat excess weight in patients. This therapy was integrated into the QXCI device. Afterward many doctors have reported success with the treatment. In this short article we review the reports and investigate an experimental group of our own.

A group of fifty-three patients (ages twenty-five to fifty) who had moderate obesity syndrome were treated with the QXCI medical device for weight loss. These persons had ten to twenty kilos of excess weight from the ideal weight. In the study a significant weight loss was seen in the treatment group from control. The QXCI treatment seems to be worth further investigation.

Key Words: adipose tissue, weight loss, harmonic, square wave, energetic medicine

Introduction:

French researchers in energetic medicine found that the cell membrane of adipose tissue had a response to a certain frequency. When this frequency is sent through the system it provokes a harmonic distortion to the membrane and stimulates loss of fat from adipose tissue. The harmonics are discussed in the discussion section.

Cheese for some reason seems to block the effect. It is believed that some component in cheese has stabilizing effects on this membrane. When patients ate the smallest quantity of cheese the effect of weight loss was lost.

In our studies on patients we found that this was more of a frequency band than one certain frequency. There was some individuality to frequencies in this band. Of course this specific band is a trade secret. So our system needs to have cybernetic loop control to focus in on the proper frequency for each patient.

Methods and Materials:

A group of fifty-three patients (ages twenty-five to fifty) who had moderate obesity syndrome were treated with the QXCI medical device for weight loss. These persons had ten to twenty kilos of excess weight from the ideal weight. The patient used were in no health threat from the excess weight. The desire of weight loss was for cosmetic reasons only.

The patients were all asked to avoid cheese and to not do anything else special or out of the ordinary. We wanted to evaluate the effects of the QXCI alone.

Of the fifty three patients who volunteered for the therapy 12 were chosen as control. There was a double blind used. An assistant in the clinic set the device for
The machine that can tell if you’re well

The Quantum Zeroid system is complementary medicine gone sci-fi. It thinks it can diagnose your bodily health and your mood.

Precious Williams went to find out.

THERE’S a scarlet high-tech new health-testing device that’s coming to a health clinic near you. If its creators are to be believed, the machine can read what is on your mind as well as what’s going on in your body. The Quantum Zeroid system - QX for short - is a computer-linked arrangement that’s just arrived in the UK and is tipped to revolutionise complementary medicine.

Developed by a former Nasa scientist, Professor Bill Nelson, QX works by measuring your body's "electrical auras". Using ultra-sensitive computer software, the device "reads" your physical and emotional vibrations. In short, it can tell whether you are healthy at a click of the switch. It’s also capable of analysing your physical reactions such as allergies to over 3,500 different substances.

Susan Goddard, President of the Complementary Medicine Association, says: Humans are naturally electrical beings and the QX system accurately measures the patient’s electrical responses.

The device uses electrophysiological activity to pick up sensitivities and identify the overload of specific substances and over.

At the Grove Health Clinic in Kensington, XJ practitioner Susan Astbury strapped electrical cables to my hand, neck and wrists (this is painting, if slightly uncomfortable). The cables are wired to Susan’s state-of-the-art laptop.

So pulse of blood pressure readings are akin. Instead Susan types details of my deep, eating and working patterns straight into the computer. In a matter of minutes, the XJ machine will have tested my body’s electro-magnetic parameters (or signs of allergies, vitamin and mineral deficiencies, oral and bacterial infections, parasites and even adverse moods and emotions. “Strong emotions are capable of causing physical reactions, which, thanks to this system, can now be measured,” says Susan, typing flatly. “With ailments which are difficult to treat, like migraines, QX can determine whether the underlying problem is sugar toxicity or simply high stress levels. The readings allow me to pinpoint your body’s precise requirements and prescribe tailor-made treatments for you.”

Seconds later, my “vibrational energy” details are digitised and displayed on-screen in easy-to-read jargon. The QX machine has revealed a reassuringly high level of overall physical and emotional health. But it isn’t all good news. According to the QX analysis, I have higher-than-normal healthy stress levels (hardly surprising, with my constant rush to meet deadlines). My level of patience is markedly low (noting my boyfriend tells me every day). The machine then charts out a personalised allergy-elimination programme. Again, it is unanimously spot-on in its suggestion that my body was reeling from recent overloads of alcohol, sugar and tobacco. In the week before my appointment, I’d been to six boot-camp parties and gone back to smoking 10 cigarettes a day. What I wasn’t prepared for was to be told that the real enemy to my health was carrot juice. If QX is to be believed, my daily trip to the juice bar are counter-productive. The levels of carotene in my body are even more toxic than the nicotine. The final stage of the QX treatment involves a five-minute interlude during which electro-magnetic resonance are zapped throughout my body (again, this is painless, but, just try keeping a straight face). These resonances, says Susan, will temporarily rebalance the chakras.

But for longer-term health benefits, she suggests I return to the clinic for a few sessions of colour therapy. QX advocates a holistic approach to health prevention rather than cure. According to this philosophy, there’s no point in indulging in quick-fix cures since you’ll simply overload your body rather than improving the underlying electrophysiological vibes. “There’s a definite validity to QX,” says Janyev Goddard. “It’s impressive. I feel that the system should be relied out to all GP clinics.” However, QX is not without its critics and Professor Edward Ernst of the Royal College of General Practitioners was quick to assure me that QX therapy was, at best, a waste of cash. “It may sound good in principle but the notion is pretty implausible. There is no evidence I have ever heard of to support for a minute that this system is effective,” says Professor Ernst. “If a patient is suffering from illness he must see his GP. To put such claims out there is dangerous.”

Apologies to the advice. I’ve lost 4lb and acquired a glowing complexion, so I think I can safely skip the colour therapy.

Root out the problems of ill health

Do you suffer food intolerance, allergies, digestive problems, fatigue, headaches, skin problems — or are you just constantly under the weather?

Well now a revolutionary computer device known as the QXCI, which gathers all the necessary data concerning the underlying causes of ill health, may help get to the root of the problem.

A trained therapist can use this analysis of underlying health issues which includes allergies, intolerance, bacteria, toxins and emotional stress, to advise the client.

Last week we looked at how the QXCI was developed and some of the uses of this innovative device. In this part we examine how the QXCI works. By taking into account an analysis of energetic data the QXCI can perform almost all different corrective therapies. These range from electropuncture, wave frequencies, hormone secretions, and intolerance determination to immune stimulation therapy and a host of other beneficial therapies.

There is a quick and easy method to the computer program in which the therapist can organize and chart the client’s needs best.

With a constant feedback ability the QXCI will continually alter the frequencies to ensure the client’s unconscious reactions show maximum effectiveness from the therapy.

In the second of this two-part series we look at how a revolutionary new machine known as QXCI works. Picture shows the QXCI which is used to help identify causes of ill health.

Article by certified Bioresonance Therapist April Harwood 01234 765419 and Rev. Mike Myers 01234 567890, QXCI available for hire for health analysis, vitamin/mineral status and Bioresonance therapies using the QXCI. Call for further details and bookings.

While not claiming to be a “cure all”, the QXCI can be used extremely effectively for a wide number of health conditions such as:

- Fatigue
- Allergies
- Irritability (irritable)
- Insomnia
- Nutritional imbalance
- Unexplained weight gain
- Poor or environmental sensitivities
- Skin problems
- General fatigue and mild depression.

One client, Tina O has suffered from chronic fatigue for seven years and was sent to the QXCI after years of not knowing what to turn. The therapy programmers give her real lift and energy boost after years of futility.

Bio-energetic therapy from the QXCI can send indications or vibrations into the body in order to reverse destructive energy patterns from pathogens that harm the body such as viruses, bacteria and parasites.

It also aims to re-balance body organs and systems by strengthening and strengthening healthy frequencies in order to help re-establish optimum health.

Mark C from Bedfords has suffered long-term ill health and has recently had QXCI analysis and therapy. She comments: “I was amazed by how accurate the information was — even though some of it only made sense with hindsight. I have used the information supplied to make dietary and lifestyle changes from which I am already benefiting.”

By analyzing and manipulating energy patterns Bioresonance therapy is helping the body to its most profound level. It is a technique that has been used successfully in South America for many more than 10 years but until recently has been slow to reach our shores.

You could be one of the first to benefit from the QXCI as it is now available right here in Bedford. It is safe for most people including children.

It is a scientific fact that when a low level voltage and micro-current pulse is applied to the body, osmosis, enzyme activity, and healing are increased. The SCIO will let the patient’s body electric autofocus a harmonic pulse to maximize this effect. This current applied to the cranium has been shown to help autism, attention deficit, and hyperactive children. It has been shown helpful for anxiety, addictions, emotional disturbances, and insomnia.

There is published research on these therapies. The new world of energetic medicine can help you.

You may have heard of biofeedback therapy, used by some practitioners to help treat stress. It operates on the notion that we have the innate ability to influence the automatic functions of our bodies through the power of our minds.

Now, there’s a device, the EPFX/SCIO, mostly referred to as the SCIO, which uses biofeedback techniques along with quantum physics and homeopathic principles, to help detect and treat certain health conditions.

**WHAT IS THE SCIO?**

Invented by American complementary health practitioner Dr Bill Nelson, the SCIO is basically a computer program using biofeedback principles to detect abnormal frequencies, or signs of stress within the body. Based on more than 20 years of research and refinement, it uses quantum biofeedback and TENS (Transcutaneous Electrical Nerve Stimulator) to detect and balance that stress. Dr Nelson developed the SCIO to stimulate the body to heal itself.

**HOW DOES IT WORK?**

The functions of the SCIO are similar to a virus scan on a computer. The device detects stress and weaknesses in the body—ranging from viruses, nutritional deficiencies and allergies to food sensitivities—by calculating the body’s reaction to more than 9000 frequencies within the device. The SCIO has four straps that attach to your ankles and wrists, as well as a headband. When connected, sensors on the straps measure and send information between the device and the client.

Biofeedback specialist, Teresa Cumbers of The Quantum Alliance which distributes the machines in Australia and New Zealand, says the SCIO communicates with the body to determine what energy imbalances are most affecting health.

“We are looking at stresses that are affecting the person’s wellbeing,” she says. “Reactions to foods, chemicals or other substances are revealed and further investigated through personal interviews, and other programs and screens within the SCIO. The investigation may locate..."
DOES THE SCIO TREAT PROBLEMS?

Cumbers says the SCIO doesn’t so much ‘treat’ as balance. After measuring the body’s frequencies and comparing them to the substances within the machine, the SCIO feeds back frequencies which the subconscious mind responds to.

“The subconscious mind, reacts with subtle energetic changes to the healthy frequency being sent from the SCIO, causing the body to alter its own pulse and create an energetic change. “For example, imbalance to balance,” Cumbers says.

Upon completion of the test, the SCIO highlights imbalances and recommends therapies and procedures to be implemented during a stress-reduction and pain-control session.

IS IT SAFE?

“Biofeedback is considered a safe technique,” Cumbers says. “It is non-invasive and requires little effort. It does, however, require a trained and certified professional to control the equipment and interpret the changes.”

(The SCIO has been passed by the TGA.)

WHAT DOES IT COST?

A session, which usually lasts about an hour or so, costs between $120-$150, depending on the therapist. You may, however, need follow-up sessions.

HOW TO FIND A PRACTITIONER: To find a SCIO therapist within Australia, contact Teresa Cumbers at The Quantum Centre on (08) 9447 7202 or 0405 045 828, www.quantumcentre.com.

THE RESEARCH

Hypothesis: The QXCI will make a significant change in AD/HD symptoms in qualified test subjects using this machine exclusively.

After five sessions, one week apart, one and one hour to two hours each, the AD/HD of the subjects generally improved. A pre- and post-test was administered and weekly journals were requested. In an attempt to determine the highest correlation of treatment and improvement of symptoms with the QXCI, many forms of stress reduction treatments were administered.

Although a traditional questionnaire was used to confirm a diagnosis of ADD or ADHD, the QXCI, through the brain wave program and harmonic therapy program, confirmed the overwhelming evidence of brain trauma or injury relationships to ADD instead of dietary correlations. There were three areas of the brain that the QXCI showed substantial improvement in (20-40%): injury profile, epileptic waves, local waves, deep asymmetry between session one and session five. The ADD brain wave pattern counts were relatively low and unaffected by the therapy, although the subjects improved on their ADD and ADHD written testing scores.

THE QXCI

The QXCI is a safe, powerful biofeedback device designed for simplicity of use and powerful healing stimulation. Designed by Bill Nelson, a former NASA scientist, the QXCI technology is based on over 20 years of research in bio-energetic and bio-resonance medicine. During personal testing, the QXCI resonates with thousands of tissues, organs, nutrients, toxins, organisms, and allergens for one hundredth of a second each and records the degree to which the body reacts. These frequencies can then be given back to the person and at high speed, make personal adjustments in order to bring the body into a more natural state- a state of homeostasis. ‘Homeostasis’ is a condition where everything in the body is in balance and the body is capable of resisting environmental changes, while regulating internal metabolic functions. The QXCI is a stress reduction device. The subject is attached to a computer software program with ankle and wrist straps and a headband. These cords are attached to a small box that is then attached to the computer. The subject feels nothing while the program is working. The biofeedback is passive without subject intervention. The operator has no control over the outcome. The outcome is generated solely from the relationship of the subject and the program.
The SCIO Universal Electrophysiological Biofeedback System can safely measure over the skin (transcutaneous) skin electro-potential down to the micro-volt range. Virtual and mathematical calculations of the attained data can provide CNS (Central Nervous System) biofeedback data, so as to include (simple EEG [electroencephalography], 3-pole ECG [simple stress electrocardiography], global transcutaneous EMG [electromyography]).

The system can measure the transcutaneous skin resistance by application of a medical safe micro-current voltametric pulse, so as to measure GSR (galvanic skin response) and TVEP (transcutaneous voltammetric evoked potential).

The system is designed for the detection of stress and reduction of stress through CNS biofeedback data or stress lifestyle questionnaires. The stress and lifestyle questionnaires provide educational feedback through library referenced functions. And the device can be used for the treatment of muscular re-education from injury, muscle weakness, sport muscular enhancement or various dystonia. The applied voltammetric pulse can be used to detect and affect in established modalities such as pain (TENS [transcutaneous electro nerveal stimulation]), trauma/wound healing, charge stability imbalance, redox potential and electrophysiological reactivity.

The device after 20 years of use is quality tested, clinically evaluated and scientifically validated as safe and effective.

Fractals

And Chaos Theory

And the SCIO

“If you like fractals, it is because you are made of them. If you can’t stand fractals, it’s because you can’t stand yourself. It happens.” Homer Smith

“Toast To Alcohol, The remedy for and the cause of all of life’s problems” Homer Simpson

“Life is the Organized Struggle against Thermodynamic Entropy, Life uses Chaotic control to Defeat Chaos” William Nelson, 2008 prof of medicine IMUNE

Reductionism is the process of taking a complex situation and reducing it to simple terms. We reduce the weight of a building to a simple vector to calculate the strength of a support wall. Reductionism has been responsible for allowing us to build cars, boats, machines, etc. But reductionism fails in very complex situations. The human body has over 200,000,000,000 cells. Each cell is more complex that we can presently imagine in out verbal minds. This complexity makes our bodies a fractal. Reductionism can not work for analysis. When the drug companies wanted to test a blood pressure medication they reduce the patient from the complexity of life to a simple variable, blood pressure. They test the blood pressure before, the pre test. Give an intervention, the drug, and then test the blood pressure again, the post test. They do not test the side effects. they observe them. This is important because they can only observe gross side effects and still they get by. If they would have tested the blood sugar, they would have found out that all patients taking certain blood pressure medications get some degree of diabetes every one of them. If they were to test all variables for side effects, it would cost too much to do testing. And there are not enough people to do the test for statistical satisfaction, There are not enough rats, There are not enough fruit flies. the statistics of total protection against side effects are
tremendous. These side effects are killing not hundreds of people, not thousands, not tens of thousands, but millions of people every year. In the IJMSH of 2009 there is an entire issue of the failure of the FDA to protect people from these side effects of synthetic drugs. I spell it SInthetic. It is a sin to kill so many in the name of profit and ignorance, ignoring the benefits of natural medicine is ignoRance at it's ultimate ignoRant best. All justified by reductionism. A science not used today by anybody but medicine. The reductionistic methods of drug testing are killing millions and wounding many many more. But big money is hard to beat, especially when there is 30 billion spent by the drug companies on political lobbying alone in America. Fractal non-linear science has stepped forward to help us understand medicine.

The SCIO system uses a non-linear system of data input into the body, and a non-linear system of data analysis. With reductionism a thing of the past we need to set up different systems of medical therapy and analysis.

The traditional medical model of the human body portrays it as an organic chemical machine. Clocklike rhythms such as the beat of the heart tick away until the machinery wears out. Like an understructure of ball joints and hinges, parts of the skeleton can be repaired, even replaced. The mechanical model shows the nervous system as a telephone exchange or, in more recent high-tech metaphors, a "wetware" computer circuit board.

This image of the body sharply contrasts with the one being crafted by a new generation of scientists who have begun portraying our physiology as a holistic activity laced with fractals and chaos. Fractal geometry describes structures full of spaces and surfaces that wrinkle, branch, and fold into self-similar detail at many scales. These kinds of structures and surfaces are found everywhere in our bodies. Consider the classical picture drawn by Andreas Vesalius, the father of modern anatomy.
Using the SCIO Medical Device as an adjunct for Excess Adipose Tissue on Patients – A Review and Update

Cosmetic Obesity Treatment Regime

Abstract:

There was a therapy developed in France where an electrical frequency was used to treat excess weight in patients. This therapy was integrated into the QXCI device. It was experimentally evaluated in 1995. Afterward many doctors have reported success with the treatment. This therapy continued in the SCIO. Now in 2008 we need to experimentally re-evaluate the original results.

A group of seventy-three patients (ages twenty-five to fifty) who had moderate obesity syndrome were treated with the SCIO medical device for weight loss. These persons had ten to twenty kilos of excess weight from the ideal weight.

A discussion of diet and life style was also used as well as hand outs. The major efforts were directed at eating good fatty acids not bad fatty acids and good sugars not bad sugars. Dextrose or right handed sugars are found to stimulate weight gain, hypo or hyper glycemia, diabetes, and immune dysfunction. Left handed sugars or fructose is more healthy.

In the study a significant weight loss was seen in the treatment group from control. The SCIO treatment has been successful for over twenty years of therapy.

Key Words: adipose tissue, weight loss, harmonic, square wave, energetic medicine

Introduction:

French researchers in energetic medicine found that the cell membrane of adipose tissue had a response to a certain frequency. When this frequency is sent through the system it provokes a harmonic distortion to the membrane and stimulates loss of fat from adipose tissue. The harmonics are discussed in the discussion section.

Cheese for some reason appears to stop the weight loss result It is believed that some ingredient in cheese has stabilizing effects on this adipose cellular membrane. When patients ate the smallest amount of cheese the effect of weight loss was defunct.

In our studies on patients we found that this was more of a frequency band than there was some individuality to the SCIO frequencies in this band. Of course this specific wave form band is a trade secret. So our system needs to have cybernetic loop control to focus in on the appropriate frequency for each client.

Methods and Materials:

A group of seventy-three patients (ages twenty-five to fifty) who had modest obesity syndrome were treated with the SCIO medical device for weight loss plus a diet instruction from the IMUNE. These persons had eight to fifteen kilos of excess weight
We are taught chemistry with a poor rod and ball analogy. There are no Rods and no Balls, there are quantic energy fields. The Rods and Balls faulty analogy misleads us into a perception of no wSynthetic Chemistry can assemble new molecules. The energy state of these molecules is different in nature than in the synthetic world. The Angel discovered this in 1982 and published the first book on Quantum Biology the Promorphics proving the incompatibility of the Synthetic Chemicals in Biology.

There are no Rods and no Balls!!!
Just energy fields

The Angel discovered that Quantum Electro Dynamics ability to describe the photon electron and proton interaction, means that the energy state of a natural made substance is different from the petrochemical Synthetic Chemistry of the Drug Co.

Modern science has de-emphasized the energy states of the electrons in glucose and the QED connection largely because it refutes the idea of Synthetic chemistry but the Angel noted the hypocrisy and has made a new medicine to help people. For this, the Drug Co. have attacked her.

Plants take in water, carbon dioxide, nutrients and photonic energy (light). They give off organic material and oxygen.

Animals take in the organic material and oxygen. They give off fertilizer nutrients carbon dioxide, water and photonic energy (body heat).

The Photosynthetic Organism can use the energy of sunlight to take electrons to higher energy states.

Sunlight +
H₂O + CO₂ + Nutrients

Body Heat
CH₂O₃ + O₂

Water Carbon Dioxide Nitrate NO₃ Phosphate PO₄ Iron Silicic

Organic matter Oxygen

The Sunlight comes in at wavelength of 400 to 700 nm and the body gives off heat radiation at wavelength 50 to 75 nm. The difference is the energy used for life. DNA gives off radiation and receives radiation in the infrared and visible light with just a touch of UV.

Desire used this advanced science for good.
To Make Medicine Safer the Angel has Made

The Quantum Quality Control Electro-Chemistry Analyzer for the Analysis of the Trivector electrical signature of a biological or anti-biological substance.

Everything is made up of atoms with mostly electrons and protons. Everything has an electrical field and an electrical interaction with its environment. This 3D interaction can be measured with Voltammetry.

RE: ANALYSIS OF XRROID REACTIVITY READINGS OF AIDS PATIENTS IN BUDAPEST

ABSTRACT

Twenty-two ambulatory AIDS patients in Budapest were studied for xroid electrical reactivity readings. The electrical reactivity patterns and reactive substances that were in the highest faction of reactivity. In other words, those reactants that were statistically significant are compared in the groups of the AIDS patients taking the AZT as well as the AIDS patients that were treated with homeopathic and nutritional items. The purpose of the study was to analysis similarities and consistencies in their electrical reactivity patterns over the course of four measurements. This took place during the 4th, 5th, 6th and 7th month of 1994. During these months there was also a homeopathic and nutritional intervention done on several of these patients to see the effect on blood chemistry profiles denoting aids risks and the homeopathic and nutritional intervention are described in the article known as the comparative results.
NATURAL TREATMENT OF CHILDREN WITH AIDS

A Report of the findings presented on AIDS and children at the 1995 IUVDT World STD/AIDS Congress

First Presented by: Michio Tani, M.D., President of the Eastern Japanese Medical Institute, Japan
Edited and Reported by: Maitreyi Ltd., Dr. William Nelson, LPCC, Professor of Complex Homeopathy, College of Practical Homeopathy, London England / Singapore, March 20, 1995

ABSTRACT

At the 1995 World AIDS Conference in Singapore, several key articles were presented on natural and homeopathic treatments for AIDS. Natural therapy is indeed getting more attention throughout the world. This article is a summary of a Japanese presentation on herbal and naturopathic treatment of AIDS in children. The article reviews the dramatic success of Naturopathic treatment versus AZT treatments and shows a heightened level of survival and decreased mortality statistics in the Naturopathic group.

INTRODUCTION

New directions of therapy are needed in AIDS. Much research has been started into co-factors that might be responsible for facilitating AIDS. New co-factors such as antibiotics and removal of adenoids, tonsils, and appendix, and other conflicts of allopathy medicine are now being reviewed by scientists. These and other immuno-suppressions which are happening in our societies and environments today might be responsible for the elevated factors of AIDS.

The dramatic use of these allopathic techniques have extremated over the years and might have reached saturation points that could then cause complications and allow the AIDS virus to do its damage. In looking to new directions, people have looked into natural therapies. At the, 1995 Singapore AIDS conference, it was indeed a pleasure to sit through doctor Tani’s presentation on his results with naturopathic treatment of AIDS in children. His paper titled “Clinical Recovery of Pediatric AIDS by Natural Therapy” was indeed intriguing. Let me present some of the basic statistics and philosophy presented in this discussion by Dr. Tani and Dr. Rodica of Constantine, Romania.

Fifty-six pediatric AIDS patients were studied. Eleven were symptomatic HIV and 29 had clinical AIDS. The 56 pediatric patients were separated into 6 treatment groups and studied for a 30 month period. Natural remedies utilizing a Chinese blend and soups were studied in contrast to AZT.

The different treatment groups consisted of
1. herbal tea
2. herbal tea*, astol (Phaseolus radiatus) and soup,
3. herbal tea*, astol, soup, and AZT,
4. just AZT, and
Homeopathic and Naturopathic Treatment of AIDS:

So in conclusion to treat this disease naturally we must do the following:

1. Use herb blends that directly interfere with the Virus. Hemo A or Chan Bai San
2. Treat the infections with natural means BAC, FNG, VIR
3. Use homeopathic Auto nosodal techniques to stimulate the immune system
4. Avoid all immunosuppressants AVOID
   A. Processed Sugar And flour
   B. Antibiotics
   C. Excess Stress
   D. Excess Alcohol
   E. Street Drugs
5. Stimulate the Immune system with herbs, soups, vitamins and Natural Immunomodulators.
6. Use the Mind to help with Neuro-Immuno-Stimulation.
7. Healthy Bowel Flora and Bowel Function, with Healthy Lymphatic functioning.

I hope that this report can help science to recognize the natural potentials.

Endotoxin Stimulation

ENDOTOXIN STIMULATION
OF THE IMMUNE SYSTEM

Immune Stimulation as a Substitute for Anti-Biotics

By: W.C. Nelson, Prof. Homeopathy College of Practical Homeopathy, London, England
L. Bertok Jr., National Research Institute for Radiobiology and Radiohygiene

ABSTRACT

Lately there has been much press about the massive problems of antibiotic therapy. Antibiotics have prompted the development of many new resistant bacteria, caused many iatrogenic disease, and prompted immunosuppression by disturbing bowel flora. The anti-biotic attacks the bacteria directly and thus furthers the immunosuppression by preventing the natural immune system from working. The press has carried many reports of the continued problems of antibiotics. The medical community is searching for a substitute for these antibiotics.

Endotoxins are the lipopolysaccharides in the outer levels of bacteria. These toxic compounds can stimulate the immune system to defeat bacteria. Homeopathy is a legal medical art that use this concept. In homeopathy a small dilute amount of the bacteria is given to the patient to stimulate the immune system. This is known as nosodal therapy. This article reviews the scientific and homeopathic literature around this therapy as a substitute for antibiotics.

KEYWORDS Endotoxins, Lipopolysaccharides, Homeopathy, Initial Values, Nosode Homeopathy, Immune Stimulation

BACKGROUND ON ENDO TOXINS

Exotoxins are excreted from living microorganisms, whereas Endotoxins are retained inside the cell. The Endotoxins are set free when the organism dies. These toxins have powerful stimulating capacities on the immune system. They stimulate antibody production, antitoxins, T-cell, B-cell, and immune cell formation, and immune cell efficiency. One mechanism is that these toxins are modified to inactivate the toxicophore group of the molecule, leaving the antigenic group unchanged. (ref. Tyler, Brady, Robbers 1988). These Exo and Endotoxins can be used to build immunity as in immunization. Certain of these endotoxins however produce general stimulation of the immune system. In other words they increase and fortify the entire immune system towards all intruders. (ref. Tyler, Brady & Robbers, 1988).

Over one hundred years ago Jules Bordet first detected the presence of factors that could augment and stimulate antigen-antibody combination. This led to the complement fixation test.

The most important part of the complement activation involve the third complement component C3. The proposed classical pathway of activation and conversion appears in the first figure. There are many other ways that Endotoxins can help the body. The Endotoxins are rich in Lipopolysaccharides (LPS) which are contained in the cell wall of gram-negative bacteria. These bacteria are essential for life and must be part of the healthy bowel flora. In the bowl they help in nutrient absorption, assimilation, detoxification, and systemic regulation of immunity.

Endotoxins can also act to excite B-cell activity and they are thus also known as polyclonal B-cell stimulators. Figure 2 demonstrates this.
The Non-Specific Immune Stimulation Effect of Endotoxin Stimulation – Homeopathics

THE NONSPECIFIC IMMUNE STIMULATION EFFECT OF ENDOTOXIN-HOMEOPATHICS
(Homeopathic Treatment of Bacterial Infections)

This article was presented at the Pharma Expo in Budapest, Hungary: an international pharmacy exposition presented on November 10 - 12, 1994.

ABSTRACT

Two studies involving homeopathic or Endotoxin treatment of bacterial infections are reported, which indicate a natural, safe alternative to antibiotics. Both studies involve patients aged twenty-five to fifty. In the first study we take scratch blood samples with a cover slip, from ten healthy patients, for a rubek test of neutrophil number. The patients are then given (in double-blind fashion) either water and alcohol or a homeopathic for bacterial stimulation. On evaluation under the microscope, the number of the white blood cell is increased in the treatment group; the placebo group shows no change.

The second study patients are evaluated for urinary bacteria from culture. They are then prescribed the Endotoxin homeopathic, and reevaluated. The study shows that the complex homeopathic can indeed help the patients to deal with their urinary bacterial infections. The proposed mechanism is discussed, along with this short study.

