The challenge in today’s market is to substantiate and validate the claims a company uses in the market.

Alternative medicine has long harbored people with vague unverified and often completely fraudulent claims. Some people feel that all of alternative medicine is fraudulent. It must be pointed out that most of alternative medicine is not properly validated. It is the job of alternative medicine people to band together and develop criteria for validation and a system to rate the claims made by a company and publically present this rating in a fashion to be used to defend these claims in the market place. To this end the World Health Professional Rating System (WHPRS) has been developed. Here is a basic simple outline for the rating system.

Testimonials

Most alternative therapists are math phobic and hate numbers thus statistics. They like stories. But sometimes these stories are embellished and twisted out of contrast. Professional athlete promotions are also popular but none of these are proper validation or substantiation. We can review this as well.

CE registration and other compliance with governmental authorities

Here a review of the compliance regulations will be accessed in light of validation of claims. If you register as a biofeedback system, it does not let you evaluate parts of the liver. Your claims must now fit the medical registration of your device. Compliance registration is of three parts.

1. Company quality control and traceability,

2. Safety, and

3. Medical use for claims. We must assay that your claims fit into your registration. Many people bend their registration into crazy claims which can hurt them in the market.

Many companies have owner operator claims, salesman claims, multi-level networkers, teacher’s declarations, and providers of information and they use a wide variety of ways to make claims. Some are done correctly some are not. These need to be reviewed to help companies to avoid trouble.

For 1000 euros a professional review of marketing claims and compliant registration can be done.
Research

There is a host of different types of research all with varying effects on substantiation.

1. Scientific bench testing research with no patient. Quality, function, electrical performance and above all safety tests must be done.
2. Clinical research must adhere to the form of the original Helsinki accord to protect patients. Patient must be protected, afforded informed consent of voluntary participation, told of risks and benefits, protected with confidentiality, given feedback of results, and informed of the nature of the test.
3. Double blind tests should have proper random sampling, placebo control, and participants told they may or may not be in the control group.
4. Medical supervision and professional record keeping is a needed for proper validity.
5. 40 patients is the base number to start to offer significance to results for publication. But case studies, small groups and other studies can be valuable as well.
6. An approved ethics committee, and Investigational Device Exemption (IDE) and or a certified Institutional Review Board (IRB) to oversee the study are required.

Professional medical supervised studies can be done for a fee. The AMPRS can organize a professional study of 40 patients into randomized groups for testing for these fees.

Ethics committees can charge 2,000 euro to 5,000 for registration.

IDE plan and set up can cost 5,000 euro

Medical doctor supervision- 10,000 euro

Advertising for Subjects and random sampling - 1,000 euro

Placebo officer- 1,000 euro

Site selection and approval- 1,000 euro

Study performance- 10,000 euro

Statistical review of data- 1,000 euro

Study write up with proper references and procedure- 10,000 euro

So a base study of significance could cost as little as 40,000 + euros to be legally and completely arranged, performed to completion and written up into publication form. Special concerns or additional procedure can affect the price.
Publication

We work with an International Peer Review Medical Journal which has had its international library ISSN number since 1996. It has been unchallenged and reputable for over 15 years. The International Journal of the Medical Science of Homeopathy, Naturopathy, and Energetic Medicine is a peer-reviewed medical journal which has published hundreds of articles for the world library system. [http://ijmshnem.com](http://ijmshnem.com)

This journal charges 1,000 euros for review of a publication article. This journal is very friendly to all of natural medicine so the chances of publication are very high. Other journals will be more and more friendly as time goes by but now we have at least one friendly such publication.

The credentials of your scientists, medical doctors, therapists, lecturers, and more can all be reviewed to see if your claims are made by people who are what they claim to be.

Accredited Medical University Instruction

We work currently with two European accredited medical universities, the Medical and Pharmacological University of Timisoara and Iasi. The medical faculty is always interested in teaching natural medicine techniques that are properly validated and substantiated. Members of the faculty are available for consultation or to be providers of information for proper fees. It usually takes peer review publication over seven years to get into a university. But good techniques and products can get there sooner.

A doctor or therapist can be hired as a provider of information. A provider of information needs to have a contract that does not pay percentage but pays a simple honorarium plus expenses for lecturing. The contract specifies that the provider does not own any percent of the company and he does not get a percent of sales. The provider uses his freedom of speech rights to express his opinions. The provider does not hand out promotional material or sales claims from the company. The company does not actively have promo material inside the place of the lecture or during the lecture. It must be understood that the provider is not a salesman but he is free to express his experiences and his opinions. The provider cannot quote or reference studies or experiences that do not exist. Any reference to any such study must be able to make such study available in 48 hours or the provider might be sued for deception.

Your device or product research might be added to a certified medical university textbook with a proper ISBN international Library number. You might consider purchasing advertisement in one or more of the journals. If properly disclaimed and reviewed you might get an advert approved. It is currently 1,500 euro for a full page. Your study might be quoted or published as well.

Governmental Professional Work Qualification

We presently work with a European government that credentials a work certificate in energetic bio-resonance medicine. The Maastricht treaty stated that in Europe what is legal anywhere is legal everywhere. This does not hold true for the workers yet as that complete harmonization is still developing. But it does hold true for product sales and product claims. The 2010 European constitution
now makes Europe a single entity. No longer does one have to register in all countries a product for sale. And when one government offers a work qualification the other countries are honor bound to not dismiss it but must consider it carefully. As for product claims it further adds to validation and substantiation.

**Scientific theory Review**

A basic scientific review will cost just 1000 euro. Here a qualified scientist will provide a certified document of his analysis and suggestions for future scientific substantiation. This is a start for validation and it must be pointed out that this is not complete validation or substantiation.

