"Health Care starts with
1. What not to eat, do or think, then
2. What is good to eat do or think, and then
3. We start with the device and balance the body electric.
    Doing 3 without 1 or 2 is not really Health Care it is Disease Care"

**PROFESSOR DESIRÉ DUBOUNET**

and her friends have spent over $5 million dollars to bring the world a professional and thorough course on Wellness, Naturapathy and Neuro-Electro-Physiology of Biofeedback as Bioresonance. She is such a humanitarian angel, she lets you pay for the course videos, books and materials with karma...

Contact www.imune-europe.com or contact the Dean at dean@imune.net

These are the **TOP FIVE REASONS** to get a Doctorate in Wellness PHD International Medical University degree at home:

1. Getting a degree means you will increase your serving potential. Studies have shown that at home study is just as good as attendance classes.
2. Study, and Complete Courses at Your Own Pace. Use this to maximize the learning.
3. Scheduling Convenience. Work when you are ready to work.
4. Teaching Faculty. Who actually have Work Experience in Your Field of Study. Global faculty at IMUNE is with worldwide famous doctors.
5. Save Money on Travel, Parking, Childcare, and Books. You save money the world saves energy, this makes you and the world better.
6. Employer Support. Many employers offer tuition reimbursement for employees’ tuition associated with training in their fields. Employers also tend to reserve enrollment in online degree programs because they have employees who will be able to go to school and still be able to be committed in their jobs. Don’t be afraid to ask your employer. Every company needs a wellness consultant.

Professor Desiré Duboumet the world’s most famous Naturapathy and her friends here spent over $5 million dollars to bring the world a professional and thorough course on Wellness, Naturapathy and Neuro-Electro-Physiology of Biofeedback as Bioresonance. She is such a humanitarian angel, she lets you pay for the course videos, books and materials with Karma go to www.imune-name for more information.

THE GOLIETHS

Battle of the Milennia: David Desi vs. Goliaths
by Heather Swenson

There's a battle outside your door, shaking your house. The battle has reached your own front yard, and you and everyone around you are living with this war inside your body. Only this is between the big guy and the little guy. And you don't have a chance. It's one you only read about in the books of our forefathers.

We all remember the story of David and Goliath. Well, today, it's not just one Goliath. It's a host of THE GOLIETHS that are tearing the earth and human body apart... all in the name of good and money.

So, dear reader, are you really thinking that this is a fairy tale? Right. Let's meet our modern day corporate Goliaths:

1) Big Sugar: Don't tell me you don't eat it. Did you know the story of sugar weakens the immune system and causes cancer? Over consumption of sugar is linked to death from obesity, type 2 diabetes, heart disease, and many other illnesses. It happens to be one of America's top money makers.

2) Big Tobacco: One of every five deaths in the United States is smoking-related. It's one of the most profitable industries in the world. Is it legal, socially acceptable, and through a consistent drug regim? The FDA, has not been effective in controlling the dangers of smoking.

3) The FDA: A kind of giganto pharmaceutical industrial complex, the others. A legal drug that has been linked to cancer, stroke, heart disease, and many other illnesses. The FDA permits big, big pharmaceuticals and medical devices more than it protects the American people.

4) The Music Industry: The death of Woodstock and the birth of MTV. Corporations, the combination of music, film, and television. It's become a bloody battle for sales and power for this type of Mega Poparts. It's a battle over home and nothing about talent.

5) The Pharmaceutical Industry: A multi-billion dollar business, the backer of current allopathic medicine practices. It's a battle of death in the United States and a killer of over one million Americans yearly.

6) Hollywood: One consumer that needs no introduction. It's a battle of power and influence. The battle of ideas and values.

1.96 trillion from world sales, and 17.7 trillion from world television licensing. Hollywood is a media monopolist with no reason to criticize or protect the natural world.

Now, meet the modern day corporate (David) Desi, some of which may surprise you. And, in the words of Desi Durbau's current fighting a 6-year battle against cancer with the FDA - a battle that Desi believes that the FDA's actions because of lack of adequate funding, thus it allows drug makers to move forward in the development of treatments for cancer.