KEYWORDS

Bacteria, complex homeopathic, Endotoxin , morbillity factor, phagocytosis

INTRODUCTION

Exotoxins are excreted from living microorganisms, whereas Endotoxins are retained inside the cell. The Endotoxins are set free when the microbial organism dies. So as a bacteria in our bodies dies the Endotoxins activate and stimulate the immune system. These Endotoxins have quite powerful stimulating capacities on the immune system. They stimulate antibody production, antitoxins, T-cell, B-cell, and immune cell formation, and immune cell efficiency. In Pathophysiology Smith and Thier write of the powerful effect of Endotoxins on releasing neutrophils.

One mechanism is that these Endotoxins are modified to inactivate the toxicophore group of the molecule, leaving the antigenic group unchanged. (ref. Tyler, Brady, Robbers 1988). These Exo and Endotoxins can be used to build immunity as in immunization. Certain of these Endotoxins however produce general stimulation of the immune system. In other words they increase and fortify the entire immune system towards all intruders.(ref. Tyler, Brady & Robbers 1988)

Dr. Lorand Bertok working at the National Research Institute for Radiobiology and Radiohygiene in Budapest Hungary started in the 1950's and he has authored hundreds of articles on Endotoxicity, some with Dr. Hans Selye. Dr. Bertok writes in several articles and books about the stimulation of nonspecific resistance by Endotoxins. These refined Endotoxins have wide range stimulation effects against all pathologic micro intruders. The effects extend to viral and fungal defence as well. (ref. L. Bertok 1962, 1963)

# Homeopathic Treatment of Urinary E. Coli Infections

**The International Journal of the Medical Science of Homeopathy**

## Homeopathic Treatment of Urinary E. Coli Infections

**Abstract**

In this short study our Budapest patient population was analyzed for possible urinary infections. Twenty patients with urinary E.coli were tested for the amount of E.coli bacteria that would manifest in a Wampole culture tube. The patients underwent a pre-test, and were tested again after two weeks and after one month of therapy. The therapy utilized was a homeopathic nosode of mixed bacteria, as well as the E.coli. This formula was shown effective in lowering the infection in the urinary tract after two weeks and after one month.

Homeopathic Treatment of Hemolytic Strep and Skin and Throat Infections

Homeopathic Treatment of Hemolytic Strep and Skin and Throat Infections

This study was performed in 1995 at the Homeopathy Research Facility in Budapest, Hungary. Revalidation and further clinical testing are currently being performed by medical doctors at the Homeopathy Clinic in Budapest, Hungary, and by the doctors listed above.

ABSTRACT

In our work on nosodal homeopathies we have found that homeopathy can be stimulatory to the immune system in defeating certain microorganism invaders. One condition that is extremely needful of antibiotics is strep throat, in which streptococcal throat infections demand immediate treatment before more opportunistic invaders cause more severe disturbances. In our study homeopathy was utilized on twenty-two strep throat infections and six streptococcus skin infections. The results showed that a safe, effective resolutions could be achieved with the homeopathics. The study discusses this in the context of endotoxin and nosodal homeopathic intervention.

INTRODUCTION

In our other studies on homeopathic nosodal work it has been found that our homeopathies were successful in working with urinary tract infections [Studies: 2 - 7].

We have now undertaken the study of homeopathy as a treatment for strep throat. Strep throat is very dangerous for the child and the entire family, as it can create severe disturbances if not treated properly. Immediate intervention is usually through antibiotics, to attack the streptococcus directly, but this will interfere with the ability of the immune system to do its job, and it will alter the bowel flora, creating longer-term problems. Also, antibiotics upset other types of nutrient balances such as manganese, sulphur, and other metabolites.

Homeopathy has been utilized for centuries to deal with many cases of exactly this type of disease. Many homeopathics will see this type of disease and treat it quite effectively with a host of various homeopathies. In this study we used a wide-spectrum blend of bacterial and nosodal homeopathics to treat the bacterial infection.

METHODS AND MATERIALS

Twenty-two patients with strep throat and six patients with hemolytic strep and skin infections have presented at our medical clinic over the last three years. Antibiotics were not used with these patients, and we experimented with the use of the nosodal homeopathic to deal with these severe conditions. All the patients, ranging in age from five through thirty-two, presented with extremely discomforting sore throats. In the skin group, hemolytic strep usually produces a one- to two-centimeter blotch on the skin that has a weepy type of red sore in both throat and skin infection cases, microscopic

NEW TECHNIQUES OF HOMEOPATHIC TREATMENT OF FUNGAL INFECTIONS

This article was presented at the Pharma Expo in Budapest, Hungary: an international pharmacy exposition presented on November 10 - 13, 1994.

ABSTRACT

In this study there are two major investigative reports that we explain. One is a forty-five-patient study of female yeast problems, in which a complex homeopathic treatment was proven to be effective. We first present a twenty-patient study of various effects on overall fungus population. The overall fungus was measured through culture analysis of patients’ hair, urine, sputum, and other physiological samples.

Three treatment groups were organized: that of a candida-only diet, that of a homeopathic singular of Candida albicans only, and that of a complex homeopathic for full-range treatment of fungal disorders. In the study we show the dramatic superiority of the complex homeopathic, how it worked on a wide variety of fungal disorders, and how the Candida albicans homopathic only worked on Candida albicans. The diet proved to have little or no effect.

The study reviews the process of the immune system’s defense against fungal intrusion and fungal overgrowth. Also, there is the proposed mechanism for the homeopathic action, in that it appears to be stimulatory of the immune system.

KEY WORDS
Candida, fungus, immune system, phagocytosis

INTRODUCTION

There are many types of systemic fungal diseases, also known as systemic mycoses. The systemic mycosis is also seen as an opportunistic disease which occurs in a compromised immune system, unlike a true fungal infection which is caused by just a pathogen. The immune system must be deficient in order for the disease to completely take hold and proliferate.

Thus this can be the result of various types of immune suppressants. These include antibiotics, ionizing radiation (x-ray, etc.), corticosteroids and antimitototics. These problems can occur in patients with azotemia, diabetes, bronchial eczema, emphysema, tuberculosia, lymphoma, leukemia, AIDS, candidiasis, burns, and other similar diseases.

There can be geographical components of fungus, and coccidioides is usually confined to the southwest area of the United States. Histoplasmosis occurs in the East and Midwest, especially in the Ohio and Mississippi River valleys. Blastomyces is restricted to North America and Africa. Paracoccidioides, often referred to as South American Blastomycoses, is usually found in the location for which it was named. As the world becomes increasingly smaller, these diseases are spreading into many different areas and can be found in many populations. In our study of fungal disorders we must culture a
HOMEOPATHIC STIMULATION OF WHITE BLOOD CELL MOTILITY AS ANALYSED UNDER THE MICROSCOPE

(A Proposed Mechanism of Homeopathic Immuno-Stimulation)

This article was presented at the Pharma Expo in Budapest, Hungary; an international pharmacy exposition presented on November 10 - 13, 1994. Revalidation and further clinical testing are currently being performed by medical doctors at the Homeopathy Clinic in Budapest, Hungary, and by the doctors listed above.

ABSTRACT

The dynamic factors of life seem to be dependent on photons. This has been developed through quantum electrodynamics, which has been applied to biology by many researchers. In this study we microscopically analyzed the white blood cell’s recognition and motility factors for bacteria and fungi. By then observing how the white blood cell moves towards the bacteria and fungi we are able to analyze one factor of immunity.

A key question in biology must be: How do the white blood cell and the immune system find and isolate the microorganism intruder? A thermodynamic and/or chemical mechanism is not a complete analysis. In this paper we bring forth the treatise that the white blood cell has some photon receptors and a type of vision which allows it to find these intruders and thereby destroy them.

In this study we then gave the patients a treatment of water and alcohol, and/or a homeopathic of various microorganisms. This was performed in a double-blind fashion. In the placebo group there was virtually no change from the baseline reading in the motility recognition factors. However, there was a thirty-five percent increase in recognition and motility of the white blood cells in the blood samples of the patients receiving the homeopathic treatment.

The conclusions of this study are drawn through a dynamic, quantum, photon system of understanding biology, which then helps us to understand some possible mechanisms of homeopathy. In the conclusions of the study we further show that homeopathy not only is a safe but also an effective and natural process of not defeating the organism directly, but stimulating the immune system to do its job better in defeating the microorganism intruder. Thus homeopathy offers a more natural way to stimulate the immune system of the host rather than a way to defeat the intruder directly, as in antibiotic treatment.

BACKGROUND

At the turn of the century the world of classical physics came tumbling down when the concepts of quantum physics were discovered. Physicists struggled with this new interpretation of the world. It wasn’t until the 1950s - 70s that the developing field of quantum electrodynamics (QED) yielded a very good cross section of understanding of the physics of the universe, which has led many theoretical physicists to call QED the “king of physics", in that it offers the deepest explanations.

If we look over the span of changes in immunology, we can see that this also parallels some of our understanding of humans, and that biology always seems to be anywhere from twenty to fifty years behind physics.
STIMULATION OF MOTILITY FACTORS IN NEUTROPHILS

This study was performed in 1994 at the Homeopathic Research Facility in Budapest, Hungary. Revalidation and further clinical testing are currently being performed by medical doctors at the Homeopathic Clinic in Budapest, Hungary, and by the doctors listed above. This article was presented at the Pharma Expo in Budapest, Hungary; an international pharmacy exposition presented on November 10 - 13, 1994.

© William Nelson 1995

ABSTRACT

In 1987 a department of scientific research in Germany published the first part of this study [Studies: 5]. In this study a sample of patients’ blood was taken by finger prick, and put onto an inverted slide. The inverted slide allowed for motility of the white blood cell underneath the cover slip. When viewing blood normally, using a noninverted slide, the cover slip would produce pressure on the white blood cell and restrict its movement.

A sample of various bacteria was put into the blood sample, comprised of streptococcus. The mobility and motility of the white blood cell was then studied under the microscope. This was done using a dark field at 1500x to minimize the effects of excess infrared radiation. However, the temperature of the blood was always maintained within one degree of body temperature (98.6°F, 37.5°C).

The speed of the white blood cell was then measured in seconds per 10 µm, as well as the ability of the white blood cell to produce phagocytosis around the bacteria. The baseline was thus established by observing multiple white blood cells in the patients. One group of patients was then given a placebo of water and alcohol (ten drops) orally, and another group was given a sample of a complex homeopathic designed to stimulate the white blood cell towards bacteria. Blood was taken thirty minutes after administration of the placebo or homeopathic.

In the treatment group there was virtually no change from the initial pre-test. In the homeopathic group there was an increase. In the homeopathic treatment group there was a thirty-five percent increase in the motility and mobility factors of the leukocytes.

This initial American study of 1987 has been duplicated using an additional ten subjects with fungus instead of bacteria, and fifteen subjects have recently been added to the study population from Hungary. This makes a sum total of thirty-five subjects who participated in our study.

Since the use of blood on the slide for testing white blood cell motility was an unnatural event, a second test was performed on four volunteers. This is the Rebec Skin Window technique [Books: 22], in which a cover slip is applied to a wound, and then the number of neutrophils is calculated. Similarly to our first test, placebo and homeopathics were used, and an increase in neutrophil motility was observed in the homeopathic treatment group. The conclusions of our study show that the homeopathic is capable of stimulating the motility.
A Short Study of Comparison Factors of Homeopathic Treatment Vs. Enzymatic Treatment of Intestinal Parasites

A SHORT STUDY OF COMPARISON FACTORS OF HOMEOPATHIC TREATMENT VERSUS ENZYMATIC TREATMENT OF INTESTINAL PARASITES

This study was performed in 1984 at the King Health Center in Lowellville, Ohio, USA Revalidation and further clinical testing are currently being performed by medical doctors at the Homeopathy Clinic in Budapest, Hungary and by the doctors listed above.

ABSTRACT

In this study a group of patients from ages twenty-five to fifty were chosen who displayed signs of worm eggs on coprolith (stool) analysis. The patients were divided into two groups of ten patients each. One group received treatment with a combination homeopathic product known as Vermex, which contains various homeopathics that stimulate the defenses of the system against parasitic intrusion, and also homeopathics that help to flush out the intestinal tract. The other group was given Standard Process enzyme therapy in a pill called Zymex, whose ability to rid the system of parasites through its enzymatic effects was claimed by various doctors.

The patients in each group were then remeasured. It was found that the Vermex product was successful in treatment, whereas the Standard Process product seemed to show no positive effect.

KEY WORDS
Intestinal parasites, Vermex, nematode.

HYPOTHESIS
It is our hypothesis that a homeopathic product can be utilized to stimulate the immune defenses of a human organism against intestinal parasites.

METHODS AND MATERIALS

Twenty patients were taken from a medical practice in which two lines of products were used: one was a homeopathic, and the other an enzymatic therapy. The patients were random-sampled into two groups of ten patients each. One group was given instructions to take Vermex at ten drops, three times a day for three weeks. The other group was given Zymex enzymatic therapy, and told to take two pills after each meal for three weeks. The three-week period was chosen because most nematode eggs go through a twenty-one-day cycle. By using therapy for three weeks, we would expect the best results.

The nematode analysis was done by standard coprolith analysis, which was accomplished by taking a stool sample from each patient and extracting from it a section of the sample about the size of a large marble. This was then put into a sugar solution. The eggs would float to the top, and could be separated from the tube with a cover slip.

The eggs and egg parts were then counted to determine the approximate number of nematode eggs in each sample. In the table (see Appendix) the circles show us
So you have a cold – Is it allergy, asthma, influenza, infectious, or nutritional imbalance?

SO YOU HAVE A COLD - IS IT ALLERGY, ASTHMA, INFLUENZA, INFECTIOUS, OR NUTRITIONAL IMBALANCE?

This article was presented by Dr. William Nelson at the Pharma Expo in Budapest, Hungary: an international pharmacy exposition presented on November 10 - 13, 1994.

ABSTRACT

In this brief paper we categorize some simple diagnostic methods for analysis of patients who present with rhinitis, sinusitis, itchy, runny eyes; asthma, fever, chills—in other words, cold symptoms. Cold symptoms can come from a variety of reasons, not just from viral infection. However, viral infection will be thoroughly discussed in this paper.

In this article we will discuss simple OTC (over-the-counter) treatment regimes which can be used for cold-like symptoms. This is vital information for pharmacists and practitioners alike in dealing with probably the most common ailment known to man.

INTRODUCTION

The common cold goes by many names. Some of these include “cold,” “coryza,” upper respiratory infection”, “acute rhinitis”, “infectious rhinitis”, “catarrh”, “hay fever”, “tonsilitis”, “flu”, “sore throat”, “laryngitis”, “pharyngitis”, “otitis”, “otitis media”, and a host of other names and diagnostic criteria that reveal the nature of the cold.

Pharmacists are likely to intervene in the case of the patient who presents these symptoms, as some patients don’t visit their doctors with “cold-like” symptoms. They will ask pharmacists about treatment, or other therapists who dispense over-the-counter medications. The result of this kind of visit with the OTC therapist is mostly likely advice regarding self-medication, or home remedies combined with OTC prescriptions. Or the inquirer may be pointed to a general practitioner.

Many pharmacists and other OTC practitioners do not have a proper understanding of homeopathic treatments, and therefore they do not recommend adequate homeopathic treatment for simple conditions like cold, flu, or any of the symptoms mentioned earlier. It is the purpose of this article to explain to pharmacists and other over-the-counter therapists how to more correctly ascertain what type of OTC therapy might be in order, and also when to refer a patient to a general practitioner for more specific diagnosis and treatment.

BACKGROUND

An extensive cold surveillance study was performed in 1992, at the Vicks Research Center in the United States [1]. The study was designed to characterize symptoms in the nasal patency profiles of subjects reporting upper respiratory disturbances. Patients who were suffering from the common cold and not using any form of therapy were included in the study.

The subjects were asked to assess their symptoms, questioned about recent medications, tested for subjective nasal congestion and nasal flow, and subjected to nasal lavage and throat swabs as well as viral cultures. This was continued over a four-year period ending in 1992. Two hundred twenty-six cold episodes were evaluated in one hundred four individuals. For the present-
Homeopathic and Herbal Treatment of Amoeba Infections

**HOMEOPathIC AND HERBAL TREATMENT OF AMOEBA INFECTIONS**

By: W.C. Nelson, L.P.C.C.

**INTRODUCTION**

Amoeba is a one celled organism that can cause a parasitical or protozoa disease. The amoeba motivate by extending and contracting their protoplasm. There are a host of types of amoeba as well as a multitude of other protozoa diseases. These diseases were thought of as being rare for many years but due to better diagnosis and detection we see today more and more of these diseases.

The usual contact is with bad food or water. The initial exposure usually results in dysentery or what we refer to in Mexico as Montezumas revenge. This is usually treated symptomatically which produces relief. But the unconquered organism can proliferate and lead to other diseases. They can cause ulcerations in the colon and digestive tract. Most often the ulceration is in the lower bowel. Often the protozoa can proliferate in the mouth, bowel or spread to other areas. The proliferation of these intruders is slow and often takes 4 to 5 years before other symptoms result.

The amoeba can occupy places in the synovial fluid of the joints and cause arthritis or articular disease. In the joints they will cause distortion of the joint and distention of the joint sack. Many arthritis deformed joints in the fingers are a result of amebic proliferation. They can cause hepatic abscesses in the liver or other organs. Since they shrink when exposed, to saline solution (from the isotonic effect) they can be difficult to diagnose. the electro reactivity Xrroid can detect the amebic disease with some accuracy.

In recent years in clinical practice I have seen more and more Amoeba infections in Northern areas. In fact the further North I go the more amoeba I see. I can speculate that this is some how related to changes in the ultra violet light and the reduction in Amphibian populations.

**TREATMENT**

The human immune system does not have a developed system for dealing with this protozoa disease. All attempts to correct this with classical homeopathy, nutrition, and behavioral therapy come up empty. The patient needs more refined and direct therapy. So to help the system to deal with this disease we developed a nosode treatment with some herbal therapy that could disable any flagellated bacteria such as Giardia or the motived Amoeba. The formula is made with the patented activation process at New Vistas which appears to increase the clinical results significantly.

The formula contains nosodes from over 8 forms of Amoeba and other Protozoa. In addition herbal forms of Diloxanide Furoate, Metronidazole, and absinthium are at lower potencies.

The formula has been tested safe for children and is to be taken 6 drops 3 times a day for 60 days to fully conquer the proliferation. Attempts to increase the chemical concentrations seem to sacrifice safety.

**OBSERVATIONS**

Over the last two decades of using this product I have seen so much success in the treatment of stubborn arthritis and joint mobility that I cannot imagine a being in practice without this formula. Several times a week I see patients that have joint distention and pain, and the machine says Amoeba. I then ask how did they like the dysentery they had in Mexico or some where 5 years ago. Surprised the patient so often responds 'How Did You Know?'. I have not organized a professional pre and post test for this study and I apologize to the reader for my assumptive assertions, But this is one case where the strength of the assertions is profound.
HOMEOPATHIC TREATMENT OF TREPONEMA INFECTIONS  (Rabbit Model)

Budapest, Hungary  1997, June 10 till Sept 15

ABSTRACT

In this study we review syphilis(treponema) and a basic homeopathic treatment of same. An animal model using rabbits is used to test the therapy and preventative capacities of a complex homeopathic remedy. There was no therapeutic effect. But To the surprise of all concerned there was a shocking preventative effect that suggest a possible vaccination for the most prolific disease on the face of the earth.

BACKGROUND

Syphilis is the most epidemic infection of humans on the planet today. In the world it is estimated by the WHO that 70 million people are infected each year. In the USA over 300,000 new cases are in need of treatment. In some countries syphilis effects one in ten. And world wide one in 25 is threatened.

Historically there are varying accounts as to the origins of syphilis, but all seem to agree that the disease at one time was unknown to humans. Once the disease started into the human population thousands of years ago, it spread unchecked. It now is epidemic everywhere. Once infected there is no second exposure immunity, this plus the nonhuman origin has further developed the theory that a vaccination was not possible.

The disease is transmitted by kissing, sexual contact, or contact with mucous membranes. The levels of syphilis has risen steadily for decades despite efforts of diagnosis and antibiotic treatment. The syphilis organism is developing antibiotic resistance, and the immunosuppression effect of the antibiotics is complicating the ability of the antibiotic treatment.

Treponema Pallidum is a spiral bacteria about 0.25 microns wide and 5 to 20 microns long. Darkfield microscope can identify it with morphology and motility.

Within hours of entering the mucous membranes of its host, trep reaches the regional lymph nodes and spreads throughout the body. The host reacts by perivascular infiltration of lymphocytes, plasma cells, and fibroblasts. The resulting lymph node swelling leads to endarteritis obliterans. Inflammation is replaced with degenerative processes, especially in the CNS and cardiovascular system. Since the first infection of syphilis does not convey any immunity, medicine developed antibiotic treatments. Also the antibody reaction to syphilis is unreliable, so it was further surmised by modern medicine that there is no way to vaccinate against syphilis. Many have dedicated lifetimes to developing a vaccine for treponema.

Homeopathy has syphilis treatment at its heart. Hanehman used syphilis as a treatment for years. The miasm of syphilis is well known. Millions of people have been treated with homeopathic syphilis for over a hundred years. But the homeopath rarely use any statistical analysis. Modern medicine has been satisfied with its antibiotic treatment. But recent development of resistant strains plus evidence of how antibiotics can act as cofactors in the acceleration of fungal and viral disease, now demands we look for new treatment modalities.
Homeopathic Treatment of Immunity

HOMEOPATHIC TREATMENT OF IMMUNITY

(Homeopathic Stimulation of Antibodies to Measles)

ABSTRACT

Blood samples from eight children were tested for antibodies to measles. Antibodies were to be below the satisfactory limit for immunity to measles. The children were treated for one month with a homeopathic poly-chord of measles at a dosage of ten drops, twice daily.

After four weeks, blood samples were again taken and the measles antibodies remeasured. The post-test showed the blood antibodies above the acceptable limit for immunity to measles.

CONCLUSION: The homeopathic medication can help to raise levels of immunoglobulins and antibodies. It might take the place of other types of immunization because of its safety and minimal side effects. Homeopathics may be used in an adjunctive or replacement therapy for standard immunization.

INTRODUCTION

Modern immunization started with Edward Jenner. In the 1870s he found that the cause of a disease could be used to treat a disease. He later found that the cause of a disease could be used to prevent a disease. This was a basic concept of ancient medicine that was expressed by Hippocrates (400 B.C.), Marcus Lucanus (50 A.D.), Thucydides (430 B.C.), Mithridates (200 A.D.), and Galen (150 A.D.). Rhazes (900 A.D.), Hahnemann (1780), Mather (1700), Timoni (1660), Pylarin (1673), and later Pasteur, Koch, Metchnikoff, von Behring, and Ehrlich [Books: 24]. None of these people ever knew of antibodies or immunoglobulins; they dealt with observations of disease resistance. Science started to realize that desensitization and immunization were valued treatments using the cause of a disease to cure it [Books: 24].

Most basic immunizations use dead, or inactivated, antigens such as diphtheria and tetanus, among others. These are then used to activate antibodies in the body. A combination of live viral vaccines for measles, mumps and rubella is available commercially. The measles, mumps and rubella vaccine (known as MMR) does not need to be taken by those born before 1957. The Merck Manual considers such people immune to measles and mumps. A rubella vaccine may be given to people of any age. The measles vaccine used in the early 1950s has resulted in evidence that women are now giving birth to children who sometimes need two immunizations, as the first type of immunization seemed to result in a variant reaction to the measles, mumps and rubella.

Re-immunization is recommended for patients who received the killed vaccine alone, or received killed vaccine followed within a year by live vaccine. Re-immunization is recommended for those who receive live, attenuated measles vaccine alone or with gammaglobulin before one year of age. Also, re-immunization is recommended when there is an unclear immunization history. The live, attenuated measles vaccine is not recommended for children with leukemia or other

1 Patients were taken from groups of clients presenting in Denver, Colorado (1990) in New York City, New York (1990), and in Hungary (1990).
IMMUNOLOGICAL AND ELECTROPHYSIOLOGICAL REACTIVITY OF PATIENTS WITH HIV INFECTION

By: Nagy K., Nelson W., Barbas E., Balazs E. Vankonyi V., Heriath A.
National Institute of Dermato-Venerology, Budapest, Hungary 1994

ABSTRACT

The diagnostic and prognostic value of electrophysiological reactivity patterns of HIV infected subjects were compared to complex immunological and virological laboratory markers.

Electrical responsiveness of 22 asymptomatic HIV infected patients were monitored monthly for a 4 month period by Quanta Med 4000, a sensitive multichannel diagnostic biofeedback machine, capable of measuring slight fluctuation of patients' brain waves and skin resistance, whilst the patients are sequentially exposed to a battery of numerous homeopathic nosodes and isodes. This process known as the Xrroid process.

Immunological and virological analysis included determination of CD cell count, HIV, HCV and CMV antibodies, HbsAg, and serum Beta 2-microglobulin (B2M) and Neopterin levels.

In the study - 4000 substances (items) were tested to determine which of these the patient had the most reaction to. The reactivity scores were then analyzed statistically. As a result a profile of electro-reaction is suggested, which considered characteristic of HIV disease in contrast to that of the normal subjects.

After initial evaluation a treatment protocol was designed. Half of the patients received a fatty acid blend and homeopathic medicaments throughout the test. Subjects were instructed to use the products daily and compliance was evaluated in the monthly interview. Reevaluation of electrophysiological reactivity and immunological tests were repeated every month.

B2M level was found decreased in 88 percent of those who received homeopathic treatment and in 30 percent it was found < 3 mg/L, compared to 27 percent of those untreated. Antibody level to CM was also found decreased in consequence of treatment. No changes, however could be detected in CD count and HbsAg and HBC antibody level.

The electrophysiological reactivity test provided information, which suggest that it can be used as a pre-diagnostic method, which might complete laboratory analysis. Complex homeopathy and individual nosode treatment shows some positive intervention.

INTRODUCTION

Reductionism has been a friend to most modern sciences. Reductionism has helped us to build bridges, engines, and much of our industrial world. In biology however reductionism has failed. Reductionism has lead to the development of synthetic chemicals which often produce more side effects and harm than benefits. (ref 1)

Until recently medicine has emphasized reductionism, but now with the aid of computer technology nonlinear fractal analysis of patients' complexity has become possible. With a disease such as AIDS involving a retrovirus a nonreductionistic philosophy makes sense. Classic homeopathic treatment is also too reductionistic for HIV treatment. So a complex treatment program was designed.(ref 2)

In our study we analyzed the fractal pattern of electrophysiological reaction patterns of 22 aids patients and compared their reaction patterns to controls. Significant differences of reaction lead to the development of a treatment protocol which was then tested on 22 ambula-

Electrical Reactivity as a Prescreen of HIV Infection Patients

THE INTERNATIONAL JOURNAL OF THE MEDICAL SCIENCE OF HOMEOPATHY

ELECTRICAL REACTIVITY AS A PRESCREEN OF HIV INFECTION PATIENTS

ABSTRACT

Twenty-two ambulatory AIDs patients in Budapest were studied for xeroid electrical reactivity readings. The electrical reactivity patterns and reactive substances that were in the highest faction of reactivity. In other words, those reactants that were statistically significant are compared in the groups of the AIDs patients taking the AZT as well as the AIDs patients that were treated with homeopathic and nutritional items. The purpose of the study was to assess similarities and consistencies in their electrical reactivity patterns over the course of four measurements. This took place during the 4th, 5th, 6th and 7th month of 1994. During these months there was also a homeopathic and nutritional intervention done on several of these patients to see the effect on blood chemistry profiles denoting AIDS risks and the homeopathic and nutritional intervention are described in the article as the comparative results. Reductionistic techniques of synthetic chemistry have failed with HIV. This study charts a non reductionistic system of analysis of the electrical reactivity patterns of the study participants.

BACKGROUND INFORMATION

Reductionism in science has helped dramatically in the areas of chemistry, nonorganic chemistry, and other non living sciences. In Biology and Medicine however this methodology has failed, often causing more damage than benefits. The science of electrical reactivity allows for testing reactions to thousands of compounds thus developing a nonreductionistic analysis. (ref. 1)

The science of electrical reactivity in the body has been documented in several articles. Two such papers were recently submitted at an international medical diagnostic symposium in Pee's Hungary in September 1994. (ref. 23,24) Copies of these articles are attainable from the Quantum Medicine network on the internet. Also included are articles that totally describes the electrical reactivity factors in medication testing.