Are the Product Claims
A. **SCIENTIFIC THEORY**- here true accepted science is used to explain how the device/product works, when a product passes double blind testing, is published in a peer reviewed medical journal, and gets regulatory CE mark permission to make claims then we know it is valid.
B. **GOOD PSEUDO- SCIENCE**- here pseudo-science, unproven but plausible theories, or futuristic notions that are being proven are used to market a device/product. Schuman wave generators, Scalar treatments, Quantum theory, Water Enhancers devices there is speculative theory and some true evidence to support it.
C. **BAD PSEUDO- SCIENCE**- here pseudo-science, unproven theories, or futuristic notions that might be proven correct in the future are used to market a device/product. Wave diverters, diodes for radiation diversion are examples. There is very speculative theory but little true evidence to support it.
D. **DIVINATION**- the devices uses subtle muscle control of the therapist to appear that is measuring the patient’s reactions, when in fact the therapist controls all results. Muscle testing, point probes, rub plates, pendulums, swing sticks are all examples of divination devices. These devices fail true double blind tests because the therapist needs to know what he is testing to get results.
E. **FRAUDULENT**- the device makes claims that it does things it does not do; Such as a biofeedback device that claims to measure bio-function but does not. Any system that uses lies to market, or lies about registration is fraudulent. The LIFE system, Introspect, Physiospect, Sensitive Imago, Delta, Gernot Gauper fraudulent counterfeit of the SCIO, Francisco Martinez Fraudulent Software are examples.

**Summary**

So as we see it is possible for alternative and energetic medicine to get full validation, verification and substantiation. It is not easy. It is not free. The tremendous amount of fraud and deception in all business has made this needed. The future of this industry depends on us all supporting the success stories and finding our way thru this quagmire to allow our industry to flourish.

We ask a fee of 450 euro a year to join as a member and get publications and updates. If you pay 1950 euro you get a year’s membership and a full appraisal of your claims that will result in a rating of your operation in all of the above categories and suggestions for future validation.
We welcome you to come to our meetings and see that it is possible and probable for your company to flourish and validate your claims and do expansive business in the world market. If we band together and stop the lies and slander of the successful ones we can save our industry and increase our market.

We need to put our money where our mouth is and prove our claims in professional scientific ways. As you can see for as little as 50,000 to 100,000 euros your product could be proven valid and your claims substantiated. Why wait, why give in to the petty attacks, let’s move forward together.

Here is a professional rating system for Alternative medicine Products or Devices to use to Verify, Validate and prove their claims to the world and in the market.

11 European Governmental Professional Work Qualifications for using the device. The SCIO is an example of a device that has met each and every criterion on this list to get a Platinum rating.

When the Romanian government made the Neuro-Anatomy, Neuro-Electro-Physiological, Biofeedback and Bio-resonance SCIO therapist an official work qualification license it fully legitimized energetic alternative medicine. The Maastricht treaty of Europe said that what is legal anywhere in Europe is legal everywhere in Europe. In 2010 all of the countries of Europe signed the Europe constitution and thus united Europe in law and spirit. Many small minds do not like big things and small petty minds fight against such growth. Harmonization of Europe Law is happening gradually but it is illegal to look down your nose at Romania. And Romania has defended energetic alternative medicine for the world.

10 Taught in accredited medical universities and your device/product appears or your peer reviewed medical studies are quoted in certified medical textbooks. This takes a minimum of seven years in peer reviewed medical journals. Gold rating.

The SCIO is taught in three major fully accredited Medical Universities with full validation. The science of the SCIO has been fully developed tested and Clinically. Legally, and Scientifically validated.

9 Medically supervised, independently researched, double blinds, Peer reviewed medical journal publication that validates to significance the function of your device/product. 40 patients needed to start significance and a thousand plus for full verification. Silver Rating.
8 Double Blind Independent Medically Supervised Studies. Proper Ethics Committees and or Institutional Review Boards are needed, as well as informed consent and full compliance with the Helsinki research accord. **Bronze rating.**

*The above ratings indicate a true validation process to verify the claims made for the device.*

7 Independent Medically Supervised Studies. Proper Ethics Committees and or Institutional Review Boards are needed, as well as informed consent and full compliance with the Helsinki research accord.

6 TESTIMONIALS, STORIES OR clinical studies done by your personal staff. Proper Ethics Committees and or Institutional Review Boards are needed, as well as informed consent and full compliance with the Helsinki research accord. *The above criteria relates to the full validation of clinical testing, publication, and medical education.*

*All devices above will have the SCIENCE + DEVICE STUDIES+ CE - United Laboratories or equivalent SAFETY Registration+ CE or FDA MEDICAL CLAIM Registration. All of the ratings above are an indication of how just well it is tested for medical use. Number 11 is the pinnacle or highest level of validation.*

5 SCIENCE + DEVICE STUDIES+ SAFETY Registration+ MEDICAL CLAIM Registration- here your device/product is proven safe, and effective for medical uses in the claims you specify in your registration. This is the minimum qualification to market your device, but in today’s world we need more.

4 SCIENCE + DEVICE STUDIES+ SAFETY Registration- here your device is safety tested to CE standards to prove your device/product is safe to market.

3 SCIENCE + DEVICE STUDIES- here the device/product is bench tested for performance specs and compared to other devices legally sold in the market.

2 SCIENTIFIC THEORY- here true accepted science is used to explain how the device/product works but there is no real validation, verification or proof that it works.

1 MAGICAL THINKING SCIENCE- here pseudo-science, unproven theories, or futuristic notions that might be proven correct in the future are used to market a device/product. Schuman wave generators, diodes for radiation diversion are examples. There is speculative theory but little true evidence to support it.

0 DIVINATION- the devices uses subtle muscle control of the therapist to appear that is measuring the patient’s reactions, when in fact the therapist controls all results. Muscle testing, point probes, rub plates, pendulums, swing sticks are all examples of divination devices. These devices fail true double blind tests because the therapist needs to know what he is testing to get results.