With his independent media company Changing the World Productions, Durbau has been fighting the propaganda that the pharmaceutical industry uses to hide their actions. He also takes a very active role in that he has been involved in many battles for the government, and he has his share of victories and defeats.

Let's see if we can learn from the lessons of the past. Let's see if we can learn from the lessons of THE GOLIETHS.

And, let's see if we can learn from the lessons of the future. Let's see if we can learn from the lessons of the future.

Take a stand today against truth and justice. Join Desi in the fight against these modern-day Goliaths that threaten our lives.

IMUNE'S MASSIVE LIBRARY OF THE MOST IMPORTANT BOOKS AND ARTICLES OF NATURAL MEDICINE ARE AVAILABLE ON THE HARD DRIVE

Article appearing in Liget Magazine

**SINthetic Chemotherapy has been use to make money**

**Profit over People**

"As a chemist trained to interpret data, it is incomprehensible to me that physicians can ignore the clear evidence that chemotherapy does much, much more harm than good."

-- Alan Nixon, Ph.D., Past President of The American Chemical Society

97 Percent of The Time, Chemotherapy Does Not Work And Continues To Be Used Only For One Reason

Doctors and pharmaceutical companies make money from it. That's the only reason chemotherapy is still used. Not because it is effective, decreases mortality, mortality or diminishes any specific cancer rates. In fact, it does the opposite. Chemotherapy focuses cancer growth and nothing on mortality rates.

Most chemotherapy patients either die or are plagued with illness within 10-15 years after treatment. It destroys their immune system, increases necro-cytotoxic death, damaged or cells, and destroys organs and metabolizes tissues. Patients basically live a permanent state of disease and their death. The cancer industry marginalizes care and effective care while promoting their patented, expensive, and toxic remedies whose risks far exceed any benefits.

What The Cancer Industry Does Not Want You To Know About Chemotherapy and Radiation

Radiation-induced secondary cancers have exploded in the last two decades due to radiation treatment.
- 90% of Chemotherapy patients die 10-15 years after treatment and the cause is not attributed to treatment.
- More than 40% of all cancer patients suffer significant treatment-related toxicity.
- Chemotherapy does not eliminate breast, colon, or lung cancers as it chemos drugs are not used on these cancers.
- Patients who undergo chemo are 14 times more likely to develop leukemia and 5 times more likely to develop cancers of the bone, joints, and soft tissue than those patients who do not undergo chemotherapy.
- Chemotherapy causes direct damage DNA.
- Chemotherapy actually boosts cancer growth.
- 68% increase in Chemo drugs since 2010.
- 75% increase in cancer patients by 2020.

"My Main Concern is the Future Cancers Being Produced By Radiologists with low dose Radiation used to detect Cancers"
(John Cameron)

"Allopathic Cancer Racket (Medical Fascism)"

"But today in the United States, and this shows you where fascism REALLY exists, ANY doctor in the United States who cures cancer using alternative methods will be destroyed. You cannot name me a doctor doing well with cancer using alternative therapies that is not under attack. And I know these people, I’ve interviewed them."

Gary Null, Ph.D., Ph.D

"Medicine should not be a profit business unless there are strict rules and management to stop Profit over People Motives"

THE FIVE UNHEALTHY WHITES

If You Have Cancer Do NOT EAT These Foods:

- White Rice
- White Flour
- White Sugar
- White Pork
- White Potato
Milk use Related to Prostate Cancer

Milk Stimulates Growth of Prostate Cancer Cells in Culture

Cows’ milk stimulated the growth of LNCaP prostate cancer cells in each of 14 separate experiments, producing an average increase in growth rate of over 30%. In contrast, almond milk suppressed the growth of these cells by over 30%.

Milk Consumption Is a Risk Factor for Prostate Cancer: Meta-Analysis of Case-Control Studies

In conclusion, we found a positive association between milk consumption and prostate cancer risk using meta-analysis to analyze published case-control studies.