To access the internet from the database go to http://osse-net/qmed

Electrical measures of medication testing using ancillary channel skin resistance devices has been shown unreliable, inaccurate, and susceptible to therapist error or intervention. (ref. 28) Reactivity patterns for electrical reactivity are best attained from electrophysiological changes of voltage and amperage along with resistance. (ref. 23,24,25,26,27)

Xeroid is a term which is coined to mean rapid electro-physiological tests of patient reactivity to large numbers of potential reactant substances. A sophisticated electrical device will then measure multi-channel reactivity of changes in skin resistance, skin voltage potential, skin amperage, and capacitance and inductance changes in the body. This is then calculated into a mathematical formula, which is then analyzed for reactivity patterns. (ref. 34)

In our study, approximately 4,000 substances (items) were tested at each measurement to determine which of these substances the patient had the most reaction to. The reactivity of the patient to the different substances was plotted by the machine from the lowest reactivity to the highest. Thus, the patient becomes his own control. The items appearing in this report are only those items
TRANSCRIPT OF THE IUVDT PRESENTATION
ON HOMEOPATHIC TREATMENT OF AIDS

The following is a transcript of the first major homeopathic and electro reactivity paper on AIDS patients, presented at a major STD and AIDS world congress. This and other papers presented at this congress are beginning to show the abilities of natural medicine, especially homeopathy. Homeopathy has the potential ability to offer a cure for the victims of this horrendous disease. While it is well known that Homeopathy offers at least a documented form of symptom management.

START

A wise sufi master, in teaching his students, pointed to the moon. His wiser students looked up and saw the moon, but some of his less wise students looked up and only saw a pointing finger.

There is a problem today with reductionism in science; too many scientists only look for the reductionistic, single variable. Reductionism has failed in biology. Reductionism often looks only at the finger, and is not capable of seeing the larger picture. Reductionism has caused more damage than benefits in the synthetic chemical world. However, reductionism has offered dramatic pathways for profit.

New techniques of analysis must be examined to develop more complex, nonlinear ways of analyzing patients. With this paper we propose an interdisciplinary program involving electrophysiological and bio-electronic engineering techniques of analyzing reactivity patterns in AIDS patients. This interdisciplinary technique allows us to look at more complicated fractal reactivity patterns in the AIDS patients which then help us to determine potential directions for cure.

To do the electrophysiological measurement we use the Quantum Med 4000 device, which made fourteen measures of voltage from brain wave electrodes. In addition, five measures of resistance were performed, accomplishing nineteen different measures of electrical reactivity. A test kit was connected to the computer, which then allowed for approximately 4,000 substances to be tested sequentially for reactivity of the patient.

The ionic relaxation time in the body is approximately one one-hundredth of a second, and this amount of time was found in experiments to be adequate for testing of the reaction to compounds.

This test was accomplished on twenty-four asymptomatic AIDS patients in Budapest, Hungary. This test was performed at the National Institute of Dermato-Venerology in Budapest, this month celebrating its one hundredth anniversary... (I would like to thank Drs. Nagy, Horvath, Barabas, Bhalaz and Varkonyi for their help in performing this four-month study. Their assistance and cooperation was vital, and I would like to take this opportunity to express my appreciation.)

After our initial scan of the patients, we had some exciting electrophysiological results. The AIDS patients tested had severely depressed oxidation levels measured by change in total electrolyte amperage. The HIV patients had significantly lower oxidation potential than the controls. This seems to fall in line with the work of Dr. Montagnier, who presented on the first day of the AIDS workshop his analysis of AIDS patients.

In his presentation on the pathogenesis of Am S and HIV, Dr. Montagnier talked about the dramatic appear-
REPORT ON THE EVALUATION OF POTENTIAL ANTIVIRAL ACTIVITY OF HIGHLY SOPHISTICATED NUTRITIONAL HOMEOPATHICS IN AN IN-VITRO HIV MODEL

AIM OF STUDY

The aim of this study was to evaluate the potential direct antiviral effect of highly sophisticated homoeopathic supplements in an in-vitro HIV model using cultured cells.

MATERIALS AND METHODS

Compounds

The compounds to be investigated are registered in the United States with national drug code (NDC) listings. They are as follows: Fatty Acid Liquescence with added Myristic acid (4/1900, NDC 55541), Retro-WIR (Test) “904044” and Hemo-A Liquitrrophic (Lot #41883, NDC 55541-0126-4). All the compounds were in sterile fluid form, in brown vials.

Cells

H9 human T lymphoid permanent cell line has been used for the antiviral test. Cells were cultured and maintained in RPMI 1640 medium supplemented with 10% fetal calf serum.

Virus stock

For the infection HIV-1 IIIB strain had been used. Viruses were propagated on H9 cell culture, and 5 days after the primary infection 24h supernatant was collected, clarified, aliquoted, and stored at -80 degrees C. Virus concentration, and the evaluation of biological active virus particles was determined by the MAGI (multinucleated activation of galactosidase indicator) assay according to Kinpnt and Emerman (J. Virol 66:2232-2239, 1992). The biological titer of the virus stock was determined as 2x10^5 IU/ml.

Treatment of the assay cells

One million of H9 cells in 1 ml of culture medium in a 12 ml test tube were treated with 1:25 and 1:100 dilution respectively, with the compounds to be tested. This treatment was done 1 hour before the virus infection. Cell incubation with the compounds was performed at 37 degrees C, 5%/CO2 atmosphere.

As control, cell-samples were also treated with AZT (Azidodehydridine, 5 ug/ml, final), an anti HIV nucleoside analogue, inhibiting the reverse transcriptase enzyme of HIV.

Infection by HIV of the treated cells

HIV-1 IIIB virus preparation was added to the test tube containing the cells pretreated with the compound or AZT, and also for untreated control H9 cells in a multiplicity of 0.02 (m.o.i) for 90 minutes. Then cells were washed 3 times with cold PBS (phosphate buffered saline) in order to get rid of the unbound viruses. Cell pellet was then resuspended in a culture media complemented with the compounds, or AZT. Then cells were seeded onto 24-well culture plates as 0.5 million cells/ml/well, and incubate at 37 degrees C, 5%/CO2 atmosphere, 24 hours after virus infection treatment of cells was repeated similarly to that of the pretreatment.
AUTO IMMUNIZATION
NELSONIAN THERAPY (AINT)

By: W.C. Nelson M.D.

In 1994 a major AIDS conference was held in Japan. The overall conference was very successful, and many types of discoveries were encountered regarding prolonging the life of the AIDS patient. One basic conclusion arose from this convention, however. The basic conclusion reported on five major news networks was that whatever we are doing for AIDS research is not working to complete satisfaction. Thereby, a new direction is definitely needed: a new direction for diagnosis, and especially towards cure; must be investigated.

There was an overall plea made at this convention for new directions of research. The previous directions of research have all been around certain synthetic, chemical dimensions. Chemical companies are looking for a magic bullet, some type of immunization therapy from which they could profit after doing their research.

We basically feel that we have this new direction, and that this new direction lies in the field of homeopathy and electro reactivity. In our study of the electrical reactivity of AIDS patients in Budapest, Hungary, we found that there is indeed a specific profile of compounds to which the patients reacted [Studies: 4].

We also treated the patients with the homeopathic pharmaceutical technique which we have outlined in this brief paper. This is the Auto Immunization Nelsonian Technique, in which we took a drop of each patient’s serum and homeopathically succussed it into an immunization product specific to the patient. This would treat the patient’s retro virus distinctly.

Our studies on antibodies such as the study of measles [Studies: 3] and others have shown that homeopathy is quite capable of raising immune activity. Homeopathy was successful in treating many worldwide epidemics such as yellow fever, pestis and others.

Now, perhaps, homeopathy has a potential answer for AIDS.

In our Budapest study [Studies: 4] we also found that there was a type of fatty acid range that these patients needed; not just one simple compound, but a whole range of fatty acids. These fatty acids also seemed to revolve around the mysteric acid. There is a mysteric compound at the end of the AIDS virus. Perhaps this mysteric acid (which is a fatty acid involved in some nutrition) is deficient, or disabled, in the AIDS patient.

We have found that by supplementing the diet with this, we have had positive effects on our AIDS patients. Also we found that there were certain types of natural compounds that also seemed to be highly reactive. These were developed into a formula known as the Hemo A formula. The fatty acid was basically changed into a formula known as Fatty Acid M, the M denoting a touch of mysteric acid. We also provided a touch of an auto immunization formula for the AIDS patients that would help to develop their antibodies against the multiple AIDS viruses.

This is a basic treatise on how to develop an inexpensive, safe and effective treatment for immune deficiency patients. It is our hope that this will help in a wide variety of conditions, in a world that has ever-increasing immune disorders. For centuries, homeopaths have used isodal type remedies; they have taken bodily secretions from patients, homeopathically succussed them, and put them back into the patient’s body for various therapeutic reasons.

This is a type of auto-immunization therapy which is used to build up certain immunities to conditions
INTRODUCTION

Herpes sores develop for many reasons. The herpes virus gets into cells, and can produce these sores. There are several types of herpes including simplex, genitales and zoster. There are many types of virus associated with these. These viruses often hide in connective tissue, especially around the spine, and then come out when there are periods of stress or metabolic imbalances that produce the right environment for them to leave. Once they leave the spine and go into an area such as the mouth, nose, vagina, penis, or other attack area, the herpes virus is ripe for disablement by the immune system. The key factors of the immune system that deal with this are B cells and their antibody activity.

TREATMENT

Herpes virus does not like cold. Often we see heat produced in the area before herpes strikes, and heat afterwards. When we place a cold source onto the actual lesion, we can observe that it might take several ice cubes to suck out the heat. We can also use ice cubes to massage the areas of the vertebral column where the herpes might have been; if the herpes were hiding in the cervical column, it might have left because of a disturbance of stress or metabolic activity. By finding the sore areas around the column and massaging them deeply with ice, we might prevent the herpes virus from moving back into the vertebral column where it was originally stored. By palpatting these areas, we find the ones that are sore on touch (not on movement). By massaging this area with ice cubes three times a day, we prevent the herpes virus from returning. The virus can then be disabled in the bloodstream.

The formula for herpes, HRPZ, is a homeopathic blend of high X potencies of the various viruses, so that there are no viruses, but only their involved energy. This helps to stimulate the immune system to surround the herpes virus with antibodies and disable it. The HRPZ formula also has homeopathics in it that help with the basic intrusion of the virus when it starts. This initial inception of the virus, when it escapes from various cells, can be dealt with by using the HRPZ formula. On this first day, the patient should take three drops every twenty to thirty minutes. This helps to deal with the symptomatology and stimulate the immune system against the virus.

The herpes virus then works by penetrating the cell membrane of the area, and then by using the DNA of the cells it replicates and spreads. If the patient is in a state of fatty acid deficiency, it is easier for the virus to penetrate the cell walls because they are made of fatty acids. Using the Fatty Acid Liquecence at ten drops, once a day helps to prevent intrusion of the herpes virus. By using ten drops twice a day on initial inception, we can help to bring fatty acids into the cell walls to prevent viral spread.

Calcium is the key ion that sits on the membrane. In a state of calcium deficiency viruses spread more quickly. By taking two or three Calcium Lactate pills with
Homeopathic Treatment of Epstein Barr Virus Infections

HOMEOPATHIC TREATMENT OF EPSTEIN-BARR VIRUS INFECTIONS

Nosodal Therapy for Viral Chronic Fatigue

This study was performed in 1987 at the Survival Center Clinic in Ravenna, Ohio, U.S.A. Revalidation and further clinical testing are currently being performed by medical doctors at the Clinic in Budapest, Hungary, and by the doctors listed above.

ABSTRACT

Homeopathy has been proven effective historically in many different viral conditions. Recent experimental evidence has shown homeopathy to be effective for flu, measles, AIDS, and other viral conditions.

In this article we review some of this literature and research, and we explore homeopathic treatment of Epstein barr and mononucleosis conditions.

INTRODUCTION

One basic concept of treating like with like (the hallmark of homeopathy) was also developed by Jenner in his exploration of vaccination. In developing vaccination he sought to find that which caused the disease, so that it might cure the disease; the like treating like precept. This led to the discovery of vaccination principles, which have been utilized historically for a host of general conditions and for many different viral conditions. Homeopathy has been shown effective in treating yellow fever, flu, and viruses, and a host of other infections.

In its two-hundred-year-old history, homeopathy has been very effective in the treatment of many epidemic cases as well. Nosodal homeopathy utilizes the various viruses, bacteria and fungi to then treat the patient [Studies: 2, 3]. This has been shown to have the ability of increasing immunological function through antibodies [Studies: 4].

Homeopaths of several types of bacteria also have been shown to have nonspecific immune stimulation effects, meaning that the endotoxins of certain bacteria are capable of stimulating the entire immune system. Thus these bacterial nosodes can have stimulating effects on the overall immune system, which can then better attack various viruses. Thus this type of homeopathic antibiotic regime can be utilized in a virus condition, whereas normal antibiotics are contraindicated in viral conditions. Classic homeopathy as well as combination homeopathy have also been utilized in the treatment of several different flu conditions [Studies: 9].

Thus homeopathy seems to have a very good capacity for a safe and effective treatment for many viral conditions. In our clinic we have treated several hundred conditions of Epstein barr viruses with homeopathic nosodes of the virus. In this short study we review a collection of thirty-five patients whose titers were evaluated in pre- and post-tests of the Epstein barr virus as an indicator of mononucleosis. First, however, let us review the Epstein barr virus. Epstein barr virus, an infectious type of virus spread around the world today, has been shown to be a causative agent in increasing numbers of diseases. The Epstein barr virus causes infectious mononucleosis when the patient’s liver is weak. Epstein barr also plays a role in the progression of certain malignancies, including nasopharyngeal canecmoa. Also Epstein barr has been linked to Burkitt’s lym-
ANTIBIOTIC DISRUPTION OF BOWEL FLORA

Antibiotics as a co-factor in AIDS

By W. Nelson, LPCC, M.D.

ABSTRACT

The antibiotic revolution was touted as one of the best discoveries of modern medicine. There have been however, a derogatory side effects of these antibiotics. The environment has been effected as well as the patients. In this article we look at the disruption of the bowel flora by antibiotics. And theorize about how this disruption of the bowel flora, could be a contributing factor to the AIDS epidemic. The article also reviews the bowel flora in naturopathic terms for treatment and diagnosis.

INTRODUCTION

Reductionism in science contributed widely to the formation of different thermodynamic understandings. Reductionism allowed us to build thermo-dynamic engines, buildings, radios, televisions, and a host of other non-living things. These mechanical devices were then easily analyzed with reductionistic theory where complex situations could be reduced to simple variables. The extreme complexity of living systems however, has not responded well with reductionistic analysis. In fact, reductionism has dramatically failed in Biology and Life Sciences, in its ability to help mankind.

The body being a quantic event responds more to a non-linear quantic type of analysis, rather than reductionistic theory.

Reductionistic theory flourished in the first part of this century. And was utilized in analyzing Biology where complex pharmacological entities such as, herbs and plants were broken down into their constituent parts and analyzed with reductionistic techniques.

The reductionistic techniques always look for the key ingredients, and ignore the other so called inert ingredients. Not realizing that these inert ingredients help to make the whole of Biology and that no place in Biology was their just key ingredients without the existence of inert ingredients side by side. Thus, the problems started to be generated when synthetic chemical companies first found that they could call “reproduce” these biological compounds.

The synthetic biological compounds were impostures and created different problems in the body. Reductionistic theory has always tried to over-simplify things. In our article on the illogic of chemical synthesis we expand on the problems of synthetic medicine.(ref Illogic of Chemical Synthesis)

One of the over-simplifications in medicine was that of a germ theory. Where the ability of the immune system to balance itself and the beneficial effects of the different micro-biological organisms were ignored. Different germs were looked for to understand the different causes of disease. In fact, even the person who started the germ theory “Louis Pasteur”, on his death bed realized that it’s not just the ‘fauna’ but, the ‘flora’ which allows for the existence of the germ to grow.

This reductionistic type theory also, was unable to understand or analyze extremely complex events. Thus the existence of the bowel flora and the fauna of the different types of micro-organisms in the bowel was not really analyzable by reductionistic theory and thus modern medicine largely ignored it. The bowel flora is extremely important part of the natural process. The bowel flora allows us to create nutrients, detoxify the
NATURAL TREATMENT OF CHILDREN WITH AIDS

A Report of the findings presented on AIDS and children at the 1995 IUVDI World STD/AIDS Congress

First Presented by: Michio Tani, M.D., President of the Eastern Japanese Medical Institute, Japan
Edited and Reported by: Muñoz Ltd., Dr. William Nelson, LPC; Professor of Comples Homeopathy, College of Practical Homeopathy, London England / Singapore, March 20, 1995

ABSTRACT

At the 1995 World AIDS Conference in Singapore, several key articles were presented on natural and homeopathic treatments for AIDS. Natural therapy is indeed getting more attention throughout the world. This article is a summary of a Japanese presentation on herbal and homeopathic treatment of AIDS in children. The article reviews the dramatic success of homeopathic treatment versus AZT treatments and shows a heightened level of survival and decreased mortality statistics in the homeopathic group.

INTRODUCTION

New directions of therapy are needed in AIDS. Much research has been started into co-factors that might be responsible for facilitating AIDS. New co-factors such as antibiotics and removal of adenoids, tonsils, and appendix, and other conflicts of allopathy medicine are now being reviewed by scientists. These and other immuno-suppressions which are happening in our societies and environments today might be responsible for the elevated factors of AIDS. The dramatic use of these allopathic techniques have extenuated over the years and might have reached saturation points that could then cause complications and allow the AIDS virus to do its damage. In looking to new directions, people have looked into natural therapies. At the, 1995 Singapore AIDS conference, it was indeed a pleasure to sit through doctor Tani's presentation on his results with homeopathic treatment of AIDS in children. His paper titled "Clinical Recovery of Pediatric AIDS by Natural Therapy" was indeed intriguing. Let me present some of the basic statistics and philosophy presented in this discussion by Dr. Tani and Dr. Rodica of Constantine, Romania.

Fifty-six pediatric AIDS patients were studied. Eleven were symptomatic HIV and 29 had clinical AIDS. The 56 pediatric patients were separated into 6 treatment groups and studied for a 30 month period. Natural remedies utilizing a Chinese herbal blend and soups were studied in contrast to AZT.

The different treatment groups consisted of:
1. herbal tea*
2. herbal tea*, astol (phaseolus radiatus) and soup,
3. herbal tea*, astol, soup, and AZT,
4. just AZT, and
5. a control group.

* Chan Bai San tea.

Dr. Tani and Dr. Rodica observed clinical and symptomatic findings in CD4 counts during the 30 months. (see Chart 6) There conclusions was that their natural treatments produced curative effects. Favorable results were shown with the natural treatments over the course of time. Twenty-six percent (26%) or 9 cases were well recovered to normal conditions. Morbidity was also remarkably reduced 1/10 compared to the other
ANTIBIOTICS AS A PRIMARY CO-FACTOR IN AIDS PROGRESSION

Presented at the 1st International Conference of the Mor Kaposi Research Foundation, Convergence of AIDS and Cancer Research, Budapest, Hungary August 27, 1996

ABSTRACT
The world has now recognized the demise of antibiotics. Iatrogenic damage, resistant strains, immunosuppression and dependency have now challenged the core of one of the prides of modern medicine. The vast marketing of antibiotics has left medicine with a severe crisis. Reductionistic research and philosophy has been used for financial reward of the chemical companies. These antibiotics have been shown to have a wide variety of deleterious side effects, including effects on the bowel flora. We also theorize about how this disruption of the bowel flora, could be a contributing cofactor to the AIDS epidemic.

The populations with the greatest antibiotic use are the highest risk for development of AIDS. A balanced bowel flora could be essential in defense against the virus propagation into the deadly disease. The antibiotics might then increase the progression of risk in the disease. This hypothesis, because of its non Reductionistic complexity is difficult to challenge in a single study. Funding of such a study would also be extremely difficult, in light of the challenge to synthetic chemistry. This brief article is but an introduction to the concept. For further information please refer to the collection of studies in the Journal of the Medical Science of Homeopathy, special issue on AIDS and vitusses.

INTRODUCTION
Chinese Proverb “A man who sees a wrong and does not try to correct it, is not a man”

Reductionist science has contributed widely to the development of society. In reductionism a scientist will reduce an extremely complex system to a set of very limited observations. Reductionism will allow us to build engines, buildings, radios, televisions, and a host of other non-living things. Reductionistic science works well in nonliving situations, where complex situations could be reduced to simple variables. The extreme complexity of living systems however, has not done well with Reductionistic analysis. In fact, reductionism has dramatically failed in Biology and Life Sciences, in its ability to help man kind. Today science has learned of the benefits of, nonlinear analysis, chaos theory, quantum analysis, fuzzy numbers, and Fractal mathematics. All of the systems of science have learned of this trend except one, medicine. For in medicine Reductionistic science has been responsible for the evolution, sale, and financial reward of chemicals developed with inappropriate two variable statistics.

Reductionistic theory in science flourished in the first part of this century. And was utilized in analyzing Biology where complex pharmacological entities such as, herbs and plants were broken down into their simple parts and analyzed with Reductionistic techniques. Reductionism was used to develop synthetic chemicals for the pharmaceutical companies. Natural compounds were found to pharmacological effects, but natural compounds are not patentable. Thus the chemical companies would try to synthesize the compounds and use Reductionistic statistics to prove safety and efficacy. But iatrogenic damage of these compounds grew dramatically. The Reductionistic statistics worked well for pro-

Clinical trials of complex homeopathic treatment of mastopathy (fibroadenomatosi) of mammae in comparison with results of traditional chemotherapy

AUTHORS: PENEZIA O., GOROSHINIKOVA T., FOMOVSKAIA G. Institute of Biochemistry, Molecular Immunology Department Leontovich 9 Kiev, Ukraine, 252030.
NOSTRA P. Kavetsky Institute of Experimental Oncology, Vasilievskaya 45, Kiev, Ukraine, 252022
CHESHUK V., LAKOTOSH V. Kiev Medical University, Oncology Department, Verhovynnaya 69, Kiev, Ukraine

KEY WORDS: mastopathy, complex homeopathy, fibroadenomatosi, nosodes, sarcodes, degenerative tissue, cohn venen, Arndt-Schulte effect, chemotherapy.

ABSTRACT

100 women with mammae mastopathy (20-57 years old) were observed and treated during 1994-95. 31 patients were treated with traditional medicinal therapy (Chemotherapy, kalii lodati 0.5, etc.) and 59 patients were treated with a complex homeopathic oral therapy of Degex, Degex Ligasecence, Fatty Acid Ligasecence, Shark Cartilage, and topical application of the Mustard Poultice. 20 Healthy volunteers from Kiev were also studied for their blood immune function.

Patients were evaluated for follow-up several times during the 12 month clinical study. All patients are physically examined by mammologist, surgeon, gynecologist, and serologically by the biochemist. Examinations were performed before starting the treatment, during the study and after completion of the study. Ultrasonography, thermography (of mammae) and mammography were performed in the pre-post fashion. Immunological serologic parameters such as T-cell subsets, T-cell ratio, expression of oncotic antigens, carcinoembryonic antigen (CEA), and trophoblast specific beta-I-glycoprotein (TSG) were performed on 10 patient random sampled from each group. Serologic tests are done by flow cytometry, also performed in prepost fashion. The results were compared to the healthy volunteers as well.

Positive improvements in clinical symptoms was observed in 50% of patients from the traditional medicinal therapy and greater symptomatic improvements were observed in 87% of the patients from the homeopathic treatment group. The results were surprising to the researchers not familiar with complex homeopathic treatment. The pretetst of abnormal T-cell subsets shows that about 50% of patients from both groups had abnormal CD4+/CD8+ cell ratio. After treatment the percentage of abnormality was 80% in the traditional medicemelntal and 20% in the homeopathic group.

Abnormal expression of oncoticel antigens on the peripheral blood lymphocytes of the patients also was different between the two groups. The traditional medication produced a rise in the oncoticel antigens to 50% where in the homeopathic the oncoticel antigens remained normal at 10%. Further pointing to the greater efficacy of the homeopathic treatment. The study discusses the contrast of the philosophy of homeopathy versus traditional synthetic chemotherapy methods.

Cell culture, animal, and now human studies point to complex homeopathy as a safe and effective method of cancer therapy. The study reviews other supporting literature.
EXPERIMENTAL EVIDENCE FOR HOMEOPATHIC TREATMENT OF CANCER IN CELL CULTURE AND ANIMAL POPULATIONS

ABSTRACT

Certain complex homeopathic preparations were prepared from homeopathic remedies known to possess anti-carcinogenic tendencies. These compounds were then evaluated in cell cultures for their toxic effects as well as for their anti-carcinogenic effects [10]. Proceeding the cell culture studies, animal (marine) studies were generated to measure the effects of the compounds on cancer growth injected into mice. A test group of patient populations was involved with homeopathic treatment of cancer as well. The discussion also compares clinical practitioners' experiences in using these formulas with cancer patients.

The conclusions of the studies show that the formulas indeed are not toxic to healthy cells, and do have the ability to inhibit cancer metastasizing and growth in cell cultures, animals, and human test subjects.

HYPOTHESIS

It is the hypothesis of this collective study that homeopaths can be developed which have positive treatment effects on cancer. To test this, and to study the full effects, we set up tests for cancer in cell cultures, cancer in animals and cancer in humans.

The set of studies outlined in this paper reflects a six-year experience and analysis of these various remedies.

First, let us discuss the general formulas that were developed. It has long been known that part of the effect of various snake venoms is their necrotizing ability, or ability to produce degeneration in cells. Homeopaths long ago learned of the Arndt-Schultz principle in which the action induced by a large quantity of a poison is opposed by the action of a small quantity of the poison [13]. This helps to explain why different cobra venoms and other venoms have been used by homeopaths to fight degenerative disease and cancer. The homeopaths of India found that dilute cobra venom was the most powerful of all venoms in reversing the effects of degenerative cancer.

Research shows the positive effects of interferon and interleukin to stimulate the immune system to deal with these carcinogenic diseases [Books: 11, 12]. Homeopaths in Germany have shown that the tinctures taken from the mistletoe plant were also powerful in dealing with carcinogenic activity. This plant comes from the viscum album family [5]. This type of degenerative plant, which grows and infects other trees and plant life, has been found to have positive homeopathic effects in inducing the human immune system to deal with disease. German homeopaths have been using eight forms of this viscum album for a variety of diseases [14].

Our Neo P/Degex was chosen as a blend of all three interferons, all three interleukins, eight viscum albas and eight cobra venoms. A variety of potencies were used in this formula to help stimulate other levels of healing (see Appendix).

Another formula we wish to evaluate is a variation on a Hoxxy formula. Hoxxy was an herbalist who worked and practiced in the United States in the late 1940s and 50s. His father was a farmer who observed that certain animals with cancer (which therefore had to be put to pasture) would consume a specific set of herbs. Some of the animals would then recover from the cancers, and would be able to return to active farm life. Hoxxy's father saw that
TREATING CANCER WITH HOMEOPATHICS

ABSTRACT

In this brief article we review various homeopathic methods of treating cancer including herbal, nutrition and other types of therapy.

KEY WORDS

Cancer, neoplasia, Degex homeopathic, Degex Liquecence, Oriental Herb formulas, Mustard Positice.

INTRODUCTION

Neoplasia (cancer) is a dramatic disease that has perplexed modern man. Most allopathic medicine centers on symptomatology, and not on how to rid the body of disease and provoke cure. Many things in our environment have occurred which rob the immune system, and thereby cause cancer.

Cancer can definitely be seen as a fault of the immune system. People develop cancer from time to time, and the immune system breaks them up. This is well documented. It is wrong to think that cancer is something that happens only to the sick. The sick, who have immune difficulties, cannot prevent cancer from developing. Thus cancer is definitely a problem of the immune system.

Stimulating the immune system is the most rational of therapies in dealing with cancer. Years ago the Nobel Prize in Medicine was given to a team of researchers in Argentina, who determined that chemotherapy, radiation and surgery were bad treatments for cancer and that only by stimulating the immune system could real progress be made.

With this in mind a series of homeopathic products has been developed which deals with this deadly disease. First is Degex homeopathic. It has long been known that snake venoms contain degenerative factors that stimulate degenerative disease, or cancer. One of the most potent of these is Cobra venom. Cobra venom has been known to start degenerative disease. In fact, in India, if a person is bitten by a cobra, he must be buried quickly so that the tumors or degenerative conditions do not start to manifest. We have found that by using a small amount of this venom, we can reverse those factors. We point the reader to the study on "Venoms" for a further understanding of this mechanism. So our homeopathic of Cobra venom can be helpful.

Along with this Cobra venom in our Degex homeopathic, we use a low potency of Interferon A, B and C; as well as Interleukin 1, 2 and 3. These also stimulate the immune system. German researchers have found that certain forms of mistletoe (Viscum alb in Latin) also have reversal effects homeopathically on degenerative disease. Several types of viscum alb are blended into the Degex. This formula after quantum quality control has been developed finely to stimulate the immune system to deal with degenerative disease. This formula can be used preventively because it is safe and natural.