-1 FRAUDULENT- the device makes claims that it does things it does not do; Such as a biofeedback device that claims to measure bio-function but does not. Any system that uses lies to market, or lies
about registration is fraudulent. The LIFE system, Introspect, Physiospect, Sensitive Imago, Delta, Gernot Gauper fraudulent counterfeit of the SCIO, Francisco Martinez Fraudulent Software are examples.

Number 11. This is a picture of Dr. Igor’s (Novak Djokovic’s doctor) Romanian license professional qualification a Neuro-Physiologist-Bio-Feedback-Bio-Resonance SCIO therapist.
Number 10 – The medical diploma of the fully accredited European and International Medical University

**Neuro-Anatomy, Neuro-Electro-Physiologist in Biofeedback**

**SCIO Therapist with Bio-Resonance**
Medical University of Timisoara Romania Place of Desire' Dubounet historic Lecture on VARHOPE techniques with SCIO
Professor Desiré Dubounet has spent over 30 million dollars to bring the world a professional and thorough course on Wellness, Naturopathy and Neuro-Electro-Physiology of Biofeedback as Bioresonance.

She is such a humanitarian Angel, she lets you pay for the course videos, books and materials with Karma...

These are the top five reasons to get a Doctorate in Wellness PHD International Medical University degree online at home:

1. Getting a degree means you will increase your earning potential. Studies have shown that at home study is just as good as attended classes.
2. Study and Complete Courses at Your Own Pace. Use this to maximize the learning.
3. Scheduling Convenience. Work when you are ready to work.
4. Teaching Faculty Who Actually Have Work Experience in Your Field of Study. Global faculty at IMUNE is with worldwide famous doctors.
5. Save Money on Travel, Parking, Childcare, and Books. You save money the world saves energy, this makes you and the world better.
6. Employer Support. Many employers offer tuition reimbursement for employees’ tuition associated with training in their fields. Employers also tend to encourage enrollment in online degree programs because they know employees will be able to go to school and still be able to be committed to their jobs. Don’t be afraid to ask your employer. Every company needs a wellness consultant.

Professor Desiré Dubouinet the world’s most famous Naturopath has spent over 30 million dollars to bring the world a professional and thorough course on Wellness, Naturopathy and Neuro-Electro-Physiology of Biofeedback as Bioresonance. She is such a humanitarian Angel, she lets you pay for the course videos, books and materials with Karma go to www.imune.name for more information.
At The 2011 World Congress on SCIO in Budapest Dr Igor Cetojevic gave us a Basic presentation on Traditional Chinese Medicine (TCM). His work with Novak was protected under confidentiality. His presentation of Traditional Chinese medicine with the SCIO was insightful and the participants learned about the vital usage of the SCIO in medicine.
This is to inform you that the Homeo Diagnostical Academy Press has published

The International Journal of the Medical Science of Homeopathy
as a peer reviewed medical journal

under from Hungarian ISSN National Center 1997 apr. 15-I and has awarded the international identification number:

ISSN 1417-0876

This number will remain unchanged for the lifetime of this publication.

You are kindly reminded that with every future publication the ISSN number will be printed on each book. Should you wish to have this publication printed internationally the identification number can be found near by the Hungarian code which would be:

HU ISSN 1417-0876

If it is your preference to have a detailed explanation of this publication available you may visit the Hungarian ISSN National Center web pages where you will find the OSZK web page called “Local services” and in this menu point you would enter your identification number. The web address can be found at:

http://www.oszk.hu/index_hu.htm

In relation to this document or in any other point please contact us at your convenience.

INTERNATIONAL STANDARD SERIAL NUMBER (ISSN)

Thank you for your recent enquiry. We have assigned the following ISSN:

The international journal of the medical science of homeopathy [Online]
ISSN 2041-4293

We would be grateful if the ISSN could be printed in all issues of the serial, preferably on the top right-hand corner of the front cover or title screen in the form given above, i.e. preceded by the letters ISSN with a hyphen separating the two halves of the number. If the serial is available in more than one physical format, a separate number is assigned to each version and all the ISSN should be quoted on each version available, with an appropriate qualifier in brackets, eg:

ISSN 0000-0000 [Print]
ISSN 0000-0000 [Online]
ISSN 0000-0000 [CD-ROM]

The same ISSN is printed on successive issues of the serial, providing the title does not change. Please notify us in advance of any change in title, however slight, as this may necessitate the assigning of a new number. The ISSN should also be quoted in all promotional and descriptive material concerning the serial.

Information concerning the voluntary schemes for the deposit of e-journals and offline digital publications with the British Library is available at: http://www.bl.uk/aboutus/stratpolprog/legaldep/index.html#elec. Further enquiries concerning the deposit of electronic publications can be made by e-mail to LDO-Electronic@bl.uk

Thank you for your interest and co-operation.

Yours sincerely

Abstract:
A global and momentous research project was developed for the last two years. The SCIO device is a Universal Electro-Physiological device used for stress reduction and patient treatment. Over 2,200 qualified biofeedback therapists joined our Ethics Committee study to evaluate how stress reduction using the SCIO device could help a wide variety of diseases.

The device and thus the study have insignificant risk. There was a staff of medical doctors who designed and supervised the study.

Over 98,600 patients gave informed consent and participated in the study. The study would conclusively prove safety and efficacy of the SCIO device. With over 660 of these patients having multiple visits, there were over 275,000 patient visits. With a total record of the 500 patient information, therapy parameters and reactivity data, No names of patients were recorded for confidentiality.

Two of the 2,200 plus therapists were given blank devices that were completely visually the same but were none functional. These two blind therapists were then given 15 patients each. This was to evaluate the double blind component of the placebo effect as compared to the device. Thus the studied groups were a placebo group, a stimulus group, and an attached harness group.