In conclusion, we found a positive association between high consumption of milk and dairy products and prostate cancer risk when analyzing published cohort studies with meta-analysis.

Hi Glycemic Sugar Feeds Cancer cells 45 times more than Natural Fruit Sugar (Avoid Corn+Candy)
Nitrate-Nitrite Lunch Meats and Hot Dogs Cause and or Aggravate Cancer

We Now KNOW that Bologna is responsible for millions of cancers world wide

Bologna Matters

EXACTLY WHO INVENTED BOLOGNA, we're not quite sure; nevertheless its reputation for deliciousness and its ability to spread throughout the planet and prove itself resilient, bologna has cause such epidemics as cholera and the plague, several international wars and debilitating natural disasters. Perhaps if people had been eating less... fun bologna we wouldn't have had such terrible incidents. Just sayin'.

Would Oscar Mayer be pleased that 1 in 4 children have never tasted bologna? That only 32% of Americans eat bologna in lunch hour? Next time you can't justify your bologna say: Oscar Mayer, the godfather of bologna circa 1900.

WHAT WOULD OSCAR DO?
Oscar Mayer, the godfather of bologna.

To Starve your Cancer Please Avoid the Bad foods and Behaviors that most probably caused the Cancer. It is easy to change.

Avoid Using these processed Meats
Years ago, a Mother and her 2 children all had Cancer and the Came to me for Therapy. As she walked into the door the Mother gave the children candy to keep them quiet.

The Mother then told me that Candy was their Life. Everything in their lives centered on Candy.

I told her that I could only help her and her children if they could give up the immune depleting CANDY. She told me she would rather her Kids DIE than to give up Candy.

I was Shocked, I said you would rather your children DIE than not get Candy, I said there are many Natural Fruit Sweets that are safe, tasty, + Healthy She Said "I Would Rather They DIE"

The Little Girl Looked at me with Sad Eyes and Said "Doctor, Help me, I want to Live. I Love Life More than Candy"

Do you want to live, enough to give up sugar totally and substitute fruit???
PROOF SUGAR IS BAD, VERY BAD, REALLY LISTEN IT IS EXTREMELY BAD AND A MAJOR CAUSE AND AGGRAVATOR OF ALL DISEASE ESPECIALLY CANCER

**Broccolli Cures Cancer**

- George Carlin
SAVE YOUR LIFE

Reasons Why Sugar Destroys Your Health

Suppresses the immune system
Interferes with absorption of calcium and magnesium
Causes hyperactivity, anxiety, difficulty concentrating, and crankiness in children
Causes copper deficiency
Makes bones more vulnerable to age-related muscular degeneration
Leads to chromium deficiency
Leads to cancer of the ovaries
Increases the risk of breast cancer
Contributes to seizures in children
Contributes to obesity
Causes food allergies
Can cause heart disease
Can cause Alzheimer’s disease
Can cause dental caries
Can cause heart disease
Can cause high blood pressure
Can cause high blood pressure
Can cause high cholesterol
Can lead to the formation of kidney stones

Click to see Sugar Substitutes

NO SUGAR
NO FLOUR

SUGAR IS A FAR GREATER THREAT TO YOUR HEART THAN FAT.
AVOID IT!

AVOID SUGAR
1. Stop feeding the cancer with high glycemic foods, stop dextrose, use fructose.
2. Plug up the holes in the cell membranes with good fatty acids, not bad fatty acids; eat fresh and raw vegetables and vegetable juice, no cooked oil, suplement fatty acids.
3. Detoxify the body of toxins, get the body’s natural detoxifiers to all work well.
4. Stop adding carcinogenic toxins, smoke, radiation, fluorine, SINthetic chemicals, etc.
5. Take natural more safe chemotherapy not SINthetic.
6. Increase water, nutrition, good air... Food is the best medicine.
7. Use fasting as nature’s suurgery
8. Exercise 20 mins a day, 5 day a week, work to a sweat.
9. Mirth, merriment and mental meditation; laughter is your best medicine; the best sign of mental stability is to be able to laugh at oneself.
10. CARE. Find joy and fun, release the negative, selfish, self pity, anger, greed, arrogance, and delusion. Face your false beliefs and grow in mind, body, spirit, environment, and social networks, find spiritual friends and talk out your troubles with laughter, respect, and care.

