Let’s get real and look at history beyond what the Ultra-Rich and the authorities want us to believe. The word FUCK has had such power that the authorities have tried to cover up its real origins that embarrass them. Governments and authorities do not want the power of this word to be used as a protest against them as the word was designed for. They make historians twist and lie to divert attention from the truth. The attempts to invent a false etiology of the word fail if we look deep.

In ancient England the King was in control of fornication. “Prima noctis” and its translation “right of the first night”. This disgusting, profane and vulgar concept of abuse of power over the people and especially power over their sex life had such incredible energy. This was an insult to the people. Such an incredible insult and offense to the people revolts led to its removal as a practice.

The Charlton Heston Movie “Warlord” and the very popular movie “BraveHeart” told us of this dark spot in history. Yes the quote is about Wives NOT Lives.
This extreme profane act to take away the dearest part of life the first night of Love was an amazing insult to the people and this black mark in human history people have tried very hard to forget. Especially people who worship over respect authorities try very hard to forget and repress the rite of “prima noctis”. The first use of the word fornicate happens in about 1100. And when King Edward reinstated the rite of prima noctis in the late 1200 the insult was renewed. A placard with F.U.C.K. (Fornication Under Control of the King) was used. The slang word FUCK had many sexual connotations and has always been an expletive to express protest or exasperation.

It was heavily a motivation in the story of William Wallace and his rebellious protest. The first true occurrence of the word fuck comes at this time. And people who conservatively over loyal to authorities try hard to forget and suppress this memory.

The religious connotation of the word comes in the 1500 when King Henry the VIII starts a new church to divorce and kill his wives. Now insulting the king was insulting the church. This led to a more social disdain for this profane word and its insult to authority. The word has been a vulgar word of protest showing that when the authorities take too much and abuse their power. It is used for emphasis and to draw attention to the abuse. It is reserved for adults in the worst of circumstance. And today it is losing its edge as the Ultra-Rich abuse the poor more and more each day the people use this word of social protest more and more.
With Proof of the word being developed when Wallace was in Paris where it first was used and with Wallace seeing the dramatic insult of the “prima noctis”. We can easily and undeniably see the development of the word F.U.C.K. Why would some historians deny this??

WELL THEY DO NOT WANT AUTHORITY TO BE INSULTED
The king of England once took such liberties with his people that he said that the first sex of marriage was to be the right of the king to have. We see this in Charlton Heston's movie Warlock and in the movie "Brave Heart" by Mel Gibson. This was also called the right of "prima noxistes". The king said the Fornication is Under the Control of the KING. It is a sad truth that the king thought he could plant his seed to the people and take away the most valuable thing in life. This was the greatest insult imaginable. Such a large unbelievable insult to the people, which the powers of authority have spent large efforts to cover up this story. This ludicrous instance of power by the king started people to realize that the power that govern us must not be allowed to have ultimate control. These powers of authority can be abused. The people saw they were being abused horribly and they coined a word for this abuse. They took the letters for an acronym "Fornication is Under the Control of the KING" and they called it FUCK. Whenever the authorities exceed logic and reason we say we get fucked.

Historians have made many other ideas of the etiology of the word FUCK, connections to German words, Danish words and others might have some value, but undeniable the Fornication Under Control of the King cannot be denied as a powerful kick in the ass for this word. The protest of the Abuse of power by the King or other authority now has a word to express extreme frustration.
Fuck is not in the bible. Fuck has nothing to do with religion. It only became a religious word when another king started his own religion to allow himself to kill his wives. **Yes that is right a King started a religion so he could kill his wives without reprisal.** His old religion frowned on killing wives so he started his own religion (the Church of England). This is also a tribute of how certain people can be lead to do things. Fuck is an offensive word not to religion or God but to the powers of authority that sometimes abuse their power. And it was an affront to the Church of England headed by the King, Fuck as a word was outlawed. And to escape a place where the King controlled both State and Church certain pilgrims went to America to start a government with separation of church and state. And a place they could say FUCK, when they want.