This is just the first study in a long task of analysis in truly break down the data totally. This study verifies the safety and efficacy of the SCIO device. There were small effects seen in the placebo group, larger effects in the stimulus, and astounding effects in the real harness group.

In this study 35 females between 37 and 65 were evaluated for their daily estrogen cycle. The results have shown that the SCIO estrogen streaming therapy of 20 a day for 5 days raises their estrogen.
Clinical Study No. 3. - VARHOPE Changes in a SCIO Session

Correction of aberrant body electric profiles such as voltage, amperage, resistance impedance, proton + electron pressure.

(This article is translated into English and Hungarian from the original Romanian)

Abstract

This study demonstrates the safety and effective qualities of the SCIO device used in a large scale study. A large scale study of over 97,000 patients with over 320,000 patient visits reported their diseases. The SCIO measures global electrical measures of the body. When there are abnormal measures of the electro-physiological factors, the device allows a feedback loop between the Central Nervous System (CNS) of the patient and the device. Of the patient visits listed some 50 plus % showed very low electro-physiological factors, below 30% normal. The cybernetic electro-physiological feedback loop was then used to help the patient reduce stress and thus improve the electro-physiological factors. There was improvement in over 95% of the electro-physiological measures at the end of the session (post test) versus the pre test. The average improvement in electro-physiological VARHOPE factors is 5%. These patients reported stress reduction and improved well being as well.
VARHOPE Improvements in a Clinical Setting in Toronto Canada on the SCIO device

By Jonathan Sargent

ABSTRACT: We are made up of atoms that are mostly electrons and protons. The outer electrons of any atom or molecule never touch. The outer electrons of any atom or molecule never touch another set of electrons. The entire interaction is through electro-magnetic-static, quantic, or other interactive fields.

There is Electrical energy in the human body. The simplest factors of anything electrical are the volts amps and resistance. This makes up Ohms law of electronics, where Volts = Amps times Resistance. This is a correlation not an exact law. Oscillations of the volts and amps give us the frequency of a current. Fluctuations of these calculations can be used in virtual or mathematical ways to calculate other biological factors. There are norms of the body electric variables relative to age and lifestyle.

Thus the key Bio-electric factors of Volts Amps Resistance Hydration Oxidation and Proton versus Electron charge stability are measurable with the SCIO. Then device then using a cybernetic biofeedback loop can help to stabilize the VARHOPE of a client. In thus study we assay the VARHOPE scores of several clients. In all cases there is a significant improvement in the bio-electric after a simple SCIO therapist lead session. This study shows three cases and an overview of one hundred cases.
SCIO AND SUPERLEARNING

Abstract

In this short article we review some basic foundations of enhanced learning or as Sheila Watson once described it superlearning. We will discuss the theory and the use of the OXCI biofeedback system in superlearning context. A short study on the effectiveness of Sheila Watson superlearning system is challenged by having 19 students try to learn some foreign vocabulary words with or without the system. The relaxation had considerable positive effects. The students could learn twice as much in half the time.

*Key Words:* Superlearning, harmonic, memory enhancement, frequency, Lozovoy

PURPOSE OF STUDY

The purpose of this clinical study is to determine the efficacy of the ECLOSION Electro Physiological Feedback Xroid (EPFX)/Scientific Consciousness Interface Operations System (SCIO) device, manufactured by ECLOSION KFT (the Company), in stress reduction by introducing low-level electromagnetic frequencies into an individual's body through electrodes attached to the person's wrists, ankles, and forehead to balance or harmonize and return to normal the optimal frequencies at which the body's cells and organs should resonate. This enables the body to strengthen, heal and expel the pathogens that propagate stress and its associated 'unwellness', consequently reducing stress and improving general health and function.
A double-blind placebo-controlled study of the application of the SCIO Universal Electrophysiological Biofeedback System for statistical evaluation of the SCIO’s ability to increase Body Wellness after one 45-minute session

Gage Tarrant, Bart Keough, Jane Summers, Jill Caravalho, Gene Helton, Lynn Smith and Julie Craker in Seattle, U.S.A.;

Dr. Codruta Bacean and Dr. Onut Bacean in Timisoara, Romania;
Dr. Rainer Mutschler and Kathrin Solner in Speyer, Germany.
Dr. Danis in Budapest, Hungary

In this study there were conclusive results of electro-physiological improvement. This study was conducted at five sites of approximately 40 subjects in each.

Under medical supervision the study was conducted in Budapest, Hungary, Timisoara, Romania, Seattle Washington, Speyer Germany, and Paris, France. Thus there were over 200 patients in this medical study.

Introduction

BACKGROUND: Stress is known to have many negative effects on multiple aspects of an individual’s life. Stress can affect an individual’s physical, cognitive, emotional and social well-being. We hypothesized that within one 45 minute biofeedback session, a measurable improvement in Body Wellness indicators can be achieved.

OBJECTIVE: To evaluate whether a 45 minute session with the SCIO biofeedback device affects an individual’s Body Wellness.

DESIGN: Randomized, double-blind, placebo controlled trial.

SETTING AND PATIENTS: 192 individuals with awareness of levels of perceived stress as well as injuries/pain, between 18 and 65 years of age, male or female, randomized into placebo and SCIO test groups, at private clinics at multi centered sites.

INTERVENTION: Subjects were randomized to the test group (a 45 minute SCIO biofeedback system session) or placebo (SCIO, Maitreya Kft. www.qxsubspace.com)

MEASURES: Pre and post measures as follows: Quality of Life Questionnaire, Energy Index Factor (systolic blood pressure left arm sitting + the diastolic blood pressure left arm sitting x pulse), Grip Strength Test (measured in kilograms), Oxygenation Test, Flexibility Test (measured in inches in The USA and centimeters everywhere else), Memory Test, pH Test, VARHOPE scores (electrical measures within the device, as follows: voltage (V), amperage (A), resistance (R), hydration (H), oxygenation (O), proton pressure (P) and electron pressure (E)).