please care
Chemotherapy using a Poison to Stop Cancer

Cancer cells lack stoplights to halt their growth. Chemotherapy drugs are taken up during division and halt the process. Halted cells eventually die. Different drugs stop division at different points. (Some Herbs are slightly poisonous to us, But extremely poisonous to cancer)

Chemotherapy was found in Plants that healthy animals avoid but cancer animals seek out, eat and sometimes the cancer goes away. Only one scientist had the courage to do a major scientific cancer study on Natural vs SINthetic Chemo. Natural Chemo is still using a poison. It is much more poisonous to the cancer than the Person, but still a poison. Remember Healthy animals avoid these plants. But still Chemical companies want patented (Unnatural) compounds so they can make money. This book is dedicated to natural remedies. But be careful it is still poison.
1. Eat Natural Foods with little preservatives
2. Eat more fruits, seed products, leafy greens, salads
3. Let Fruit be your Sweetener,
4. Drink ONLY 100% Fruit juice diluted with water
5. Boil foods in WATER, NOT OIL
6. Use fresh, cold processed UNHEATED olive oil, sunflower oil, safflower oil etc.
7. Less Cooking, Use stir fry well washed veggies
8. Foods made with Love and Nature is Blessed Nutrition, Foods made and eaten with Hate and Anger are poisons.
9. Celebrate each meal with friends, family or at least your joyous self. Celebrate
10. Listen to your inner self what to eat, and when to stop, do not eat with your eyes
Towards a Cure for Degenerative Disease with the new science of Electronics and Quantum Electrodynamics

ANOTHER GIFT FROM THE ANGEL

QUANTUM ELECTRODYNAMIC BIOFEEDBACK

The atoms of all things are made of mostly electrons and protons and other miscellaneous subatomic particles. Everything has an electric field around it because of the electrons and protons that make it up. The workings of these atoms is covered in chemistry. In chemistry we learn that most atoms have imbalances in their outer electron shell. So they seek atoms that can help to fill these shells. These shells are only explained in quantum physics. All things are only describable with quantum physics. The electrons are placed around the nucleus of the atom. If the nucleus is the size of a golf ball the electron is less than the head of a pin and about a half mile away from the nucleus. The truth is that we are mostly empty space. Space that is full of fields. Fields that interact and make biology possible. To study biology we must study these fields. But these fields are only explainable through electronics or quantum physics.

What we call modern medicine is not modern at all. In fact it is based in antiquated science of thermodynamic Newtonian physics and old style chemistry. Today a truly modern science is based in non linear fractal quantum electrodynamics. We need a more modern medicine. Traditional medicine has just been a puppet for the SYNTHETIC drug companies.

Everything has an electric field around it because of the electrons and protons that make it up. We all know about these fields today especially if you have traveled and had to go thru a metal detector. The metal detector senses the magnetic field of metal. Metals have a strong magnetic field. Other substances have a weaker or paramagnetic field such as water. It has weak field. Some things have an almost nil field and some substances such as bismuth have a negative field. But everything has an electric field around it because of the electrons and protons that make it up.

In a major Medical University Study done with over 100,000 patients, 7,000 patients with cancer were treated by qualified QED biofeedback therapists. There was over a thirty percent cure rate. The future of medicine is in modernizing away from SYNthetic chemistry towards the body Electric and QED.
The Hermetian Emerald Tablet of Desiré

Desiré is the creator, developer and the leading pioneer in the medical art of Quantum Electro Dynamic Biofeedback. By first developing the Quantum Quality Control system of homeopathic electrical signature analysis, then developing the EPFX and the SCIO system of measuring the human Electro-Physiological Reactivity of a patient to the QQC signals, a new medicine of electrical energetic medicine was created. After twenty years of clinical scientific research and millions of safe and effective patient visits the art is firmly established in medicine.