About 30% of the people develop blind obedience to authority; it is in their nature to do so. They become conservative. Some 30% of the people develop total mistrust of authority they become liberal. The basic foundations of their belief make it impossible to communicate, so they always argue. There are always enough blindly obeying conservatives to keep even stupid authority people
in power. The middle 30 plus % know we need governmental organization and sometimes the powers go too far. We need powers of authority but we must have constant vigil and never trust blindly.

When David Frost asked me to make a movie about the "Story Of" a rock and roll band called Fuck, I jumped at the chance. But only if I could play one of the lead parts and If I could get this story of FUCK into the movie. We all agreed to do it and it won the Baltic States Film festival people choice award in 2009.

My Friend Sir David Frost Dies

David we will miss you and your irreverence to authority.

We can all say Fuck to Authority

Thanks yo you.

...the Angel who leads a group of wanker losers to become the world’s greatest Rock and Roll Band. A band called FUCK. Well Fuck is not in the Bible as most people think. It is an acronym of Fornication Under Control of the King. Fuck is a word of protest against an inhuman government authority. A word of emotional release, of way to unburden feelings of frustration. A way for the little man to emancipate himself and throw remonstration in the face of the snooty elite system sucking twits. A way to express some degree of protest. A way to release emotional tension. It is a rejection of Fornication Under Control of the King. We take back our rights, take back some respect, express our indignation. Fuck is not a polite word it is not a religious word, it is an insult to authority.
Today, the First Amendment still protects our freedom of laughter. While speaking at the 2006 White House Correspondents’ Dinner, Stephen Colbert mocked President Bush’s administration, standing just 10 feet away from Bush. Colbert even joked that Bush “calls his wife his better half, and obviously America agrees.”

There are very few places in the world where a comedian can lock eyes with a commander-in-chief and relentlessly josh him. People in other countries are imprisoned for statements not nearly as harsh.

In the Middle East, stand-up comedy is growing in popularity. However, Arab comedians cannot perform routines discussing sex, politics or religion. For example, Egyptian TV host Bassem Youssef was arrested last spring for making fun of that nation’s president. In Burma, a comedian was sentenced to 59 years of prison for speaking out against his government. His stage name: Zarganar, or “Tweezers” in English. Zarganar chose this name as a nod to how his humor pulls political fear from audience members.

Many comedic performances are censored throughout Europe as well. England has a law that prohibits inciting religious hatred or using insulting words. A noble objective, it has caused disfavor among British comedians such as Rowan Atkinson, better known as Mr. Bean, who has spoken out against censorship.

In Italy, you can be sentenced up to five years for lampooning the prime minister or the pope. Sabina Guzzanti, one of Italy’s most beloved political satirists, was almost prosecuted in 2008 after she gave Pope Benedict XVI and the Catholic Church a brutal tongue-lashing for its stance on homosexuality.

Even now in 2014, the French government is preventing comedian Dieudonne M’bala M’bala from performing shows with anti-Semitic undertones. French authorities also are working to keep M’bala’s material from circulating online.

Try to imagine “The Blue Collar Comedy Tour,” “The Daily Show” on Comedy Central, or NBC’s “Saturday Night Live” if comedy was censored more within America. It would not be nearly as funny, for sure. Comedy is not only a huge part of our culture as a nation, but is also a healthy outlet. There is truth to the saying, “Laughter is the best medicine.” By pushing boundaries and discussing taboo subjects, comedians enhance their listeners’ lives and help many of us deal with personal insecurities. Laughing at a comedian’s controversial or offensive jokes with others creates a sense of social acceptance. Laughing in unison satisfies our primal need of belonging; it conveys inter-sympathy. You discover something shared in common with everyone else and no one feels like a stranger.

Having strong protection for our freedom of speech should generate appreciation of the First Amendment. Lenny Bruce, George Carlin and the nation’s Founders gave us the freedom of speech and the freedom of laughter. In freely exploring our sense of humor, we find our sense of humanity.