RESULTS: Patients in SCIO group had greater VARHOPE scores than those in placebo group (p<0.005). The other indicators of Body Wellness were not statistically significant, but there are trends in the improvement levels between the Test and Control (Placebo) groups.

CONCLUSIONS: The electrical parameters of VARHOPE can be improved by a 45 minute SCIO biofeedback session. However, it may require more SCIO biofeedback sessions for the other Body
Four Decades of the Trivector

Voltammetry Stimulation of Testosterone in Gold medal Athletes in the China Olympics

Taken from Adam Mandel’s lecture in 2011 Budapest at the congress on SCIO about work done at the 2008 Olympics.

Adam Mandel was sent to China to work on the Chinese Athletes with the SCIO in 2007 till 2008. He presented his work for the first time in the 2011 international conference on the SCIO held in Budapest. Titled “The Greatest Story Never Told” he showed the audience incredible awe inspiring details of wondrous results with the SCIO. This is a brief summary of his 3 part lecture now available from IMUNE.

Adam talked about testosterone boosting by voltammetry streaming therapy of the SCIO. The SCIO is a
Cranial electrotherapy stimulation and fibromyalgia
Marshall F Gitula

Cranial electrotherapy stimulation (CES) is a well-documented neuroelectrical modality that has been proven effective in some good studies of fibromyalgia (FM) patients. CES is no panacea but, for some FM patients, the modality can be valuable. This article discusses aspects of both CES and FM and how they relate to the individual with the condition. FM frequently has many comorbidities such as anxiety, depression, insomnia and a great variety of different rheumatologic and neurological symptoms that often resemble multiple sclerosis, dysautonomias, chronic fatigue syndrome and others. However, despite long-standing criteria from the American College of Rheumatology for FM, some physicians believe there is probably no single homogeneous condition that can be labeled as FM. Whether it is a disease, a syndrome or something else, sufferers feel like they are living one disaster after another. Active self-involvement in care usually enhances the therapeutic results of various treatments and also improves the patient’s sense of being in control of the condition. D-ribose supplementation may prove to significantly enhance energy, sleep, mental clarity, pain control and well-being in FM patients. A form of evoked potential biofeedback, the EPFX, is a powerful stress reduction technique which assesses the chief stressors and risk factors for illness that can impede the FM patient’s built-in healing abilities. Future healthcare will likely expand the diagnostic criteria of FM and/or illuminate a group of related conditions and the ways in which the conditions relate to each other. Future medicine for FM and related conditions may increasingly involve multimodality treatment that features CES as one significant part of the therapeutic regimen. Future medicine may also include CES as an invaluable, cost-effective add-on to many facets of clinical pharmacology and medical therapeutics.

Cranial electrotherapy stimulation (CES) with Alpha-Stim® is a well-documented neuroelectrical modality that has been proven effective in some good studies of fibromyalgia (FM) patients (References 1 & 2). This article discusses aspects of both CES and FM and how they relate to the individual with the condition. CES is the US FDA and EU recognized generic category for medical devices using microcurrent levels of electrical stimulation applied across the head via transcutaneous electrodes for the treatment of anxiety, insomnia and depression. Microcurrent (<1000 μA) stimulation usually means 1 mA or less, whereas transcutaneous electrical nerve stimulation (TENS) involves higher currents in the 50–100 mA range and with very different waveforms. CES treatment of anxiety and depression began in the USA in the early 1960s, and is still being prescribed routinely by several hundreds of physicians today, but has yet to achieve ubiquitous acceptance in medical practice. That is possibly because sufficient information has not been made available to practitioners regarding the safety and efficacy of CES as a treatment for the approved indications of anxiety, insomnia and depression. Using an electroencephalographic device requires more of an additional learning curve for both practitioners and patients who are accustomed to the pharmaceutical model of intervention. Inserting a capsule or a tablet does not always require the attention to detail that correct application of ear clip electrodes, for example, demands. We have been conditioned
TVEP reactivity scores to isode compounds measured

Written by Prof Desire’ Dubounet of IMUNE

DATE and PLACE: August, 2011, Budapest
SPONSOR:
Maitreya Kft.
MONITOR:
IMUNE (International Medical University of Natural Education)

Abstract: In this study we tested 21 males Transcutaneous Voltammetric Evoked Potential (TVEP) electrical reactivity to two compounds given internally. One was diluted orange juice to act as a placebo and the next one was a safe weak dilution of a common insecticide. The subjects had a very significant reaction to homeopathic isode compounds containing the insecticide for detox and other detox compounds. They also had a no measurable reaction to placebo orange juice after testing. The placebo test showed no reaction to the sensitive compounds were as the treatment group had significant reactions. This points to the efficacy of the TVEP method.

TVEP reactivity scores to Nosode compounds measured

Written by Prof Desire’ Dubounet of IMUNE

Maitreya Kft.
MONITOR:
IMUNE (International Medical University of Natural Education)

Abstract: In this study we tested 5 males and 8 females with known infections using the Transcutaneous Voltammetric Evoked Potential (TVEP) electrical reactivity in the SCIO. The SCIO readings to the Infectious nosodes of the know infections of the subjects was compared to TVEP x-rayd scores of the Infectious items trvector readings. The reactivity scores of the known nosodes were significantly higher than the non-Infectious items. This proves the TVEP reactivity reaction of the SCIO.
Ovarian torsion of a pedicle, left, with bleeding in the middle of the cycle on 17.04.2006 at night with acute clinical symptoms.