There is no such thing as noise. Noise is only information we do not understand.

Desiré Dubonet

Desiré has been nominated for the Nobel Prize in Medicine for over two decades. Her advances and patents in VoltAmmetry, Electro-Physiological Reactivity, TVEP, and Homeopathy are Legendary and World Renown.
Eductor

The word 'Doctor' comes from the Latin word 'Eductor' which means 'to teach'.

Thomas Edison said that the doctor of the future will teach the patient how to live and how to eat, exercise and meditate.

The Eductor is a Biofeedback Teacher

Part of the Following:
LARGE SCALE STUDY OF THE SAFETY AND
EFFICACY
of the SCIO Device
Chair Location
Amelia Tufton D.O. (TAMU)

Abstract
This study demonstrated the safety and efficacy of the SCIO device used in a large scale study. A large scale study of over 27,000 patients with over 275,000 patient visits reported their treatment. Many of them reported no disease. And the results of the test therapy are reported in this study. The SCIO device uses the principle of Quantum Electro Dynamic (QED) as the base of an energetic medicine technique for healing. Biomedical, Varicennics, Therapeutic, Prognostics, Alert, Test, Infection-Resistant Testing and Immune Stimulation, Neuro-Immunomodulation, Neurological Stimulation, Biofeedback Psychological Interaction, Mind-Body Neurological Physiological Phenomena, Therapeutic Biomedical Behavior-Management Therapy, and more. A preclinical research test was registered for the SCIO device and performed on patients. Cancer is a deregulation of the neoplastic proliferative genetic rhythm. This dysfunction shifts the energy from metabolism to reproduction. Thus, the cancer kills cells. This is explained in the PROMOHEMUS and in the IMMIH area in cancer. The SCIO device can interrupt the energetic distribution and thus destroy the cancer cells. In this study the disease group total number of patients was 7,672, with Subacute Treatment 2,010 patients, and 5,662 SCIO Harmonic Devices. There was: Subacute Treatment 5,610 patient visits, SCIO Harmonic Treatment 6,270 patient visits.

The results show dramatically improve for the patients that the SCIO treatments of the SCIO device have caused effects on a cancer patient. There was over 2,000 cases of cure reported in this study. More than fifty percent of the patients reported positive results. There was significant negative effects reported.

Introduction
Overview
This large scale research was designed to produce an extensive study of patients with a wide variety of diseases to see who gets the best treatment using the SCIO for cancer remission and patient monitoring. The SCIO is a novel portable Universal Electro Magnetic Medical apparatus that gauges how an individual reacts to miscellaneous homeopathic substances. The device is registered in Europe, America, Canada, S. Africa, Australia, S. America, Moscow and Shanghai. The treatment parameters are fully registered. Some additional factors, where permitted by the manufacturer, to be verified are required. This is a study necessary to determine safety and efficacy. (As a result of these studies those additional factors are now registered within the EU)

An European ethics committee was officially registered and governmental permission obtained to do the large animal study. Qualified registered and certified Biofeedback therapists were involved in the study. The SCIO was used throughout the study. Fifty patients were involved from all over the world including: S. America, Europe, China, Africa, Australia, Asia, and S. America. They were treated in the patients of the study and how to obtain informed consent and to maintain the results to the ethics committees in all areas. The researchers to be involved in the study and had treatment with a number of different patients. The results of the study were published in various international medical journals: The African Journal of Cancer Science, The American Journal of Cancer Science, The European Journal of Cancer Science, The Australian Journal of Cancer Science, and The Chinese Journal of Cancer Science. The study involved 2,289 researchers in the study. There were 5,070 patients. 64% had more than one visit, 43% had over two visits. There were over 221,000 patient visits recorded. The therapists were...