Degex Liquecence, however, offers a different technique to work against cancer. It has long been observed that cancerous animals, when let out to pasture, are drawn towards certain plants. This observation led to the discovery of Periwinkle. Periwinkle had chemo toxic agents, which later were developed into modern chemotherapy. Hoxy among others was able to see this, and develop a blend of herbs that were all known to have chemo toxic, or

ABSTRACT

In this short profile we review the clinical protocol and results of our medical team on treating benign fibrocystic disease of the breast. It was found in our protocol that fatty acid deficiency, stress, and caffeine, nicotine, and other drugs were part of the profile. Thirty patients with fibrocystic disease were evaluated and treated with homeopathic and naturopathic modalities. Eighteen of the patients responded to the therapy quite well. A short review of the protocol and theory are explained in this article.

INTRODUCTION

Fibrocystic disease of the breast, also known as chronic cystic mastitis, is a benign and a common condition of the female breast. It occurs in fifty percent of premenopausal women. The fact that new cysts do not appear after menopause leads us to suspect that ovarian hormones are involved in the etiology of this disease. Pain or premenstrual breast pain is a frequent symptom, and the cysts may be tender. Most of the time this condition is without symptoms, and patients generally seek medical advice because of accidental palpation of one or more of the cysts. These cysts usually occur on one side only.

Most of the time they occur singly, but multiple cysts do occur. One third of the women examined by biopsy show some degree of proliferative hyperplasia. Often the cysts develop into breast cancer. The risk of cancer increases dramatically if the woman smokes between the ages of twenty-five and thirty-five, and if there is a family history of the disease [Books: 1].

In our treatment protocol, it had been found that there were several conditions that increased the risk of this disorder in women. One was found in caffeine products such as colas, coffee, and chocolate. Caffeine seems to have a detrimental effect on the female hormonal system and increases the risk of fibrocystic disease. One of our treatment protocols was to remove these caffeinated products from the diet. Fatty acid deficiency and the inability to handle fatty acids properly also seemed to be a common profile occurring in our clinical setting. Fatty Acid Liquescence was used to supplement fatty acids and to encourage patients to eat fresh fruits and raw vegetables on a daily basis to get their full range of fatty acids.

Stress is another variable that seems to relate to an increase in fibrocystic disorders. Patients in the protocol were encouraged to use stress reduction twenty minutes a day as part of their therapy.

It was also found that the Degex homeopathic, as well as the sarcolad homeopathic treatment of Lymph, Spleen, Mammary; had a profound effect by helping the body to diminish the size of these lesions. Thus the total protocol of Fatty Acid Liquescence, Degex and Lymph, Spleen, Mammary made up the threefold homeopathic treatment protocol for our patients.

Thirty female patients between the ages of twenty-eight and fifty were evaluated, and were found to have fibrocystic disease. They were treated with the above protocol. Biopsies were not performed, but mammogram and...
Nutritional Deficiency of Fatty Acids

NUTRITIONAL DEFICIENCY OF FATTY ACIDS
(Demyelination Syndrome and Other Disorders of Fatty Acid Metabolism in the Body)

1997

ABSTRACT

In this short study we give an overview of fatty acid nutritional deficiency and its implications. This illustrates the need for fatty acids to be utilized in any doctor's office. Viral disease, demyelination syndrome, and other factors involving fatty acids are reviewed.

INTRODUCTION

Dr. Chyle, in his early work at the Cleveland Clinic, was able to separate various tissues into their fatty components with a cold process extraction. He was also able to extract from these tissues some of the RNA/DNA products, which he called protomorphogens, and take them through a high-temperature process. By combining these two factors in a mineral bath he was then able to produce autogenic, or self-made, cells. This work is reviewed in "Quantum Biology", as well as Royal Lee's book, "Proto-morphology" [Books: 1, 22].

Chyle was one of the first to point out our dramatic need for fatty acids. A large percentage of the fatty acids in the body are located in cell membranes. Also circulating through the blood stream is a free fatty acid pool known as the FFA pool. Thus as cells break down they must release these fatty acids and then replenish them from the free fatty acid pool cycling through the body.

There are many different fatty acids depending on the number and strength of carbon bonds as well as the occurrence of various compounds that bond to various sites. We talk about unsaturated fatty acids as being the ones that have open ends. These occur mostly in the plant kingdom and largely in oils such as canola oil, safflower, sunflower and others. The thinner the oil is, the richer the unsaturated fatty acids are; the thicker the oil, the more likely that the fatty acids have been saturated. Thus a polyunsaturated oil is one that has many unsaturated components.

The empty carbon holes in the unsaturated oils allow the fatty acids to pick up various types of free radicals and help in detoxifying the body. Thus the free fatty acids are important free radical fighters in the body.

The myelin sheath over many nerve fibers of the body is a complex of lipo protein layers formed early in life by the oligodendroglia in the central nervous system and by Schwann cells in the peripheral nervous system. These two types of myelins differ chemically and immunologically. They do serve the same function: to promote and insulate transmission of neurological impulses along the axons.

There are metabolic disorders such as PKU, amino acid urias, proteinuria, Tay-Sachs, Niemann-Pick, Gaucher's disease, Hurler's syndrome, and leukodystrophies, all of which can affect the developing myelinated sheath, mostly in the central nervous system.
A SHORT REVIEW OF FATTY ACIDS IN TREATMENT OF pH DISTURBANCE

ABSTRACT

Dr. Revici and Crile made the point that life requires fatty acids. In fact, every cell membrane is made up of fatty acids. This article briefly reviews some of the basic history of this, and sets up a one hundred-patient study of intervention showing fatty acids to be helpful in treating patients with pH disturbances.

Fatty acid deficiency is the number-one nutritional disease today, and Fatty Acid Liquescence is a powerful treatment factor. Many cancer conditions can be started by a fatty acid deficiency.

KEY WORDS

Revici, Royal Lee, Crile, Fatty acid, pH disturbance, Fatty acid Liquescence

INTRODUCTION

Dr. Revici in his work on morphology found that blood pH was extremely important in disease. It was reflected in the pH of the urine; blood pH was difficult to measure. Dr. Revici also pointed out the relationship of fatty acids to cancer. Some cancers resulted from fatty acid deficiency where the membranes of the cells become too porous and let toxins in and nutrients out.

Dr. Revici found that fatty acids were indeed important in metabolism. These fatty acids could be destroyed in cooking. In fact, temperatures at approximately 106°F could destroy the bonds in fatty acids and set up rancidity factors. Not all fatty acids are so heat-labile; only a handful. Some of these are indeed needed for health.

We have shown that these fatty acids have factors that are problematic with heat. Over-cooking has created some problems for fatty acids. Revici also remarks that cell membranes give up their fatty acids in response to stress; stress that sets fatty acids free and allows them to bind with chlorinic in an irreversible bond. Thus stress and over-cooking have set up a situation in which fatty acid deficiency is the number one nutritional disturbance of the body.

Fatty acids are the precursors of our sex hormones, make up the cell membranes, and have numerous other functions inside the body. So compensating for fatty acid loss is a very important part of any nutritional program.

Since these compounds are destroyed at temperatures that even light cooking can reach, we must use formulas from cold-processed oils and compounds. When we attempted to make these into pills, we learned that the gelatin corporation and other companies that had the encapsulating materials exposed the inside to temperatures of around 115°F. This could set up rancidity factors, and was inappropriate for a true fatty acid compound. Thus to make fatty acid compounds including fatty vitamins, essential fatty acids, Evening Primrose oil, fish oils, borage oil, and many others is very complicated. Also, they would have to be in liquid form. We created this as the Fatty Acid Liquescence.

Revici remarks that these fatty acids can be utilized to stabilize the body if there is a pH imbalance. This pH imbalance is the major predisposing condition for cancer.

In our study one hundred patients were chosen who had a urinary pH of 5 or below and a specific gravity of 1.030 or above.
Homeopathic Treatment of Smoking, Addiction, a Protocol Guide and Research Study

HOMEOPATHIC TREATMENT OF SMOKING ADDICTION,
A PROTOCOL GUIDE AND RESEARCH STUDY

(Desensitization of Cigarette cravings with Complex Homeopathy)

ABSTRACT

This is a paper on using a graduated desensitization program to help a group of twenty-three smokers become free from nicotine and tobacco dependency. They were tested for nicotine dependency. Successful treatment resulted in over twenty of the cases, showing both short- and long-term results in dealing with smoking addiction. Complex homeopathy is shown to be a possible treatment for stopping cigarette addiction.

KEY WORDS

Nicotine, smoking, addiction, vitamin C, Anti-Smoking I, Anti-Smoking II, Lung Liquescence, Hygyl; Heart, Lung homeopathic, endorphins, Endorphin homeopathic, Crystallized Cell Salt, Substance Abuse

INTRODUCTION

Cigarette smoking and other types of nicotine usage have been with us for many years. The use of the natural herb known as tobacco as a stimulant has been extreme, and has complicated the health of many people. In fact, recent evidence shows that over seven hundred fifty thousand deaths a year occur in the United States as a result of smoking. World-wide estimates of smoking deaths well exceed the multiltions per year because of this habit. Dramatic evidence now shows conclusively that smoking is a drastic health risk.

Nicotine is a highly addictive substance. Manufacturers and retailers of these tobacco products try to ignore the fact that they are making accessible, a highly addictive substance that can have drastic detrimental effects on health. This type of substance abuse requires a complete reconsideration of the process of how and why we let such companies sell such a drastically harmful product.

For the homeopath or naturopath a safe, natural process of bringing patients of cigarette addiction is very important. To this end we have developed a series of complex homeopathic treatments that can help the patient in this fight against addiction.

We have developed a two-step desensitization program for this. One has a concentrated amount of nicotine...
A HOMEOPATHIC REVIEW OF INSET, SPIDER, SEA LIFE, SNAKE AND OTHER VENOMS
(Special attention to degenerative disease)

CHIEF EDITOR: Judith Nagy, M.D., Independent Medical Editor, Budapest, Hungary
EDITED AND VALIDATED BY:
Istvan Bandics, M.D., Budapest, Hungary

Dima Sasharov, Ph.D., Kiev, Ukraine
Tony Hughes, D.A.C., Dublin, Ireland
Peter Bartlett, D.O., London, England

ABSTRACT

In the following article we review both the mechanisms of action of homeopathic use of venoms and a proposed mechanism of action. Homeopathic venoms are a key part of the treatment for degenerative disease. Since many of these venoms cause cellular degeneration in raw dose they can reverse some degeneration in dilute homeopathic form. A total review of the world of venoms is proposed with many recommendations for homeopathics, as well.

KEY WORDS

Amph-Schutz, Law, Wilder's Law of Initial Values, Reversal, Poison. Homeopathy, Cancer, Degenerative Disease, Coagulation, Enzymatic, Post synaptic, Pre synaptic Toxins, Cytotoxic, Hemolytic, Proteolytic

HYPOTHESIS

Many different venoms have been used historically in medicine by many cultures. Snake venom in particular has achieved much attention throughout the ages. The snake was thought to represent death, but also to represent aspects of life. It has been part of deep mythology in almost every culture.

The symbol for healing, the staff with the snake around it, is used by the American Medical Association as its signature. Many aspects of healing are connected to snakes.

Venoms were found to have many different effects for both medicine and biology. As early as 1737 Geoffroy and Hennault observed that the blood from cats and dogs bitten by vipers did not coagulate. In 1787 Fontana found that when he injected a rabbit in the jugular vein with a small quantity of the same venom, this caused immediate death. On opening the vessels he found that the blood was coagulated.

This was later put together in 1899 by an author named Phisalis, who found that there were two distinct types of activity of this viper venom. One was an anticoagulant at high doses, and the other a coagulant at low doses. This was part of the first finding that some compounds often had various effects at different potencies. The amount of dilution could sometimes accomplish an influx, or a distinct difference of action in potencies or dilutions. This was later developed as the Arnott-Schultz law of pharmacology.

Dr. Issacs remarks that the effect between alpha receptors and beta receptors in the body is not a factor of different compounds that stimulate results, but different amounts of the same compound. Different dilutions can have different effects on neurotransmitter points within the body. This is key in the understanding of homeopathy, especially when we understand various snake and insect venoms.

In 1854 Brainard found that venom in blood taken from animals bitten by crotaulid was found to cause non-coagulation. In 1860 Mitchell found that the toxic secretion of the Crotalus adammense prevented blood from clotting in vitro. In 1893 Martin cited that the venom of elapidae (an example of which is the pseudocelis phyririacus and the naja elapidae scutates) coagulated blood in the...
TREATING POLYPS AND ADHESIONS WITH COMPLEX HOMEOPATHY

ABSTRACT

In the course of a medical process a naturopath reports on several cases involving polyps and adhesions, and the success of using a complex homeopathic product for polyps and adhesions.

KEY WORDS

Polyps, adhesions, Polyps & Adhesions homeopathic

INTRODUCTION

Polyps, which are non-cancerous growths, emerge in some patients without real explanation. Many of these polyps occur in the intestines or sinuses, and some in other parts of the body. Their growth baffles science.

Homeopathy has long possessed products that are recommended for cases of polyps. Adhesions occur when parts of the body, such as the small and large intestines, adhere to each other. The products used for treating polyps are very similar to the products used in treating adhesions in the singular homeopathic field.

Thus a product was developed that was designed for treating polyps and adhesions as a complex homeopathic. It would involve saccodes, nosodes, and other classical formulas, most importantly, that of graphites. This formula was then used to treat polyps and adhesions. Over the last two years six patients have presented with polyps and adhesions.

The first case of polyps was that of an eight-year-old girl who had learning disabilities, and had three surgeries to remove her intestinal polyps. These polyps appeared for no apparent reason. There was no inherited tendency towards this, but the polyps did seem to regrow with great voracity. The child was treated with Polyps and Adhesions formula, and within ninety days a medical investigation found that the polyps were shrinking. A month later, the polyps had disappeared, and the child's grade level had improved. She was taken out of the learning disability group.

In another case a six-year-old boy had intestinal polyps. There were no other symptoms other than intestinal blockage, which led to the inspection that found the polyps in the large intestinal tract. The doctor had already removed them once, but they regrew. The boy's parents were concerned that the surgery was not getting at the cause, but was only dealing with the surface issues. We treated him with the Polyps & Adhesions formula for two months. No polyps have reappeared in the child during the last seven years.

Another case involved a twenty-three-year-old woman with nasal polyps. These polyps had been operated on three times, and they seemed to form without explanation. The patient presented with rhinitis and sinusitis symptoms, as well as abdominal allergies to particles including house dust, ragweed, and miscellaneous grasses. This did not explain the formulation of the polyps. The Polyps & Adhesions formula was prescribed, as well as homeopathic desensitization of the allergies through allersode therapy. Within six months the rhinitis had cleared, and the polyps had disappeared. The polyps have not returned in the last nine years. The initial therapy lasted for only six
ABSTRACT

In this short study we review the clinical treatment of 38 endometriosis patients presenting in a medical clinic over the course of a 4 year period. Treatments of the 38 patients showed 35 were dramatically helped by this form of therapy. Causeative factors and theoretical factors of the results are discussed in the article.

INTRODUCTION

Endometriosis is the presence excess of endometrial tissue in abnormal locations found in women. This type of disease is very common in women of reproductive age. Intra-abdominal endometriosis may be due to retrograde flow of menstrual tissue through the fallopian tube. But the finding of endometriosis at distant sites of nasal mucous and lung, suggests vascular or lymphatic transport of the endometrial fragments. Another possible cause is the transformation of coelomic endometrial glands. It is estimated that approximately 50 percent of infertile women have endometriosis, thus it should be suspected in any woman with infertility. Dysmenorrhea, particularly after many years of pain free menses, and dyspareunia also can occur as a sign of endometriosis. Super pubic or rectal pain may be present as well as abnormal bleeding during menses. Examination may be normal, but may reveal lesions on the vulva or cervix in the vagina, umbilicus or surgical scars. There may be retroverted or fixed uterus, enlarged ovaries, or uterosacral nodularity. If there is no external visible lesions, the diagnosis can be assisted with laparoscopy. Diagnosis can also be found with ultrasound and by symptomatology. Staging of the extent of the disease into mild moderate severe form is important in evaluating response to therapy and also to tell the seriousness of this to the doctor and to the patient. Normal medical treatment danazol, medroxyprogesterone acetate or oral contra-
ceptive pills have shown dramatic side effects. Thus natural therapy needs to be developed and researched.

The most common side effects of the drugs are weight gain, fluid retention, fatigue, decreased breast size, acne, oily skin, hot flashes, muscle cramps, and emotional liability. Bloating, weight gain, breast tenderness, chloasma, irregular bleeding, and depression can also result from the drug type therapies.

Endometriosis is the second most common gynecological disorder requiring hospital treatment. More and more women are being diagnosed as having endometriosis. It is known that the hypothalamus with the pituitary, in the normal female body, should send out a tiny bit of growth hormone that helps stabilize the body. This dosage of the growth hormone is approximately 5 units for every 90 seconds. When there is excess stress, the hypothalamus and pituitary will put out more of the growth hormone into the body. This is one of the suspected causes of endometrial growth as then these tissues are excessively susceptible to these growth hormones. Thus stress is one of the basic causes of endometriosis and must be one of the basic curative factors and reducing stress must be implemented in any one of our therapeutic regiments.

It is also found with endometria growth that the tissue is very sticky and fibrous. It is associated with a fatty acid deficiency in that the fatty acids help to discourage the endometrial growth and help to lubricate the tissues.

Thus part of our nutritional deficiency of fatty acids which is being more and more pervasive is helping to increase the amount of this disease in clinical settings. Supplementing fatty acids will be needed in our naturopathic treatments.

Common symptoms of painful ovulation, painful periods, and painful intercourse as well as bloating and heavy or irregular menstruation, constipation, bowel or constipation with bouts of diarrhea, constant tiredness and insomnia and depression helps to lead us into the diagnosis of endometriosis.
Cancer (neoplasia) is a radically different type of life form, but still is capable of reproduction and metabolism. Here the reproduction goes a little crazy and starts tapping the finances of the cell uneconomically, whereas in the normal cell the procedure of reproduction gets only six to eight percent of the energy of the cell. Here, in some types of cancer, a mismanagement is happening, and up to ninety percent of the energy might be tapped for reproduction. This change in balance is also reflected in a change in the electromagnetic resonance of the cell. The size and organization of a cell is a function of its electromagnetic qualities.

Revici poses the argument that cancer actually could be a viable part of the immune system, where a new type of living organism is manufactured within the body in order to deal with some type of toxic contaminant or metabolic disturbance.

Cancer might be part of our toxic and metabolic response. In a report released in major newspapers in December 1990, the study showed that cancer in industrialized toxic nations is at an outstanding rate, higher than cancer in more natural environments. This was not found to be due to smoking or any other type of cultural intervention. There seems to be a definite link with industrial toxicity. We know the cause of cancer; we can easily cause cancer in the cells of animals by imposing different toxins. We know that Red Dye #2 causes cancer in certain animals. We know that in order to do research on certain animals, we use certain toxic agents called carcinogens to induce the cancer. So we can study our neoplastic animals by giving them cancer with toxicity.

The link between cancer and toxicity is profound. It is within the realm of logic that perhaps cancer actually is part of the defense mechanism of the body. As the immune system goes awry in lupus, this part of the immune system might go awry in cancer. The cancer might initially start to deal with some toxicity, and then depend on another part of the immune system to then deal with the cancer. If that secondary part of the immune system is inoperable, disturbed due to some other toxin, or perhaps from some surgical mutilation, as in the case of B cell-interrupted activity (via adenoids, tonsils or appendix); then we might find an upset in the balance that causes the cancer to not just do its job, but to vehemently attack the rest of the organism.

This is the proposition of Revici and many other researchers. Cancer is part of the natural organism that has existed since the beginning of time. Only when outstanding variables allow for it to be out of control in the body does cancer take the life of the organism. Cancer might be just another opportunistic infection.

Neoplastic cells have been found in many, many people, who have not died of cancer or come down with profound types of cancer. So the label "cancer" as a disease might be another way of saying that the fly has caused the garbage. Just because we find flies around garbage does not mean that the fly has caused it, as we have discussed in previous chapters.

The fly has a purpose in nature. So, too, might cancer. Cells can increase their reproduction over a long period of time as it loses its informational constraints. This is the last chance of cancer.

Organisms have to conjugate and reproduce at regular intervals in order to stop the loss of vitality. After many different types of reproduction, there is an increase in probability of losing information, or the information becomes altered. It is the job of sexual conjugation to correct the information and try to conserve the informational transport.

Germ cells involved in the reproduction of the organism can be set aside by the animal, and thus do not undergo epigenetic divisions of their own in the informational transport. These cells take on specialized capabilities not performed by the ordinary germination cells. These cells will go under an asexual mitosis for information conservation. This is done to help preserve the information so that we do not lose it as time passes.
Chapter 8: The developer, Desire’Dubounet

IMUNE 12 Month Home Study Course

Go to [http://imune.name](http://imune.name) to learn and to get your European professional qualification in neurophysiological bioresonance and biofeedback.

The Tassel is worth the Hassel. In a world so concerned of Wellness can be yours in just 12 months of Home Stury, a simple thesis, a practicum and four days of monitored supervised contact.

Big Tobacco, Big Sugar, Big Pharma, Big Oil, and Big War Industry are exempt from lay and they kill and injure, maim and cripple in the name of profit. They seek to control and dominate medicine to further build their profits.

Their money controls governments, regulators, and the small minded media. The Ultra Rich Master Echelon Computer now sees and hears all the things we say, write, and do. Rights of privacy are gone worldwide. They have taken away our rights of free speech.

The Ultra Rich control the media and refuse to tell stories that expose or offend the Ultra Rich Power. They control every movie that gets distribution, every song that hits the radio, everything that is put on the world news. They use science and psychology to control and manipulate the minds of the masses.

But medicine is controlled by Universities that teach medicine. There is now one university starting to teach Natural Medicine. IMUNE has a new 12 month home study course that can be bought with Karma and you can learn how to do natural medicine and how to break free from the Ultra Rich control.

Big Tobacco
Big Pharma
Big Sugar
Big Media
Big Banking
Big Money

Well, the game of Reality Monopoly is still being played all over the world. One percent of the world’s population is winning and no controls over 98% of the wealth. The law allows the game to continue till we will see one winner and 6 billion plus losers.
The SCIO device can use the Trivector and Cybernetic Loop to rectify aberrant and disharmonious energy patterns in the body. This has profound effects on all body functions but affects the corpus callosum most intensely.

This means that the ability of the conscious verbal mind to relate to the subconscious is increased with the rectification process. The patient will probably not feel the effect. There will always be a positive effect. If there is a negative effect, it is because there is shielded or covert feelings or memories in the subconscious. These will cause disease if left untreated. A simple release may solve the problem.

The changes include:
1. Activate the innate intelligence to balance the body energies. This is the basic principle of chiropractic, acupuncture, and osteopathy medicine.
2. There is an easier exchange of energy and information from right brain to left brain via the corpus callosum. The corpus callosum is the largest energy form in the body and the rectification process has profound effects on stabilizing it, so it dramatically reduces switching phenomena.
3. The SCIO thereby increases the ability of the conscious to interface with the unconscious. This allows greater knowledge of self and of the higher self.
4. There is a greater memory access, a more true access of memory without emotional clouding.
5. There is a greater flexibility of connective tissue, allowing for more resilience.
6. There is a greater oxygenation and hydration ability of the body.
7. There is a smoother muscle control.
8. There is a general increase in well being that the conscious mind is so often unable to perceive. And thus there are thousands of subtle improvements to be found.

If you need more information on the SCIO and purchase details please get in touch with us

Doctorate of Wellness

PROFESSOR DESIRÉ DUBOUNET
has spent over 30 million dollars to bring the world a professional and thorough course on Wellness, Naturopathy and Neuro-Electro-Physiology of Biofeedback as Bioresonance.

She is such a humanitarian Angel, she lets you pay for the course videos, books and materials with Karma...

These are the TOP FIVE REASONS to get a Doctorate in Wellness PHD International Medical University degree at home

1. Getting a degree means you will increase your earning potential. Studies have shown that at home study is just as good as attended classes.

2. Study and Complete Courses at Your Own Pace. Use this to maximize the learning.

3. Scheduling Convenience. Work when you are ready to work.

4. Teaching Faculty Who Actually Have Work Experience in Your Field of Study. Global faculty at IMUNE is with worldwide famous doctors.

5. Save Money on Travel, Parking, Childcare, and Books. You save money the world saves energy, this makes you and the world better.

6. Employer Support. Many employers offer tuition reimbursement for employees’ tuition associated with training in their fields. Employers also tend to encourage enrollment in online degree programs because they know employees will be able to go to school and still be able to be committed to their jobs. Don’t be afraid to ask your employer. Every company needs a wellness consultant.

Professor Desiré Dubounet the world’s most famous Naturopath has spent over 30 million dollars to bring the world a professional and thorough course on Wellness, Naturopathy and Neuro-Electro-Physiology of Biofeedback as Bioresonance. She is such a humanitarian Angel, she lets you pay for the course videos, books and materials with Karma go to www.imune.name for more information.
Wellness and Naturopathic Medicine Course
and You can Pay in Karma

QUOTES FROM PEOPLE ABOUT DESIRÉ

"How would you like to spend some time with a great intellect like Einstein? Well Desire is without doubt the most intelligent person alive and I am sure that if Einstein was alive today he would like to spend time with Desire"  

"Desire is one of the most dazzling intellects that has ever lived, combine her intellect with courage and we get a historical person who will be remembered by humanity forever"

"As a child they could not measure Desire's IQ it was off the charts. Desire's mental powers are phenomenal but her compassion and altruistic grace are transcendentally awe-inspiring"

"Desire has saved countless lives she will never know and she has touched innumerable hearts and changed people's lives"

"She has written over 80 medical textbooks, hundreds of medical journals, hundreds of scientific articles to help the planet. Desire has over the last 15 years spent over 35 Million Dollars making over 50 movies and hundreds of training videos to help preserve natural medicine. And the greatest thing is Desire offers this training to the world not for money but for Karma. Desire is not just the most astounding intellectual; she is the most astounding humanitarian."

IF YOU PROMISE TO HELP OTHERS YOU CAN PAY ME IN KARMA
Scientists Who Have Worked with Desire’

Some of the Scientists that have worked personally with Bill Nelson

Selye Janos, who’s legendary work on stress is the finest achievement in medicine of all time

Linus Pauling, who won 2 Nobel Prizes and helped Bill with Quantic Biology and Ortomolecular

William Fowler, Nobel Laureate co-authored an article with Bill on the transmutation of the Elements in Biology

Albert Szent-Györgyi, Nobel Prize for discovering Vitamin C, worked with Bill to develop the Quantum Biology electron transport theory

Jacques Beneveniste
Joseph Scogna
Dr. Frank King DC
Dave Polen DC
Dr. Louis Rasmussen
John Stewart Bell

Richard Gerber
Julian Keston MD
Emanuel Revici
Richard Levyman
Eric Green

John Edward Brough
Dr. Glen Rein worked with Bill at the Heartmath lab; and Eddy Lavine on mathematical formulas
Andrea Grand Pierre worked with Bill to validate the FROGS methodology
Billy Horton
Turako Yul and Desire Dabounet

Edgar Mitchell

These famous scientist, Nobel laureates, quantum physicist, doctors, and researchers among many others are those that worked personally with and helped Bill to shape his theories and develop his life’s work.
Greetings from Budapest
Professor of Medicine

Dr Desire’ Dubounet has written and edited over 85 University Certified Medical Textbooks
When The State of Utah decided to make a Homeopathy Medical Board Nelson was called on to address the State of Utah Legislature
When English Homeopathy was challenged in the early 90's, Dr. Nelson addressed the Parliament to help save Homeopathy.
Nelson Method of Care

1. Reduce causes of disease

2. Rebuild organs and tissue destroyed by causes

3. Unblock the blockages of flow

4. Treat symptoms NATURALLY

5. Metabolic and constitutional therapy.
In Canada Prof Nelson's Research helps MP Grant Hill to get Homeopathy into the Health care system
Proof that the SINthetics are Incompatible with the Human Body

1. The Synthetic drug companies do not know how to properly place the electrons around the atoms in making a drug. Nature uses QED via Photosynthesis to put some of the electrons into high energy quantum states. This is how we get energy and life.

2. The Synthetic Drug companies use antiquated outdated reductionism philosophy to assemble and test their drugs. The Fractal Complexity of Nature with it’s incredible complexity must be revered rather than ignored. The height of IGNORANCE is to ignore nature. An IGNORANCE that makes money.

3. There is no study known that ever shows a synthetic drug completely equivalent to its natural counterpart. The reductionism studies only measure the required variables. They DO NOT measure side effects. Side effects are observed and often only observed years or decades later. The laws and the FDA protect them.

4. Side Effects dominate and proliferate the Synthetic Drug scene. Look at the Physician Drug Reference and see that all drugs have a list often a long list of side effects. This is not natural. Almost every year over a hundred drugs are removed from the market because they are hurting people. It’s just a matter of time before the hurtful side effects are seen.