Morphologic comparison of findings:
- 17.04.2006 at night
- 18.04.2006 in the morning

Lap test of 18.04.2006, pre-operation phase as preparation for laser laparoscopy in general anesthesia.

Ovarian torsion and bleeding on 18.04.2006 in the morning, same ultrasound result with no complaints at all after 12-hour SCIO treatment.
TVEP reactivity Validity Study

IMUNE (International Medical University of Natural Education)

Abstract: As we have shown everything is an energetic collection of fields that hold atoms in their places. These fields that make us up are reactive with the environment. We must decide what is appropriate to eat and what to avoid. This education starts at the earliest of ages. Most of our current electro detection of what is good or bad for us takes place in the nasal-pharynx between smell and taste. The shape receptors of the small and taste buds are electronic. They sense a proper voltammetric fields that says it is good for nutrition or what is bad. The taste receptors do not absorb or metabolize the nutrient they only credential it for intake by measuring the shape of the fields with the shape receptors of the tongue. Voltammetry is the science of analysis of the electrical fields of a substance.

We have shown the patent for the process of the QQC voltammetric analyzer. This device has been designed to work like the human tongue and to recognize the voltammetric signatures of items. These signatures are maintained as a 22x22x22 matrix of 10,064 separate shape vectors that constitute one signature. Since these fields reflect shapes they have a 3 Dimensional component and are referred to as the true vector voltammetric signatures. These complex signatures can be amplified and inputted into the body as part of the Xrroid process in the EPF or what is now known as the SCIO.

The Xrroid analysis is where the SCIO device measures the reaction of the body to over 10,000 substances at the calibrated speed of the body reaction. During the calibration of the SCIO device to the subject the device will measure the voltammetric field of the patient and then send it in the QQC. Then the voltammetric signature of what is generally known as the weakest reactive substance (distilled water) is sent in over 20 times and the highest known reactive substance combination is sent in 4 times. The starting speed is 100 microseconds or less. If the subject does not react significantly to the reactive substance versus the non-reactive distilled water the speed is reset minus one to 10,000th of a second. The speed drops in this increment till the subject has a significant reaction to the reactive substances and it is repeatable. This then gives a measure of the speed the subject reacts to items. Research in the 1980s showed that patients on morphine reacted much slower to normal patients. Then a variety of reactive speeds was shown thus making a speed of reactivity calibration needed for proper testing.

There are several factors that can interfere with the testing of reactivity. If we test and test an item over and over there is adaptation. An aberrant movement, electrical wave form, or a brain wave surge can affect a reading. So we have seen that the reading of reactivity to a single item is not as significant as we would like. Till we could put a subject into a Faraday cage and perfectly control mental aberrations it is not likely. But we have seen that if we measure family reactions we can get some good insight into the reactivity fields of a subject. Research has shown that these families that we use to develop risk profiles are worth medical attention. In this review over one hundred thousand subject studies have verified the TVEP reactive families and the risk profiles have resulted from this work.

In this study over two hundred subjects were measured for Xrroid analysis on either a normal setting or a placebo setting. This was done to validate the TVEP validity and show that on normal setting there would be much more replication of data.

Proper Ethics committee and IRB were used and informed consent from subjects. The study took place in Europe and in America. Subjects were asked to do several measures of their wellness and they were measured for their Xrroid reactivity profiles before and after the test. Repeated items were counted in placebo versus real testing.
TVEP reactivity scores to Allersode compounds measured

Bioenergetische Diagnose und Therapie mit umweltmedizinischem Potenzial
Anwendungsmöglichkeiten des computergestützten Biosonanzsystems SCIO

Seit zwei Jahren macht auch in Deutschland ein bioenergetisches Hightech-System (SCIO) mehr und mehr von sich reden. Seine Attraktivität liegt in der Möglichkeit, nicht nur die energetischen Störungen des Patienten zu diagnostizieren, sondern mit ihm gleichzeitig die meisten energetischen Therapien durchführen zu können. Dieser Beitrag befasst sich mit der Fragestellung, welche Optionen dieses System bietet, funktionelle Störungen, die durch Substanzstöße der Umwelt hervorgerufen werden, zu analysieren und zu behandeln. Zunächst ein Verständnis der Verhältnisse wird in der Funktionsoptik und in den bioenergetischen Verfahren eingehend.

SCIO ist ein hohlkomplexes bioenergetisches Verfahren, dass wie ein Scanner energetische Muster eines Organismus erfassen und auf Grundvieltausend registrierter Datenuntersuchungen Therapiensätze aufzeigt, die dann auch direkt durch das System ausgewählt werden können. Es vereinigt in sich die Prinzipien der energetischen Medizin, wohlas es das therapeutische und wissenschaftliche Spektrum der Diagnostik und Behandlungsmöglichkeiten bietet.

Biophysikalische Steuerung des Organismus
Das System macht sich das Grundprinzip der Quantenphysik zunutze, nach dem zu jedem Material eine ein quantenspuriges Feld gehört, das auch zu jeder Zelle, zu jedem Organ und zu jedem Einzelnen gehört. Mit dem System werden die energetische Reaktionskraft eines Organismus, und wie sich diese Reaktionskraft ändert, wenn der Körper Frequenzen von außen aufnimmt, aufgenommen und dann rechnerisch analysiert. Dieser Wechsel von Energie und Information, die über das SCIO-System visualisiert wird, ermöglicht es, den Körper auf die zu analysierende Substanz zu verweisen und die Frequenzmuster der einzelnen Substanzen zu detektieren. Mit Hilfe dieser Technik werden Frequenzmuster und Energiefluss von bis zu 5000 homöopathisch angewendeten Substanzen erfasst, die in Wassertempel und dergleichen in Einzelkammern analysiert werden. Die Infor...

This device has had an amazing impact on my life.