Stress, fear increase cancer recurrence risk, study says

By BJS

Created 02/27/2008 - 12:27

Edited and reviewed By Professor of Medicine William Nelson IMUNE

International Journal of the Medical Science of Homeopathy

After the surgical removal of a malignant tumor, the chance that cancer will re-appear in a different location of the body remains high. But new research from Tel Aviv University, in a bold new field called Psychoneuroimmunology, may prevent those cancer cells from taking root again — and the key to the treatment is stress reduction.

A new study led by Prof. Shangar Ben-Eliyahu, from Tel Aviv University’s Department of Psychology (http://www.aftau.org [1]), has shown scientifically that psychological and physiological stress prior to, during and after surgery has a biological impact that impairs immune system functioning. This impairment bears down on disease progression, he says, especially at the critical point during oncological surgery when a primary tumor is being removed.

The study was published in the journal Brain, Behaviour, and Immunity (2007). The results are expected to influence cancer intervention programs in the future.

Effects of Fear

“The psychological stressors of surgery deal a blow to the immune system, but this is hardly discussed in the medical community,” says Prof. Ben-Eliyahu. “Ours is among the first studies to show that psychological fear may be no less important than real physiological tissue damage in suppressing immune competence.”

Doc Steve I just worked with the head of emergency surgery at a local hospital diagnosed with Ovarian Cancer but she refused to do the Chemo & Radiation the Oncology Dept recommended....After only 2 sessions with me I told her to go for another biopsy...No trace of any Cancer was found! She was stunned and told me I had given her life back to her and called me a miracle worker but the real miracle was the SCIO that guided the protocol I created for her....

Doc Steve: I have succesfully treated dozens of cancer cases even Stage 4 and have gotten complete remissions by using the SCIO, 8-14-2014
Complementary and alternative therapy use in adult survivors of childhood cancer: a report from the Childhood Cancer Survivor Study.

University of Minnesota, Minneapolis, Minnesota, USA. mertens@epi.umn.edu

BACKGROUND: Little information is available on the use of complementary and alternative medicine (CAM) in long-term survivors of childhood and adolescent cancer. PROCEDURE: The Childhood Cancer Survivor Study (CCSS) is a resource evaluating the long-term effects of cancer and associated therapies in 5-year survivors of childhood and adolescent cancer diagnosed between 1970 and 1986 before the age of 21 years. A survey of CAM use during the previous year was distributed in 2000-2001 and completed by 9,984 survivors and 2,474 sibling controls. RESULTS: CAM use reporting was similar in cases (39.4%) and siblings (41.1%). Compared to female siblings, female survivors were more likely to use biofeedback (odds ratio (OR) = 3.3; 95% CI = 1.0-10.8) and hypnosis-guided imagery (OR = 3.2; 95% CI = 1.6-6.8); male survivors were more likely than male siblings to use herbal remedies (OR = 1.2; 95% CI = 1.1-1.6). Factors associated with CAM use in survivors included elevated scores on the brief symptom inventory (BSI) - 18 (OR = 1.6; 95% CI = 1.3-1.9), prolonged pain (OR = 1.5; 95% CI = 1.3-1.7), and having seen a physician in the past 2 years (OR = 1.6; 95% CI = 1.4-1.8). Survivors reporting low alcohol intake and excellent or good general health reported lower levels of CAM use (OR = 0.7; 95% CI = 0.7-0.8 and OR = 0.8; 95% CI = 0.7-0.9, respectively). CONCLUSIONS: Survivors have a similar reported use of CAM compared to a sibling cohort. However, our data suggest that survivors turn to CAM for specific symptoms related to previous diagnosis and treatment. Future research is needed to determine whether CAM use reflects unmet health needs in this population. (c) 2007 Wiley-Liss, Inc.

Evolution of Electrotherapy: From TENS to Cyberpharmacology

C. Norman Shealy
Holos Institutes of Health, Inc., Fair Grove, Missouri, USA.

Saul Liss and Bernard S. Liss
MEDI Consultants, III C, Paterson, Nell Jersey, USA.