5. Our society has now learned conclusively that synthetic foods are incompatible with health. We have now rejected all synthetics and we know that the finest quality comes from the natural. It is the next step of simple human consciousness and thought to see clearly that synthetic drugs are incompatible with the human body.
Proofs of the Powers of the Mind

1. Test of Time
2. Quantum Theory
3. Placebo Effect
4. What we don’t know is so vast
5. Bell’s Theorem
7. The people who do not believe in the mind always find that conclusion
8. Researchers that disbelieve are psychologically unstable or they have a hidden agenda
The Hermetian Emerald Tablet of Desiré

Desiré is the creator, developer and the leading pioneer in the medical art of Quantum Electro Dynamic Biofeedback. By first developing the Quantum Quality Control system of homeopathic electrical signature analysis, then developing the EPFX and the SCIO system of measuring the human Electro-Physiological Reactivity of a patient to the QQC signals, a new medicine of electrical energetic medicine was created. After twenty years of clinical scientific research and millions of safe and effective patient visits the art is firmly established in medicine.

There is no such thing as noise. Noise is only information we do not understand.

Desiré Dubonet

Desiré has been nominated for the Nobel Prize in Medicine for over two decades. Her advances and patents in VoltAmmetry, Electro-Physiological Reactivity, TVEP, and Homeopathy are Legendary and World Renown.

Quantum Electro Dynamic Biofeedback
pictures on China, AC Milan, San Antonio spurs, Dennis Johnson

The first sport study with the Quantum Xrroid technology was on members of the Cleveland Browns football team in 1988. The results were amazing and all of the participants went all Pro over the next five years. Having worked with the power lifting team of Hungary in 1991 they went from moderate to gold medal performance.

AC Milan bought some systems and their injury level dropped 91%. This was because the system can stimulate and accelerate healing of injured tissue. They asked for us to develop the device to sharpen the athletic skills of the clients. With this in mind we developed a way to sharpen coordination endurance and strength. AC Milan won the European championship the next two years. We worked with Dennis Johnson em twice NBA MVP in the San Antonio Spurs system. The results were amazing.

The Chinese Olympic team had us do a study. Out of their 487 athletes in the 2008 Olympic Games, they assigned 150 of the sick, old, weak, and tired to us. The study was to see if we could repair injured tissue and get an athlete back onto the field. The results were astounding. Out of the hundred medals won by the Chinese our 30% of the injured performers won 33% of the medals. Our athletes were not supposed to win. And because of this Desire was awarded an honorary Gold medal.

Sports medicine has entered the energetic arena. There are those who want to win and they differ from those who want to conform.

**Some of the best cyclists in the world have used the SCIO to win championships**
1. Make Big Tobacco pay for the damages they incur.
2. Must stop sales of cigarettes
3. Make Big Sugar pay for the damages they incur
4. Make Big Pharma pay for the damages they incur
5. End Allopathic philosophy and develop a new stressor reducing based medicine
6. Avoid Bad white processed sugars. Eat Good Sugars from fresh fruit. Avoid bad oils cooked or saturated. Eat good oils from fresh and raw vegetable and uncooked low temperature made oils.
8. Safe forms of early intervention medicine such as energetic biofeedback
9. Recognize the powers of the mind such as in the EPFX/SCIO system.
10. Recognize the need for an energetic medicine to safely evaluate the body electric and balance the aberrations of the body electric. We need to use a more modern medicine utilizing the body electric without emphasis on synthetic chemistry.
11. Recognize that the SINthetic experiment has failed and we should be using the synthetics only in extreme cases when the natural remedies fail. Quantum Electrodynamics has further proven the problem of synthetic chemistry.
12. Allopathy does not work, we must adapt a safer and more extensive theory of medicine.

With these social changes degenerative disease could be so greatly reduced to allow for an inexpensive medicine.

Desiré is the Professor Emeritus of IMUNE. IMUNE is an accredited and legally registered medical university in Europe.

Since 1995 IMUNE has been offering medical education in a variety of subjects to defend and perpetuate Natural Medicine. There are many small minded people being driven by the Synthetic chemical companies to destroy Natural Medicine as a viable choice in Medicine. IMUNE has offices in Switzerland, Mexico, Dubai, Budapest, England, and the British Virgin Islands. The small petty minded picaunery minions of the chemical companies constantly attack with their anal retentive biased short sided views. We must fight for freedom of choice and especially freedom of choice on medicine.

Education... ...free from Borders  www.imune.net
Prof Desi's DOCTORATE IN WELLNESS COURSE is based on a HOLISTIC MODEL of the MIND. As a man thinks, so is he. Desi was one of the first credentialed graduates of NLP and she was a licensed psychological counselor in Ohio. She teaches how to help any person with any disease to improve in this wellness course.

BODY
You are what you eat. We need to intake more healthy vegetables and fruits (25% raw), use lots of juices, drink lots of water. Eat good cold processed vegetable oils. No cooked oils or long cooking with oils. Eat good non-processed fructose fruit sugars. No bad processed dehydrated sugars. Exercise, love, kindness, caring and respect are nutrients. Get them and give them daily.

ENVIRONMENTAL
What we sow, we reap. We must work with our environment and all work to make a less Carbon footprint and make a greater Oxygen footprint. By eating more fruits and vegetables and less meat we increase the Oxygen while decreasing the Carbon.
Everyone must cultivate more plants, shift from fossil fuels to Bio-fuels and Bio-mass fuels.
We must stop the toxic poisoning of the world and work to help us return to the Garden.

SOCIAL
We are social beings that need networking feedback to help us grow and mature. We need to foster compassion, cooperation, connection, and care. We all share air. We need to share care.

The verbal word area of the brain is about the size of a golf ball on just one side of the brain. The Reticular Formation filters the 10 to the 15th plus bits of data coming from our cells to the brain. And the Reticular Formation filters the information so that only one million or so bits of data go to the word area of the brain.
The autonomic functions of digestion, immunity, growth, detox and health itself are thus not under verbal control or should they be. Science has made the mistake of thinking that the verbal mind is all that there is. If I am not verbally aware of it how could it be important. This false belief has polluted medicine. The verbal mind is reductionism, simple, and prone to false beliefs. Classic biofeedback enlarged this mistake. The body electric is in the whole and operates non-verbally and holistic a type of Gestalt integrity.
By making a cybernetic loop to the body electric the Angel has developed a superior form of biofeedback that can balance and repair the body electric. This is the advent of a new medicine.

The mind of God fills the universe with subspace. We need to be able recognize the powers greater than us and with reverence and respect for all things activity cooperate with the Great Spirit. We need to listen to the Positive Force and resist the Negative Forces. It is an illusion that we are separate.
We need to expand our circle of compassion to include all things in the Universe.

Fractal & Chaos theory have taught us of the complexity of humans. We must respect the whole individual not the reduction of their parts. A small flaw on any part might amplify a disease elsewhere.

The contrast of cultures we call east and west can display the contrast of the verbal versus non-verbal brain. The words are arrogant, destructive, greedy, judging, plotting, scheming, trying to protect the ego more than respect for the planet. The Eastern more Buddhist way is based on mindful non judgmental awareness of the whole and respect for the process. As we see how the Western arrogance has almost destroyed this planet we need to be more balanced and recognize that the verbal area is a good tool but should not be the master.
“All truth passes through three stages. First, it is ridiculed, second it is violently opposed, and third, it is accepted as self-evident.”

- Arthur Schopenhauer German philosopher, 1788-1860.

Chapter 9: Hungarian Presentations on SCIO
Graduating Class from Semmelweis Medical University advanced work in Energetic Medicine, the instructor is Dr. Nelson, Professor of Natural Medicine. Budapest 1996
ABSTRACT

The world has now recognized the demise of antibiotics. Iatrogenic damage, resistant strains, immunosuppression and dependency have now challenged the core of one of the prides of modern medicine. The vast marketing of antibiotics has left medicine with a severe crisis. Reductionistic research and philosophy has been used for financial reward of the chemical companies. These antibiotics have been shown to have a wide variety of deleterious side effects, including effects on the bowel flora. We also theorize about how this disruption of the bowel flora, could be a contributing cofactor to the AIDS epidemic.

The populations with the greatest antibiotic use are the highest risk for development of AIDS. A balanced bowel flora could be essential in defense against the virus propagation into the deadly disease. The antibiotics might then increase the progression of risk in the disease. This hypothesis, because of its' non-reductionistic complexity is difficult to challenge in a single study. Funding of such a study would also be extremely difficult, in light of the challenge to synthetic chemistry. This brief article is but an introduction to the concept. For further information please refer to the collection of studies in the Journal of the Medical Science of Homeopathy, special issue on AIDS and vitusses.
Cataract Study at the Szent Janos Hospital in Budapest

Abstract

During the course of a one year period the 1834 patients in our clinic were asked in their intake form to participate in a study. All patients were treated with the EPFX device. The types of disease trends these patients presented were evaluated by one of the medical doctors on staff. The EPR reactivity profile was checked by the EPFX device. A comparison of the EPR reactivity patterns yielded a risk probability profile. The results of this profile are reported here.

At the Szent Janos hospital in 1995 Budapest a TVEP study was done on cataract patients. Both of these studies proved TVEP reactions patterns to be helpful and significant in detection of disease patterns. see XROID reactivity patterns in Cataract patients, IUMSH 1997 volume1/4 ISSN 1417 0876

The following reactants are statistically significant at alpha levels .05 for the cataract patient.

- sucrase
- glucuronidase
- glucose
- glucogen
- glucose dehydrogenase
- aspartase
- myleoperoxidase
- cataract nosode
- pancreatin
- pancrease sarcode
- glutathione
It is a scientific fact that when
a low level voltage and
micro-current pulse is
applied to the body osmosis,
enzyme activity, and healing
are increased. The SCIO will
let the patient’s body
electric autofocus a
harmonic pulse to maximize
this effect. This current
applied to the cranium has
been shown to stimulate the
learning process and
increase memory retention,
and learning. There is
published research on these
therapies. The new world of
energetic medicine can
help you to learn twice as
much in half the time
comfortably and easily.

Electrical Reactivity as a Prescreen of HIV Infection Patients

ELECTRICAL REACTIVITY AS A PRESCREEN OF HIV INFECTION PATIENTS

ABSTRACT

Twenty-two ambulatory AIDS patients in Budapest were studied for xrood electrical reactivity readings. The electrical reactivity patterns and reactive substances that were in the highest faction of reactivity. In other words, those reactants that were statistically significant are compared in the groups of the AIDS patients taking the AZT as well as the AIDs patients that were treated with homeopathic and nutritional items. The purpose of the study was to analysis similarities and consistencies in their electrical reactivity patterns over the course of four measurements. This took place during the 4th, 5th, 6th and 7th month of 1994. During these months there was also a homeopathic and nutritional intervention done on several of these patients to see the effect on blood chemistry profiles denoting aids risks and the homeopathic and nutritional intervention are described in the article known as the comparative results. Reductionistic techniques of synthetic chemistry have failed with HIV. This study charts a non reductionistic system of analysis of the electrical reactivity patterns of the study participants.

Supervizing researcher: Dr Istvan Bandics MD Licensed Hungarian Medical doctor. This study was done at the Hippocampus clinic in Budapest on 73 patients attending the clinic in 1994. Studies done with the supervision of a local ethics committee and all subjects gave informed consent to participate as part of their intake form.

Abstract
In this study we took 73 patient/subjects from the medical clinic and tested their global Voltage, Amperage, Resistance, Hydration and Oxidation body electrical parameters in per and post fashion. Each subject was treated with the EFXX device for one week after pre and before post testing. The patients had significant increases in their post electrical measures. These factors are called the VARHO.
Electron spin resonance therapy and the SCIO

Electron spin resonance spectroscopy and the SCIO

Edited and Validated By Medical Staff:
Somos Zsuzsa MD and Nagy Attila of Budapest HU

This is a repeat of the Vitamin C electron spin study of Ashton, Young, Peters, Jones, Jackson, Davies, and Rowlands of 1999 using the SCIO instead of Vitamin C. Much effort was used to reproduce the style and completeness of the 1999 study.

Abstract

Chemistry tells us that oxygen free radicals are very reactive compounds that are formed in bigger quantities during strenuous exercise and can damage critical biological targets such as membrane phospholipids. This study examines the effect of 60 minutes of SCIO electrostimulation on exercise-induced free radical production in healthy subjects.

lipid peroxidation; SCIO; free radicals; superoxide

Introduction

INCREASED WHOLE BODY OXYGEN FLUX during exhaustive aerobic exercise may elicit potentially toxic perturbations in cellular homeostasis via increased free radical production. The measurement of free radicals in biological systems is difficult because of their high reactivity and low steady-state concentration. Electron spin resonance (ESR) spectroscopy is arguably the most sensitive, specific, and direct method of measuring free radical species and is currently underutilized in the clinical and physiological environment. Until recently, ESR spectroscopy had only been used in the animal model to demonstrate increases in free radical concentration after exercise (4, 18). Using ESR spectroscopy, we recently reported that maximal aerobic exercise resulted in significant increases in the concentration of the o-phenyl-tert-butyl nitronate (PBN) adduct and also lipid hydroperoxides (LH) and malondialdehyde (MDA) in the venous circulation of healthy human volunteers (2). LH are considered to be the major initial reaction products of free radical attack on the cell membrane, whereas MDA is formed as a decomposition product of LH, thus
IMMUNOLOGICAL AND ELECTROPHYSIOLOGICAL REACTIVITY OF PATIENTS WITH HIV INFECTION

By: Nagy K., Nelson W., Barabas E., Balazs E., Varkonyi V., Horvath A.
National Institute of Dermato-Venerology, Budapest, Hungary 1994

ABSTRACT

The diagnostic and prognostic value of electrophysiological reactivity patterns of HIV infected subjects were compared to complex immunological and virological laboratory markers.

Electrical responsiveness of 22 asymptomatic HIV infected patients were monitored monthly for a 4 month period by Quanta Med 4000, a sensitive multichannel diagnostic biofeedback machine, capable of measuring slight fluctuation of patients' brain waves and skin resistance, whilst the patients are sequentially exposed to a battery of numerous homeopathic nosodes and isodes. This process known as the Xroid process.

Immunological and virological analysis included determination of CD cell count, HIV, HCV and CMV antibodies, HbsAg, and serum Beta 2-microglobulin (B2M) and Neopterin levels.

In the study - 4000 substances (items) were tested to determine which of these the patient had the most reaction to. The reactivity scores were then analyzed statistically. As a result a profile of electro-reaction is suggested, which considered characteristic of HIV disease in contrast to that of the normal subjects.

After initial evaluation a treatment protocol was designed. Half of the patients received a fatty acid blend and homeopathic medicaments throughout the test. Subjects were instructed to use the products daily and compliance was evaluated in the monthly interview. Reevaluation of electrophysiological reactivity and immunological tests were repeated every month.

H2M level was found decreased in 88 percent of those who received homeopathic treatment and in 50 percent it was found < 3 mg/L, compared to 27 percent of those untreated. Antibody level to CM was also found decreased in consequence of treatment. No changes, however could be detected in CD count and HbsAg and HBC antibody level.

The electrophysiological reactivity test provided information, which suggest that it can be used as a pre-diagnostic method, which might complete laboratory analysis. Complex homeopathy and individual nosode treatment shows some positive intervention.
HOMEOPATHIC TREATMENT OF EPSTEIN-BARR VIRUS INFECTIONS

Nosphal Therapy for Viral Chronic Fatigue
Chief Editor: N Vilmos, M.D.; Independent Medical Editor: Budapest, Hungary

Developed By: The staff of Maitreya, Limerick, Ireland

This study was performed in 1987 at the Survival Center Clinic in Ravenna, Ohio, U. S.A. Revalidation and further clinical testing are currently being performed by medical doctors at the Clinic in Budapest, Hungary, and by the doctors listed above.

ABSTRACT

Homeopathy has been proven effective historically in many different viral conditions. Recent experimental evidence has shown homeopathy to be effective for flu, measles, AIDS, and other viral conditions. In this article we review some of this literature and research, and we explore homeopathic treatment of Epstein barr and mononucleosis conditions.
NEW TECHNIQUES OF HOMEOPATHIC TREATMENT OF FUNGAL INFECTIONS

This article was presented at the Pharma Expo in Budapest, Hungary; an international pharmacy exposition presented on November 10-13, 1994.

ABSTRACT

In this study there are two major investigative reports that we explain. One is a forty-five-patient study of female yeast problems, in which a complex homeopathic treatment was proven to be effective. We first present a twenty-patient study of various effects on overall fungus population. The overall fungus was measured through culture analysis of patients' hair, urine, sputum, and other physiological samples. Three treatment groups were organized: that of a candida-only diet, that of a homeopathic singular of Candida albicans only, and that of a complex homeopathic for full-range treatment of fungal disorders. In the study we show the dramatic superiority of the complex homeopathic; how it worked on a wide variety of fungal disorders, and how the Candida albicans homeopathic only worked on Candida albicans. The diet proved to have little or no effect.

The study reviews the process of the immune system's defense against fungal intrusion and fungal overgrowth. Also, there is the proposed mechanism for the homeopathic action, in that it appears to be stimulatory of the immune system.
Stimulation of Motility Factors in Neutrophils

STIMULATION OF MOTILITY FACTORS IN NEUTROPHILS

Chief Editor: N. Vilmos, M.D.; Independent Medical Editor; Budapest, Hungary
Developed By: The staff of Maitreya Limeick, Ireland William Nelson L.P.C.C.

This study was performed in 1994 at the Homeopathic Research Facility in Budapest, Hungary. Revalidation and further clinical testing are currently being performed by medical doctors at the Homeopathic Clinic in Budapest, Hungary, and by the doctors listed above. This article was presented at the Pharma Expo in Budapest, Hungary; an international pharmacy exposition presented on November 10-13, 1994.

ABSTRACT

In 1987 a department of scientific research in Germany published the first part of this study [Studies: 5]. In this study a sample of patients' blood was taken by finger prick, and put onto an inverted slide. The inverted slide allowed for motility of the white blood cell underneath the cover slip. When viewing blood normally, using a noninverted slide, the cover slip would produce pressure on the white blood cell and restrict its movement.

A sample of various bacteria was put into the blood sample, comprised of streptococcus. The mobility and motility of the white blood cell was then studied under the microscope. This was done using a dark field at 1500x to minimize the effects of excess infrared radiation. However, the temperature of the blood was always maintained within one degree of body temperature (98.6°F, 37.5°C.).

The speed of the white blood cell was then measured in seconds per 10 μm, as well as the ability of the white blood cell to produce phagocytosis around the bacteria. The baseline was thus established by observing multiple white blood cells in the patients. One group of patients was given a placebo of water and alcohol [ten drops] orally, and another group was given a sample of a complex homeopathic designed to stimulate the white blood cell towards bacteria. Blood was taken thirty minutes after administration of the placebo or homeopathic.

In the treatment group there was virtually no change from the initial pre-test. In the homeopathic group there was an increase. In the homeopathic treatment group there was a thirty-five percent increase in the motility and mobility factors of the leukocytes.

This initial American study of 1987 has been duplicated using an additional ten subjects with fungus instead of bacteria, and fifteen subjects have recently been added to the study population from Hungary. This makes a sum total of thirty-five subjects who participated in our study.
Full Spectrum Micronutrient Treatment of Bacteria

Full Spectrum Micronutrient Treatment of Bacteria
(Homeopathic Treatment of Bacterial Infections)

Judith Nagy, M.D.; Independent Medical Editor; Budapest, Hungary

Edited and Validated by:
Istvan Bandics, M.D.; Budapest, Hungary
Gylila Panszki, M.D.; Budapest, Hungary

Consultant:
Dr. Simon Gutl, M.D.; Hanover, Germany

Abstract
Two studies involving homeopathic or micronutrient treatment of bacteria are reported which indicate a natural, safe alternative to antibiotics. Both studies involve patients aged twenty-five to fifty. In the first study we take pin-prick blood samples from ten healthy patients, bring them on an inverted side, and then measure the speed and motility factors of the white blood cell. The patients are then given (in double-blind fashion) either water and alcohol or a homeopathic for bacterial stimulation. On evaluation under the microscope, the speed of the white blood cell is increased in the treatment group; the placebo group shows no change.

In the second study patients are evaluated for urinary bacteria from culture.

They are then prescribed the complex homeopathic, and reevaluated. The study shows that the complex homeopathic can indeed help the patients to deal with their bacterial infections.

The proposed mechanism is discussed, along with this short study.

done at the Hippocampus office in Budapest in January 1994. Studies done with the supervision
of a local ethics committee and all subjects gave informed consent to participate.

Abstract
This study took 18 members of a Hungarian Power lifting team and measured their performance
before and after an EPFX therapy and some sport oxygen formula. Their personal best are a matter
of record. Each had two sessions on the EPFX over two days and they were asked to do their
best in Squats and Bench press. By comparing to the personal bests most of these athletes had
increases in performance after two sessions on the EPFX.
Comparative Study on the Treatment of Average Allergy Patient with SCIO versus a Conventional Medical Protocol

Comparative Study on the Treatment of Average Allergy Patient with SCIO-Medical Device versus a Conventional Medical Protocol

Developed and written by Dr. Annamária Cakó

Part of The International Ethics Study, 2007

ABSTRACT:

One hundred allergy patients from a typical medical practice were evaluated and treated with the SCIO provocative allergy system. Their results and fees were compared to nine hundred patients treated in traditional ways: from scratch and live cell tests, to antihistamine and synthetic chemical treatments. The results showed better results from the SCIO group, for considerably less money. A complete discussion of the field of allergy testing comes at the end of the treatise.
Treating Handicapped Young Adults with the SCIO Device

Written By: Authors: Kinga Gulyás, Quantum Biofeedback Therapist
Budapest, Hungary, 2 / 2008

Abstract

I have been using SCIO since 2004. I was practicing with SCIO at the Egyenlő Esélyekért Alapítvány (Foundation for Equal Chances) in Csőmor Hungary for 3 years which is a center for handicapped young adults. People here live and work with different kinds of disabilities. They are handicapped either in vision, motion or in hearing; they can be mentally or psychiatrically injured or they can suffer of a cumulation of some of these above.

Some people’s handicap originate from the foetal period, some were handicapped at birth and again, some suffered some kind of injuries at a later period of their lives due to an accident or illness. The SCIO device is absolutely safe, there has never been any record of any significant risk. The SCIO is highly effective at medically treating the clients in many ways.

In our treatment of these children we were able to dramatically help the children with the SCIO device. The SCIO was able to help sedate and relax the children when there were temper tantrums.

The SCIO was able to help with immune system balancing and was used to stimulate cellular regeneration. Budapest, 5. February, 2008 © UMSH 2008
SCIO Bio-electronic Supported Elimination of Toxic Substances from the Human Body

SCIO-Bio-Electronic Supported Elimination of Toxic Substances from the Human Body (SCIO Detox)

Developed By:

Authors: Dr. Annamaria Cakó M.D.

Abstract

We are living now in the age of big contradictions. Development of science makes medicine be able to carry out great achievements but in the meantime, lifestyle depending diseases outbreak in epidemic growth. There is an ever increasing toxic burden implied on all of our patients. We must detox to survive. Detox is becoming more difficult in an ever increasingly toxic world.

Methods of detoxication have been known for a long time and they revive today. The SCIO has the electronic signatures of thousands of toxins in it’s repertory. Also the trivector signatures of the detox organs and their hormones. The SCIO can put electronic signals of these signatures into the body for the body electric to guide for increasing the detox abilities of the body. This article reviews the safety of the SCIO and it’s tremendous assistance to detox in over four hundred patient records. 425 patients are assayed for toxins and retested after the SCIO treatments. The results were astounding.

Key Words: Biofeedback, stress, stress reduction, Detox, Auto-Toxins, Sue-Toxins

Homeopathic Stimulation of White Blood Cell Motility as Analyzed under the Microscope

HOMEOPATHIC STIMULATION OF WHITE BLOOD CELL MOTILITY AS ANALYSED UNDER THE MICROSCOPE

(A Proposed Mechanism of Homeopathic Immune-Stimulation)

Chief Editor: N. Vilmos, M.D.; Independent Medical Editor: Budapest, Hungary.
Developed By: The staff of Maitreya; Limerick, Ireland William Nelson L.P.C.C.

This article was presented at the Pharma Expo in Budapest, Hungary: an international pharmacy exposition presented on November 10 - 13, 1994. Revalidation and further clinical testing are currently being performed by medical doctors at the Homeopathy Clinic in Budapest, Hungary, and by the doctors listed above.

ABSTRACT

The dynamic factors of life seem to be dependent on photons. This has been developed through quantum electrodynamics, which has been applied to biology by many researchers. In this study we microscopically analyzed the white blood cell’s recognition and motility factors for bacteria and fungi. By then observing how the white blood cell moves towards the bacteria and fungi we are able to analyze one factor of immunity.

A key question in biology must be: How do the white blood cell and the immune system find and isolate the microorganism intruder?

A thermodynamic and/or chemical mechanism is not a complete analysis. In this paper we bring forth the treatise that the white blood cell has some photon receptors and a type of vision which allows it to find these intruders and thereby destroy them.

In this study we then gave the patients a treatment of water and alcohol, and/or a homeopathic of various microorganisms. This was performed in a double-blind fashion. In the placebo group there was virtually no change from the baseline reading in the motility recognition factors. However, there was a thirty-five percent increase in recognition and motility of the white blood cells in the blood samples of the patients receiving the homeopathic treatment.

The conclusions of this study are drawn through a dynamic, quantum, photon system of understanding of biology, which then helps us to understand some possible mechanisms of homeopathy. In the conclusions of the study we further show that homeopathy not only is a safe but also an effective and natural process of not defeating the organism directly, but stimulating the immune system to do its job better in defeating the microorganism intruder. Thus homeopathy offers a more natural way to stimulate the immune system of the host rather than a way to defeat the intruder directly, as in antibiotic treatment.
A Short Study of Comparison Factors of Homeopathic Treatment versus Enzymatic Treatment of Intestinal Parasites

A SHORT STUDY OF COMPARISON FACTORS OF HOMEOPATHIC TREATMENT VERSUS ENZYMATIC TREATMENT OF INTESTINAL PARASITES

Chief Editor: N. Vilmos, M.D.; Independent Medical Editor: Budapest, Hungary
Developed By: The Staff of Materney; Limerick, Ireland
This study was performed in 1984 at the King Health Center in Lowellville, Ohio, USA Revalidation and further clinical testing are currently being performed by medical doctors at the Homeopathy Clinic in Budapest, Hungary and by the doctors listed above.

*William Nelson 1995

ABSTRACT

In this study a group of patients from ages twenty-five to fifty were chosen who displayed signs of worm eggs on coprolith (stool) analysis. The patients were divided into two groups of ten patients each. One group received treatment with a combination homeopathic product known as Vermex, which contains various homeopaths that stimulate the defenses of the systemic against parasitic intrusion, and also homeopaths that help to flush out the intestinal tract. The other group was given standard process enzyme therapy in a pill called Zymex, whose ability to rid the system of parasites through its enzymatic effects was claimed by various doctors.

The patients in each group were then remeasured. It was found that the Vermex product was successful in treatment, whereas the Standard Process product seemed to show no positive effect.
The SCIO will improve the body electric VÄHRÖPE by five% as an average after just one session. The AutoFocusing Harmonic therapies of the Cybernetic Loop of measuring, stimulating, re-measuring, all guided at maximizing the body electric potential will improve your body electric by an average of five%. Improvements of Voltage, Amperage and thus power. Improvements of Resistance and Hydration that means improved enzyme and osmosis transfer of nutrients and detoxification. Improvements in Oxidation meaning more endurance. And improvement in pH meaning more health. No wonder there are a mile long list of testimonials. Now we can understand why the sport athletes get such great results. A five% improvement is a great edge for a professional sportsman. The patented and proprietary process of the SCIO and QQC have been proven on the world scientific stage to work wonders of improving and stabilizing the body electric.

Zapping the Human Papilloma Virus

Zapping the Human Papilloma Virus

By William Nelson LPCC

At the Semmelvise Hospital in Budapest 1994

Abstract

We know of no good evidence for Dr. Kruger's zap therapy. The Zap technology of the QXCI/EPFX has some tested capabilities. In this study 25 women showed signs of papilloma virus spots. The papilloma virus HPV spots fluoresce in UV light if they are exposed to vinegar. A vinegar swab showed spots on all 25 with an average of 12 spots per person. The women were given three 30 min QXCI Zap therapies over the course of one week. In 2 of the subjects there was no change. All of the others had lessening of their spots in size and number. In five subjects there was complete removal of the spots. The rest had approximately 60% reduction in the number of spots. The overall average therapy was 60% effective in treating papilloma.

QXCI Birth Trauma Program

- **New Panels and buttons for the Clasp32 program**
  - The new panels are designed to eliminate low frequencies associated with mother’s trauma at birth caused by a variety of conditions
  - New panels are NEEDED to be used for elimination of anesthetics from the brain, spine and dura caused by the epidural anesthetics

- **Signs of birth trauma in babies – demographics**
  - Sleep deficiency
  - Eye contact-ability to bond
  - Weight gain and feeding irregularities
  - Nervous reactions-frequent crying, fussiness

- **Signs of birth trauma in adults – demographics**
  - Sequential trauma in areas of life, trauma attracts more trauma
  - Birth trauma recapitulates and becomes a time bomb at different stages of life:
    - Rejection in relationships as a result of abandonment at birth, no bonding with mother.
    - Memory loss and stress can all be traced to birth trauma
Research Results - Quantitative

- Mixed VARHOPE Results
  - Scores in both measurements against the total population were not impacted.
  - With one exception, average resonant frequency over the individual tests did increase by 7918.