Suzanne Williams, CA

Though I would never rule out Divine intervention, I had become resigned to using prescription medication to treat my high blood pressure for the rest of my life. I had done everything in my own power to lower my blood pressure. I maintained a healthy weight, exercised, practiced healthy eating, regularly visited the chiropractor and got massage therapy but still saw no change.

"Suzanne, you hold your breath," my massage therapist told me bluntly one day. "I've known you for a while, so I can tell you, 'You hold your breath!" She began to coach me in my breathing, making me aware of the value of breathing consciously. Sometime after that I saw an advertisement for RESPeRATE in Parade Magazine. My reaction was; "Why not try it? If nothing else, it will provide some relaxation and stress relief." Well, it did much more than that.

I purchased my RESPeRATE device and, realizing that this was a commitment, I used it almost daily, with my doctor's knowledge and
A well-functioning autonomic nervous system is the key to the health and well-being of your patients / clients.

Whether HRV measurement (HRV-scan) or heart (HRV) biofeedback, the BioSign HRV technology used by doctors, psychologists, therapists, coaches and management trainers successfully.

HRV in the scanner provides know-how based on the experience of their predecessors fans and stress balls. The goal is a clearer focus of HRV scanner to the requirements of professionals.

HRV scanner is an HRV biofeedback system (3D- animated biofeedback, real-time spectral analysis - on-line spectrum) and a HRV measuring station (standard test of HRV, such as RSA test (paced breathing, Deep Breathing test), short-term HRV, Long-Term - and orthostatic test, long-term measurement).

In addition to the evaluation of automated quality assessment, extensive post-processing options are available. Meaningful diagrams and illustrations, as well as many parameters (standard values for key are stored) can be a quick and meaningful interpretation of the measurement results. Comprehensive reporting system creates easy to understand reports for therapist and Family.

For users who want to do research, there is a study in HRV scanner module that enables the collection and processing of the study data effectively and clearly. Export functions as an interface to external applications for further analytical reflection on data.

Biofeedback 2000x-pert (BFB)

Biofeedback 2000x-pert ist das innovative, kabellose Biofeedbacksystem von SCHUHFRIED. Es kann zur Entspannung, aber auch zur Rehabilitation und Diagnostik eingesetzt werden. Stellen Sie individuell die Module zusammen, die für Sie relevant sind.

Die wichtigsten Features von Biofeedback 2000x-pert:
- Anwenderfreundliche, einfach zu bedienende Software
- Modularer Aufbau von Software und Hardware
- Übertragung der Messwerte mit Funk-Technologie (Bluetooth), über kleine, leichte Funkmodule, die direkt am Körper getragen werden
- Vollständige Bewegungsfreiheit während der Messung
- Hochsensible Sensoren bei hoher Stabilität gegenüber Artefakten

Van Rijsselberge wins Olympic windsurfing gold

WEYMOUTH, England – His Olympic gold medal in windsurfing already guaranteed, all
Dutch Van Rijsselberge had to do was stay on
his board and fight the final two

He did much more than that, skiing across
the waves to finish first in the medal race and
claim his gold in style on Tuesday in windsurfing’s farewell to the Olympics.

After winning the race, the 9-foot 3 Van Rijsselberge, "he showed his head just before the
Olympics began, climbed on top of the mast as his board’s best sail, hanging onto the pole that
supports the weather vane, finished the “hang loose” sign with his right hand. A large Dutch flag
flew from the boat.

Van Rijsselberge was one of the first smiles. His head was too big that he sat out the sixth race.

"During our classes Gdv Camera is going to be at disposal of everybody. It has been created after 20 years of study from Prof Konstantin Korotkov and certified as a medical instrument in Russia and Belarus.

On the occasion of our training, we introduce special offer for using this technology and analysing participant’s energy field, biological health status and real condition after different tests.

The Gdv equipment allows:

1. to diagnosis the physics and psychological state.

Gdv bioelectrography provides early diagnosis of a lot of illnesses. Gdv has the potential to serve as an extremely powerful and comprehensive medical diagnostics tool, capable of showing malfunctions of the body before any physical symptoms become evident.

2. to monitor responses to treatments.

Gdv enables us to evaluare and quantify the response of any person to any treatment. A typical procedure involves recoding a person’s initial state and the state after the treatment. One will be able to see the changes of body system on a computer screen.

3. to quantitative evaluate of individual’s physiological stress level.

4. to estimate treatment effectiveness.

By recording the human state at some time intervals after a treatment has been applied (typically minutes or hours), it is possible to estimate if the treatment has a temporary or a systematic effect on the human state.

5. to compare therapies.

Gdv method of human state assessment enables comparing various therapies and estimating the best therapy for any given person/condition.

6. to test new treatments.

Since electrophotonic Gdv glow seems to reflect the state of human consciousness, rather than just the body, it is possible to estimate the effect of a new treatment BEFORE actually applying it.

7. to study person’s individual reaction to the influence of CAM (Complementary/Alternative Medicine).

(informational, energy, physical medicine): oriental techniques, light, sound, airmions, magnetic field, etc. You can also check the effects of subtle influences such as homeopathy, flower essences, essential oils and wave therapy, including allergic reactions, on individual’s energy.

8. to see the impact of spiritual sessions.

such as meditation, Reiki, pray, Yoga, emotional release, and many others on your physical wellbeing.