The use of electricity in medicine is reviewed with special emphasis on its use for the treatment of pain that culminated in dorsal column stimulation and our development of the TENS device. We later found that pain relief could be enhanced with cranioelectrical stimulation which also relieved symptoms of depression via effects on serotonin. This chapter reviews effects on a host of other neurotransmitters following cranial-electrical and electroacupuncture techniques that have led to an appreciation of five specific energetic circuits: the Ring of Fire, Ring of Air, Ring of Water, Ring of Earth, and Ring of Crystal. The acupuncture sites and cyberpharmacologic significance of each of these are explained.

What part of your body do you dislike most?

How would your life change if your disease was gone?
SCIO, Indigo, Eductor, Cybermagnetic Chair Tech for Cancer

IF YOU ARE LOOKING FOR A FIVE MINUTE WAY, OR A ONE HOUR COURSE TO DO CANCER PATIENTS, THEN PERHAPS YOU SHOULD CONSIDER JOB OPPORTUNITIES IN THE FAST FOOD OR HOUSE CLEANING INDUSTRIES.

When They found out that 95% of accidents happen in the Home, They Moved to be Safe

DOCTOR HOUSE FACEPALM

I TRUST YOU HAVE LEARNED HOW TO DO A NORMAL PATIENT
Click these pics to see a short intro video on SCIO Eductor training: https://youtu.be/C_9b02RuxfQ
after loading "Timed Therapies" and then "Enabling Testing", we do what the patient's unconscious choose for at least 2 minutes.

We would like to get a rectified value of over 55% Repeat process till rectification is over 55 Then click on Degeneration Treatment for at least 5 min Click degeneration for extra effects.
SCIO, Indigo, Educator, Cybermagnetic Chair Tech for Cancer

Now do the Degeneration Correction Therapy and all additional therapies suggested after.

After then go to the AFE degeneration button 1 thru 4 do each till rectified equals 100 do 1 and 2 one day and do 3 and 4 on a separate day. only on the fourth visit can we do all four in one day, but be cautious it makes patients weak.

New Super Cancer treatment in the new 2015 software Do for 15 minutes
The BIG program offers you validation of measured and stimulation cybernetic loop.

The BIG (Biofeedback Interface Graphics) offers you a chance to show true biofeedback to your client or other skeptical person. As well there are movies and music that can be played to maximize Cancer therapy.
Here you can show a cancer movie and see biofeedback at the same time.
There several very good Vibrational Therapies on the Cybermagnetic Chair. This exciting new therapy sends music into the stomach chakra as magnetic vibrations. This will incite water molecules (which are para-magnetic) to incite other water molecules till the music penetrates thru the body. Then we measure the magnetic action at the heart chakra, thus setting up a cybernetic loop to maximize safety and efficacy.

Many choices to maximize and cancer therapy

Just Imagine Floating on a Zero Gravity Chair the Waters in your Body Magnetically Start to Align + all Your Cells Vibrate to the MUSIC

If You Have Never had the Experience of Magnetic Music Expanding and Cascading through your Cells, Try it for an Hour

Effects of acupuncture for cancer pain and quality of life – a case series

Sivarama Prasad Vinjamury1*, Ju-Tzu Li1, Eric Hsiao1, Calen Huang2, Cheryl Hawk3, Judith Miller1 and Yuhong Huang1

Abstract

Background: Many cancer patients seek complementary and alternative medicine (CAM) including acupuncture to manage their cancer-related symptoms or side effects of treatments. Acupuncture is used to manage cancer pain and improve quality of life (QoL). This study aimed to conduct a preliminary study on a case series to evaluate the feasibility of acupuncture for treating cancer pain and to collect preliminary data on the effectiveness of acupuncture in treating cancer pain and improving QoL.

Methods: A semi-standardized acupuncture treatment comprising one to three treatment sessions (20–30 minutes per session) per week for 8 weeks was provided by four licensed acupuncturists, who had more than 5 years of clinical experience, at the University Health Center. The European Organization for Research and Treatment of Cancer Quality of Life Questionnaire (EORTC QLQ-C30) and a visual analogue scale (VAS) for pain rating were used as the outcome measures to assess pain and QoL. Data were collected at baseline, immediately after 2, 4, 6, and 8 weeks of treatment and at 4 weeks after treatment completion (week 12).