- Neurotransmitters/Amino acids were varied in response
  - Pain assistance-Endorphins-lessened in the overall group by 29% but the need increased for individuals by 18%.
  - Emotional assistance-Dopamine-increased in both measurements by 22% for the workshop and 16% for individuals.
    Tyrosine also increased in the overall workshop by 35%, unchanged for individuals.
  - The need for Love & Bonding-Oxytocin-increased in the overall workshop by 27% but decreased slightly by 7% for individual responses
Research Results - Quantitative

- Neurotransmitters/Amino acids were varied in response
  - The need for Joy and happiness inducement, as indicated by Serotonin, decreased in both segments. Total workshop went down 19% and individual results were down 35%.
  - Cortisol needs were unchanged in both groups.
  - Iso-Leucine for alertness and AD/HD remained unchanged.
  - Need for Taurine, heart support, increased for the workshop by 27% but decreased for individuals by 9%.
  - Tryptophan for relaxation decreased in the overall group by 11% and remained unchanged for individuals.
- An exact opposite result for Glutamine that calms the mind. The workshop needs increased (16%) while individuals were largely unchanged (1%)
Research Results - Quantitative

- Brain Wave indicators showed much total all workshop improvement on a majority of indicators:
  - Attention Deficit was hugely impacted with a 84% decrease
  - Local Slow Waves improved by 70%
  - Epileptic improved by 25%
  - Deep Brain and General Asymmetry improved by 23% and 14%, respectively
  - Injury improved by 4%
  - Theta waves improved by 25% as an indicator of the shift in consciousness during the workshop, while worry indicated by Beta waves went down 7%.

- Stress went up by 10% indicating that bringing these deeply held memories to the surface challenged all participants

---

Percentage calculated on ratio's e.g. Injury divided by Normal
Chapter 11: The Nahinga Project – The SCIO and HIV

In African Bantu the word for the Angel coming from Heaven to the Earth to save its people is NaHinga. This name was given to Desiré for her work on AIDS. Desiré kicked off Project NaHinga in early 2005 in Africa. Desiré is a citizen of Mozambique and is a diplomatic liaison for the country. All because of her work on healing. She taught the natural healers, the Sangoma, to make remedies for AIDS and how to use simple energetic medicine.

Project NaHinga was a multi million dollar task financed solely by Desiré for the purpose of healing the planet.
Nahinga – Immuno Compromised Protocol

NaHinga

IMMUNO COMPROMISED PROTOCOL
First Avoid All White Processed Sugar
This means all dextrose sugar products including candy, cola, doughnuts, etc.
You can have all of the levulose fructose products you want,
this means any fruit of fruit sugar

Second Avoid all Foods Boiled or Fried in Oil.
Use at least three tablespoons a day of uncooked natural cold pressed oil such as
olive oil, safflower, sunflower, soybean oil.
Have some five servings a day of fresh and raw fruits or vegetables.

Third Reduce Stress and Enjoy Life
Do at least fifteen minutes twice a day of quiet meditation using affirmations, and
imagery of your immune system working.

Exercise for twenty minutes at least four times a week
work to a sweat and breathe deeply, use the thymus tap

Take the Hemo-A twice a day with other supplements
Hemo-A has Yecla Santa, Phytolacca, Chinese Cucumis Sativa, Trifolium, herring sperm
and other sarcodes of Thymus adenoids tonsils and appendix
use 500 mg Vitamin C, 15, mg Zinc, 4 pills of Oxygen Stimulator at bed
use Golden Seal, Aloe Vera, Lentil, Mustard, Tumeric, Curry, Paprika
Sesame seeds, and use Sambuca

AVOID ANTI-BIOTICS
use Probiotics Actimel, Activa, etc twice a day

Electrical Reactivity as a Prescreen of HIV Infection Patients

ELECTRICAL REACTIVITY AS A PRESHSCREEN OF HIV INFECTION PATIENTS

By: Nagy K., Nelson W., Barabas E. Balaz E. Varkonyi V., Horvath A Study Site National Institute of Dermato-
Venerology, Budapest, Hungary 1994

ABSTRACT

Twenty-two ambulatory AIDS patients in Budapest were studied for xeroid electrical reactivity readings.
The electrical reactivity patterns and reactive substances that were in the highest faction of reactivity. In
other words, those reactants that were statistically significant are compared in the groups of the AIDS
patients taking the AZT as well as the AIDS patients that were treated with homeopathic and nutritional
items. The purpose of the study was to analysis similarities and consistencies in their electrical reactivity
patterns over the course of four measurements. This took place during the 4th, 5th, 6th and 7th month of
1994. During these months there was also a homeopathic and nutritional intervention done on
several of these patients to see the effect on blood chemistry profiles denoting ailds risks and the
homeopathic and nutritional intervention are described in the article known as the comparative results.
IMMUNOLOGICAL AND ELECTROPHYSIOLOGICAL REACTIVITY OF PATIENTS WITH HIV INFECTION

By: Nagy K., Nelson W., Barabas E., Balazs E. Varkonyi V., Horvath A.
National Institute of Dermat Venereology, Budapest, Hungary 1994

ABSTRACT

The diagnostic and prognostic value of electrophysiological reactivity patterns of HIV infected subjects were compared to complex immunological and virological laboratory markers.

Electrical responsiveness of 22 asymptomatic HIV infected patients were monitored monthly for a 4 month period by Quanta Med 4000, a sensitive multichannel diagnostic biofeedback machine, capable of measuring slight fluctuation of patients’ brain waves and skin resistance, whilst the patients are sequentially exposed to a battery of numerous homeopathic nosodes and isodes. This process known as the Xrroid process.

Immunological and virological analysis included determination of CD cell count, HIV, HCV and CMV antibodies, HtSAG, and serum Beta 2-microglobulin (B2M) and Neopterin levels.

In the study - 4000 substances (items) were tested to determine which of these the patient had the most reaction to. The reactivity scores were then analyzed statistically. As a result a profile of electro-reaction is suggested, which considered characteristic of HIV disease in contrast to that of the normal subjects.

After initial evaluation a treatment protocol was designed. Half of the patients received a fatty acid blend and homeopathic medicaments throughout the test. Subjects were instructed to use the products daily and compliance was evaluated in the monthly interview. Reevaluation of electrophysiological reactivity and immunological tests were repeated every month.

H2M level was found decreased in 88 percent of those who received homeopathic treatment and in 50 percent it was found < 3 mg/L compared to 27 percent of those untreated. Antibody level to CMV was also found decreased in consequence of treatment. No changes, however could be detected in CD count and HtSAG and HBC antibody level.

The electrophysiological reactivity test provided information, which suggest that it can be used as a pre-diagnostic method, which might complete laboratory analysis. Complex homeopathy and individual nosode treatment shows some positive intervention.
ANTIBIOTICS AS A PRIMARY CO-FACTOR IN AIDS PROGRESSION

Presented at the 1st International Conference of the Mor Kaposi Research Foundation, Convergence of AIDS and Cancer Research, Budapest, Hungary August, 27, 1996

"If a Man sees a Wrong and does not Correct it, He is NOT a Man"

ABSTRACT

The world has now recognized the demise of antibiotics. Iatrogenic damage, resistant strains, immunosuppression and dependency have now challenged the core of one of the prides of modern medicine. The vast marketing of antibiotics has left medicine with a severe crisis. Reductionistic research and philosophy has been used for financial reward of the chemical companies. These antibiotics have been shown to have a wide variety of deleterious side effects, including effects on the bowel flora. We also theorize about how this disruption of the bowel flora, could be a contributing cofactor to the AIDS epidemic.

The populations with the greatest antibiotic use are the highest risk for development of AIDS. A balanced bowel flora could be essential in defense against the virus propagation into the deadly disease. The antibiotics might then increase the progression of risk in the disease. This hypothesis, because of its' non Reductionistic complexity is difficult to challenge in a single study. Funding of such a study would also be extremely difficult, in light of the challenge to synthetic chemistry. This brief article is but an introduction to the concept. For further information please refer to the collection of studies in the Journal of the Medical Science of Homeopathy, special issue on AIDS and vituses.
We have seen six patient data files from Ghana where patients who had HIV in Blood test were cured and the tests have come back negative for HIV after the Nahinga protocol.

In Budapest, Africa, and elsewhere we have seen several reports of cures and viral irradication. This begs for further study and confirmation of results. But the research from project Nahinga seems interesting at least. We are continuing the search for more funds to do better studies and better controls, but till then we still seek to study and treat patients with this future orientated medicine.
Desire' and the Shaman Healers of South Africa

This document is to develop the basic science of study and detail for a simple solution to this problem. I have stumbled on a natural medicine formula to help these people. And I want to share it with you in the form of Project NaHinga.

Prof Desire' Dubounet with some of the Shaman healers of SA

In 1992, I tested most of the Aids patients and HIV positive patients in Hungary at the Semmelvise University medical hospital. There was a set of natural compounds that the patients reacted strongly to. These compounds were tested in the laboratory and in the clinical hospital with some success. These articles were presented in Singapore at an International Congress of STD and AIDS. Reprints of these articles are accompanying this document.

But since there was little interest in natural medicines, this work has been largely dormant. I tried to tell the story to the African governments, but the hold the Drug companies have is extreme. Now I have invested Half a million dollars into a research project to help this massive problem. If no one will help I will do it myself.
Dr. Amanda Velloen – Update on Project Nahinga

Project Nahinga (bantu for the Angel that comes from the heavens to help us, the bantu name for Desire) has been spreading and many extreme success stories have shown fantastic results.

PROGRESS
• Results in PHASE 1 –
  • Up to 100% feeling better
  • Average 65% improving in Critical Measures of HIV progression
• No side effects reported
• Symptom free
• No secondary infections
• Improved quality of life

Critical Measures
• Subjects tested positive for HIV Virus
• CD4 count
• Elisa test if available
• Viral Load test

Schedule for 2009
• Father John Mugaga in Kwa-Zulu Natal 1st Satellite
• October 2009 – AIDS Children’s homes
• November 2009 – Brazzaville Congo, DRC, Angola, Nigeria
• November 2009 - Kenya, Zimbabwe, Mozambique
• December 2009 – Lesotho, Swaziland

After Desire has donated over 2 million dollars of equipment for our research we have shown safety and efficacy and there appears to be a natural cure for this horrible disease on the future horizon
Chapter 12: Nobel Prize in Medicine
Nomination

Dr Nelson has been Nominated for the Nobel Prize in Medicine many times. In 2000 he was invited to lecture in the Nobel Prize Hospital in Stockholm Sweden.

His lecture was a Revolution in Medicine.

The Nobel Prize Hospital in Sweden Place of Desire’ Dubounet’s lecture in 2000.
Watch these 2 video to understand more

http://video.google.com/videoplay?docid=-3943318454841262491#

http://video.google.com/videoplay?docid=4449802586589468951#

When I lectured at the Nobel Prize hospital in 2000, I encountered the work of Dr Nordenstrom, the institute tried to ban my lecture but we won the battle and I gave my historic lecture there.

Bjorn Nordenstrom has found a heretofore unknown universe of electrical activity in the human body.
Chairman of the Nobel Prize Committee Nordenstrom used electrodes to administer an electrical current into cancerous tumors in order to dissolve them in a miraculous fashion. He was also featured on the cover of Discover Magazine in 1986. He lost his job as the head of the Karolinska Institute and was ostracized by his colleagues but traveled to China to work with scientists and doctors there who were more open to his theories.
Girard graduate nominated for Nobel

In a few years, the Youngstown State University alumnus could become a Nobel Prize winner in medicine.

By William K. Alcorn

Vindicator, Youngstown, Ohio

Dr. William Nelson, professor of wellness studies at the Notre Dame de Lafayette University in Colorado says he has positive, mathematical proof that natural medications are better, and his research has earned him a nomination for the Nobel Prize in the field of medicine.

Background: Nelson, a former scientist and mathematician, he based his opinions on quantum physics, a complicated mathematical method used to measure minute energy particles.

“I was able to prove I don’t mean speculate, I mean prove — that the synthetics are not the same.”

Dr. William Nelson Nobel prize nominee

Now the professor of wellness studies remains hopeful that his research will help improve the field of medicine.

Background: Nelson, a former scientist and mathematician, he based his opinions on quantum physics, a complicated mathematical method used to measure minute energy particles.
Chapter 13: Royal Society of Medicine
Presentations on SCIO Technology
“All truth passes through three stages. First, it is ridiculed, second it is violently opposed, and third, it is accepted as self-evident.”

- Arthur Schopenhauer, German philosopher, 1788-1860.

Many years ago a scientific investigator was looking into a treatment protocol for cancer. He surmised that the problem with cancer was an inability of the white blood cells to properly attack the cancer cells of the body. From this, he generated an experiment in which he withdrew blood cells from a patient, separated the white blood cells, and made them into an ointment which he then applied to cancerous tissue. He did this in a scientific study and found it to be successful. Other researchers tried to duplicate his work, but found that it did not work to their satisfaction.

He struggled with the scientific community about their refusal to publish his data, and he struggled to advance his ideas into medicine. Eventually he found that there was a problem with proving a medical hypothesis. So he put together a seminar and invited outstanding scientists from all over the world to attend and offer their opinions on what would constitute scientific proof of a medical hypothesis.

One initial response to his invitation came from a scientist who, in his response, said, "I'm afraid that the idea of scientific proof is one of astounding complexity, and one that I would not be able to personally offer any advice towards." That letter was signed by Albert Einstein.
Dr. Julian Kenyon

Froehlich basically said is that inside the body there is communication that would make an enzyme come to a substrate. This would, in the first instance, be a coherent electromagnetic oscillation. The reason for that is that within the body there's so much going on all the time. There is such a range of biological processes that you've got a signal-to-noise ratio problem.

We have achieved a viable hypothesis after six or seven years of hard work. In two of those years we were able to employ two physicists and electronic engineers, and a biologist and immunologist full-time. We researched the EPFX and found it to be the best energetic medicine device. And the EPFX has a scalar component.

Now, scalar fields are actually quantum fields. They are basically quantum interference patterns between electrons. Electromagnetic fields are derived from quantum fields. Maxwell's equations for the derivation of electromagnetic fields actually do contain a scalar expression. So they are derived from that. They are, therefore, more fundamental than electromagnetic fields.

Electromagnetic fields act as carriers for scalar information. That's very important, because you can piggyback one on top of the other. When I use the Eclosion EPFX system, I'm basically piggybacking the scalar information on top of electromagnetic information. That's why it's easier to do. That's why, for example, if I have to douse out all these patients (I'm not ashamed of saying I do dowsing; I'm a fairly average dowser), I could probably douse out about four patients a day. By that time I'm absolutely tired. With any equipment where I use an electromagnetic field as a carrier, I can cope with probably thirty or forty patients a day without any problem at all. I'm making use of what seems to be a fact that the scalar information is piggy-backed on the electromagnetic information.

For example, in electro-acupuncture, if you want to use an electro-acupuncture stimulation device, the waveforms that work best are square waves, in which the rise time is very high, and the fall time is very very steep. Biological systems respond best to that. Bill Nelson will tell you is that the information carriers are the photons, and I'm sure he's right, because that's what makes the interference pattern.
Richard Gerber, MD, is the author of the 1988 book, Vibrational Medicine: New Choices for Healing Ourselves, a publication that has been reviewed as 'landmark' and 'encyclopedic', and in many ways bridges the gap between science and esoteric healing. Vibrational Medicine cites hundreds of scientific studies that support the energy model of health and healing and presents the theoretical foundation for such therapies as homeopathy and acupuncture.

Is there any type of research that substantiates the existence of this organizing energy field? We need to look no further than the work of Dr. Harold Saxton Burr, who in the early 1940s was a neuro-anatomist at Yale University. He was very much interested in the electrical field characteristics of living objects, plants and animals. He found some rather unusual things about animals and plants. He decided to study salamanders, because their electrical field characteristics were fairly easy to map. You could actually trace the outline of the field around the salamander. It seemed to have an electrical orientation along a central axis, which mapped along the nervous system and spinal cord. And he wondered if this electrical axis in the organism first formed, so he started looking at earlier and earlier stages of embryological development of salamanders trying to draw the electrical field around this earlier and earlier living form. What he found was actually an electrical axis at the level of the unfertilized egg. He wondered if this was the same electrical axis as the one in the adult organism.

It is the necessity of developing this type of sensitive technology to measure things happening at the subtle energy level that will really be important in finding out not only how subtle energy medicine therapies work, but some of the unseen side effects of accepted medical therapy: surgical therapies we are really not aware of. We take for granted that the body heals up just fine, and it doesn't matter that there's some scar tissue over here.

It turns out that it is very important. You do develop energy blockages in the body with surgery, and there are unseen side effects with drugs that happen at the subtle energetic level.

I want to move on from this into this phenomenon of acupuncture. Acupuncture is also an energy system that is very ancient. It is a model that describes energy circuitry throughout the body; yet it is thousands of years old, or older. This particular statue [visual reference] is a teaching statue that is several hundred years old. It shows these different acupuncture points on the body. It's a more contemporary model, used for teaching acupuncture students.
Dr. LaValley is a member of the American Medical Association (AMA), the Texas Medical Association (TMA), the Travis County Medical Society (TCMS) in Austin Texas, the Canadian Medical Association (CMA) and Doctors Nova Scotia. He has also served as the Chairperson of the Complementary Medicine Section of the Nova Scotia division of the CMA since 1994.

Thank you. I feel that it's a great honor to be here; it's a very exciting moment. I think, in the history of this field, because we're here at the Royal Society of Medicine, I want to thank Dr. Nelson and the Royal Society of Medicine for having me here to speak on what I feel is an important and long-controversial subject. In order for clarity, I'm going to read what I have written rather than speak extemporaneously, because there are so many specific points I want to make, and tie together at the end.

My intention is to discuss a scientifically accountable framework, model or paradigm that can begin to give us as scientists and medical practitioners reasonable and logical access to the underlying mechanism or action of homeopathy and homeopathic effect. I must acknowledge the vast number of scientists and practitioners who before me have generated research, knowledge and effort that have made available all the facts and observations drawn upon for this discussion. This discussion will bring into consideration many general facets of science, chemistry, physics, mathematics and homeopathy, in order to build a consistent, coherent model of scientific accountability in this vast area. Concepts will be brought forth in succession, and then tied together in a testable, hypothetical picture or model that acts to include these various schools of thought in a synergistic understanding for all of us to consider, to critique, to investigate, and to explore.
The SCIO will improve the body electric VARHOPE by five% as an average after just one session. The AutoFocusing Harmonic therapies of the Cybernetic Loop of measuring, stimulating, re-measuring, all guided at maximizing the body electric potential will improve your body electric by an average of five%. Improvements of Voltage, Amperage and thus power. Improvements of Resistance and Hydration that means improved enzyme and osmosis transfer of nutrients and detoxification. Improvements in Oxidation meaning more endurance. And improvement in Ph meaning more health. No wonder there are a mile long list of testimonials. Now we can understand why the sport athletes get such great results. A five% improvement is a great edge for a professional sportsman. The patented and proprietary process of the SCIO and QQC have been proven on the world scientific stage to work wonders of improving and stabilizing the body electric.

If you need more information on the SCIO and purchase details please get in touch with us
Maitreya Kft.

Dr. Bill Wolfe graduated from Baylor University College of Dentistry in Texas in 1972. He practiced dentistry in Austin, Texas from 1972 until 1978, and in Albuquerque, New Mexico from 1978 to the present day. Dr. Wolfe also has a doctorate degree in naturopathic medicine. He is a member of several organizations including the American Dental Association, the Holistic Dental Association, the American Association of Biological Dentists, the American Association of Health Practitioners, and the Environmental Dental Association, of which he is a director.

This is important in the United States right now: informed consent. In many areas of medicine, it is quite usual that the patient must be informed of what the procedure they are going to be receiving involves. Yet, we have a material that has been used in the United States at least since the 1820s. We've been fighting about it for that long. We've called it silver fillings. Now, by the FDA labeling laws, you are supposed to put the ingredient with the highest content first. So if you had a mixture of mercury which is fifteen percent, silver which is thirty percent, and then tin, tin and copper, what would you call it? A mercury filling. This demonstrates the level of denial of the American Dental Association to call it a silver filling instead of a mercury filling, with fifty percent mercury.

Now, what happens is that once the mercury is mixed into the sludge of metals, the mercury does vaporize. I was the first dentist in the United States to purchase a mercury vapor detector, which is like a Geiger counter. It was originally developed for mining geological surveys, because wherever they find mercury vapor in a cave or mine, there is usually gold associated with it. That's why I don't feel that a dentist should put gold and mercury in the same mouth; they're very attractive to each other, and create a battery effect.

The US Navy found out about this machine, that it can detect mercury vapor, and purchased two hundred of them for their submarines, because in electrical switches, gauges, et cetera there's a lot of mercury used, and they didn't want vapor leaks in a closed, pressurized container under the ocean. So they purchased the vapor detectors, and started using them in their industry. OSHA in the United States, which controls work environment, has testing methods where if they come into your industry with a mercury vapor detector, and find more than .05 milligrams of mercury per cubic meter of air, they can fine you ten thousand dollars, and close your plant down. Yet, there are many of you in this room who have that much mercury vapor coming out of one tooth.
Dr. Will Corell is a cum laude graduate of Yale College, 1970 and Stanford University School of Medicine, 1974. He completed five years of postgraduate training including Internal medicine, Ear, Nose and Throat, General Surgery, and Family Medicine.

He was board certified by the American Academy of Family Practice in 1979 with recertification in 1986, 1993, 2000 and 2007. He has been in practice in the Spokane area since 1979, where he blends aspects of traditional medicine with his primarily holistic-oriented medical practice.

Thank you, Dr. Nelson for inviting me here. Thank you all for having me here. It's a great honor to be talking in the Royal Society of Medicine here in London.

I'd like to address my talk today on some of the more practical applications of some of the bio-medicine techniques we've been talking about today. For the purpose of the talk, I'd like to address a syndrome we call CHRONIC FATIGUE SYNDROME in America. I understand that here it's called myalgic encephalomyelitis. If you don't mind, for my untrained American tongue, I prefer to call it chronic fatigue syndrome, or CFS, or more appropriately, chronic fatigue immune deficiency syndrome.

First off, the criteria. A patient must have both major criteria to be identified as having chronic fatigue syndrome, again, for purposes of research. The primary onset of fatigue, persistent or relapsing, or easy fatigability with the conditions you will see described.

The second factor under major criteria-- and here is where we may have some disagreement-- there is an exclusion of other conditions that produce similar symptoms. I would look specifically at letters C or D, especially chronic or sub-acute bacterial, fungal or parasitic disease. As Dr. Nelson mentioned, the degree of vigor with which we look for parasitic disease will often determine our success at finding it. So when my colleagues typically say they've done a routine investigation for parasitic disease and found the workup negative, I think we need to take that with a small to moderate-sized grain of salt. As we've all discussed, I think parasitic disease is much more common than traditionally reported.

I've been measuring patients for ten years now with my mercury vapor detector, and very rarely do I find a filling that doesn't have mercury vaporizing from the filling, no matter how old it is. That's why it's called chronic micro-mercurialism, low-dose mercury exposure over a long period of time. This is why it may take years before the chronic exposure to mercury is noticed. When you're eighteen or twenty-five, the adaptive capacity of your immune system to deal with these mercury fillings is much greater. But maybe you're forty now, and with the pesticides, pollutants, preservatives, stress, plus the mercury vapor leakage affecting your teeth, then it does begin to catch up with you.
Dr. William Nelson

Inventor of the Electro-Physiological Feedback Xrroid Interface EPFX

Born and raised in Ohio, Bill Nelson was identified as a genius from an early age. As a young man, his interest in quantum physics and electronic engineering led to his work on the navigation system for the Apollo space project. He turned his genius to the field of medicine and health after the birth of his first-born son. His son retreated into the world of autism—a result of an anti-nausea drug his wife took while pregnant. After devouring the information offered by a medical world, he turned to the world of alternative health. With natural remedies, he was successful in reversing many of the symptoms of his son’s autism.

During his research, he was intrigued by a number of bio-electric devices being used in Germany—the Vega machine, the Yoll, and the Mora unit—as well as biofeedback and cranial electrical stimulation (CES) units in the US. These units either measure the body’s electrical response to help diagnose problems in the body or they emit frequencies to treat problems. He also studied the body’s subtle energy systems—acupuncture meridians, chakra energy, applied kinesiology or muscle testing, etc. The body’s subtle energy system is an early warning system. Imbalances in the body’s subtle energies show up much earlier than disease symptoms. Bill Nelson decided to apply his genius to design an all-inclusive system—a computerized system that would both test and balance the body at the subtle energy level. The EPFX was born.

To develop this system, Bill Nelson has integrated the sciences of mathematics, quantum physics, electronics, naturopathy, homeopathy, chiropractic, energetic medicine and computer programming. He has also incorporated his knowledge of metaphysical subjects to bring a unique synergistic perspective to natural healing. He has studied homeopathy, naturopathy, science, business, computer science and international law. He has also mastered the difficulties of creating the software to integrate the many healing modalities he has programmed into the EPFX system. His unique knowledge of esoteric subjects such as fractal dynamics, subspace theory, a tri-vector system and more has made this energetic feedback system possible.

The EPFX gathers bio-energetic data from the body via twenty channels simultaneously. The information is prioritized to help the natural health practitioner zero in on the body’s current specific needs. The program offers information specific to your subtle energies-emotional and mental stresses, nutritional needs, food sensitivities, digestive and cleansing needs, etc. In the hands of a trained health practitioner, the imbalances in the subtle energy field are tracked to determine the most probable sources of ill health. In addition, the EPFX has the capability to apply approximately 50 different corrective energies to help the body establish energetic balance for health and well-being. The health practitioner is also able to determine the lifestyle changes and remedies that will best help you as a next step in your plan for better health.
Chapter 14: SCIO and Sports Studies
SCIO Sport Study review

The 7th Congress of the Hungarian Sport Science Review, Budapest, Hungary

Presentation at the Semmelweis Egyetem, Testnevelési és Sporttudományi Kar (TF) Budapest
Date: 28th of May 2009
VII. Országos Sporttudományi Kongresszus
By: Prof. Desiré Dubounet

Some of the best cyclists in the world have used the SCIO to win championships.

Basic 5th grade science tells us. We are made of atoms and atoms are made almost exclusively of electrons, protons and neutrons. None of us can in any way perceive this simple truth presented to us in 5th grade. We live in the false belief that there is solid flesh in our bodies, when we know that it is not true. The outer area of any atom or molecule is made of the electrons. The electrons have a very strong electric charge. So strong that two electrons can almost never touch, the energetic charge will repel them. No atom ever touches another atom. No molecule ever touches another molecule. Everything is held together with energetic, quantum, electro-static-magnetic, or other subatomic forces. All of life is mostly electrons and protons that never touch but only interact through electro-magnetic fields. These are the basic forces of electricity. All of the interactions of life are energetic and electrical at some level, 5th grade fact.

Chemistry has been taught with the analogy of rods and balls. Every chemistry student has been shown molecules with balls for atoms and rods for the bonds. This implies there is a solid nature. There is not. The atoms are energy fields, the bonds are also fields not much different than two magnets that repel on the table. There is no rod or ball, but this analogy is used by the pharmaceutical companies to sell their wares. It is a false belief.

The field of voltammetry tells us this simple fact. We appear solid because these forces are strong. But we cannot touch anything but just interact with energy fields. This is basic 5th grade science but our society has decided that since this interferes with the sale of pharmaceuticals, we will ignore this simple truth in medicine. People such as me, who try to reposition medicine to this truth are attacked and persecuted.
Project December 2007 - A two-week project in Shanghai and Beijing

Author: Jeffrey Sutton, Medabolic Inc., Calgary, Canada, May 28, 2009

In China the word for sport is pronounced T.U. It means education of the muscles. This device is registered in America to re-educate the muscles. The perfect test of the technology was about to come.

First 5 days in Shanghai.

These were very rigorous sessions with important business people, including Victor’s friends and colleagues of esteemed sports physician Dr. Chu, whom Adam had made an impression with a year earlier. They were all “friendly” contacts that were presented as practice for Adam and me, prior working with Dr. Li Guoping and the doctors at the Sports Hospital in Beijing. The Shanghai participants included top-class sports medicine doctors, cardiologists, Nutrition professors, surgeons, plus several high-level industrialists and business owners.

The Chinese doctors were skeptical, but they were used to words and concepts of subtle energies such as Chi. They still had no knowledge of electronics and did not want to admit or confront their lack of knowledge, just the same as the typical western doctor. Ego defense of False beliefs can be excessive. But after seeing success many (not all) were more and more interested.
On the Sheik’s Arabian horses they use artificial insemination to help increase the rate of survivial.