Two special Offers for you:

a) One test with Gdv Camera and print of result at a price of 100 euro
b) Pack of 2 test during the days of a training, when they want, at a special price of 130 euro
Biofeedback

Biofeedback ist wie der Blick in einen Spiegel - einen ganzheitlichen Spiegel des Körpers, des Geistes wie auch der Psyche! Durch die elektrische Aufzeichnung und Rückmeldung von psychophysiologischen Signalen können wir über uns selbst lernen, wie unser Körper reagiert, was unsere Gefühle und Reaktionen, den mentalen Zustand, Streß und Entspannung, Ebenen automatisch wie ein kleines Kind über das Feedback des Gleichgewichtsorgan ein Laufen lernt, so können wir über die Rückmeldungen des Biofeedbacktrainings lernen, unsere autonomen Körperreaktionen besser zu steuern sowie unsere emotionalen und psychischen Prozesse souverän zu kontrollieren. Zudem bietet uns das Biofeedback-Instrumentarium einer objektiven Messgrundlage die Möglichkeit einer effektiven Erfolgskontrolle auch im Hinblick auf andere Trainingssysteme und -methoden.

Stolen software, no validation, no verification,

There are 5 ways to enjoy the revolutionary SRC4U software.

1. SRC4U Premium Portable USB Stick
This is the most cost effective version of the SRC4U software. It is designed to be used for stress reduction, emotional balancing, and stress relief. Instead of just one at a time, you can run up to 10 at a time.

2. SRC4U Premium Plus Portable USB Stick
Includes the same amazing features of the Premium. The "Plus" is that it includes an automatic scheduler. That is 10 additional windows! That's a total of 50 windows. You can choose a window to run on specific days and times for up to 10 of the windows and it happens automatically! Set it and forget it.

3. SRC4U Premium Online Subscription
No USB stick. Additional windows may be purchased.

4. SRC4U Power Pack Portable USB Stick
With the Power Pack, you have access to all of the 5 products (SRC4U Basic, Sh-E-motion, and Body4You) and 5 E-motions. You may mix and match, any way you like for the best results. The Power Pack is the ultimate package.

5. SRC4U Basic Online Subscription
Our newest energetic software. E-motions are binary, no USB stick. Up to three windows may be purchased.

Body4You is the newest SRC4U product.

Click for 14 day FREE trial

Whether you are a fitness enthusiast, beginner or untrained, Body4You can enhance your current fitness level!

The ability to enhance the body's energetic flow and to remove energetic blockages (stagnation) can have a profound effect on the body.

Whether your exercise program involves the gym, the spa, running, climbing, whatever you do - even nothing at all, we believe that Body4You can enhance your results.

Body4You Qi Gong enhancing software can be purchased as a Portable USB stick or as an Online Subscription.

By purchasing the SRC4U Power Pack Portable USB stick, you may choose how many windows you desire to 14-E-motion!
Warning: This Software does not operate the SCIO/Indigo systems. It is Fraudulent, Criminal, Counterfeit and Dysfunctional.

Do Not purchase, report to the Police.

Resonant Field Imaging™

WHPRS Rating = 1
Some shaky science, no registration of claims, no studies, no validation

After years of research into the mechanics of bioenergy, ITEM successfully developed what we believe is the first \textbf{objective} bioenergy measurement and analysis system in the world - \textbf{Resonant Field Imaging™} (RFI™). Using this experimental process, you can easily monitor the auras of humans, animals, and even plants, as well as evaluate the energy fields of non-living objects, at 50% - 90% less than other "aura imaging" devices on the market. Doctors, chiropractors, psychologists, alternative therapists, and hobbyists all over the world are joining in this revolution to form an international network of RFI™ users. RFI™ is currently being used in 57 countries around the world.

With RFI™ Version 3.1 Software, you can use standard templates to show the human bioenergy field, or you can create your own template by importing a picture:

A Fraudulent confidence game
What are BioApps™ Frequency Patches?

BioApps work through Infrasonic technology. This is a non-transdermal and non-invasive technology. Each of the 60 different BioApps have their own combination of Bio Frequencies embedded in them. Each set of frequencies is developed to elicitate and activate a particular targeted system. Once applied to the body, the BioApps emit specific frequencies which communicate with, and enhance the body’s natural systems to restore, revitalize and rejuvenate itself.

Help awaken your body’s natural response with NO side effects by ordering from our extensive catalog today!

TheaRx or “Therapeutic Experiences” is a complimentary restoration patch system. The patch or “BioApps™” are made to rapidly promote and activate the necessary responses to optimize body and brain function, restore missing cell communication, and accelerate the body’s natural ability to heal itself faster.

Many health care providers from Medical Doctors, Acupuncturists, Naturopaths, Pharmacists, Chiropractors, Psychologists and Nutritionists are using Therapeutic BioApps™ in conjunction with the techniques and methods they already utilize, whether it’s medication, nutrition, physical therapy, massage or any modern method to alleviate health concerns.

The Bio App is a patch that is worn, on the left side of the body, for a period of 2-3 days and then replaced by a new one. There are currently over 40 different BioApps™ that have been developed to activate, energize and correct the body’s natural healing response for a number of conditions that have proven problematic in most people’s lives.

BioApps™ are designed to provide a therapeutic experience usually within 24 hours. The BioApps™ are made to give you 72 hours of beneficial energy to trigger the body to naturally work more effectively and with greater ease. Bio Apps are constructed from medical grade, non-irritating tape that is breathable, flexible, and works under the toughest conditions - even through swimming, jogging, sweating, and showering.

Advantages of Therapeutic BioApps™ patches:
- 72-hour Consistent Ongoing Benefit per Patch
- Easy to Remember to Change Patches Every 3 Days
- No Negative Side Effects
- Immediate Results
- Enhances Nutritional Supplements & Medications Effectiveness
- No Struggling to Swallow Pills or Other Tasting Liquids

We could find no Registration of Medical Claims, No Research, No Validation or Verification whatsoever WHPRS rating = 1
Eductor

The word 'Doctor' comes from the Latin word 'Eductor' which means 'to teach'.

Thomas Edison said that the doctor of the future will teach the patient how to live and how to eat, exercise and meditate.

The Eductor is a Biofeedback Teacher