Results: Two males and five females with a median age of 66 years (range: 44–71 years) completed the study. For the VAS, the percentage of improvement ranged between 18% and 95%. The baseline mean raw score was reduced from 51 mm to 36 mm at the end of week 8 and to 23 mm at the end of week 12. The percentage of overall QoL improvement ranged between 20% and 100%. The mean raw score for QoL improved with time. The baseline score was increased from 55 to 69 at the end of treatment (week 8) and to 73 after the follow-up (week 12).

Conclusions: This pilot study on a case series showed that acupuncture might be beneficial for reducing pain and improving QoL in cancer patients.

Background

Cancer is the second leading cause of mortality in the United States [1], and 41.24% of men and women born in the United States will be diagnosed with some type of cancer during their lifetime [2]. Although modern therapies for cancer have improved life expectancy, the management of this complex disease [3] and improvement of quality of life (QoL) of patients, especially in managing cancer-related pain, are still limited. Cancer pain is frequently reported among patients, with 53% of patients experiencing pain, and one-third experiencing severe to moderate levels of acute or chronic pain [4]. The occurrence of pain in cancer patients increases the risk for psychological disorders (e.g., anxiety, depression, and suicidal ideation) [5], that distract patients from their daily activities (e.g., ability to concentrate) [6]. In addition, the cause of pain is not limited to the physiological etiology, but also arises through side effects of standard treatment modalities like drugs, surgery, radiotherapy, and chemotherapy [3].

Opioids are currently used in cancer pain management [7]. The World Health Organization has described a three-step analgesic ladder on how to effectively administer opioids for chronic cancer pain, with the main goal being to prohibit pain by giving high doses of the drugs around-the-clock [8,9]. However, up to 20% of patients are resistant to opioids [10], and of those who are not resistant, many choose not to have treatments that involve narcotic substances because of the various side effects. The common short-term side effects are constipation,
Acupuncture as an Evidence-Based Option for Symptom Control in Cancer Patients

Opinion statement
Current technology suggests that acupuncture modulates neurological processes within the central nervous system, especially the spinal cord gating mechanisms, cerebral subcortical nuclei, and the hypothalamic-pituitary-adrenal axis. Many single-arm clinical studies report the effectiveness of acupuncture for controlling symptoms in cancer patients. However, the challenge has been to separate the nonspecific effects of the practitioner, as well as regression to the mean, from the neurophysiological effects of needle penetration. Recently, randomized controlled trials have attempted to answer this question, with mixed results. For example, needle penetration (or equivalent stimulation) is effective for nausea and vomiting, whereas it does not appear to be a major factor in reducing hot flashes. Safety and quality are priorities, so regulation of the practice of acupuncture is important, as well as excellent communication between practitioners. In addition, continuing research is mandatory, using validated methodology and reporting principles as outlined in the CONSORT and STRICTA recommendations.

Introduction
Acupuncture is the insertion of fine sterile FDA approved needles into intradermal or subdermal loci called acupuncture points. These points lie along so-called energy meridians that were constructed as part of Traditional Chinese Medicine (TCM) theory. The specific anatomical points often correspond to nerve pathways or tissue fascia. Different combinations of points have a wide variation of effects on symptoms, the balance of the autonomic nervous system, degrees of inflammation, tissue regeneration, and hormone and immunocyte levels.

The optimal selection of points requires expert knowledge and experience, and can vary between patients, according to TCM theory. The points can be tonified (stimulated) or sedated (suppressed) by appropriate patterns of physical manipulation or electrical pulsation. There are some standard points for common symptoms, but TCM theory is based on patterns of disease that require an individualized, tailored approach. This individualized approach is challenging for the construction of randomized controlled trials (RCTs). Despite methodological barriers, some innovative RCTs reveal that acupuncture is effective beyond the placebo effect for some symptoms of cancer and for the adverse effects associated with anticancer therapies.