They were only 3 % successful before the Scio but 65 % successful after using the SCIO. The SCIO works on Horses.
Sheik Saeed Bin Maktoum crown prince of Dubai on his SCIO
Dear Desire:

It was a pleasure to talk to you. I have heard so many good things about you and when we compared the free throw % of our players to before and after the SCIO treatment we showed a consistent increase of about 5%. Since we have good records of their free throw success this proves the SCIO is successful at stimulating their eye to hand coordination.

Also thanks for the use of the SCIO device, we have used it on our basketball players here in Texas with the San Antonio Spurs organization. It has been shown to boost coordination, strength, endurance and mental sharpness just with a 15 minute burst. It is amazing and I hope to use it more and maybe even on myself.

Thanks,

Dennis Johnson
At The 2011 World Congress on SCIO in Budapest Dr Igor Cetojevic gave us a Basic presentation on Traditional Chinese Medicine TCM his work with Novak was protected under confidentiality. His presentation of Traditional Chinese medicine with the SCIO was insightful and the participants learned at lot of vital usage of the SCIO in medicine.
The International Medical University of Natural Education IMUNE who sponsors the International Journal of the Medical Science of Homeopathy and Natural Medicine wishes to invite all and any to attend our yearly world congress on medicine. If you would like to present material please send us a proposal. Please send us studies, letters, comments, articles, photos, testimonials, or stories for us to consider for publication.

If you wish to give a workshop, or have a booth please send us a proposal.

Please send us in acceptable form to:

Edit Barota - Conference Organizer
edit@qxsbspace.com

Every year in October, Prof William "Bill" Nelson invites you to the "QX World Conference" in the beautiful European city of Budapest, Hungary. Prof Nelson and his office staff, The Budapest Home Office, are the creator and manufacturer of the universal electrophysiological biofeedback system, the SCIO. Prof Nelson and his staff are living and working out of Budapest and this is a chance to meet them as well as numerous other Trainers and Speakers from around the world covering various topics connected to the device.

Call for papers and presentation booths, workshops etc.

An Introduction to Quantum Biofeedback and its use for Sport Performance Enhancement

Author: Jeffrey Sutton, Medabolic Inc., Calgary, Canada

ABSTRACT

Quantum Biofeedback offers a state-of-the-art methodology for identifying and reducing the impact of stressors and stress responses exhibited by the body electromagnetically and informatically, which has applications in medicine and sport performance enhancement. Specific low-dose micro-currents are fed into the body via extremity and head electrodes, and responses are measured via a process of non-invasive automated biofeedback referred to as Electro-Physiological Feedback Xrroid® (EPFX). A review of conventional biofeedback literature shows strong scientific support for the general benefits of biofeedback training and technologies for a broad range of symptoms, disorders and performance enhancement. Advancements in computer technology and bioelectromagnetics (BEM) research have provided the foundation for Quantum Biofeedback, an evolved form of biofeedback training, which offers similar mind-body benefits combined with additional medical possibilities not seen before, such as, digital-human cybernetic interface, double-blind electro-physiological response measurement, instantaneous feedback, sub-clinical wellness forecasting, and auto-focusing corrections. The EPFX device—a culmination of over 30 years of research, development, and application—is introduced, along with case evidence demonstrating EPFX use and efficacy with athlete performance and recovery.

Bioenergetische Diagnose und Therapie mit umweltmedizinischem Potenzial

Anwendungsmöglichkeiten des computergestützten Bioresonanzsystems SCIO

Seit zwei Jahren macht auch in Deutschland ein bioenergetisches Hochtech-System (SCIO) mehr und mehr von sich reden. Seine Attraktivität liegt in der Möglichkeit begründet, nicht nur die energetischen Störungen des Patienten zu diagnostizieren, sondern auch mit ihm gleichzeitig die meist energetischen Therapien durchzuführen. Dieser Beitrag befasst sich mit der Fragestellung, welche Optionen dieses Systems bietet, funktionelle Störungen, die durch Schadstoffe der Umwelt hervorgerufen werden, zu analysieren und zu behandeln. Zum besseren Verständnis wird zunächst in die Funktionsprinzipien dieses bioenergetischen Verfahrens eingeführt.

SOQ ist ein hochkomplexes bioenergetisches Verfahren, das, wie es das System energetische Muster eines Organismus erfassend und auf Grund aller tausend registrierter Daten entsprechende Therapiemethoden aufzeigt, die dann auch direkt durch das System angewandt werden können. Es verweigert schließlich die Prinzipien der konventionellen Medizin, weshalb es als Therapeutikum vieler skeptischer Anwendungen verwendet werden kann.

Biophysikalische Steuerung des Organismus

Das System macht sich das Grundprinzip der Quantenphysik zunutze, nach dem zu jedem Materieteilchen ein elektronisches Feld gehört, also auch zu jeder Zelle, zu jedem Organ und zu jedem Einzelgremiier.

Gestörte Schwingungsmuster deuten auf ein zunehmendes Krankheitsrisiko hin, das sich zu einem akuten oder auch chronischen Leiden auswachsen kann.

Mit dem System wird die energetische Reaktionskraft des Körpers, über die sich die Reaktivität des Organismus ändert, wenn der Körper von außen ausgesetzt wird, und mit welchem Veränderungsverlauf der Organismus auf die Störung seines energetischen Netzwerks antwortet gemessen. Dieser Wirkungsgrad ermöglicht das mit einem Computer durchgeführte computergestützte Bioresonanzsystem zur Verfügung, indem es die aus mehreren Kilometer entfernt auftretenden physikalischen Eigenschaften, die auf die Substanzinformationen in der Umgebung vermittelt wird, verstärkt und verstärkt wird.

Resonanz-Test

In der Elektroakupunktur wird die bioenergetische Informationen einer Substanz auf die elektrische Dimension protrahiert und die Reaktivität des Organismus über den Hautwiderstand gemessen. Dieser Veränderungsverlauf ermöglicht die automatische Abtastung von denjenigen Substanzen, die die Substanzinformation in der Umgebung vermittelt.

Mit Hilfe dieser Technik werden Frequenzmuster und Energieabgabe von rund 1000 homöopathisch aufbereiteten Substanzen, die zusammengenommen bekannt sind, gemessen und die Substanzen, die eine wissenschaftlich relevante Information vermitteln können, erkannt.

Insgesamt ist das bioenergetische Verfahren SCIO ein hilfreiches Instrument zur Diagnose und Therapie von Krankheiten und stellt eine Alternative zur konventionellen Medizin dar.

Teknologi
SI CHIAMA OXCI
È un piccolo computer in grado di curare
È stato presentato al circolo della Stampa di Milano dal suo inventore, il Professor Bill Nelson, insignito scozzese per la prima volta in Italia, esperto in medicina bioenergetica, che studia gli equilibri e le dinamiche delle energie trasmesse o prodotte dalle cellule.
Nelson è riuscito a sviluppare una tecnologia elettronico-informatica altamente evoluta, in grado di produrre e misurare variazioni quantiche così sensibili da interagire con le energie sottili del nostro corpo, riuscendo a modificare e correggere i flussi energetici allo scopo di riequilibrare lo stato di salute fisica. Con un piccolo computer, senza l'assunzione di medicine.
Il mondo scientifico si concentra sulla medicina quantica

La macchina dell’energia

attenzione del mondo scientifico per la medicina quantica, indagine sull’anatomia energetica, sistema operativo che regola gli equilibri del ciclo vitale. La malattia, infatti, altro non è che un alterazione del flusso energetico. Bill Nelson ha saputo cogliere l’antica tradizione cinese che da cinquecento anni ritiene che l’energia corporea con i più attuali sviluppi della medicina che opera sulla biologia energetica. Lo studioso americano ha così portato a realizzazione la “Quantum Xiroid Consciousness Interface, tecnologia elettronomatematica d’interfaccia, che consente la misurazione dei fotoni promani dal corpo umano. Rivoluzionaria, dunque, sarà la diagnosi legata a questo nuovo campo applicativo della Bioenergia, in quanto la misurazione consentirà di studiare le variazioni quantiche dell’energia dell’organismo. Ne conseguiti, in ambito terapeutico, l’applicazione compensativa di attrezzature variazioni capaci di influenza a mezzo di minute energie. L’intervento sui flussi energetici dell’organismo consentirà la riaquisizione dell’ottimale livello biologico per il corpo. Ciò che, oltretutto, conta è che ci si trova dinanzi a una terapia priva di controindicazioni, non invasiva, indolore e, per quanto concerne l’esito terapeutico, assolutamente precisa; il procedimento potrà essere utilizzato per terapie elettromagnetiche, ma anche per la biorisonanza e radionica. Un sistema misterioso potente, impiantato informaticamente, volerà il modulo di risposta necessario alla situazione riscontrata, modulo che si interrompe automaticamente allorché l’applicazione è ritenuta completa. Negli Stati il macchinario, registrato presso il Food and drug administration, è da tempo operativo presso le più diverse branche mediche. Ci sarà da attendere del tempo prima che tale tecnologia possa essere capacitamente gestita sul territorio. A Milano, tuttavia, già opera un centro specializzato in raccordo con le strutture americane, che sta consegugando apprezzabili risultati. Recentemente ha però questa prescrittiva la “macchina” messa a punto da Bill Nelson, suscitando notevole interesse non solo nell’ambito della comunità scientifica, ma soprattutto di quanti, affetti da patologie croniche, non riescono a trovare una risposta dalla cosiddetta medicina ufficiale.

NON RISCHIARE LA PELLE

Cosmetici sicuri? Non tanto. Sulla pelle sana causano dermatiti intolleranze e allergiche da contatto, orticato, fotosensibilità, acne e cosmétique in due persone in più casi. Lo dice un'inchiesta epidemiologica del Gischa, Gruppo italiano ricerca dermatiti da parlato e ambientale (ora parte della Fidaas, Società Italiana di dermatologia allergologica professionale e ambientale) durata 15 anni, che ha coinvolto 63 mila 762 italiani. Il 12,5 per cento delle dermatiti da contatto non lavorative sono dovute ai cosmetici. L'allergia ai profumi interessa il 1%. Secondo uno studio europeo effettuato per Johnson & Johnson da università francesi, inglesi, belghe e tedesche, le reazioni allergiche sui 475 volontari sono state:

- 165 per conservanti di crema e prodottiviso-corpo,ingerenti solari, per capelli e per make-up;
- 144 per profumi in questi prodotti;
- 105 per ricettanti emulsi e sublimi negli stessi prodotti;
- 112 per ingredienti di tinture, liquidi per permanenti, smalti per unghie, unghie artificiali. Inoltre, sottolinea la dermatologa Donatella Schena dell'Ospedale Civile di Verona, l'Istituto finlandese di medicina del lavoro dell'Università di Helsinki ha scoperto che il 75% degli ombretti costituisce cromo, arsenico, piombo, nichel e cobalto, e i 50% di questi prodotti contengono sostanze nocive.

Un rischio per chi ha una sensibilità ai metalli. M.C.S.

QUANTICA

Una nuova medicina unisce l'Inn-tech alla tradizione cinese

di Letizia Michelozzi

Nel flusso segreto DELL'ENERGIA

La chimica quantica fa sorgere la branca che esplora l'anatomia energetica del corpo umano. L'energia nasce dal centro della vita, dalle cellule che costituiscono la salute. Se per qualche ragione il flusso energetico viene turbato, si iniziano ad avvenire disturbi e sofferenze, e si sviluppa la malattia. L'American Bili Nelson - biofisico, matematico, studioso di medicina bioenergetica e ormoniaca, esperto elettronico e informatico, già collaboratore della Nasa per il progetto Apollo - è riuscito a integrare gli sviluppi della medicina tradizionale cinese, che da cinquant'anni agisce sull'energia, con la moderna medicina bioenergetica. Ha così sviluppato una tecnologia elettronico-informatica molto raffinata, il Qci (Quantum Xrod Consciousness Interface), un'interfaccia che permette di misurare il numero dei fotoni erogati dal corpo umano. Il sistema è in grado di aprire un'occhiata alla vita di getti, misurando le variazioni quantiche (vedi riquadro) di energia all'interno dell'organismo e, in seguito, a livello terapeutico, produrre un flusso di energia a livello del corpo umano e un flusso di energia a livello del corpo umano e un flusso di energia a livello del corpo umano e un flusso di energia a livello del corpo umano.

NELCUOLO DEL BENESSERE

L'atomo è costituito da un nucleo, attorno al quale ruotano gli elettroni che orbitano intorno alla nebo caratterizzata da particolari livelli energetici, spiegato Peacock, fisico dei laboratori di fisica dell'Ospedale E. Monti di Sondrio (Sondrio, Torino, Torino, Torino, Torino, Torino, Torino). Il corpo umano è formato da eosinofili, neutrofili, basofili e basofili, che scavano informazioni per le cellule, ognuno degli organi, ognuno degli organi, ognuno degli organi, ognuno degli organi, ognuno degli organi, ognuno degli organi, ognuno degli organi, ognuno degli organi, ognuno degli organi, ognuno degli organi, ognuno degli organi, ognuno degli organi, ognuno degli organi, ognuno degli organi, ognuno degli organi, ognuno degli organi, ognuno degli organi, ognuno degli organi, ognuno degli organi, ognuno degli organi, ognuno degli organi, ognuno degli organi, ognuno degli organi, ognuno degli organi, ognuno degli organi, ognuno degli organi, ognuno degli organi, ognuno degli organi, ognuno degli organi, ognuno degli organi, ognuno degli organi, ognuno degli organi, ognuno degli organi, ognuno degli organi, ognuno degli organi, ognuno degli organi, ognuno degli organi, ognuno degli organi, ognuno degli organi, ognuno degli organi, ognuno degli organi, ognuno degli organi, ognuno degli organi, ognuno degli organi, ognuno degli organi, ognuno degli organi, ognuno degli organi, ognuno degli organi, ognuno degli organi, ognuno degli organi, ognuno degli organi, ognuno degli organi, ognuno degli organi, ognuno degli organi, ognuno degli organi, ognuno degli organi, ognuno degli organi, ognuno degli organi, ognuno degli organi, ognuno degli organi, ognuno degli organi, ognuno degli organi, ognuno degli organi, ognuno degli organi, ognuno degli organi, ognuno degli organi, ognuno degli organi, ognuno degli organi, ognuno gli
BASIGLIO — Nel centro storico di Basiglio, in via Gennari, in una piccola bottega, si trova il "Centro Terapie Naturali". È gestito da Federico Borio, naturopata e terapeuta specializzato in psicologia e psicosomatica. Il centro offre una serie di servizi a base di tecniche alternative come la terapia viscerale, la terapia energetica, la terapia endocrino-fisiologica, la terapia energetica magnetica, la terapia di campo magnetico e la terapia energetica elettromagnetica.

BASIGLIO — Per chi crede nella medicina alternativa, ecco lo «scanner» che misura l'energia del corpo umano.

Il "scanner" utilizzato è stato sviluppato dall'Università di Basiglio e consente di rilevare le variazioni energetiche del corpo umano. La procedura è avvenuta in un ambiente protetto, dove i soggetti erano seduti su sedie speciali. Durante l'esame, i soggetti sono stati esaminati per un periodo di circa 30 minuti, e il risultato del test è stato registrato su un sistema di computer. Il «scanner» consente di rilevare e analizzare le variazioni energetiche del corpo umano, che possono essere causate da diversi fattori come stress, malattie e malattie croniche.

"Il QXCI - afferma Federico Borio - consente di eseguire una serie di diagnosi energetiche del paziente. La tecnica, attraverso l'osservazione di piccoli cambiamenti nella frequenza cardiaca, analizza l'energia dell'organismo."

"E' fondamentale comprendere che non è possibile sottoporre a questo tipo di esame i portatori di apparecchiature elettroniche."

"Vorrei sottolineare che la tecnica QXCI è stata sviluppata e testata in varie parti del mondo, e confermerà l'importanza del rispetto dei limiti e delle norme."

Daniele Stasi
Il QXCI e i nuovi traguardi della medicina bioenergetica

Un evento straordinario per il mondo scientifico:
Il Professore Nelson, insignito scienziato per la prima volta in Italia, parlerà di medicina bioenergetica, che studia gli equilibri e le dinamiche delle energie trasmesse o prodotte da cellule, tessuti e organi; l'energia vitale, elemento essenziale di trasmissione e coesione dal quale dipende la vita. Un'energia che nasce con noi e preserva, durante la nostra vita, i delicati equilibri che costituiscono lo stato di salute. Se il flusso energetico viene perturbato, per qualsiasi ragione, si altera l'equilibrio, si iniziano ad avvertire disturbi e sofferenze e può svilupparsi la malattia. Questo insegna la medicina tradizionale cinese da oltre 5000 anni. Nelson incontrerà la stampa, i medici e gli studiosi per presentare le sue scoperte e le applicazioni del sistema QXCI, la più avanzata espressione tecnologica attualmente disponibile nell'ambito della medicina bioenergetica, in grado di rivoluzionare la diagnosi e la terapia medica. Introdurrà il prof. Piergiorgio Spaggiari

Sabato 14 settembre 2002 - ore 10.30
Circolo della Stampa - Sala Bracco - Corso Venezia 18 - Milano
Per le allergie, un rimedio high tech

L'allergia non va mai in vacanza. Secondo un recente studio dell'americano National Institute of Allergy a causa dell'allergia, in crescita del 30%, non sono solo pollini e alberi, ma un cocktail di muffe, acari, inquinanti presenti nei detergenti. Un rimedio high tech, ma anche «naturale», arriva dagli Usa e si chiama QXCI, Quantum X-roid Consciousness Interface, un sofisticato sistema di diagnosis e cura delle allergie elaborato dai tecnici della NASA, la cui intuizione è della scuola bioenergetica americana. La filosofia del metodo? «E' quella di ristrutturare l'elettromagnetismo alterato di una cellula sotto lo stress allergico e stabilire il corretto equilibrio elettrico. Solo così è possibile riaziuvare le funzioni compromesse dalla reazione allergica», spiega il dottore Umberto Maria Filippi, esperto in medicina quantistica del centro Tuscaloosa. La paziente durante il trattamento sta seduta e impugna due elettrodi in modo che il segnale energetico possa giungere al suo corpo. «Questi elettrodi analizzano stato energetico generale e locale, stress psicofisico, livello diacidità del corpo, inflammazioni e quantità di ossigeno in circolo. Con gli stessi elettrodi e dosando le frequenze energetiche non invasive si reintegano i danni cellulari», aggiunge Filippi. Il principio teorico? «Ogni potenziale allergene genera un picco di frequenza unico. La cura consiste nell'inviare un segnale speculare a quello paralogico in modo da annullarlo». QXCI lavora come un radar, irradia e riassorbe energia evidenziando anche i punti in cui il flusso elettrico viene dispero. Li invia nuovi impulsi di correzione che riducono lo stato infiammatorio. Un altro aspetto? E' quello di valutare l'efficacia di farmaci e rimedi somministrati prima di fare la cura. A volte bastano tre sedute per risolvere il problema mentre in caso di sensibilità a più sostanze il trattamento va ripetuto. Per saperne di più c'è il trattato La Medicina quantistica di Piergiorgio Spaggiari (Tecniche Nuove, pagg. 200, euro 15) o si può telefaxare al numero verde 800015411.

Tra le cause di allergia non ci sono solo i pollini (foto in alto), ma anche muffe e acari. Sotto: le pesche bio sono ricche di vitamine e sali minerali.

CONTRO LE OCCHIAIE, UN INFUSO DI ISSOPO

Non ho alcuna patologia, oppure ho molto spesso le occhiaie. Seguito che sono sempre starnutiata e soffro d'insonnia. Vorrei un rimedio fitoterapico. (Paola, L.)

Risponde Paul Belaiche, professore di fitoterapia, all'università di Robigyn di Parigi e presidente dell'Institut National de Phytothérapie.

Un rimedio efficace è l'issopo, da usare in infuso una volta al giorno. Mettere 50 g di foglie e fiori di issopo in un litro di acqua bollente per 10 minuti. Una volta freddo, applicare il composto sugli occhi con una garza sterile per 15 minuti. Così gli odi essenziali e i flavonoidi (simili vitamine dell'issopo) penetrano nella pelle e raccoglono il circolo sanguigno. Altro metodo è l'acqua di rose, ricca di vitamina C, rigenera il microcircuito potenziando gli effetti dell'issopo. Si applica nello stesso modo.

(Testi raccolti da Maria Angela Massim)
L'avvocato Muzza è il nuovo Segretario comunale

Il Sindaco Sergio Graffeo il 16 luglio 2002 ha nominato Segretario Generale del Comune di Corsico, con decorrenza immediata, l'avvocato Cino Muzza, già vice segretario e direttore dell'ufficio Legale e del settore istituzionale.

Informaggionavi per il lavoro

Colloquio di accoglienza orientativa.

Ecco cosa permette di ottenere uno dei buoni posti (anche detti voucher di base) rilasciati dall'ufficio Servizi per l'impiego e spentibili presso vari enti e associazioni fra cui anche l'informaggionavi di Corsico.

D'ora in poi infatti, potrete avvalervi della loro più che decennale esperienza nel campo dell'orientamento professionale che vi permetterà di sapere come e dove indirizzare i vostri sforzi nella ricerca di un impiego.

Tralasciando l'aspetto burocratico della vicenda, concentriamoci ora su cosa sia effettivamente un colloquio di accoglienza orientativa.

Dietro questa definizione si nasconde il primo, e forse più importante, passo nel difficile percorso di inserimento nel mondo del lavoro: durante questo incontro il personale informaggionavi (nel caso in cui abbiate deciso di avvalervi della loro consulenza per questo servizio) si occuperà di individuare capacità e competenze dell'utente e di capire in quale ambito lavorativo cerchi impiego.

Conclusa questa prima fase potranno essere consigliati corsi di formazione per conseguire determinate competenze necessarie in ambito lavorativo, oppure sarà fomita

una consulenza relativa all'orientamento professionale da seguire.

Nel primo caso gli eventuali corsi, tirocini o stage consigliati si terranno presso vari enti nel territorio provinciale all'interno di progetti specifici.

I buoni, sia quelli di base che quelli specialistici, vengono rilasciati a inoccupati e disoccupati senza alcuna limitazione di età e, entro sei mesi dalla disoccupazione, saranno convocati direttamente dai Servizi per l'impiego.

Per ulteriori informazioni sui buoni base, su come ottenere e sul decreto 181 che li ha introdotti rivolgetevi presso informaggionavi, tel. 024474412, fax 024474197.
Grande successo ieri al convegno presso il Circolo della Stampa di Milano: il prof. Bill Nelson, insigne scienziato per la prima volta in Italia, ha parlato sul tema

"Il QXCI e i nuovi traguardi della medicina bioenergetica"

L’argomento, introdotto e coordinato dal prof. Piergiorgio Spaggiari, è stato trattato con dovizia di particolari. Le molte domande del pubblico e le esaurenti risposte del prof. Nelson hanno arrecitato e vivacizzato il convegno che è risultato dinamico e interessante anche per i non "addetti ai lavori".

Nell’ambito della medicina bioenergetica, che studia gli equilibri e le dinamiche delle energie trasmesse o prodotte da cellule, tessuti e organi, la medicina quantica esplora profondamente l’anatomia energetica del corpo umano: studia l’energia vitale, elemento essenziale di trasmissione e coesione dal quale dipende la vita. Un’energia che nasce con noi e preserva, durante la vita, i delicati equilibri che costituiscono lo stato di salute. Se il flusso energetico viene perturbato, per qualsiasi ragione, si altera l’equilibrio, si iniziano ad avvertire disturbi e sofferenze e, conseguentemente, si sviluppa la malattia. Questo insegna la medicina tradizionale cinese da oltre 5000 anni.

Il prof. Nelson ha saputo abilmente integrare questi insegnamenti con la moderna medicina bioenergetica, sviluppando una tecnologia elettronico-informatica estremamente evoluta, in grado di produrre e misurare variazioni "quantiche" di energia così sensibili da interagire con le "energie sottili" del nostro corpo, modificando e correggendo i flussi energetici al fine di ripristinare l’equilibrio e la salute. Il nostro corpo risponde positivamente a questi stimoli, che riconosce propri, sia energeticamente sia sotto forma di bioinformazione; l’effetto terapeutico è estremamente efficace, preciso, indolore, non invasivo e, soprattutto, privo di qualsiasi effetto secondario. Nelson ha spiegato quanto siano eccezionali i risultati nelle cure organiche, sistemiche, mentali, ormonali, del dolore, nelle allergie, nelle parassitosi, contro la cellulite, etc. L’incontro con il prof. Nelson è proseguito nel pomeriggio in una sessione riservata ai medici presso la sala conferenze del poliambulatorio ALGOS, dove sono stati approfonditi i temi del mattino e presentate tecniche di diagnosi e terapie.

Arriva il computer Qxci che cura un po' di tutto

Il nome - Qxci - sicuramente dice poco, ma il super computer impiegato nella medicina bioenergetica, inventato da un ex scienziato della Nasa, Bill Nelson e presentato ieri, sembra destinato a rivoluzionare lo studio degli equilibri e delle dinamiche delle energie trasmesse o prodotte da cellule, tessuti e organi; proprio le perturbazioni dei flussi energetici, infatti, generano disturbi e sofferenze, secondo quanto sostiene la medicina cinese. Da un punto di vista terapeutico, il macchinario è in grado di curare un po' di tutto, dalle allergie alla cellulite, in modo indolore e privo di effetti collaterali.
**APPUNTAMENTI**

**DIBATTITI** - "Il Minareto di Jam, Afghanistan. Perché salvarlo?" Se ne parla, alle 18, all'Ottagono della galleria Vittorio Emanuele, con Andrea Bruno, responsabile Unesco per gli interventi di restauro in Afghanistan.

**MUSICA** - Vincenzo Mirabella ritorna al Mama Café (via Caminadella 7) proponendo il suo vasto repertorio classico e contemporaneo con originale versatilità.

**BIOENERGETICA** - Alle 10.30, alla sala Bracco del Circolo della Stampa (Corso Venezia 16), il professore Bill Nelson parlerà sul tema "Il Qocci e i nuovi traguardi della medicina bioenergetica".

**FESTA** - Nella storica sede dell'Istituto Iic, Schiaparelli Gramsci (via Settembrini 4), dalle 11, si terrà la 1ª Festa del Diploma.

**JAZZ** - Allo Jumpin' Jazz Ballroom, in viale Monza 140 (1° piano), alle 22, inaugurazione della nuova stagione musicale con il Quartetto di Paolo Tomelleri. È gradita la prenotazione al 02/28 04 07 00.

**DANZE SACRE** - Dalle 9.30 alle 18, nella palestra Egca (corso Buenos Aires 61), si terrà un seminario di danze danze di Gurdjieff. Info al 02/95 30 24 51.

**LATINOAMERICANO** - Alla casa HispánAmerica (Corso Magenta 79/81), alle 21, "De la vida el desamor y la muerte" con la soprano uruguaiana Laura Blanco e il maestro Uniberto de Baptista.
QXCI: un piccolo computer in grado di curare

L'ha spiegato a un folto pubblico interessato (molti i medici presenti) il professor Bill Nelson, noto scienziato americano, biofisico e matematico, studioso di medicina bioenergetica, osteopatia, nutrizionista, esperto elettronico e informatico, collaboratore della NASA per il progetto Apollo, autore di numerose pubblicazioni scientifiche a livello internazionale. La medicina bioenergetica studia gli equilibri e la dinamica delle energie trasmesse o prodotte da cellule, tessuti e organi. Si tratta di un'energia vitale che nasce con noi e preserva, durante la nostra vita, i delicati equilibri che costituiscono il nostro stato di salute. Se il flusso energetico viene perturbato, si altera l'equilibrio, si avvertono disturbi e sofferenze e può svilupparsi la malattia. Questo è il segreto della medicina tradizionale cinese da oltre 5000 anni. Nelson ha presentato le sue scoperte e le applicazioni del sistema QXCI, la più avanzata espressione tecnologica attualmente disponibile nell'ambito della medicina bioenergetica, in grado di rivoluzionare la diagnosi e la terapia medica al Circolo della Sausa.
Per informazioni sul QXCI: www.qxicur.it
Atlantico di Milano, sul piatto la musica servita da Coccoluto

MILANO — Si continua, come si dimostrò durante la premessa, non solo nel ristorante "Il Milione" della via C. Brera, ma anche in una sala da gioco a piazza della Scala, dove una notizia di cronaca romana e un servizio di cronaca musicale servirono da sfondo a una serata che non smise di suscitare curiosità e interesse. La festa si svolse in un ambiente accogliente e affascinante, con un mix di musica e cultura che fece di quella serata un evento straordinario.

La serata ebbe inizio con un sontuoso brunch, seguito da una serie di concerti che si susseguirono durante tutto il giorno, offrendo un'ampia gamma di stili e genere musicali. Il brunch fu seguito da un serata di musiche dal vivo, con una performance di un gruppo di cantanti e musicisti locali che conquistarono gli ospiti con la loro interpretazione di brani di vario genere.

La serata si concluse con una festa a piazzetta, dove gli ospiti poterono godere della musica e della compagnia in un'atmosfera di allegria e gioia. La serata fu un successo, con un grande numero di ospiti che si unirono alla festa e si divertirono fino al mattino. La serata fu un esempio di come la musica e il cibo possano essere combinati per creare un'esperienza unica e memorabile.

Nelson ha incontrato la stampa, i medici e gli studiosi per presentare le sue scoperte e le applicazioni del sistema QXCI, la più avanzata espressione tecnologica attualmente disponibile nell’ambito della medicina bioenergetica, in grado di rivoluzionare la diagnosi e la terapia medica.

Piergiorgio Spaggiari, laureato in Fisica e in Medicina e Chirurgia, specializzato in Medicina dello Sport, è Direttore generale dell’azienda ospedaliera “E. Morelli” di Sondalo (Sondrio). Già docente universitario presso la Facoltà di Farmacia dell’Università di Milano, è stato ricercatore dell’Istituto di Tecnologia Biommediche Avanzate del CNR e Direttore generale dell’Istituto Ortopedico “G. Pini” di Milano. E’ autore di numerose pubblicazioni scientifiche.

Bioenergetica: sabato in Italia lo scienziato Bill Nelson
Postato il 2002-09-12 18:16:19 da Erika

Un evento straordinario per il mondo scientifico:
"il prof. Bill Nelson, insignito scienziato per la prima volta in Italia, parlerà sul tema "IL QXCI e i nuovi traguardi della medicina bioenergetica". Introdurrà il prof. Piergiorgio Spaggiari.

Milano, 12/09/2002 - Nell’ambito della medicina bioenergetica, che studia gli equilibri e le dinamiche delle energie trasmesse o prodotte da cellule, tessuti e organi, la medicina quantica esplora profondamente l’anatomia energetica del corpo umano: studia l’energia vitale, elemento essenziale di trasmissione e coesione dal quale dipende la vita. Un'energia che nasce con noi e preserva, durante la vita, i delicati equilibri che costituiscono lo stato di salute. Se il flusso energetico viene perturbato, per qualsiasi ragione, si altera l’equilibrio, si iniziano ad avvertire disturbi e sofferenze e, conseguentemente, si sviluppa la malattia. Questo insegna la medicina tradizionale cinese da oltre 5000 anni.

Il prof. Nelson ha saputo abilmente integrare questi insegnamenti con la moderna medicina bioenergetica, sviluppando una tecnologia elettronico-informatica estremamente evoluta e raffinata, in grado di produrre e misurare variazioni “quantiche” di energia così sensibili da essere rilevate nelle “energie sottili” del nostro corpo, modificando e correggendo i flussi energetici ai fini di ripristinare l’equilibrio e la salute. Il nostro corpo risponde positivamente a questi stimuli, che riconosce propri, sia energeticamente sia sotto forma di bioinformazione; l’effetto terapeutico è estremamente efficace, preciso, indolore, non invasivo e, soprattutto, privo di qualsiasi effetto secondario. Eccezionali i risultati nelle cure organiche, sistemiche, mentali, ormonali, del dolore, nelle allergie, nelle parasitosi, contro la cellulite, ecc.

Sabato 14 settembre 2002 - ore 10.30
Circolo della Stampa - Sala Bracco - Corso Venezia 16 - Milano

Il prof. Nelson è biofisico e matematico, studioso di medicina bioenergetica, oncoepatia, naturopatia, esperto elettronico e informatico, già collaboratore della NASA per il progetto Apollo, autore di numerose pubblicazioni scientifiche a livello internazionale. Nelson incontrerà la stampa, i medici e gli studiosi per presentare le sue scoperte e le applicazioni del sistema QXCI, la più avanzata espressione tecnologica attualmente disponibile nell’ambito della medicina bioenergetica, in grado di rivoluzionare la diagnosi e la terapia medica.

Dalla bioenergetica alla medicina quantistica. Rimedi e trattamenti naturali, tradizionali e non, per ritrovare forma psicofisica e salute

Per contrastare lo stress della vita quotidiana e ristabilitre il giusto equilibrio tra “mens sana” e “corpus sano”, l’estetica e la medicina moderne offrono un’infinità varietà di rimedi, tradizionali e non.

Cura corpo e mente in modo dolce e naturale è, si sa, alla base delle varie tecniche di trattamento dei paesi orientali. Ma anche da noi sono ormai molti a ricorrere a soluzioni... esotiche. In Messico, per esempio, a sud di Puerto Vallarta, si trova Hoteltito, un albergo di lusso con trenta palafitte “ecologiche” illuminate da candele, il cui asso nella manica è Mateo, sciabattino azteco che si prende cura delle energie e dell’anima dei suoi ospiti. Questo “guardatore” offre un trattamento unico nel suo genere: il Temazcal, un mix fra massaggio, aromaterapia, musicoterapia e ricerca spirituale, il cui nome deriva dalle parole azteche Temaz (bagno) e Calli (cura), utilizzato per secoli come bagno terapeutico e come rituale di purificazione. Una tecnica, questa, che associata a un particolare massaggio può offrire immediato sollievo a reumatismi, tensioni muscolari e vari disturbi derivanti dallo stress. Lo stesso principio si trova alla base di un altro particolare tipo di massaggio di origine cinese, il Tuina, da pochissimo praticato anche in Italia (info: Beauty Care, tel. 02 67100268). Fondato sui principi della bioenergetica umana, consiste in una serie di manipolazioni e trazioni sui muscoli e lungo i cosidetti 12 meridiani principali, con digioppressione sugli stessi punti solitamente stimolati dall’agopuntura: tecniche utili a riattivare la funzionalità di vertebre e giunture. Può essere utilizzato sia come trattamento di problemi osteoarticolari e muscolari, sia come tecnica di pura relax, nonché per aumentare le difese dell’organismo. Il suo scopo principale è quello di drenare i “canali energetici” e ristabilire l’equilibrio fra le forze vitali Yin e Yang.

Un rapporto disarmante tra esse, infatti, sarebbe causa di disturbi in série. Ma ormai anche la medicina occidentale, fondata su rilevazioni e dati scientifici, non pare più così “normale” dei rimedi empirici non invasivi. È infatti in aumento il numero dei centri in cui si praticano sistemi di cura e trattamenti integrati. Basti l’esempio del Caroli Health Club Sedi specie (a Milano, Roma, Sardegna, Cortina, St Moritz e Atenae), un po’ palestre, un po’ beauty farm, un po’ centri medici, dove esperti guru-trainers in uniforme Prada Sport applicano metodologie naturali, ma si avvalgono anche di strumenti high-tech all’avanguardia. Alcuni studi poi, in base a una casistica ben documentata, rivelano come determinate affezioni potrebbero risolversi interagendo con le invisibili “forze vitali”. Recentemente è stato presentato un apparecchio, unico al mondo, il QXCI (Quantum Xroid Consciousness Interface), un sistema diagnostico e terapeutico computerizzato in grado di produrre variazioni di energia che permettono di identificare patologie nascoste. Esso non solo individua velocemente la presenza di stress, squilibri vitamici e ormonali, o allergie, ma consiglia anche i rimedi naturali più idonei per il paziente. Inoltre, può eseguire veri e propri trattamenti (agopuntura, cure oncoepatiche) per riportare l’organismo allo stato originale di benessere. Il riavvicinamento della scienza ai principi della bioenergetica attraverso strumenti tecnologici, Bill Nelson, biofisico e matematico americano, ideatore del QXCI (www.qxci.com), ne è convinto, quando afferma: «L’energia del corpo umano è il futuro della medicina». Barbara Rott
La moderna terapia elettromagnetica riporta l'equilibrio

FELICITÀ DONALDINO

Oltre dieci milioni di italiani si rivolgono alla medicina complementare (terapia, medicina chino- se, osteopatia, assistiti da diverse migliaia di medici che hanno adottato questo approccio. "Un fenomeno di tali dimensioni non poteva più essere igno- rato," dice il Prof. Piergiorgio Spaggiari, direttore generale delle aziende ospedaliere della Valtellina e della Valchiasera. Ecco la parte dell'ospedale di Sondrio, grande struttura che ha posto all'attenzione per la propria efficacia e per le iniziative innovative. Infatti la Regione Lora- barda ha creato una commissione tecnico-scientifica che si è occupata di eseguire dei provini: i risultati hanno permesso di mettere in serietà l'utilizzo della medicina tradizionale le metodiche più efficaci di queste discipline. Dei prove attualmen- te sotto osservazione, ben 50 sono stati realizzati all'Ospedale Monti di Sondrio, tutti accomunati dalla medesima filosofia: impiegare le tecniche e gli apparecchi più efficaci della medicina complementa- re per determinare i risultati più significativi. E così gli studi che stanno dando i risultati più interessan- ti, sono di oltre 100 pazienti oncologici, per attua- re gli effetti collaterali della chemioterapia, oppure l'utilizzo di prodotti emopatia e lo stesso setto-

Il metodo: l'integrazione con terapie elettromagnetiche.

La terapia elettromagnetica è una tecnica che utilizza la forza magnetica per interagire con il corpo umano, promuovendo un equilibrio interno. È basata sull'impiego di onde elettromagnetiche, che vengono applicate direttamente sulla pelle in aree specifiche, come il viso, la testa, le mani e le gambe. Questa tecnica viene utilizzata per attivare le cellule, migliorare la circolazione sanguigna e promuovere la guarigione. Le onde elettromagnetiche sono in grado di attraversare il corpo e di interagire con i vari sistemi fisiologici, come il sistema nervoso, il sistema immunitario e il sistema muscoloscheletrico. In questo modo, la terapia elettromagnetica può aiutare a prevenire e a trattare una varietà di condizioni, come il mal di schiena, l'artrite, l'insonnia e molte altre.

cuto (massemp咻), contro i dolori articolari e nel trattamento del sonno insoddisfacente. Altre metodiche sono basate sull'impiego di apparecchiature fisiote- rapiche, come le comoditeterapie, che stanno dando originali risultati perché consentono di commettere un lavoro più profondo (trasferito in 8 cm sotto la cute), riducendo l'assorbimento allo siero sanguino e l'effetto sulle cellule che sono sensibili agli strati profondi di movimento. Continua il Prof. Spaggiari, che ritorna ad esaminare il sito.

La terapia elettromagnetica è un sistema di cura che utilizza la forza magnetica per interagire con il corpo umano, promuovendo un equilibrio interno. È basata sull'impiego di onde elettromagnetiche, che vengono applicate direttamente sulla pelle in aree specifiche, come il viso, la testa, le mani e le gambe. Questa tecnica viene utilizzata per attivare le cellule, migliorare la circolazione sanguigna e promuovere la guarigione. Le onde elettromagnetiche sono in grado di attraversare il corpo e di interagire con i vari sistemi fisiologici, come il sistema nervoso, il sistema immunitario e il sistema muscoloscheletrico. In questo modo, la terapia elettromagnetica può aiutare a prevenire e a trattare una varietà di condizioni, come il mal di schiena, l'artrite, l'insonnia e molte altre.
Onde benefiche di ultima generazione

A colloquio con Alessandro Bertolissi, Direttore Operativo di Oxicur

Dopo aver frequentato il biennio di Ingegneria Nucleare, ho conseguito al Politecnico il diploma di Fisico Sanitario, in ausilio al medico di Medicina Nucleare. Successivamente, dopo aver lasciato l’ambito ospedaliero, dove svolgevo, fra le altre funzioni, anche quella della riabilitazione post-tumoreale (cobaltoterapia, radioncisia), ho intrapreso l’attività di libero professionista, dedicandomi soprattutto al campo della disintossicazione (fumo, alcol, droghe ecc.), oltre a fungerne da supporto per diverse aziende nel collaudo e messa a punto di vari macchinari elettromedicali.

«Signor Bertolissi, oltre alla formazione nel campo della fisica, quali sono le altre sue frequentazioni, con particolare riferimento all’ambito medico o, più in generale, sanitario? Mi sono specializzato nel campo delle più aggiornate biotecnologie applicate all’elettronica. Ed è stato proprio in questo contesto che sono venuto a conoscenza del QXCI, scoprendo in esso una macchina che, oltre a offrire molteplici applicazioni, ha delle potenzialità ancora tante da esplorare.
Da quel momento mi sono infatti innamorato e, dopo aver stabilito gli opportuni accordi con il distributore europeo e con la proprietà, ho iniziato a curare la diffusione in Italia. Entrando, come si dice, nello specifico, illustriamo le funzioni che QXCI può svolgere, in uno studio medico, per esempio. Prima di passare ai dettagli, premetto qualche notizia di carattere storico. A progettare il sistema è stato il professor Bill Nelson, un “incredibile” personaggio americano, plurierudito, il quale è entrato a far parte giovanissimo del gruppo di ricerca della NASA (dopo essersi laureato in Fisica a soli 19 anni!) responsabile del progetto Apollo; ha così potuto maturare, in modo assai veloce, una serie di esperienze che si sarebbero rivelate poi fondamentali per la sua carriera futura. Inoltre, si è particolarmente distinto nella soluzione di vari problemi sorti durante le missioni spaziali con astronauti. Realizzato per primo, per esempio, un sistema matematico di analisi trivettoriale, grazie al quale rese possibile la soluzione di equazioni differenziali, ritenute fino a quel momento irresolubili, con gli strumenti della matematica “classica”, a causa dell’elevato numero di incognite da tenere presenti.

Nato dall’esperienza di un fisico americano, una volta alle dipendenze della NASA, ecco uno strumento che si può definire pre-dagnostico oltre che terapeutico. Sfruttando infatti sofisticatissime tecnologie, già applicate alle missioni spaziali, è in grado di fornire in maniera predictiva i segni ancora nascosti di una patologia, e di porvi rimedio per tempo.

Pippo Zappulla
Pubblicitario esperto di terapie naturali

Un esempio aiuterebbe a capire meglio.

Un punto nello spazio può essere identificato attraverso le classiche tre dimensioni: x, y, z. La faccenda si complica quando, a queste, ne aggiungono altre; per esempio, la velocità (quarta dimensione), la traslazione (quinta dimensione), o la dimensione temporale (sesta dimensione). Grazie alla sua intuizione dell’analisi trivettoriale, appunto, Bill Nelson trovò la soluzione a questo problema matematico-fisico. Per sua e nostra fortuna non si è poi limitato ad applicare la scoperta alle missioni NASA, ma, essendo anche medico, ha trasferito alle apparecchiature mediche di uso tradizionale, che hanno mostrato di colpo i loro limiti (sia detto senza nulla voler togliere ai loro meriti, che sono tanti).

Cos’è che non andrebbe in queste ultime?

Partiamo da un principio: nella medicina classica, dato che si impiegano genericamente alimenti in corrente continua (e quindi in tensione continua), la misurazione consiste nel valutare la resistenza, che come tutti sanno è data dal rapporto tensione di corrente (D=V/I). Le situazioni diventano molto complesse quando si considerano impieghi di apparecchiature che sono alimentate con correnti (e quindi tensioni) alternate, la cui frequenza è
Le luci del grande complesso ospedaliero di Sondalo brillano sulle montagne dell'Alta Valtellina, al confine fra la rotte e il cielo; l'ex sanatorio ora è un centro di ricerca all'avanguardia nella moderna medicina quantistica.

Desire’ Dubounet – The body electric

Desire’ Dubounet Abstract

The body is energetic and electrical in nature. Electricity is of current and potential. Voltage is potential, current is Amperage. Voltage is the push behind the flow energy where the amount of energy or the amount of charge is the Amperage. Power is measured in Watts. Power is Voltage times Amperage. 1 Volt times 1 Amp equals 1 Watt. If there is no push or no charge then there is no power.

Voltage in the body is connected with the catecholamines which the most important one is Adrenalin. The adrenals make Adrenalin and they make more in states of fight or flight.

Amperage in the body is connected to the indolamines or brain hormones like serotonin, melatonin, etc. Indolamines are boosted by love and spirit.

Anger boosts adrenalin, thus they boosts power. But Love boosts indolamines thus greatly boosting power. We hear so many stories of how small 100 pound women can lift a car to save her baby because love gives her strength. She cannot lift the car to throw at her husband in a fight. Love is ten to twenty times greater at making you stronger and more focused.

The best sportsmen love the game. The best mantra is "I love the Game, I love my country, I love my Family, I love my Woman, I love Myself, I love God, I LOVE TO WIN, I love WINNING." God wants you to WIN. Love boosts power and makes more focus. Anger boosts power but not focus and anger can make you make mistakes. The best sportsmen who last do not play from anger. If you get angry at yourself you build depression. Depression is a hard cycle to break. If you get angry at yourself, express it and let it pass as a lesson. Thank yourself for the lesson on what not to do. Some people live and learn, some just live.
At The 2011 World Congress on SCIO in Budapest Dr Igor Cetojevic gave us a Basic presentation on Traditional Chinese Medicine (TCM)

his work with Novak was protected under confidentiality. His presentation of Traditional Chinese medicine with the SCIO was insightful and the participants learned a lot of vital usage of the SCIO in medicine.
Adam Mandel - Voltammetric Stimulation of Testosterone in Gold Medal Athletes in the China Olympics

Voltammetry Stimulation of Testosterone in Gold medal Athletes in the China Olympics

Taken from Adam Mandel’s lecture in 2011 Budapest at the congress on SCIO about work done at the 2008 Olympics

Adam Mandel was sent to China to work on the Chinese Athletes with the SCIO in 2007 till 2008. He presented his work for the first time in the 2011 International conference on the SCIO held in Budapest. Titled “The Greatest Story Never Told” he showed the audience incredible awe inspiring details of wondrous results with the SCIO. This is a brief summary of his 3 part lecture now available from IMUNE.

Adam talked about testosterone boosting by voltammetry streaming therapy of the SCIO. The SCIO is a
It was no accident that I was drawn to energy medicine. I was drawn by the pull of the gravitational, electrical, and magnetic forces. These forces dictate, and have major influences on, the electrophysiological, cellular, and hormonal systems. These forces are closely aligned with who we are as energy beings, light beings made in the image of our Creator. My experience in clinical practice over the years has caused me to take a provocative and intriguing look deeper into the unsaid and the miracles witnessed. I became convinced that there is more to the human condition than just anatomy and physiology, and furthermore that pathology is corrected easily through the use of the body’s subtle energy if perhaps assessment is done early, pre-diagnostic if you will. Despite the most hazardous toxic stimulus, it appears that the body is on automatic surveillance and repair if the mechanism for same is not hampered or impeded. I have had the opportunity as a clinician to observe the human condition as it pertains to family in crisis, behavioral problems, learning disabilities, depression, anxiety, etc. Suffice to say that there has always been a grey zone, suggesting that there is more than pathophysiology, and indeed it is these subtle energies that we need to address in addition to the pathology. We are complex, multi-dimensional and energetically functional beings.

I use the EPFX/QCXI/SCIO, developed by Professor William Nelson. He has clearly done thorough investigative research on the parameters of the body electric and trivector forces, and he has the studies, journals, and books to substantiate his work. I have found this tool to be very comprehensive in its assessment of the psychological, social, emotional, and spiritual parameters. It provides multiple therapies for balancing the body’s stressors. It is multi-faceted, with amazing accuracy, thus making it a cutting edge pre-diagnostic tool in energy assessment and therapy. I will be taking a closer look through and reviewing the literature and studies.
Chapter 19: 2002 to 2010 Budapest QX World Congresses

2002 to 2010
World Congresses on the SCIO Technology
Project Nahinga (bantu for the Angel that comes from the heavens to help us, the bantu name for Desire) has been spreading and many extreme success stories have shown fantastic results.

PROGRESS
• Results in PHASE 1 –
• Up to 100% feeling better
• Average 65% improving in Critical Measures of HIV progression
• No side effects reported
• Symptom free
• No secondary infections
• Improved quality of life

Critical Measures
• Subjects tested positive for HIV virus
• CD4 count
• Elisa test if available
• Viral Load test

Schedule for 2009
• Father John Mugaga in Kwa-Zulu Natal 1st Satellite
• October 2009 – AIDS Children’s homes
• November 2009 – Brazzaville Congo, DRC, Angola, Nigeria
• November 2009 – Kenya, Zimbabwe, Mozambique
• December 2009 – Lesotho, Swaziland

After Desire has donated over 2 million dollars of equipment for our research we have shown safety and efficacy and there appears to be a natural cure for this horrible disease on the future horizon.
Dr. Heleen Coetzee, PhD, MSc, TED, Quantum Diplomate, Quantum Instructor

This protocol for the SCIO contains biofeedback programs focusing on the influence that epigenetics (environment, belief and nutrition) has on the DNA. It is not possible to do all the programs in a session and have to be spread out over a few. Remember to do the foundational building by opening the Channels of Elimination in Short Sarcoïdes and always include at least one of the two recommended Universal Biofeedback Therapies.

If achieving balance had been difficult i.e. many Flaws in chromosomes had been revealed or there are many Energetic Foci detected; consider the SCIO DNA Correction and Stabilization Long Term therapy. If the bars on the graph have not reached the top upon completion of the DNA therapy or are very uneven consider the SCIO DNA Stimulation and Stabilization Long Term therapy.

SCIO DNA Correction and Stabilization Long Term OR SCIO DNA Stimulation and Stabilization Long Term (whichever is the appropriate choice)
Welcome to a day of exploring the vastness of superconscious potential. Here we are, users of a biofeedback device with extraordinary capabilities to bypass the limits of critical, verbal thought and interface with the larger “superconscious” component of mind… and yet, to ponder the larger capacity of the “superconscious” is to take a closer look at its dynamics when it is most actively engaged, during moments of peak potential, when it can affect positive outcomes on a world scale… when we’re asleep.

That’s right! Profound experiences take place when most people have been trained to be “unconscious” of them; if not outright amnesic of dream experiences upon waking. By “trained”, I would suggest that what some experience as “passive dreaming” or “no dreaming” at all during sleep is not the natural state of dreamtime’s purpose and capacities, but rather a conditioned unawareness by lack of intentional conditioning otherwise. After all, the mind and body are a system, and the body-builder saying of “use it or lose it” applies equally to the mind as much as to the body. Dreamtime and all its creative potential, like muscle building or study habits, can be proactively entrained for strength, healing, world stewardship and peace through the use of focused intention.

Humanity has a great propensity for creatively impacting world direction through “visioning”, a talent if not gift, which has been cited by spiritual philosophies as our outright duty and higher purpose contribution to world consciousness at large. It is up to us, individually and collectively as a whole, to apply our free will and make the decision to harness and direct this talent productively, lest it be harnessed and used by others.
Clients with Allergies: Helping avoid and improve the negative degenerative cycle

By: Kathryn Wilson, ND, CBI, CBT, IrD.

The ALLERGY REACTION can be easily explained with the action of the histamine cascade. Histamine receptor cells cause the allergy reaction. Now why... The body has a reaction to something, which it finds to be foreign, not foreign to others outside of that person, but foreign to them, this may be fungal (mold, mildew), bacterial, food, any type of protein molecule or even an emotional trigger. It can happen in a matter of a few minutes or up to a couple hours. In my case the food triggers, which cause anaphylaxis shock, trigger in 5 to 8 hours where the green peppers, which caused hives, were instantaneous.

So let's look at the event: Antigen (enemy) is sensed, it causes the immune system to handle it by using the white blood cells. These white blood cells increase to combine and produce antibodies (immunoglobulin), which are made in the B-cells (B-lymphocytes) of the lymph nodes and the antibodies now attach to the white blood cells (basophilie) and mass cells to fight the allergens. Mast cells trigger histamine cells, which produce the histamine, which now makes the inflammation, which the body stores into its memory. After the first time reaction (memory) is done the body will automatically respond. This response to the antigen (enemy) will produce an automatic “allergy cascade” reaction to happen and IF the histamine is released all over the body rather than just to a specific region; we now have anaphylaxis (anaphylaxis shock).

Using the SCIO I could find allergies quicker and also find solutions to treating them with biofeedback and the SCIO technology.

This is to inform you that the Homeo Diagnostical Academy Press has published

**The International Journal of the Medical Science of Homeopathy**

as a peer reviewed medical journal

under from Hungarian ISSN National Center 1997 apr 15-1 and has awarded the international identification number:

**ISSN 1417-0876**

This number will remain unchanged for the lifetime of this publication.

You are kindly reminded that with every future publication the ISSN number will be printed on each book. Should you wish to have this publication printed internationally the identification number can be found near by the Hungarian code which would be:

**HU ISSN 1417-0876**

If it is your preference to have a detailed explanation of this publication available you may visit the Hungarian ISSN National Center web pages where you will find the OSZK web page called ”Local services” and in this menu point you would enter your identification number. The web address can be found at:

Chapter 21: SCIO Registrations
Re: K892114A
Electro-Physio-Feedback-Xrroid®

System
Dated: Undated
Received: July 18, 1989
Regulatory Class: II

Eclosion Corporation
Attn: Frank DiMauro
3936-A Niagara Street
Denver, Colorado 80207

Dear Mr. DiMauro:

We have reviewed your Section 510(k) notification of intent to market the device referenced above and we have determined the device is substantially equivalent to devices marketed in interstate commerce prior to Mar. 28, 1976, the enactment date of the Medical Device Amendments. You may, therefore, market the device, subject to the general controls provisions of the Federal Food, Drug, and Cosmetic Act (act). The general controls provisions of the act include requirements for annual registration, listing of devices; good manufacturing practices, and labeling, and prohibitions against misbranding and adulteration.

Your device is classified (see above) into either class II (Performance Standards) or class III (Premarket Approval) it may be subject to such additional controls. Existing major regulations affecting your device can be found in the Code of Federal Regulations, Title 21, Parts 800 to 895. In addition, the Food and Drug Administration (FDA) may publish further announcements concerning your device in the Federal Register. Please note: this response to your premarket notification submission does not affect any obligation you might have under the Radiation Control for Health and Safety Act of 1968, or other Federal laws or regulations.

This letter immediately will allow you to begin marketing your device as described. An FDA finding of substantial equivalence of your device to a pre-Amendments device results in a classification for your device and permits your device to proceed to the market, but it does not mean that FDA approves your device. Therefore, you may not promote or in any way represent your device or its labeling as being approved by FDA. If you desire specific advice on the labeling for your device, please contact the Division of Compliance Operations, Regulatory Guidance Branch (HFP-323) at (301) 427-8040. Other general information on your responsibilities under the act, may be obtained from the Division of Small Manufacturers Assistance at their toll free number (800) 638-2941 or at (301) 443-6597.

Sincerely yours,

George C. Murray, Ph.D.
Director
Division of Anesthesiology, Neurology, and Radiology Devices
Office of Device Evaluation

APPROVAL
EC Directive 93/42/EEC; Annex II, Article 3
Full Quality Assurance System
Medical Devices

Registration No.: M23 69240068 0001
Report No.: 28208466 001

Manufacturer: MAITREYA Hungary Ltd.
Kálvária tér 2.
1089 Budapest
Hungary

Scope: Design/development and manufacturing of Universal Electrophysiological Biofeedback System

Product: SCIO

Date of expiry: 2015-02-22

The Notified Body hereby authorizes the quality management system established and applied by the company mentioned above. The requirements of Annex II, Article 3 of the directive have been met. This approval is subject to periodic surveillance, defined by Annex II, Article 5 of the aforementioned EC Directive, and can be used by the company with the manufacturer's declaration of conformity.

Budapest, 2010-02-23

MEEI Kft. – member of TÜV Rheinland Group – H-1132 Budapest, Váci út 48/A-B

Notified under No. 1007 to the EC Commission.

The CE marking may be used if all relevant and effective EC Directives are complied with.
Certificate

Hungarian Institute for Testing and Certification of Electrical Equipment Ltd (MEEI Kft.)

hereby certifies that

MAITREYA Hungary Ltd.
Kálváriá tér 2.
1089 Budapest
Hungary

Place of the audit: H-1089, BUDAPEST Kálváriá tér 2.

established and applies a quality system for the following scope:

Design/development, manufacturing, distribution and servicing of Universal Electrophysiological Biofeedback System

Compliance with the requirements of

EN ISO 9001:2008

standard has been proven.
This certification is subject to regular surveillance audits.

Registration no.: MQ 692400700001
Audit report no.: 28208466 001
Validity of certificate: from 2010.02.23 to 2013.02.22

Budapest, 2010.02.23

How to get the studies

To get the full articles presented in this book, please go to www.imune.name and select Books. You can choose to download one or more books and journals.

For more information, please contact us at info@imune.name.
I prayed to God to give me the Wisdom of Solomon, he gave me major Problems to solve
I asked God for Strength, he gave me Resistance to make me Strong
I asked God for Intellect, he gave me the Light of Enthusiasm and the Breath of Inspiration
I asked God for Courage, he gave me Obstacles to overcome and Hatred and Anger to defeat
I asked God for Love, and he gave me Suffering People to help, he gave me Opportunity to grow and Opportunities to help others
I did not get what I wanted... but God gave me what I needed day by day.
